October 13, 2010

Dear Commissioner, Kristin Mayes

I am writing you this letter in support of the Hualapai Valley Solar project in Mohave County.

Hualapai Valley Solar has been in our community for the last 2 years building trust and educating the community about their project. They Co-Sponsored a Green Energy Job Fair introducing the local contractors to the expected E.P.C Contractor.

I am a forth generation Mohave County resident and a Business owner. I am a prominent person in our community and would not support this project if I thought it would hurt Mohave County in any way. I believe this project would be a positive move in the right direction for the community of Mohave County, being this project is a Green Project and would be using the effluent waste water from the City of Kingman's North Sewer Plant I feel this project would benefit Mohave County not to mention the Job's it will bring to Northern AZ.

In closing I ask that you please VOTE to support the Hualapa Valley Solar project, I feel it will benefit not only Mohave County but our entire State of Arizona.

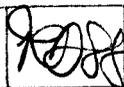

Thank You for your time

Keith Walker
