MAYES PROPOSED AMENDMENT 1

TIME/DATE PREPARED: April 12, 2010

COMPANY: Arizona Public Service Company

AGENDA ITEM NO. 7

DOCKET NO. E-01345A-09-0338

OPEN MEETING DATE: 4-13-10

Page 5, line 2.5, INSERT NEW FINDING OF FACT:

“The Commission is concerned that the majority of the residential incentive funds paid by APS in the past year, totaling more than 90 percent of the residential incentive dollars, has gone to only one technology: photovoltaics. We are further concerned that other technologies such as solar water heating may be crowded-out of the funding through the current first-come first-served mechanism. This could jeopardize the survival of the solar thermal industry in Arizona. With this in mind, only for 2010 and only because of the current emergency, we direct APS to set aside \$900,000 of the remaining residential incentive funds for solar water hearing. The \$900,000 would be divided equally in each funding cycles. Any funds not allocated in the first or second cycle would be returned to the pool of residential incentives and could be used for any eligible residential technology. The \$900,000 amount is roughly equivalent to the 8 percent share of incentive funds that solar water heating systems have received in the past years.”

Page 6, line 2.5, INSERT NEW ORDERING PARAGRAPH:

“IT IS FURTHER ORDERED that the APS set aside \$900,000 of the remaining residential incentive funds for solar water hearing. The \$900,000 would be divided equally in each funding cycles. Any funds not allocated in the first or second cycle would be returned to the pool of residential incentives and could be used for any eligible residential technology.”

Make all conforming changes.
