Subject: "Rittenhouse Residents Against Transmission Lines"

All,

I'm not happy about having to write this letter and surprised that high power tension lines are even being considered next to railroad tracks and a neighborhood! My father retired as a train engineer and I agree with Fred Wade (RRATL.org) on the hazards of putting trains and high power tension lines together. All it would take is one derailment to hit a high power tension line and thousands of humans killed! How irresponsible can you be in your process of thinking..... you are seriously putting thousands of people at risk!! Then there is always the issue of Re-sale value—ugh! I paid a lot of money for my home. Let me correct myself ---I paid a ton of money for my home.....long work hours, savings and you are going to destroy everything my family has worked for????????????? Let's not forget the facts that high power tension lines carry large amounts of electricity over long distances. Homes, schools, and playgrounds should not be built anywhere near them!!!You can't convince me high power tension lines are safe! I bet if I could turn on a Electro-Magnetic Frequency Meter and it would go off the chart!

Desired outcome! PUT THE HIGH POWER TENSION LINES GERMANN TO MERIDIAN!

Thank you for taking the time to read my email

Lorri Cordova

**Subject:** Resident against Transmission Lines

Ladies and gentlemen,

My name is Calvin O. Frye, my family and I live very near the Rittenhouse route where you proposed high tension power lines. Our property values have suffered enough, my house is worth less than half of what I paid...and if you run high tension power lines visible from my front door I doubt the property will ever recover its initial value. I know that my neighbors are all of the same opinion, we know this needs to be done but why to our Cortina community?

We and our neighbors are supporting the RRATL and we urge you, please, please have SRP use the Germann to Meridian route, where it affects the least number of homeowners...please don't dissect our community with high tension power lines! We can't afford to sell our home, we can't afford another home, and we cannot live under high tension power lines.

Thank you for your time and efforts.

Calvin O. Frye

**Subject:** Rittenhouse Power Lines

Good Morning,

I am contacting you all to express my DEEP concern for running the powerlines through the Rittenhouse route. Clearly, the safest route to run is through the Germann to Meridian route. A route that is much less populated, and therefore much safer to the general population. Along with the safety concerns, there is the fact that home values near large powerlines are negatively affected, further depressing the local economy. Please consider the Germann/Meridian route, as it is the best option, even if it costs a little more, it is ultimately the best option for the not only the local residents, but ultimately, the power company as well. Thank you for your time.
