To: Pierce-Web  
Subject: Power Purchase Agreements are not electric utilities.

Commissioner Pierce,

Power Purchase Agreements are not electric utilities.

Businesses that provide Power Purchase Agreements or Solar Service Agreements should not be regulated under the ACC like they were electric utilities because they are not electric utilities. They are not a giant electric company with a monopoly on supplying power to public. They are an alternative to a monopoly electric utility. They include small local businesses .

Isn't it your job to protect the consumer from exploitation by the electric monopolies? Allowing competition benefits the consumer. Distributed generation of power has many benefits compared to a centralized power source.

Have you considered the difficulties regulating PPA's? Have you considered all the negative consequences of restricting PPA's? Please support free markets.

Sincerely,

Norman Soifer
