To the Corporation Commissioners and Administrative Law Judge,

I support rate consolidation for Arizona-American Water (AAW). The consolidated rates proposed by the Company meet with my hearty approval.

I believe I represent at least one hundred others who may not take their valuable time to write a letter such as this to support rate consolidation. We want to support, in every way possible, policy changes which reflect responsible stewardship of dwindling fresh water resources.

The proposed rate consolidation for all 8 water districts is a move in the right direction towards making decisions about how water is distributed and paid for according to the very real limitations of a community in the desert. We need policies which emphasize and reward water conservation. We need policies which insure that everyone has sufficient water for their needs, regardless of income. We need to have the humanity to accept policies which put the economic burden more on those who can afford it so that everyone in our community has sufficient water. Privatized water is a travesty when people are refused water for lack of funds.

We need to view water usage in terms of what is best for the entire watershed, not what is best for self-serving geo-political sectors and agendas that have nothing to do with maintaining a sustainable yield in our local water cycles.

Reference Docket Numbers W-01303A-09-0343 and WS-01303A-09-0343

To the Corporation Commissioners and Administrative Law Judge,

I support rate consolidation for Arizona-American Water (AAW). The consolidated rates proposed by the Company meet with my hearty approval.

I believe I represent at least one hundred others who may not take their valuable time to write a letter such as this to support rate consolidation. We want to support, in every way possible, policy changes which reflect responsible stewardship of dwindling fresh water resources.

The proposed rate consolidation for all 8 water districts is a move in the right direction towards making decisions about how water is distributed and paid for according to the very real limitations of a community in the desert. We need policies which emphasize and reward water conservation. We need policies which insure that everyone has sufficient water for their needs, regardless of income. We need to have the humanity to accept policies which put the economic burden more on those who can afford it so that everyone in our community has sufficient water. Privatized water is a travesty when people are refused water for lack of funds.

We need to view water usage in terms of what is best for the entire watershed, not what is best for self-serving geo-political sectors and agendas that have nothing to do with maintaining a sustainable yield in our local water cycles.

I support rate consolidation for Arizona-American Water (AAW). The consolidated rates proposed by the Company meet with my hearty approval.

I believe I represent at least one hundred others who may not take their valuable time to write a letter such as this to support rate consolidation. We want to support, in every way possible, policy changes which reflect responsible stewardship of dwindling fresh water resources.

The proposed rate consolidation for all 8 water districts is a move in the right direction towards making decisions about how water is distributed and paid for according to the very real limitations of a community in the desert. We need policies which emphasize and reward water conservation. We need policies which insure that everyone has sufficient water for their needs, regardless of income. We need to have the humanity to accept policies which put the economic burden more on those who can afford it so that everyone in our community has sufficient water. Privatized water is a travesty when people are refused water for lack of funds.

We need to view water usage in terms of what is best for the entire watershed, not what is best for self-serving geo-political sectors and agendas that have nothing to do with maintaining a sustainable yield in our local water cycles.

I support rate consolidation for Arizona-American Water (AAW). The consolidated rates proposed by the Company meet with my hearty approval.

I believe I represent at least one hundred others who may not take their valuable time to write a letter such as this to support rate consolidation. We want to support, in every way possible, policy changes which reflect responsible stewardship of dwindling fresh water resources.

The proposed rate consolidation for all 8 water districts is a move in the right direction towards making decisions about how water is distributed and paid for according to the very real limitations of a community in the desert. We need policies which emphasize and reward water conservation. We need policies which insure that everyone has sufficient water for their needs, regardless of income. We need to have the humanity to accept policies which put the economic burden more on those who can afford it so that everyone in our community has sufficient water. Privatized water is a travesty when people are refused water for lack of funds.

We need to view water usage in terms of what is best for the entire watershed, not what is best for self-serving geo-political sectors and agendas that have nothing to do with maintaining a sustainable yield in our local water cycles.

A handwritten signature in black ink that reads "Pam McKelly". The signature is fluid and cursive, with a large loop at the end of the name.
