 Subject: APS Request to reduce solar rebates

47

Dear Commissioner,

Please receive this as a request for denial by the commission of the APS proposal for the retroactive reduction of rebates offered to residential customers who install photovoltaic systems. This technology makes so much sense for Arizona, this emerging industry should be put at the forefront and not put at risk. I understand that APS may need to make adjustments to its programs in the bigger picture of rates approved by the commission. However this hasty proposal by APS should be denied. The APS web site encouraged customers to make these plans and investments also all the recent home shows and the recent build it green expo had APS there to promote their rebates on solar energy.

My family saved up the money for solar so we would not have to finance and have interest payments on top of everything. WE would suffer financial harm if a retroactive reduction was approved.

Sincerely,  
 Joseph Harriot

Arizona Corporation Commission
