Re: System water plan review

Dear Water Provider:

The Arizona Department of Water Resources (ADWR) has completed its review of your system water plan and has determined that your plan meets the objectives set forth in *Arizona Revised Statutes* § 45-342.

Please note that ADWR bases its compliance determination on the basic outline of system water plan requirements provided in statute. It is the water provider's responsibility to make sure the plan is realistic, practical, and technically sound for the water system and the community. The goal of the system water plan should be to reduce drought vulnerability through a strong water supply plan and conservation component, as well as ensure that the system is prepared to respond to a drought emergency.

System water plans should be implemented and evaluated prior to the next submittal so that appropriate revisions and improvements can be made. Updates are due to ADWR every five years. **To assist you with future submittals, we have included a list of important points to consider on the back of this page.** Note that these guidelines and recommendations are not specific to your plan, but are general recommendations based on components that were commonly not given sufficient consideration. For further assistance, you can also view several plans chosen as good "models" to consider at www.azwater.gov/dwr/drought/cws.html, as well as a fact sheet on conservation and drought planning.

Your system water plan update will be due to ADWR by January 2, 2013. (Note that if you choose to make changes to your plan before this time, your plan must be submitted within 60 days of the time the revisions are made.) If you have any specific questions about your system water plan or ADWR's review, please contact me at (602) 771-8533 or by e-mail at ecws@azwater.gov.

Sincerely,

Susan Craig, Manager
ADWR Community Water Planning
