Nature of Complaint:

Dockets # E-1575A-08-0328 & E-01575A-09-0453

There is no reason to change the commission's decision on SSVEC's Rate Application Rehearing and no urgency to institute a moratorium on new connections to the V-7 feeder line.

1. The initial decision to delay start of the line is still valid. The Independent Feasibility Study was not definitive in conclusions. There are alternatives to the construction of a new 69kV line and these alternatives should be investigated and discussed with the community.
2. The Independent Feasibility Study has shown that demand for power in this area has been decreasing in the last few years. With the current economy this trend is likely to continue.
3. Even if SSVEC started work on the line tomorrow, the line would not be functional until mid-next year at the earliest. This is past any 'peak' load periods. So waiting a few more months won't make any difference.

Many community members have been working long and hard to find feasible alternatives that will benefit both this community and SSVEC. Please do not change the decisions made previously and let this community work further to find a more cost effective, environmentally friendly solution to our power needs.

Sincerely,

Jeanne & Rob Horsmann

Sonoita
