DELETE Finding of Fact No. 71

REPLACE with "AT&T has presented evidence that its proposal to have qualified technicians remove Qwest facilities from the NID when those facilities are not required to provide service to the end-user and the NID lacks capacity, can be performed safely and will not endanger Qwest facilities. If CLECs are not allowed to remove and cap such facilities using qualified personnel, the CLECs will incur unnecessary added expense. Therefore, we adopt Staff's recommended language and direct Qwest to revise its SGAT accordingly.
