CLERK OF SUPERIOR COURT
DOCKET CONTROL

Dear Sir,

We support de-commissioning the Black Mountain Sewer Processing Plant located in the middle of our residential neighborhood. We recognize the value of de-commissioning this sewer Processing plant and if there is a cost, it would be modest. We believe it would be a wise investment for the future.

We live down the line from the treatment plant and every morning as we brush our teeth we are awakened by a nauseating odor of sewer fumes. I have tried everything with and without the help of our plumber to rid us of this disgusting morning ritual... even to the point of dismantling the sinks and totally cleaning out the line. Until this plant is removed or we leave this house, we appear to be stuck with it.

I have been to many third world countries and this bathroom odor is worse than any bathrooms I have stayed in.

Please consider this as you make your decision. We moved to Arizona to smell the wonderful desert air and listen to the wild life, not the constant movement of trucks to and from the plant.

Sincerely,

Virginia Pringle
