Subject: Comments on Proposal to Include Externalities

Commissioners:

I am a long-time follower of Electric Utility regulatory policy topics. I have just learned of the proposal in your Commission to include Externalities in your deliberations. This is to strongly endorse this proposal and to offer to answer questions about the process, the need for it, and the benefits that I am sure will follow its adoption.

Ronal W. Larson, PhD, Retired, Past-Chair, American Solar Energy Society (ASES) and former Principal Scientist at SERI (now NREL, the National Renewable Energy Laboratory)
