Dear Commissioner,

Thank you for coming to Kingman yesterday and joining with Commissioner Pierce in hearing from the customers of Truxton Canyon Water Co.

I do not need to repeat the complaints of yesterday. My wife and I are encouraged to hear that the **"Order to Show Cause" is being pursued.**

The Neal Family has a long history in our area. The earlier generations were 'pioneers' and benefactors to Mohave County. The younger generations now in charge seem calloused and indifferent to being good stewards of their **'Certificate' and right to deliver a needed service to our citizens.**

We are not privileged to see their 'books' but it is obvious that they have been willfully fleecing their businesses and putting nothing into 'reserves' or capital improvements, thus poor and unsafe delivery of water.

**The Claude K. Neal Trust is a shrewd safe-haven for them since it has escaped for years being brought to justice for its failure to provide the services their ancillary water companies are required to do by law. It is time for the ACC to intervene and provide management oversight upon the Neals. Please, no more delays and extensions. It is a 'game' they play too well.**

Respectfully,

William & Mary Meehan
