Qwest 271

Gentlemen:

In case you haven't seen it, the URL below will take you to a Justice Department evaluation, issued earlier this month, on Qwest's Section 271 application for Minnesota. It strikes me that the situations are so alike that you could simply replace Minnesota with Arizona throughout the memo, except for some CLEC penetration numbers which are bound to be different. Justice concludes that the Section 252 violations in Minnesota are distinct from the 271 issues and recommends that the FCC approve the application without the concurrence of the Minnesota Commission. Just thought you might like to know.

Bill Meek
