I strongly oppose ANY rate increase for Sun City water and waste water.

Sun City has not grown above 40,000 residents in the last 40 years and there is NO construction for new homes in this area. No major improvements have been made in Sun City by Arizona-American Water. When AAW took over in Sun City they apparently did not do their home work and are now finding that with the addition of Agua Fria, Anthem, Tubac, Mohave, Havasu and Paradise Valley they need more revenue to support them. It is not Sun Cities responsibility to support other water districts with out getting some benefit. Our infrastructure has not changed, we've had no discernible improvements, and we probably don't use any more water today than we did 40 years ago.

What benefit does Sun City get from this consolidation? NONE. Each of the above mentioned water districts except Sun City has income producing families who can well afford a rate increase in their district to support them. Let them support their water and waste water needs on their own backs. Not on the backs of Sun City.

We should not be expected to subsidize other areas for their water and waste water. We would in effect be bailing out those other areas. If they need a bail out, let them go to the federal government, not the citizens of Sun City.

Vote NO for any rate increase for Sun City
