To the Board of Supervisors:

I am a Tierra Linda Nueva resident who requests that your board please consider a 90 day moratorium on this project so that tep/frv can reach a resolution on all issues with the affected parties.

I believe that tep/frv has failed miserably in informing and communicating with us and addressing our issues and responding to them. My home was one of the very few that received any type of notice and I and our neighbors had to share it with the rest of our community in Tierra Linda so that they would be informed. I do believe that there are others who still may not be aware of what is being proposed.

I do not feel that tep/frv have made any concessions to their potential neighbors as to how awful their chain link and barred wire fence may look. I truly believe that unless a block wall is constructed to hide this solar field that our property values will diminish. The current market has been bad enough to all property owners.

I would also add that I have concerns with the potential failure to maintain the landscaping and do not believe that the proposed designs for such is adequate for screening. It sounded to me that tep/frv where just planning on allowing natural to take its course once planting was placed.

Our neighborhood is trying it's best to maintain the upscale living that we as homeowner's bought into when we moved here. I know that if I were to buy my home now with all this going on I would not chose to live in Tierra Linda because of how tep/frv are planning this project.

Thank you for your time,

Brain Baader
