The Project involves the construction of a new 345/69/21kV substation and an interconnection with the existing eastern Cholla to Pinnacle Peak 345kV line that consists of two new 345kV transmission lines. The two 345kV transmission lines would interconnect in and out of the new substation, each approximately 600 feet in length. The Project is completely located on United States Forest Service (USFS) land, and an Environmental Assessment was prepared to fulfill requirements of the National Environmental Policy Act. The USFS issued a Finding of No Significant Impact for the Project in August 2010. The Applicant is requesting a 400 foot corridor for the interconnection.
