RECEIVED

2010 FEB 12 P 2:10

ARIZONA CORPORATION COMMISSION
ENERGY EFFICIENCY

Feb 11, 2010

Commissioner Paul Newman
1200 W. Washington St.
Phoenix, AZ 85007

Dear Commissioner Newman,

I am writing to thank you for voting to move forward with a formal rule to promote an energy efficiency standard. This is a very important step for our state! I support a standard that will achieve at least 20 percent in energy savings by 2020, which will help save consumers money and reduce air pollution and water use.

Energy efficiency is the lowest cost of any resource. Plus, the less electricity we use, the less pollution we generate. This means fewer greenhouse gas emissions, fewer mercury emissions, and less pollution overall. It also means we use less water as most power-generation requires significant amounts of water.

Thank you again for supporting increased energy efficiency in our state!

Sincerely,

Mr. Donald G Begalke

I support a standard that will achieve at least 20 percent in energy savings by 2020, which will help save consumers money and reduce air pollution and water use.

Arizona is blessed with the highest solar flux density in the USA.

Enabling an energy efficiency standard may be the push necessary to make solar energy cost competitive, and establish a more stable economy.

Thank you again for supporting increased energy efficiency in our state!
