Subject: SSVEC is continueing work on the Sonoita-Elgin 69kV

000

Chairwoman Mayes and Commissioners,

Thank you so much for listening to us yesterday, since our co-op has not. We especially appreciate how you moved the meeting to Tucson so that we could all attend. The right decision was made when you ruled for more communication and a feasibility study.

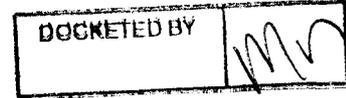

Today at 2pm I found the SSVEC subcontractor who is surveying and marking for the placement of the poles continuing to work on the 69kV line in the Babocomari easement. They were at my place last week and several months ago, so I recognized them immediately. Yesterday I left the meeting at noon, but I understand that SSVEC was told to cease activity on the line. I'm afraid SSVEC is ignoring your direction. I will be glad to provide more details if you need them, please call me if you wish.
