Subject: Not in My Backyard - Variations Thereof

Dear Commission Member, et al.:

As a Sonoita property owner and resident, I have taken no small interest in SSVEC's nearly 20-year effort to perform needed upgrades to our highly stressed electrical grid. When I served on the Citizen's Committee some fifteen or so years ago the mantram then was that high tension electrical lines caused cancer and that SSVEC was out to kill us all. One Committee member suggested that candles and oil lanterns would be OK by her. Another suggested we would be better off with portable generators. Now, not that much has changed except that the claim our backyards are historic *is true* - each and every plot of land does have a history... John Bevan
