Re: Docket No. L-00000HH-08-0422-00141, Decision No. 70636

Dear Sir/Madam:

Pursuant to Condition No. 4 of the Certificate of Environmental Compatibility (CEC) for the TransCanada Coolidge Generating Station, Decision No. 70636 (December 11, 2008), the Salt River Project (SRP) affirms that SRP has completed or is near completion of all required transmission system upgrades and that Coolidge Power LLC has satisfied all requirements of SRP to interconnect the Project with the SRP switchyard and transmission system.

A detailed list of the transmission system upgrades and interconnection requirements is provided below and includes the actual/expected in-service dates. The planned energization dates may change slightly due to a recent request from Coolidge Power LLC to delay energization of the transmission upgrades to accommodate some testing of the generator units. SRP commits to completing all transmission system upgrades prior to the commercial operation of the Coolidge Generating Station, currently anticipated for May 1, 2011.
