**RE: The Community Power Project – Flagstaff Pilot**  
Docket No.: E-01345A-09-0227

Dear Arizona Corporation Commission:

Please accept my regrets as I am unable to attend today's hearing in person. City business requires my personal attention in Flagstaff. This Project is of great interest and importance to Flagstaff and our region. I am seeking your support and forward progress on this Project.

The City of Flagstaff strives to be a leader in community and regional sustainability. As such, we are continually looking for new opportunities to reduce energy consumption, promote renewable energy technologies and reduce the environmental, economic, and social impacts associated with traditional energy production. With that in mind, we are pleased to write this letter of support for the Community Power Project – Flagstaff Pilot

Renewable energy is an essential component of our region's sustainable energy future. The Community Power Project in the Flagstaff area will enable local residents to obtain energy from renewable resources with no upfront costs. Increasing the number of solar photovoltaic (PV) systems in our region will also help to increase the community's knowledge of such systems and encourage residents and businesses to pursue additional renewable energy projects.

The City of Flagstaff is committed to supporting and promoting the Community Power Project - - Flagstaff Pilot, as well as serving as a partner in facilitating solar PV installations at appropriate sites within City limits. We strongly encourage the Arizona Corporation Commission to support this proposal

Sincerely,

Sara Presler  
Mayor, City of Flagstaff
