*****DOCKET NUMBER E-01461A-09-0450*****

Reference: Trico Electric Cooperative, Inc.

Under the current request Trico wants a reset date of March or April. This would mean that any excess energy I produce in winter could not be used during the summer months when I use the most electricity. At present, I have over two thousand kilowatt hours of electricity that I have send back to Trico. If the reset date is March or April, Trico will pay me for this, and any other power I generate prior to the reset date at the wholesale rate which is a fraction of what Trico charges me for energy.

With a reset date in October, energy I produce in November and December, (low usage months for me) could be used to offset power used July, August and September (high power usage months). Therefore, I would appreciate the Commission taking steps to have Trico chance their reset date to October. Thank you.
