Subject: Proposed APS Change in Solar Incentives

RECEIVED

2010 APR - 7 P 4: 04

Mr. Newman

ORIGINAL

AZ CORP COMMISSION
DOCKET CONTROL

I do not believe in a time of job creations and trying to move Arizona to a leader in Renewable Energy that APS request for a retroactive decrease in Solar Incentives can be viewed as a positive move. The attached request will stop many jobs that we are just now as an industry trying to finalize. I know my dealers assure me that this move will eliminate multiply proposal that we have spent months trying to assist home owners with financing the out of pocket investments. Banks in Arizona do not want to lend, appraiser are not following federal guide lines as outlined in The Appraisal Journal (More Evidence of Rational Market Values for Home Energy Efficiency).
http://www.aps.com/news/BreakingNews_137.html.

Most of us have already had to spend our own money to cross train into the Solar Business. I have brought CA Solar and there Chinese investors to GPEC to try and lure them to the Valley of the Sun and bring over 500 high paid jobs. I don't believe this change will make them think are very committed to the Solar business in the long term. SRP changes have already eliminated many clients from being able to afford to go with Solar.

We believe this legislation need to be turned down or the new jobs many of us have invested our life savings in will go down in vain. I urge you and all the Commissioners to reconsider this request.

Sincerely

James Lichtenwalter
