Re: Docket Numbers ~~E-01345A-08-0172~~, E-00000J-08-0314 and G-00000C-08-0314

Dear Corporation Commission members:

Please establish an energy efficiency requirement of at least 20% by 2020 as part of the APS rate case and Commission workshops currently being held. As a small business, we feel the pressure from high electricity bills, especially during these trying economic times, and although we do everything we personally can to keep our bills down, there's only so much that we can do.

Requiring the utilities to increase their energy efficiency measures will significantly benefit all of us in the long run. Straightforward requirements such as weatherization and more efficient light bulbs will go a long way toward reducing our electric footprint, and will help small business continue to maintain a cost-effective practice. Concrete practices such as clear, measurable yearly ramp-ups and benchmarks for energy efficiency – similar to the Corporation Commission's already successful Renewable Energy Standard – will help move us toward a more sustainable system.

We urge you to adopt these measures, as they will greatly improve our energy system and help small business. Although an energy efficiency requirement will most likely necessitate a slight rate increase, we are willing to pay this because we understand that an efficiency standard will reduce our overall electricity bill. Thank you very much for the work you've done on this matter, and for your continued support.

Sincerely,

Joe Lines

Re: Docket Numbers ~~E-01345A-08-0172~~, E-00000J-08-0314 and G-00000C-08-0314

Dear Corporation Commission members:

I am writing you as a utility customer and local business owner personally invested in increasing energy efficiency in Arizona. I am writing today to urge you to enact energy efficiency requirements as part of the current Commission workshops and APS rate case to ensure that all Arizonans get the maximum amount of energy we can for the money that we spend.

We currently use far more energy in our state than we need to, and as a result, collectively pay the price. Efficient energy saves money, is the lowest cost resource available, is safer for our environment and public health, and in general just makes sense. Many people recognize the benefits of efficient energy and do all they can to reduce their extraneous usage; however, there's only so much we all can personally do. It's up to the utility companies to help consumers save money on energy usage, and it's up to the Corporation Commission to enact an energy efficiency requirement to help consumers save that money.

Through adequate energy efficiency measures, we greatly reduce our overall energy usage and diminish stress on the grid. Although I like doing my part in regards to energy efficiency, I know that there is much more we could be collectively doing, and benefits that could be much more widely and significantly realized, by both those who utilize energy efficiency now and those who don't yet understand the benefits of such programs. As a local small business owner and utility customer, I feel the ever-increasing costs of energy, especially during these difficult financial times, and I need to save as much money as I can in order to weather this economic storm. That is why I am calling on the Arizona Corporation Commission to enact an adequate energy efficiency requirement to ease the burden on our environment, our public health, our grid and our wallets. Thank you.

Re: Docket Numbers ~~E-01345A-08-0172~~, E-00000J-08-0314 and G-00000C-08-0314

Dear members of the Arizona Corporation Commission,

As I'm sure you're aware, energy efficiency has played a small role in our state's energy mix, but its potential is significant. As a small business owner, I strongly support increasing Arizona's energy efficiency requirements as part of the Commission workshops on energy efficiency and the APS rate case.

There should be a standard in Arizona of at least 20% energy efficiency by 2020, and energy efficiency should be at the top of the energy resource list for benefiting customers and the economy. It is proven that energy efficiency is the lowest cost energy resource available (lower than conventional forms of generation), which can mean real savings for my business and others like it. As you know, any money a business can save keeps prices lower for customers and increases profitability, and these cost-saving measures are particularly important given the depressed nature of our current economy. The savings I will see on my energy bill as the result of energy efficiency measures has the ability to significantly cut costs for my business, which is why I urge you to advance energy efficiency in Arizona.

Although such measures may result in higher rates, these will be offset by lower energy bills overall. I urge you to enact an energy efficiency requirement of at least 20% energy efficiency by 2020 for Arizona. Thank you for your support.

Sincerely,

Re: Docket Numbers ~~E-01345A-08-0172~~, E-00000J-08-0314 and G-00000C-08-0314

Dear Corporation Commission members:

Please enact an energy efficiency requirement of at least 20% by 2020 for Arizona's utilities as part of the current Commission workshops and ongoing APS rate case considerations. Our state needs a proper energy efficiency requirement to ensure that we consumers are not getting the short end of the energy stick.

I am a local small business owner, and as such I simply cannot afford to pay ever-increasing energy bills. With efficient energy, we can actually reduce energy costs over time, reducing the burden on our grid and more importantly, our wallets.

Along with a 20% efficient energy requirement should go annual evaluations to ensure that the utilities are constantly improving their output systems and moving toward a more sustainable system. If adopting a responsible commitment to efficient energy requires a slight initial rate increase, I am ok with this because I understand that energy efficiency will save me considerable amounts of money over time.

I urge you to enact a proper energy efficiency requirement, at least 20% by 2020. Arizona needs it.

Sincerely,

Re: Docket Numbers ~~E-01345A-08-0172~~, E-00000J-08-0314 and G-00000C-08-0314

Dear Corporation Commission members:

Please establish an energy efficiency requirement of at least 20% by 2020 as part of the APS rate case and Commission workshops currently being held. As a small business owner, I feel the pressure from high electricity bills, especially during these trying economic times, and although I do everything I personally can to keep my bills down, there's only so much that I can do myself.

Requiring the utilities to increase their energy efficiency measures will significantly benefit all of us in the long run. Straightforward requirements such as weatherization, energy efficient appliances, and more efficient light bulbs will go a long way toward reducing our electric footprint, and will help small business owners like me continue to maintain a cost-effective practice. Concrete practices such as clear, measurable yearly ramp-ups and benchmarks for energy efficiency – similar to the Corporation Commission's already successful Renewable Energy Standard – will help move us toward a more comprehensive sustainable strategy.

I urge you to adopt these measures, as they will greatly improve our energy system and help small business owners like myself. Although an energy efficiency requirement will most likely necessitate a slight rate increase, I am willing to pay this because I understand that an efficiency standard will reduce my overall electricity bill. Thank you very much for the work you've done on this matter, and for your continued support.

Re: Docket Numbers ~~E-01345A-08-0172~~, E-00000J-08-0314 and G-00000C-08-0314

Dear Corporation Commission members:

Please establish an energy efficiency requirement of at least 20% by 2020 as part of the APS rate case and Commission workshops currently being held. As the secretary/treasurer of a 501C(3) non-profit, I know of the problems businesses and individuals experience from high electricity bills, especially during these trying economic times. Although I do try to do everything I personally can to keep my bills down and work with others to do the same there's only so much we can do.

Requiring the utilities to increase their energy efficiency measures will significantly benefit all of us in the long run. Requirements such as weatherization, new types of windows and doors and more efficient light bulbs will go a long way toward reducing our electric footprint, and will help all of us to continue to maintain a cost-effective practice and ease our carbon footprint. Concrete practices such as clear, measurable yearly ramp-ups and benchmarks for energy efficiency – similar to the Corporation Commission's already successful Renewable Energy Standard – will help move us toward a more sustainable system.

I urge you to adopt these measures, as they will greatly improve our energy system and help small business owners and other consumers. Although an energy efficiency requirement will most likely necessitate a slight rate increase, the public I am sure are willing to pay this because we understand that an efficiency standard will reduce our overall electricity bills. Thank you very much for the work you've done on this matter, and for your continued support.

Re: Docket Numbers ~~E-01345A-08-0172~~, E-00000J-08-0314 and G-00000C-08-0314

Dear members of the Arizona Corporation Commission:

I am writing to encourage you to choose increasing energy efficiency requirements to at least 20% by 2020 as part of the APS rate case and as part of the Commission workshops on energy efficiency. As a business owner and utility customer, I would like to point out the positive impacts that such requirements will have on large and small businesses around the state.

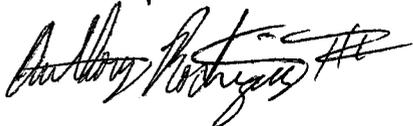

For many commercial buildings, the greatest energy savings come from efficiency improvements in air conditioning and lighting. The benefits of energy efficiency programs for a small business such as mine can be increased by installing multiple efficiency measures at one time. Incentive, education and support programs for technologies such as energy efficient lighting and air conditioners would help make it possible for my business to make the switch to more efficient technology, reducing my business' environmental footprint and allowing me savings on my electricity bill.

I understand that such requirements would most likely raise electricity rates; I am willing to pay slightly higher rates in order to lower electricity costs in the long run, and I know I am not alone in these sentiments. Thank you for all the work you've done so far regarding energy efficiency, and for your continuing support on this crucial issue.

Sincerely,

+

Re: Docket Numbers ~~E-01345A-08-0172~~, E-00000J-08-0314 and G-00000C-08-0314

Dear Commission Members:

I am writing as a small business owner to encourage you to increase energy efficiency requirements to at least 20% by 2020 as part of the APS rate case and the Commission workshops on this matter. Electric rates continue to rise and businesses need assistance in reducing our electric bills and managing our energy usage.

One of the most effective energy cost management tools is energy efficiency. If the utilities offer programs to assist businesses in increasing energy efficiency in their workplaces through rebates and technical assistance to those that purchase energy efficient lighting, air conditioners, and other equipment, we can maximize our efficiency potential.

I understand that these measures may cause slightly higher rates, but am willing to pay these because they will mean a less expensive bill overall. Please consider increasing energy efficiency requirements to at least 20% by 2020, and thank you for your support in the matter.

Dear members of the Arizona Corporation Commission,

Significantly investing in energy efficiency can lower our electric bills and protect public health and air quality.

As you consider increasing our rates now and in the future, please first adopt and implement an Energy Efficiency Standard of at least 20% by 2020.

Sincerely,
