Re: North Valley 230Kv Facility Sitting project

L-00000D-02-0120

This letter is in response to the future installment of APS 230KV power lines on the west side frontage road of I-17 and happy valley road.

Upon hearing of the installment of these lines, I could not beleive it. We were going to purchase a home on the west side but the house was near similiar ugly power lines and we decided against it. We bought a home at I-17 and Dynamite, above Happy Valley, and was very happy with the choice that we made. We bought it as a good investment and feel we made a good decision. We are dead-set against any installment of power lines on the West side of the road as they are very unpleasing to the eye, and all of our home resale values will go down as well. I was sick to my stomach when I heard the news. I am unfamiliar with the safety aspect of it, so I can't comment on that.

Please, Please, we ask that you help in the prevention of the power lines on the west side of the frontage road. If it has to be, we would much rather see it on the sparsely populated EAST side of I-17.

Thank you for listening.
