Subject: Opposition to the wet cooled hualapai solar plant  
To Whom it May Concern,

ORIGINAL

0000112967

47  
00

**I strongly oppose the construction of the Hualapai Solar Power Plant in our valley. I, and my family depend on the water in our aquifer to live, this plant could drain this vital water supply and I and the hundreds of families living out here would be doomed.**

**Solar energy has not proven to be a viable alternative to coal or natural gas. We have trillions of metric feet of natural gas and enough coal to last more than two hundred years, we only have so much water to sustain life. Go back to your drawing boards and come up with something we all can support.**

Respectfully,

Thomas R Dosey
