IN THE MATTER OF THE
APPLICATION OF WICKENBURG
RANCH WASTEWATER, AN ARIZONA
LIMITED LIABILITY COMPANY, FOR A
CERTIFICATE OF CONVENIENCE AND
NECESSITY TO PROVIDE
WASTEWATER SERVICE IN YAVAPAI
COUNTY

Docket No. _____

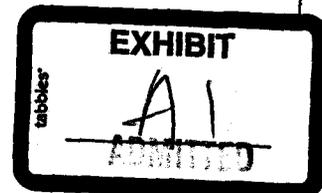

APPLICATION FOR A
CERTIFICATE OF CONVENIENCE
AND NECESSITY

Applicant Wickenburg Ranch Wastewater, LLC (Company) submits the following
in support of this Application.

PRELIMINARY STATEMENT

Company is seeking to provide wastewater utility service to customers in Yavapai
County, Arizona. Company currently serves no customers and has no operating plant.
The proposed development to be served by Company is owned by Vanwick, LLC, Van
Development Co., Inc., 5860 Development Inc., and JVT Investors, LLC (collectively
referred to as Developer).¹ Developer is building a 2,162-acre master planned
community consisting of 1,724 single-family home lots, 600 multi-family units (2,324
housing units total), and commercial units known as Wickenburg Ranch. The Developer
owns all of the land within the proposed Company service area and wants Company to
provide wastewater service. Therefore, Company is seeking approval of this Application

¹ The exception is the parcel dedicated to Arizona Public Service Company for construction of a substation.

1 to enable it to provide wastewater service to Wickenburg Ranch within the area described
2 in Exhibit 1 and mapped in Exhibit 2.

3 **APPLICATION DETAILS**

4 The Company is filing this Application, and consistent with the Commission's
5 rules, is providing the following corporate and management details, development
6 information, and financial projections:

7 A. The name, address and telephone number of the Applicant (Company) is:

8 **Wickenburg Ranch Wastewater, LLC**
9 **Attention: The M3 Companies**
10 **4222 E. Camelback Road**
11 **Suite H100**
12 **Phoenix, Arizona 85018**
13 **602-386-1307**

14 B. If doing business (d.b.a.) under a name other than the Applicant (Company) name
15 listed above, specify:

16 **N/A**

17 C. List the full name, address and telephone number of the management contact:

18 **William I. Brownlee**
19 **Manager, The M3 Companies LLC**
20 **4222 E. Camelback Road**
21 **Suite H100**
22 **Phoenix, Arizona 85018**
23 **602-386-1307**

24 D. List the full name, address and telephone number of the attorney for the Applicant:

25 **Steve Wene**
26 **Moyes Sellers & Sims Law Offices**
27 **1850 North Central Avenue, Suite 1100**
28 **Phoenix, Arizona 85004**
602-604-2189

E. List the full name, address and telephone number of the operator certified by the
Arizona Department of Environmental Quality:

1 Peter Chan, PE – Certified Operator, No. 26138
 2 Project Manager – GDH Inc.
 3 7600 N. 16th Street, Suite 205
 4 Phoenix, AZ 85020
 (602) 216-7200

5 F: List the full name, address and telephone number of the on-site manager of the
 6 utility:

7 Peter Chan, PE – Certified Operator, No. 26138
 8 Project Manager – GDH Inc.
 9 7600 N. 16th Street, Suite 205
 10 Phoenix, AZ 85020
 (602) 216-7200

11 G: The Applicant is a:

<input type="checkbox"/> Corporation: <input type="checkbox"/> "C", <input type="checkbox"/> "S", <input type="checkbox"/> Non-Profit <input type="checkbox"/> Arizona, <input type="checkbox"/> Foreign	<input type="checkbox"/> Partnership <input type="checkbox"/> Limited, <input type="checkbox"/> General <input type="checkbox"/> Arizona, <input type="checkbox"/> Foreign
<input type="checkbox"/> Sole Proprietorship	<input checked="" type="checkbox"/> Limited Liability Co, (LLC)
<input type="checkbox"/> Other (Specify)

 15
 16
 17
 18
 19
 20
 21 H. If Applicant is a corporation: N/A

22 1. List of names of Officers and Directors:

23 Officers N/A Directors N/A

24
 25 2. Attach a copy of the corporation's "Certificate of Good Standing" issued by
 26 the Corporation's Division of the Arizona Corporation Commission. N/A

27 3. Attach a copy of the Articles of Incorporation. N/A

28 4. Attach a copy of the corporation's By-Laws. N/A

1 5. If a for-profit corporation, indicate the number of shares of stock authorized
2 for issue: N/A

3 6. If stock has been issued, indicate the number of shares issued and date of
4 issue: N/A

5 H. If the Applicant is a partnership: N/A

6 1. List the names of the general partners: N/A

7
8 2. List the name, address and telephone number of the manager partners:
9 N/A

10 3. Attach a copy of the Partnership's Articles of Partnership. N/A

- 11 • If the Applicant is a foreign limited partnership, provide a copy of
12 the Partnership's "Certificate of Registration" filed with the Arizona
13 Secretary of State. N/A

14 I. If the Applicant is a Limited Liability Company:

15 1. List the full name and mailing address of all the Applicant's managers or, if
16 management is reserved to the members, the Applicant's members:

17 **The Company is managed by VANWICK LLC. Larry Van Tuyl is the**
18 **sole member of VANWICK LLC. The mailing address of 1550 East**
19 **Missouri, Ste. 300, Phoenix, AZ 85014.**

20 2. Attach a copy of the Articles of Organization.

21 **See Exhibit 3.**

22 J. List the legal name and mailing address of each other utility in which the applicant
23 has an ownership interest:

24 **None.**

25 K. Attach a description of the requested service area, expressed in terms of
26 **CADASTRAL** (quarter section description) or **Metes and Bounds** survey.
27 References to parcels and docket numbers will not be accepted.

28 **See Exhibit 1.**

1 L. Attach a detailed map using the form provided as Attachment "B". Shade and
2 outline the area requested. Also, indicate any other utility within the general area
3 using different colors.

4 **See Exhibit 2.**

5 M. List the name of each county in which the requested service area is located and a
6 description of the area's location in relation to the closest municipality, which
7 shall be named:

8 **The requested service area is located within Yavapai County. The closest
9 municipality is the Town of Wickenburg, which is approximately 5 miles
10 south of the requested service area.**

11 N. Attach a complete description of the facilities proposed to be constructed,
12 including a preliminary engineering report with specifications in sufficient detail
13 to describe each water system and the principal components of each water system
14 (e.g., source, storage, transmission lines, distribution lines, etc.) to allow
15 verification of the estimated costs provided under subsection (B)(5)(o) and
16 verification that the requirements of the Commission and the Arizona Department
17 of Environmental Quality can be met.

18 **See Exhibit 4.**

19 O. Provide the estimated total construction cost of the proposed offsite and onsite
20 facilities, including documentation to support the estimates, and an explanation of
21 how the construction will be financed, such as through debt, equity, advances in
22 aid of construction, contributions in aid of construction, or a combination thereof.

23 **The Company proposes the maintenance of a capital structure that includes a
24 minimum of 70% equity and no more than 30% combined advances-in-aid-
25 of-construction and contributions-in-aid-of-construction. The full build-out
26 cost estimate is \$11,228,886. See Exhibit 5.**

27 P. Explain the method of financing utility facilities. Refer to the instructions, item
28 no. 7. (Use additional sheets if necessary):

**The homebuilders and commercial developers purchasing the development
lots will be required to construct the collection system within the subdivisions
they are developing. The Company will utilize the capital structure in
paragraph "O" above to build the treatment plant and backbone
infrastructure, which includes main transmission lines, lift stations,
manholes and other similar equipment.**

1 Q. Attach financial information in a format similar to Attachment "C". Include
2 current assets and liabilities, an income statement, estimated revenue and expenses
3 and the estimated value of the applicant's utility plant in service for the first five
4 years following approval of the application.

5 **See Exhibit 6.**

6 R. Provide a detailed description of the proposed construction timeline for facilities
7 with estimated starting and completion dates and, if construction is to be phased, a
8 description of each separate phase of construction.

9 **The Company projects that construction of the wastewater treatment
10 facility (WWTF) will consist of three phases, beginning with an initial phase
11 of 100,000 gpd with expansion areas provided for two additional 315,000 gpd
12 trains to serve the Wickenburg Ranch Development. The initial phase will
13 consist of an extended aeration package plant with bar screen; influent pump
14 station with pumping equipment; headworks to consist of flow metering and
15 screening; toxic and aeration chambers; aeration supplied using positive
16 displacement blowers; clarifier; filtration and UV disinfection; MCC and
17 electrical system; and reuse system. The second and third phases will switch
18 to a MBR process with fine screens, membrane bioreactor and chlorine
19 disinfection. The sewer collection system will be phased in as the residential
20 and commercial properties are constructed.**

21 **Consistent with improvements described above, the Company projects that
22 construction of the first phase will commence in the third quarter of 2011 and
23 will be completed in the second quarter of 2012. Further, it is anticipated
24 that construction of the second phase will commence in the third quarter of
25 2012 and will be completed in the second quarter of 2013. The Company also
26 projects that the third phase will commence in the first quarter of 2019 and
27 will be completed in the third quarter of 2019.**

28 S. Provide a copy of any requests for service from persons who own land within the
proposed service area or extension area, which shall indentify the applicant by
name.

**The Developer requesting service owns the entire area except the site
dedicated to Arizona Public Service Company for a substation site.**

T. Provide maps of the proposed service area indentifying:

1. The boundaries of the area, with the total acreage noted;

- 1 2. The land ownership boundaries within the area, with the acreage of each
2 separately owned parcel within the area noted;
- 3 3. The owner of each parcel within the area;
- 4 4. Any municipality corporate limits that overlap with or are within five miles of
5 the area;
- 6 5. The service area of any public service corporation, municipality, or district
7 currently providing water or wastewater service within one mile of the area, with
8 identification of the entity providing service and each type of service being
9 provided;
- 10 6. The location within the area of any known water service connections that are
11 already being provided service by the applicant;
- 12 7. The location of all proposed developments within the area;
- 13 8. The proposed location of each water system and the principal; and
- 14 9. The location of all parcels for which a copy of a request for service has been
15 submitted.

16 **See Exhibit 2.**

17 U. Provide a copy of each notice to be sent, as required, to a municipal manager or
18 administrator.

19 **See Exhibit 7.**

20 V. Provide copy of each notice sent, as required, to a landowner not requesting
21 service.

22 **See Exhibit 8.**

23 W. For each landowner not requesting service, provide either the written response
24 received from the landowner or, if no written response was received, a description
25 of the actions by the applicant to obtain a written response.

26 N/A

1 X. Attach proposed Tariffs using either the water or sewer format of Attachment "D"
2 unless the Utilities Division, prior to the filing of this application, approves
3 another form.

4 **See Exhibit 9.**

5 Y. Attach the following permits:

6
7 1. The franchise from either the City or County for the area requested.

8 **Yavapai County does not require a franchise for Wickenburg Ranch.**
9 **See Exhibit 10.**

10 2. The Arizona Department of Environmental Quality (or its designee's)
11 approval to construct facilities.

12 **See Exhibit 11 for Yavapai County Construction Authorization for sewer**
13 **lines. Approval to Construct treatment facility will be filed upon receipt.**

14 3. The Arizona State Land Department approval. (If you are including any
15 State Land in your requested area this approval is needed.)

16 N/A

17 4. Any U.S. Forest Service approval. (If you are including any U.S. Forest
18 Service land in your requested area this approval is needed.)

19 N/A

20 Z. Indicate the estimated number of customers, by class, to be served in each of the
21 first five years of operation. Include documentation to support the estimates.

22 **Residential:**

23
24 First Year 190 Second Year 430 Third Year 720 Fourth Year 1,085 Fifth Year
25 1,487 (includes RV Park estimates)

26 **Commercial:**

27 First Year 3 Second Year 4 Third Year 5 Fourth Year 6 Fifth Year 7

28 **Industrial:**

1
2 First Year ___ Second Year ___ Third Year ___ Fourth Year ___ Fifth Year ___

3 **Irrigation: (effluent purchasers)**

4 First Year 2 Second Year 2 Third Year 2 Fourth Year 2 Fifth Year 2

5 AA. Indicate the projected annual water consumption or sewerage treatment, in gallons,
6 for each of the customer classes for each of the first five years of operation:

7 **Residential:**

8
9 First Year 7,573,750 Second Year 25,002,500 Third Year 46,993,750

10 Fourth Year 74,688,125 Fifth Year 107,492,500

11 **Commercial:**

12
13 First Year 740,950 Second Year 9,865,950 Third Year 9,938,950

14 Fourth Year 12,128,950 Fifth Year 23,078,950

15 **Industrial:**

16
17 First Year ___ Second Year ___ Third Year ___ Fourth Year ___ Fifth Year ___

18 **Irrigation:**

19
20 First Year ___ Second Year ___ Third Year ___ Fourth Year ___ Fifth Year ___

21 BB. Indicate the total estimated annual operating revenue for each of the first five
22 years of operation:

23 **Residential:**

24 First Year \$100,552 Second Year \$328,505 Third Year \$610,157

25 Fourth Year \$958,931 Fifth Year \$1,367,848

26 **Include RV:**

27 **Commercial:**

28 First Year \$4,758 Second Year \$11,103 Third Year \$14,275

1 Fourth Year \$17,448 Fifth Year \$20,620

2 **Industrial:**

3
4 First Year ___ Second Year ___ Third Year ___ Fourth Year ___ Fifth Year ___

5 **Irrigation:**

6 First Year \$6,436 Second Year \$26,988 Third Year \$44,066
7 Fourth Year \$67,196 Fifth Year \$101,062

8
9 CC. Indicate the total estimated annual operating expenses for each of the first five
10 years of operation:

11 **Combined:**

12 First Year \$168,397 Second Year \$428,483 Third Year \$642,036
13 Fourth Year \$753,199 Fifth Year \$883,911

14 **Residential:**

15 First Year ___ Second Year ___ Third Year ___ Fourth Year ___ Fifth Year ___

16 **Commercial:**

17
18 First Year ___ Second Year ___ Third Year ___ Fourth Year ___ Fifth Year ___

19 **Industrial:**

20 First Year ___ Second Year ___ Third Year ___ Fourth Year ___ Fifth Year ___

21 **Irrigation:**

22
23 First Year ___ Second Year ___ Third Year ___ Fourth Year ___ Fifth Year ___

24
25 DD. Attach an itemized list of the major components of the water or sewer system (see
26 Attachment C-3).

27 **See Exhibit 5.**

28 EE. Indicate the total estimated cost to construct utility facilities.

1 **\$11,228,886.35.**

2
3 FF. Provide a description of how wastewater service is to be provided in the proposed
4 service area or extension area and the name of each wastewater service provider
5 for the area, if any.

6 **See Exhibit 4.**

7 GG. Provide a letter from each wastewater service provider identified under subsection
8 (B)(5)(aa), confirming the provision of wastewater service for the proposed
9 service area or extension area.

10 N/A

11 HH. Provide plans for or a description of water conservation measures to be
12 implemented in the proposed service area or extension area:

13 **The Company will provide reclaimed water to irrigate turf-related facilities
14 and landscaped common areas.**

15 II. Provide a backflow prevention tariff that complies with Commission standards, if
16 not already on file.

17 N/A

18 JJ. Provide a curtailment tariff that complies with Commission standards, if not
19 already on file.

20 N/A

21 KK. Provide a copy of a Physical Availability Determination, Analysis of Adequate
22 Water Supply, or Analysis of Assured Water Supply issued by the Arizona
23 Department of Water Resources for the proposed service area or extension area or,
24 if not yet obtained, the status of the application for such approval;

25 **See Exhibit 12.**

26 **REQUEST FOR APPROVAL**

27 As set forth in this Application, the Company requests that the Commission
28 authorize it to provide wastewater service in the area described herein.

1 DATED this 16th day of November, 2010.

Wickenburg Ranch Wastewater, LLC
Service Area Legal Description
Parcel No 1

All that portion of Sections 7, 8, 17 and 18, Township 8 North, Range 5 West of the Gila and Salt River Base and Meridian, Yavapai County, Arizona, more particularly described as follows:

BEGINNING at the Northeast Corner of said Section 7, point also being the Northwest corner of said Section 8;
Thence North 89 degrees 58 minutes 15 seconds East, 639.21 feet along the North line of said Section 8;
Thence South 17 degrees 27 minutes 50 seconds East, 913.00 feet;
Thence South 20 degrees 28 minutes 12 seconds East, 802.26 feet;
Thence South 39 degrees 20 minutes 49 seconds East, 1119.67 feet;
Thence South 17 degrees 52 minutes 53 seconds East, 402.20 feet;
Thence South 12 degrees 51 minutes 26 seconds West, 249.52 feet;
Thence South 01 degrees 07 minutes 38 seconds West, 411.79 feet;
Thence South 23 degrees 07 minutes 02 seconds East, 236.98 feet;
Thence South 38 degrees 58 minutes 00 seconds East, 329.01 feet;
Thence South 54 degrees 59 minutes 00 seconds East, 1101.16 feet;
Thence South 13 degrees 43 minutes 16 seconds West, 1068.17 feet to a point from which the South Quarter corner of said Section 8 bears North 34 degrees 30 minutes 42 seconds West, 471.28 feet;
Thence North 85 degrees 04 minutes 37 seconds West, 417.23 feet;
Thence North 74 degrees 12 minutes 30 seconds West, 384.82 feet;
Thence North 85 degrees 59 minutes 26 seconds West, 252.71 feet;
Thence South 87 degrees 41 minutes 42 seconds West, 678.82 feet;
Thence North 78 degrees 08 minutes 06 seconds West, 799.05 feet;
Thence North 69 degrees 14 minutes 01 seconds West, 601.69 feet to a point from which the corner common to said Sections 7, 8, 17 and 18, bears South 50 degrees 33 minutes 43 seconds East, 192.62 feet;
Thence South 06 degrees 07 minutes 06 seconds West, 642.74 feet;
Thence South 23 degrees 44 minutes 04 seconds East, 565.53 feet;
Thence South 05 degrees 31 minutes 57 seconds West, 817.18 feet;
Thence South 11 degrees 54 minutes 27 seconds West, 1042.85 feet;
Thence South 74 degrees 13 minutes 56 seconds West, 437.84 feet;
Thence South 82 degrees 21 minutes 15 seconds West, 62.17 feet;
Thence North 78 degrees 05 minutes 33 seconds West, 964.58 feet to a point on the East right-of way of United States Highway 89;
Thence North 10 degrees 49 minutes 30 seconds West, 7191.87 feet along the said East right-of-way to a point on a tangent curve concave to the West and having a radius of 11,510.00 feet and a center point which bears South 79 degrees 06 minutes 51 seconds West;

Thence continuing along said curve through a central angle of 02 degrees 43 minutes 45 seconds and an arc length of 548.27 feet;
Thence North 13 degrees 31 minutes 56 seconds West, 496.30 feet along the East right-of-way to a point on the North line of said Section 7;
Thence South 89 degrees 59 minutes 56 seconds East, 925.02 feet along the said North line to the North Quarter corner of said Section 7;
Thence South 89 degrees 56 minutes 00 seconds East, 2368.78 feet to the Northeast corner of said Section 7 and the POINT OF BEGINNING.

EXCEPTING there from that portion of the Southeast quarter of the Northwest (SE ¼, NW ¼) of Section 7, Township 8 North, Range 5 West of the Gila and Salt River Base and Meridian, Yavapai County, Arizona, conveyed to the State of Arizona in Deed recorded in Book 4159 of Official Records, Page 828, records of Yavapai County, Arizona, described as follows:

COMMENCING at an aluminum cap marking the West quarter corner of said Section 7 from which a rebar marking the East quarter corner of said Section 7 bears South 89 degrees 06 minutes 17 seconds East, 5288.84 feet;
Thence along the East-West mid section line of said Section 7, South 89 degrees 06 minutes 17 seconds East 2483.49 feet to the existing right of way centerline of State Route 89 (Wickenburg-Prescott Highway);
Thence along said existing right of way centerline of State Route 89 North 10 degrees 18 minutes 52 seconds West 144.20 feet;
Thence North 79 degrees 41 minutes 08 seconds East 50.00 feet to the said existing Easterly right of way line of said State Route 89 and the Point of Beginning;
Thence South 55 degrees 18 minutes 52 seconds East 29.70 feet;
Thence South 10 degrees 18 minutes 52 seconds East, 50.00 feet;
Thence South 33 degrees 21 minutes 12 seconds West 30.41 feet to said existing Easterly right of way line of said State Route 89;
Thence along said existing Easterly right of way line of State Route 89, North 10 degrees 18 minutes 52 seconds West 93.00 feet to the Point of Beginning.

AND EXCEPTING that portion of the Southwest quarter of the Southeast quarter (SW ¼, Se 1/4) of said Section 7, Township 8 North, Range 5 West of the Gila and Salt River Base and Meridian, Yavapai County, Arizona, described as follows;

COMMENCING at a rebar marking the South quarter corner of said Section 7 from which a marked stone marking the Southeast corner of said Section 7 bears South 89 degrees 32 minutes 23 seconds East 2643.46 feet;
Thence along the South line of said Section 7 South 89 degrees 32 minutes 23 seconds East 347.08 feet to said existing right of way centerline of State Route 89;
Thence along said existing right of way centerline of State Route 89 North 10 degrees 18 minutes 52 seconds West 898.02 feet;
Thence North 79 degrees 41 minutes 08 seconds East 50.00 feet to the existing right of way line State Route 89 and the Point of Beginning;
Thence South 55 degrees 18 minutes 52 seconds East 7.07 feet;
Thence South 10 degrees 18 minutes 52 seconds East 76.00 feet;

Thence South 34 degrees 41 minutes 08 seconds West 7.07 feet to said existing Easterly right of way line of State Route 89;
Thence along said existing Easterly right of way line of State Route 89 North 10 degrees 18 minutes 52 seconds West 86.00 feet to the Point of Beginning;

AND EXCEPTING that portion of the Northwest quarter of the Northeast quarter (NW ¼, NE ¼) of Section 18, Township 8 North, Range 5 West of the Gila and Salt River Base and Meridian, Yavapai County, Arizona, conveyed to the State of Arizona in Deed recorded in Book 4159 of Official Records, Page 828, records of Yavapai County, Arizona, described as follows:

COMMENCING at a marked stone marking the Northeast corner of said Section 18 from which a rebar marking the North quarter corner of said Section 18 bears North 89 degrees 35 minutes 35 seconds West 2643.46 feet;

Thence along the North line of said Section 18, North 89 degrees 35 minutes 33 seconds West, 2296.38 feet to said existing right of way centerline of State Route 89;

Thence along said existing right of way centerline of said State Route 89, South 10 degrees 18 minutes 52 seconds East 616.98 feet;

Thence North 79 degrees 41 minutes 08 seconds East 50.00 feet to said existing Easterly right of way line of said State Route 89 and the Point of beginning;

Thence South 55 degrees 18 minutes 52 seconds East 24.04 feet;

Thence South 10 degrees 18 minutes 52 seconds East 20.00 feet;

Thence South 34 degrees 41 minutes 08 seconds West 24.04 feet to said existing right of way line of said State Route 89;

Thence along said existing Easterly right of way line of State Route 89, North 10 degrees 18 minutes 52 seconds West 54.00 feet to the Point of Beginning;

AND EXCEPT all minerals and all uranium, thorium, or any other material which is or may be determined to be peculiarly essential to the production of fissionable materials, whether or not of commercial value, as reserved in Patent from United States of America, recorded in Book 192 of Deeds, Page 423 and in Book 10 of Official Records, Page 406, records of Yavapai County, Arizona.

(Reservoir Site 2008)

AND EXCEPT that portion of the Northwest quarter of said Section 7, Township 8 North, Range 5 West of the Gila and Salt River Base and Meridian, Yavapai County, Arizona, more particularly described as follows:

COMMENCING at the North quarter corner of said Section 7;

Thence North 89 degrees 59 minutes 56 seconds West along the North line of said Northwest quarter a distance of 476.65 feet to the TRUE POINT OF BEGINNING;

Thence South 00 degrees 00 minutes 00 seconds East, leaving said North line a distance of 193.27 feet;

Thence South 75 degrees 41 minutes 21 seconds East a distance of 318.69 feet to a point on a curve the radius of which bears South 45 degrees 19 minutes 13 seconds East a distance of 42.50 feet;

Thence Southerly along the arc of said curve through a central angle of 41 degrees 35 minutes 32 seconds a distance of 30.85 feet;

Thence North 75 degrees 18 minutes 54 seconds West, leaving said curve a distance of 308.93 feet;

Thence South 16 degrees 29 minutes 36 seconds West a distance of 65.66 feet;

Thence South 00 degrees 00 minutes 00 seconds East a distance of 21.39 feet to the TRUE POINT OF BEGINNING;

Thence continuing South 00 degrees 00 minutes 00 seconds East a distance of 224.22 feet;

Thence South 76 degrees 45 minutes 28 seconds West a distance of 141.74 feet;

Thence North 58 degrees 42 minutes 37 seconds West a distance of 98.50 feet;

Thence North 13 degrees 31 minutes 56 seconds West a distance of 211.40 feet;

Thence North 90 degrees 00 minutes 00 seconds East a distance of 271.61 feet, to the TRUE POINT OF BEGINNING.

(Well 4 site 2008)

AND EXCEPT That portion of the Southeast quarter of Section 7, of Township 8 North, Range 5 West of the Gila and Salt River Base and Meridian, Yavapai County, Arizona, more particularly described as follows:

COMMENCING at the East quarter Corner of said Section 7, from which the Southeast corner of said Section 7, bears South 00 degrees 00 minutes 08 seconds West a distance of 2641.48 feet;

Thence South 89 degrees 06 minutes 17 seconds East along the North line of said Southeast quarter a distance of 2468.03 feet;

Thence South 00 degrees 53 minutes 43 seconds West leaving said North line a distance of 663.59 feet to the TRUE POINT OF BEGINNING;

Thence North 83 degrees 04 minutes 35 seconds East a distance of 76.74 feet, to a point on a curve the radius of which bears South 83 degrees 04 minutes 35 seconds West a distance of 784.00 feet;

Thence Southerly along the arc of said curve through a central angle of 09 degrees 11 minutes 41 seconds a distance of 125.82 feet to a point of tangency;

Thence South 02 degrees 16 minutes 16 seconds West a distance of 28.78 feet;

Thence North 87 degrees 43 minutes 44 seconds West a distance of 52.84 feet;

Thence North 10 degrees 49 minutes 30 seconds West a distance of 145.58 feet to the TRUE POINT OF BEGINNING.

Wickenburg Ranch Wastewater, LLC
Service Area Legal Description
Parcel No 2

All that portion of Sections 7, 8, 17, 18, 19, 20 and 21, Township 8 North, Range 5 West of the Gila and Salt River Base and Meridian, Yavapai County, Arizona, more particularly described as follows:

Commencing at the Northwest Corner of said Section 8, point also being the Northeast corner of said Section 7;

Thence North 89 degrees 58 minutes 15 seconds East, 639.21 feet along the North line of said Section 8 to the POINT OF BEGINNING;

Thence continuing North 89 degrees 58 minutes 15 seconds East, 4633.71 feet to the Northeast corner of said Section 8;

Thence South 00 degrees 05 minutes 03 seconds East, 2642.77 feet to the East quarter corner of said Section 8;

Thence South 00 degrees 01 minutes 00 seconds East, 2643.56 feet to the South east corner of said Section 8, point also being the northeast corner of said Section 17;

Thence South 00 degrees 00 minutes 39 seconds East, 3940.42 feet;

Thence North 63 degrees 02 minutes 31 seconds West, 1071.34 feet;

Thence North 20 degrees 06 minutes 58 seconds East, 432.62 feet;

Thence North 42 degrees 25 minutes 18 seconds West, 173.13 feet;

Thence North 07 degrees 17 minutes 47 seconds West, 783.65 feet;

Thence North 05 degrees 50 minutes 06 seconds West, 1558.35 feet;

Thence North 86 degrees 37 minutes 10 seconds West, 2501.12 feet;

Thence South 10 degrees 26 minutes 30 seconds East, 1885.29 feet;

Thence South 12 degrees 35 minutes 38 seconds East, 1051.68 feet;

Thence South 61 degrees 23 minutes 09 seconds East, 972.18 feet;

Thence North 62 degrees 23 minutes 49 seconds East, 135.52 feet;

Thence South 49 degrees 22 minutes 53 seconds East, 66.84 feet;

Thence South 01 degrees 17 minutes 16 seconds East, 176.23 feet;

Thence South 23 degrees 00 minutes 31 seconds West, 142.25 feet;

Thence South 20 degrees 51 minutes 27 seconds West, 70.97 feet;

Thence South 15 degrees 04 minutes 21 seconds West, 231.46 feet;

Thence South 06 degrees 02 minutes 25 seconds West, 150.25 feet;

Thence South 03 degrees 24 minutes 22 seconds East, 175.23 feet;

Thence South 35 degrees 59 minutes 53 seconds East, 291.77 feet;

Thence South 61 degrees 34 minutes 03 seconds East, 135.59 feet;

Thence North 86 degrees 33 minutes 04 seconds East, 303.77 feet;

Thence North 64 degrees 28 minutes 47 seconds East, 159.98 feet;

Thence North 20 degrees 06 minutes 58 seconds East, 540.85 feet;

Thence South 39 degrees 08 minutes 40 seconds East, 821.85 feet;

Thence South 29 degrees 01 minutes 10 seconds West, 1653.95 feet;

Thence South 29 degrees 47 minutes 42 seconds East, 3182.75 feet to a point on the line common to said Sections 20 and 21;

Thence South 89 degrees 58 minutes 04 seconds West, 1096.09 feet;

Thence South 51 degrees 09 minutes 49 seconds West, 1161.14 feet to a point on the East right-of-way of United States Highway 89 and a point on a non-tangent curve to the northeast and having a radius of 21,243.59 feet and a center point which bears North 38 degrees 50 minutes 07 seconds East;
 Thence continuing along said curve through a central angle of 03 degrees 26 minutes 23 seconds and an arc length of 1275.14 feet;
 Thence North 47 degrees 44 minutes 17 seconds West, 2961.13 feet along said right-of-way to a point from which the section corner common to Sections 17, 18, 19 and 20 bears North 03 degrees 37 minutes 04 seconds West, 1875.90 feet;
 Thence North 38 degrees 48 minutes 50 seconds West, 1374.84 feet along said right-of-way to a point on a tangent curve to the Northeast and having a radius of 2810.00 feet and a center point which bears North 51 degrees 09 minutes 42 seconds East;
 Thence continuing along said curve through a central angle of 28 degrees 02 minutes 55 seconds and an arc length of 1375.61 feet;
 Thence North 10 degrees 49 minutes 30 seconds West, 2087.00 feet along said right-of-way;
 Thence South 78 degrees 05 minutes 33 seconds East, 964.58 feet;
 Thence North 82 degrees 21 minutes 15 seconds East, 62.17 feet;
 Thence North 74 degrees 13 minutes 56 seconds East, 437.84 feet to a point from which the East Quarter corner of said Section 18, bears North 44 degrees 24 minutes 42 seconds East, 402.14 feet;
 Thence North 11 degrees 54 minutes 27 seconds East, 1042.85 feet;
 Thence North 05 degrees 31 minutes 57 seconds East, 817.18 feet;
 Thence North 23 degrees 44 minutes 04 seconds West, 565.53 feet;
 Thence North 06 degrees 07 minutes 06 seconds East, 642.74 feet to a point from which the Section corner common to Sections 7, 8, 17 and 18, bears South 50 degrees 33 minutes 43 seconds East, 192.62 feet;
 Thence South 69 degrees 14 minutes 01 seconds East, 601.69 feet;
 Thence South 78 degrees 08 minutes 06 minutes East, 799.05 feet;
 Thence North 87 degrees 41 minutes 42 seconds East, 678.82 feet;
 Thence South 85 degrees 59 minutes 26 seconds East, 252.71 feet;
 Thence South 74 degrees 12 minutes 30 seconds East, 384.82 feet;
 Thence South 85 degrees 04 minutes 37 seconds East, 417.23 feet to a point from which the South Quarter corner of said Section 8, bears North 34 degrees 30 minutes 42 seconds West, 471.28 feet;
 Thence North 13 degrees 43 minutes 16 seconds East, 1068.17 feet;
 Thence North 54 degrees 59 minutes 00 seconds West, 1101.16 feet;
 Thence North 38 degrees 58 minutes 00 seconds West, 329.01 feet;
 Thence North 23 degrees 07 minutes 02 seconds West, 236.98 feet;
 Thence North 01 degrees 07 minutes 38 seconds East, 411.79 feet;
 Thence North 12 degrees 51 minutes 26 seconds East, 249.52 feet;
 Thence North 17 degrees 52 minutes 53 seconds West, 402.20 feet;
 Thence North 39 degrees 20 minutes 49 seconds West, 1119.67 feet;
 Thence North 20 degrees 28 minutes 12 seconds West, 802.26 feet;
 Thence North 17 degrees 27 minutes 50 seconds West, 913.00 feet to the POINT OF BEGINNING.

EXCEPTING there from that portion of the West half of the Southeast quarter (W1/2 SE 1/4) of Section 18, Township 8 North, Range 5 West of the Gila and Salt River Base and Meridian, Yavapai County, Arizona, conveyed to the State of Arizona in Deed recorded in Book 4159 of Official Records, Page 828, records of Yavapai County, Arizona, described as follows:

COMMENCING at a rebar marking the West quarter corner of said Section 18 being North 89 degrees 29 minutes 14 seconds West 5285.91 feet from the unmonumented East quarter corner of said Section 18 said unmonumented corner being South 00 degrees 33 minutes 47 seconds West 65.85 feet from a stone marked "1/4 W.C." marking the witness monument to said East quarter corner;

Thence along the East-West mid section line of said Section 18 South 89 degrees 29 minutes 14 seconds East 3495.54 feet to said existing right of way centerline of State Route 89;

Thence along said existing right of way centerline of State Route 89 South 10 degrees 18 minutes 52 seconds East 1324.17 feet;

Thence North 79 degrees 41 minutes 08 seconds East 50.00 feet to said existing Easterly right of way line of State Route 89 and the Point of Beginning;

Thence North 34 degrees 41 minutes 08 seconds East 70.71 feet;

Thence North 10 degrees 18 minutes 52 seconds West 97.00 feet;

Thence South 79 degrees 41 minutes 08 seconds West 50.00 feet to said existing Easterly right of way line of State Route 89;

Thence along existing right of way line of State Route 89 South 10 degrees 18 minutes 52 seconds East 147.00 feet to the Point of Beginning;

AND EXCEPTING that portion of the Northeast quarter of the Northeast quarter (NE 1/4 NE 1/4) of Section 19, Township 8 North, Range 5 West of the Gila and Salt River Base and Meridian, Yavapai County, Arizona, conveyed to the State of Arizona in Deed recorded in Book 4159 of Official Records, Page 828, records of Yavapai County, Arizona, described as follows;

COMMENCING at a 1/2 inch stainless steel rod with an aluminum cap marking the Northeast corner of said Section 19 from which a marked stone marking the North quarter corner of said Section 19 bears North 89 degrees 27 minutes 57 seconds West, 2641.50 feet;

Thence along the North line of said Section 19 North 89 degrees 27 minutes 57 seconds West 1249.77 feet to said existing right of way centerline of State Route 89;

Thence along said existing right of way centerline of State Route 89, from a local tangent bearing of South 10 degrees 18 minutes 52 seconds East, along a curve to the left, having a radius of 2865.00 feet a length of 748.40 feet;

Thence North 55 degrees 53 minutes 23 seconds East 50.00 feet to said Easterly right of way line of said State Route 89 and the Point of Beginning;

Thence North 11 degrees 48 minutes 05 seconds East 37.76 feet;

Thence North 33 degrees 21 minutes 37 seconds West 20.44 feet;

Thence North 79 degrees 36 minutes 45 seconds West, 37.09 feet to said existing Easterly right of way line of State Route 89;

Thence along said existing Easterly right of way line of State Route 89 from a local tangent bearing of South 32 degrees 37 minutes 50 seconds East along a curve to the left having a radius of 2815.00 feet, length of 72.71 feet to the Point of Beginning;

AND EXCEPT all minerals and all uranium, thorium, or any other material which is or may be determined to be peculiarly essential to the production of fissionable materials, whether or not of commercial value, as reserved in Patent from United States of America, recorded in Book 192 of Deeds, Page 423 and in Book 10 of Official Records, Page 406, records of Yavapai County, Arizona.

(WWTP 2008)

AND EXCEPT That portion of the Southeast quarter of Section 17, Township 8 North, Range 5 West of the Gila and Salt River Base and Meridian, Yavapai County, Arizona, more particularly described as follows:

COMMENCING at the Southeast corner of said Section 17;
Thence North 89 degrees 55 minutes 20 seconds West along the South line of said southeast quarter of Section 17, a distance of 1621.90 feet;
Thence North 00 degrees 04 minutes 40 seconds East leaving said South line a distance of 309.24 feet to the TRUE POINT OF BEGINNING;
Thence South 90 degrees 00 minutes 00 seconds West a distance of 424.78 feet;
Thence North 00 degrees 00 minutes 00 seconds East a distance of 164.42 feet;
Thence North 90 degrees 00 minutes 00 seconds East a distance of 424.78 feet;
Thence South 00 degrees 00 minutes 00 seconds East a distance of 164.42 feet to the TRUE POINT OF BEGINNING.

(Lift Station Site 2008)

AND EXCEPT That portion of the Northeast quarter of Section 20, Township 8 North, Range 5 West of the Gila and Salt River Base and Meridian, Yavapai County, Arizona, more particularly described as follows:

COMMENCING at the East quarter corner of said Section 20;
Thence South 89 degrees 58 minutes 26 seconds West along the South line of said Northeast quarter, a distance of 2352.09 feet;
Thence North 00 degrees 01 minutes 34 seconds West leaving said South line a distance of 680.23 feet to the TRUE POINT OF BEGINNING;
Thence South 87 degrees 44 minutes 44 seconds West distance of 60.00 feet;
Thence North 02 degrees 15 minutes 16 seconds West a distance of 85.00 feet;
Thence North 87 degrees 44 minutes 44 seconds East a distance of 60.00 feet;
Thence South 02 degrees 15 minutes 16 seconds East a distance of 85.00 feet to the TRUE POINT OF BEGINNING.

Parcel 2
WR Wastewater Service Area
3-17-09

Wickenburg Ranch Wastewater, LLC
Service Area Legal Description
Parcel No. 3

All that portion of Section 17, Township 8 North, Range 5 West of the Gila and Salt River Base and Meridian, Yavapai County, Arizona, more particularly described as follows:

BEGINNING at the Southwest corner of said Section 17, from which the Northwest corner bears North 00 degrees 02 minutes 17 seconds East a distance of 5281.72 feet; Thence North 33 degrees 08 minutes 10 seconds East a distance of 3560.09 feet to the TRUE POINT OF BEGINNING, said point being on the West boundary of "The Wickenburg Inn Tennis and Guest Ranch" recorded in Book 17 of Maps, Page 18, records of Yavapai County, Arizona;

Thence along said boundary, North 10 degrees 26 minutes 30 seconds West a distance of 1885.29 feet (record North 10 degrees 25 minutes 50 seconds West, 1885.15 feet); Thence South 86 degrees 37 minutes 10 seconds East a distance of 2501.12 feet (record South 86 degrees 37 minutes 21 seconds East a distance of 2501.02 feet); Thence South 05 degrees 50 minutes 06 seconds East a distance of 1558.35 feet (record South 05 degrees 50 minutes 05 seconds East a distance of 1558.42 feet); Thence South 07 degrees 17 minutes 47 seconds East a distance of 783.65 feet (record South 07 degrees 17 minutes 30 seconds East); Thence leaving said boundary, South 42 degrees 25 minutes 18 seconds East a distance of 173.13 feet;

Thence South 20 degrees 06 minutes 58 seconds West a distance of 1979.10 feet; Thence South 64 degrees 28 minutes 47 seconds West a distance of 159.98 feet; Thence South 86 degrees 33 minutes 04 seconds West a distance of 303.77 feet; Thence North 61 degrees 34 minutes 03 seconds West a distance of 135.59 feet; Thence North 35 degrees 59 minutes 53 seconds West a distance of 291.77 feet; Thence North 03 degrees 24 minutes 22 seconds West a distance of 175.23 feet; Thence North 06 degrees 02 minutes 25 seconds East a distance of 150.25 feet; Thence North 15 degrees 04 minutes 21 seconds East a distance of 231.46 feet; Thence North 20 degrees 51 minutes 27 seconds East a distance of 70.97 feet; Thence North 23 degrees 00 minutes 31 seconds East a distance of 142.25 feet; Thence North 01 degrees 17 minutes 17 seconds West a distance of 176.23 feet; Thence North 49 degrees 22 minutes 53 seconds West a distance of 66.84 feet to a point on the South boundary of said Wickenburg Inn Tennis and Guest Ranch;

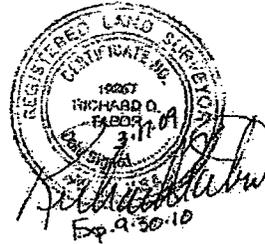

Thence along said Boundary, South 62 degrees 23 minutes 49 seconds West a distance of 135.52 feet (record South 62 degrees 23 minutes 50 seconds West); Thence North 61 degrees 23 minutes 09 seconds West a distance of 972.18 feet (record North 61 degrees 23 minutes 10 seconds West a distance of 972.26 feet); Thence North 12 degrees 35 minutes 40 seconds West a distance of 1051.68 feet (record North 12 degrees 37 minutes 10 seconds West a distance of 1051.93 feet), to the TRUE POINT OF BEGINNING.

EXCEPT all minerals and all Uranium, Thorium, or any other Materials which is or may be determined to be peculiarly essential to the production of fissionable materials, whether or not of commercial value, as reserved in Patent from United States of America.

(WWTP 2008 Site)

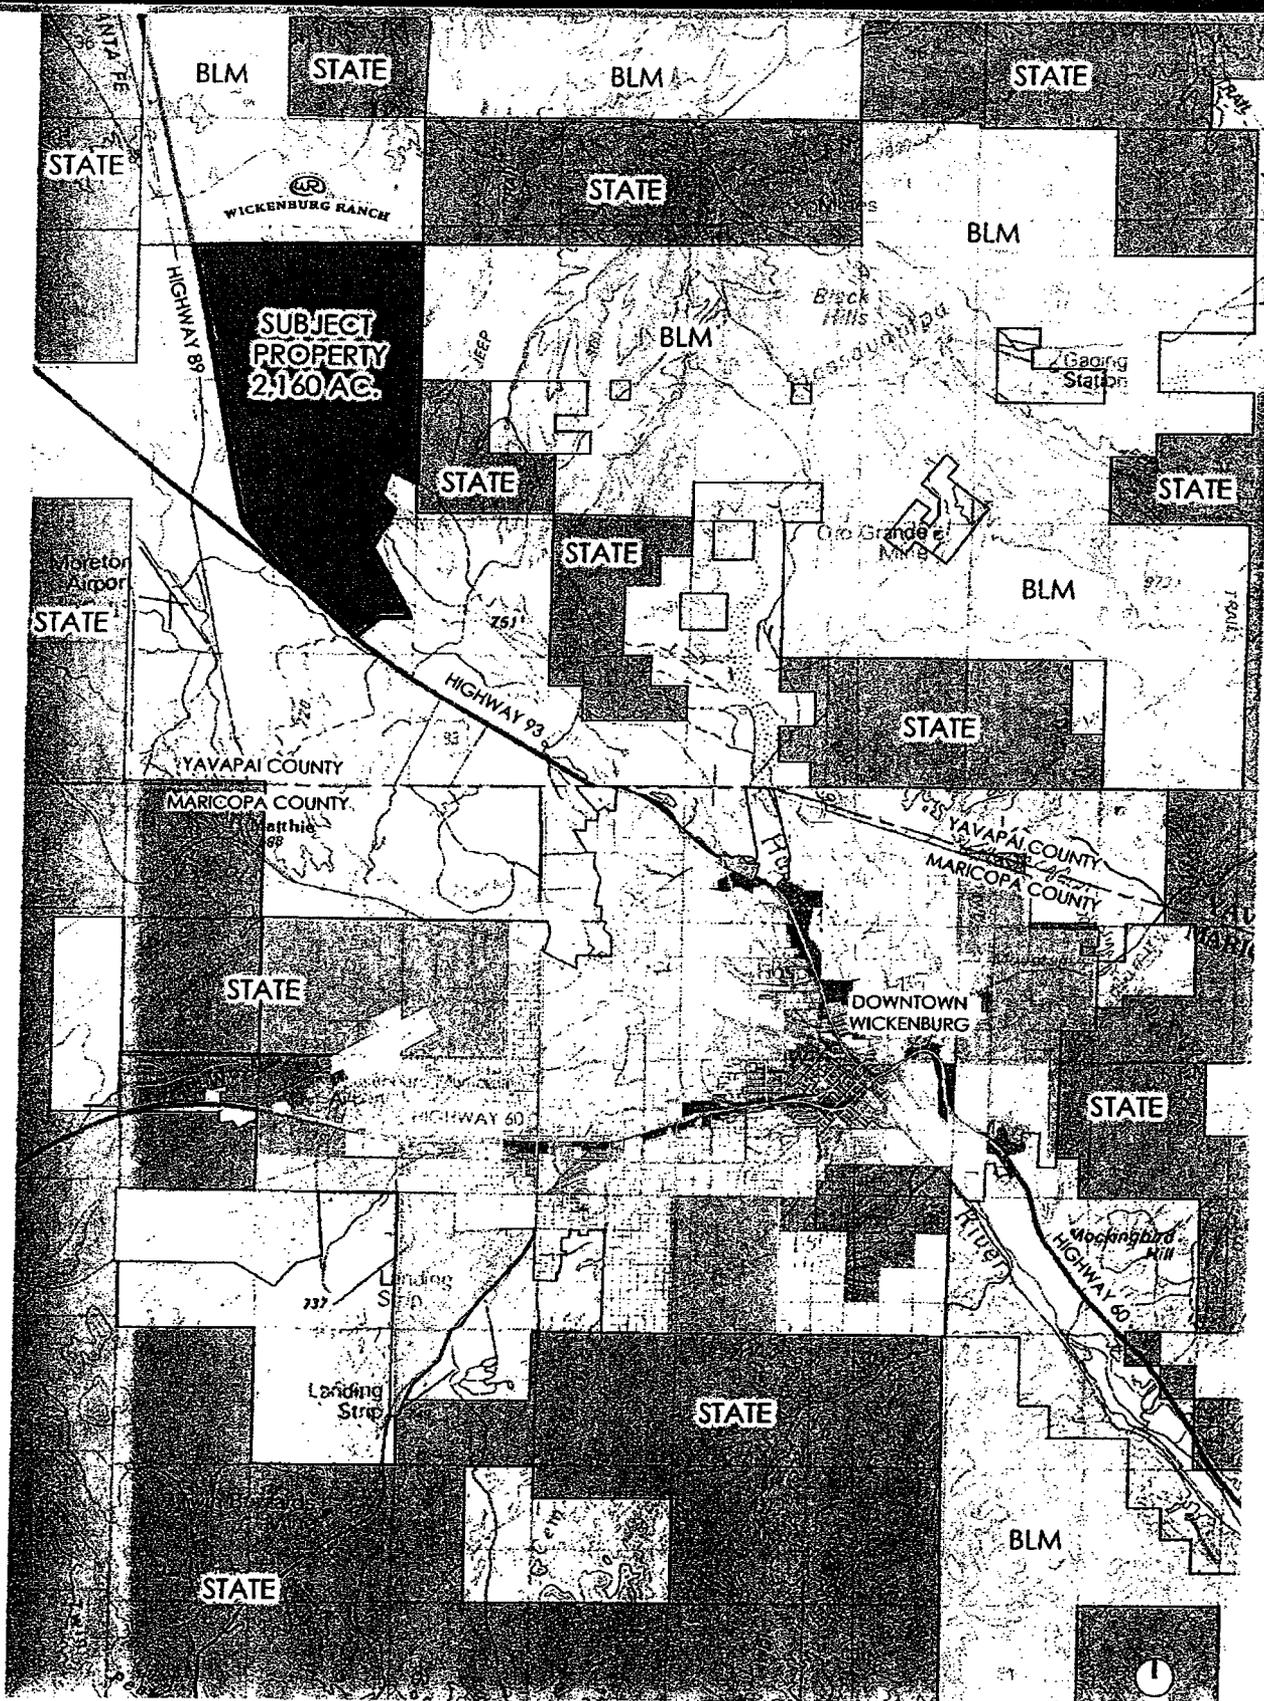

AND EXCEPTING That portion of the Southeast quarter of Section 17, Township 8 North, Range 5 West of the Gila and Salt River Base and Meridian, Yavapai County, Arizona, more particularly described as follows:

COMMENCING at the Southeast corner of said Section 17;
Thence North 89 degrees 55 minutes 20 seconds West along the South line of said southeast quarter of Section 17, a distance of 1621.90 feet;
Thence North 00 degrees 04 minutes 40 seconds East leaving said South line a distance of 309.24 feet to the TRUE POINT OF BEGINNING;
Thence South 90 degrees 00 minutes 00 seconds West a distance of 424.78 feet;
Thence North 00 degrees 00 minutes 00 seconds East a distance of 164.42 feet;
Thence North 90 degrees 00 minutes 00 seconds East a distance of 424.78 feet;
Thence South 00 degrees 00 minutes 00 seconds East a distance of 164.42 feet to the TRUE POINT OF BEGINNING.

Section 1

INTRODUCTION

Wickenburg Ranch Estates is a proposed 2,157-acre Master Planned Community with various residential land use designations consisting of a maximum of 2,324 residential units, 18-hole golf course, equestrian facilities, club house facility, trail system, and open space corridors. The Master Planned Community is located within portions of Sections 4, 5, 6, 7, 8, 17, 18, 19, and 20 of Township 8 North, Range 5 West of the Gila and Salt River Basins and Meridian, Yavapai County, Arizona. Wickenburg Ranch Estates development consists of the following tax parcel numbers:

201-02-100B	201-06-001H	201-02-156
201-02-149E	201-07-003C	201-07-002

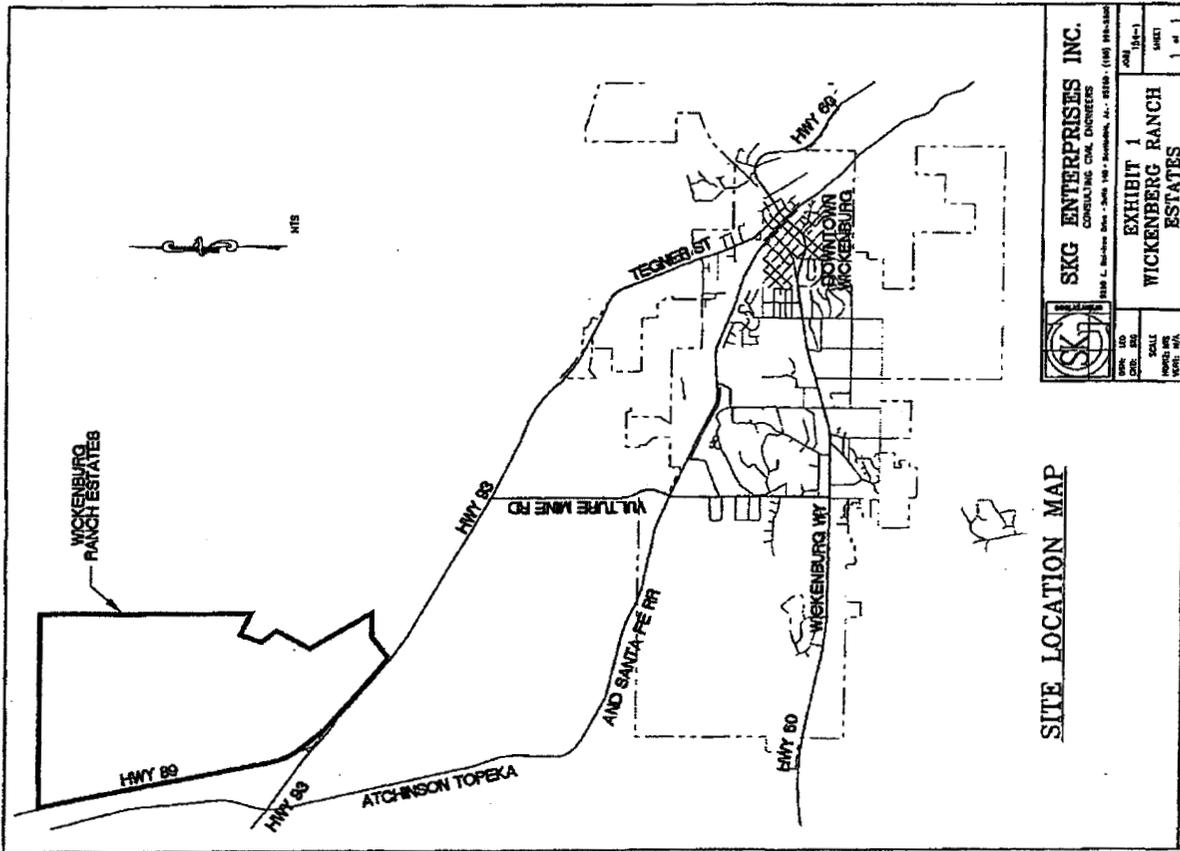

Wickenburg Ranch Estates was presented to and was approved by the Yavapai County Planning and Zoning Commission under Zoning Map Change APN: 201-02-100B, 201-02-149E, 201-02-156, 201-07-002, 201-07-003C, and 201-06-001H; HA# H5214.

A Site Location Map is shown on Exhibit 1 of this report. Exhibit 2 of this report presents the proposed Master Planned Community of Wickenburg Ranch Estates.

The Wickenburg Ranch Estates is bounded by vacant parcels of land from all directions. State Route Highway 89 bounds the proposed development along its westerly boundary and SR 93 bound the property along the southerly boundary. The land, within Wickenburg Ranch Estates slopes in a southerly to southeasterly direction at various slopes.

The name and address of the developer is:

WASTEWATER SYSTEM

2.1 Objective

The objective of this wastewater report is to update and formalize the design criteria based on the preferred selected on-site WRF sewer analysis option and the updated Wickenburg Ranch Estates Master Plan, prepared by Greer-Pickett, August 17, 2007. This report will present the design parameters, density projections, proposed design flows, design capacities for the sewer main, sewer main horizontal alignments, lift station and the water reclamation facility. The density projections were based on the Land Use Plan by Greer-Pickett, which provided the parcel areas and estimated lot yield. Actual lot layouts for the development were not used for the analysis; therefore, actual alignments may be subject to changes, upon parcels developments.

2.2 Proposed Wastewater Collection System

SKG has previously evaluated five (5) other wastewater treatment alternatives as described in the October 2006 Water and Sewer Basis of Design Report. These alternatives were subject to the acceptance and jurisdiction with the Town of Wickenburg.

The preferred selected proposed alternative will provide a Water Reclamation Facility on site and remain in the jurisdiction of the State and Yavapai County.

This alternative will consider planning the wastewater collection system for the entire onsite generated flows for the proposed development of Wickenburg Ranch Estates and offsite flows for an equivalent of 1099 lots. The on-site system will consist of gravity systems, low pressure systems, and a pressure system.

Areas where gravity collection system is unattainable, an alternative method will be utilized. This alternative will be the utilization of "B-One" Low Pressure System (LPS) or approved equal. The onsite generated wastewater flow will be collected via a combination of gravity and a Low Pressure System throughout the development.

The site is divided into two segments relative to wastewater collection system. The vast majority of the northerly and easterly segments of the development area are proposed to flow directly into the proposed Water Reclamation Facility (WRF) location through a combination of gravity system and Low Pressure System. The remaining segment of the development area (mainly the westerly and southerly portions) together with the limited offsite generated flows are proposed to be collected at a low point, located at the vicinity of the southwesterly end of the development, where a lift station is proposed. Flow will then be lifted from this low point to the proposed Water Reclamation Facility location (see Exhibit 3). This alternative proposes the WRF be located within the Wickenburg Ranch Estates site directly south of the proposed golf-course driving range area. Plan preparation and design specification for the proposed onsite WRF will be prepared by a consulting design team that specializes in this field. All requirements and governmental guidelines are relative to the WRF design and construction will be adhered to by the selected consulting design team that specializes in this field. Detailed information of such will be provided during the final improvement plans phase of this project.

2.2.1 Wastewater Planning Parameters

This section outlines the parameters used in calculating the onsite anticipated wastewater flow generated by the proposed Master Plan of Wickenburg Ranch Estates and anticipated offsite wastewater flow. For the purpose of this report, all sewer line capacities were based on a minimum velocity of 2.0 fps and not actual design slopes. Table 1 below presents the parameters utilized for this section. The design parameters are based on the proposed Land Use Master Plan shown on in Exhibit 2 of this report. Average Daily Flow of 80 gallons per capita per day was derived from Arizona Administrative Code Title 18, Ch.9, Table 1, page 89.

Table 1 - Wastewater Planning Parameters

Land Use Type	Average Daily Flow (gpcd)	Persons Per D.U.	Average Daily Flow/Unit (gpd/unit)	Peaking Factor	
				Dry Weather	Wet Weather
RESIDENTIAL					
Low Density	80	2.5	200	2	3
Medium Density	80	2.5	200	2	3
High Density	80	2.5	200	2	3
Offsite	80	2.5	200	2	3
RESORT & TIMESHARE	80	2.5	200	2	3
CLUBHOUSE 1,000 members @ 100gpcd			100,000	1	1
EQUESTRIAN (0.1 gal/sf) 32-acres @ 4356 gal/ac			139,392	1	1
PUBLIC FACILITIES (0.1 gal/sf), 6-acres @ 4356 gal/ac			26,136	1	1

2.2.2 Peaking Factor

The peaking factor was derived from ADEQ's administrative code Title 18, Chapter 9, page 62.

$$P.F. = (0.33 \times p^{0.21}) + 1.094$$

Where P.F. = Peaking Factor (dry weather)

p = Population from 1001 to 10,000

The population projections are based on the land use and density for each use;

S.F. Units		
Low & Medium Density	1952 units x 2.5 persons/DU =	4880
High Density	170 units x 2.5 persons/DU =	425
Resort & Timeshare	<u>202 units x 2.5 persons/DU =</u>	<u>505</u>
Totals	2324 units	5810 persons

Therefore a dry weather peaking factor of 1.96 was derived from the ADEQ table and equation. The above dry weather peaking factor was rounded off to 2.0. Due to the possibility of wet weather infiltration, ADEQ recommends adding an amount to the peaking factor, for such wet weather infiltration. As such, this report will use a wet weather peaking factor of 3.0.

2.2.3 Wastewater Flow Generation Calculation

The anticipated onsite flows were calculated using the number of units and respective unit flow shown in Table 1. Table 2 presents the summary of wastewater flow generated by the five proposed drainage areas in Wickenburg Ranch Estates, as shown on Exhibit 3. Table 4 simulates flow generation for the proposed Land Use parcels and the wastewater collection system capacity.

The anticipated wastewater flows are based on the Greey - Pickett Master Plan dated August 17, 2007, as shown on Exhibit 2, and the Wastewater Planning Parameters shown in Table 1. Table 2 on the next sheet will summarize the anticipated design flows for Sewer Line B, and 4 sub-areas conveying flow to Line A, including the estimated off-site flows. Through monitoring actual flows, subsequent phases of the water reclamation facility capacity can be adjusted accordingly.

Table 2 - Summary of Wastewater Design Flows

Residential	Phase 1			Phase 2			Total		
	# of units	Average Daily Flow (mgd)	Peak Flow (mgd)	# of Units	Average Daily Flow (mgd)	Peak Flow (mgd)	# of Units	Average Daily Flow (mgd)	Peak Flow (mgd)

Non-Residential Sub-total		0.2455	0.2455		0.0200	0.0200		0.2655	0.2655
Total Onsite Flows		0.6323	1.4059		0.0980	0.2540		0.7303	1.6599
Offsite S.F. Units				1099	0.2197	0.6591		0.2197	0.6591
Total Flow					0.3177	0.9131		0.9500	2.3190

2.2.4 Wastewater Main Capacity Analysis

Wastewater main capacity analysis flowing full was conducted using manning equation on each reach between the identified nodes. The following parameters are used to determine the pipe capacity flowing full:

- o Size of pipe
- o Length of pipe
- o Slope of the pipe (assumed minimum)

The following equation is used to determine the Wastewater Main Capacity.

$$Q = 0.646,272 * \frac{1.486}{n} AR^{2/3} S^{1/2}$$

Where :

- Q = Discharge in Million Gallons per Day (MGD)
 - A = Pipe Area in Square Feet
 - R = Hydraulic Radius in Feet
 - S = Pipe slope in Foot-per-Foot
 - n = Manning's Roughness Coefficient (.013)
- 0.646272 Converts cubic feet per second to MGD

Since the wastewater fill flow capacity can vary on each reach due to actual slope, maximum and minimum wastewater full flow capacities were calculated. Table 3 summarizes the maximum and minimum wastewater full flow capacity. This table is based on the minimum flow velocity of 2-fps and the maximum velocity of 10-fps. The table also includes capacities for actual minimum design slopes used on the project.

Table 3 - Summary of Maximum and Minimum Pipe Size Capacity

Pipe Size	Maximum Slope	Minimum Slope	Maximum Capacity @ 2-fps	Minimum Capacity @ 2-fps	Maximum Capacity @ 10-fps	Minimum Capacity @ 10-fps
24"	0.0193	0.0008	20.29	0.0050	4.050	10.338
18"	0.0283	0.0011	11.42	0.0050	2.280	4.800

10"	0.0610	0.0025	3.52	0.0050	0.704	1.001
8"	0.0835	0.0033	2.25	0.0050	0.450	0.552

2.2.5 Gravity Wastewater Collection System

The first step in this model is confirming the main backbone sewer line of the proposed sewer network. The interior sewer lines collect flows from each tributary area and convey collected wastewater into the main backbone sewer lines. The primary backbone sewer line A and secondary backbone sewer line B will collect flows from interior sewer lines by other gravity lines or a low pressure system. The proposed backbone sewer line A conveys collected wastewater into a low point, located at the vicinity of the southwesterly end of the development, where a lift station is proposed. A schematic of this routing is shown on Exhibit 3, where onsite backbone sewer lines, interior LPS sewer lines, and pressure lines are shown for the proposed Wickenburg Ranch Estates. Table 4 on the next 2 pages show the accumulated peak flows and the proposed pipe size, based on a minimum slope for 2fps for the conveyance capacity. The proposed backbone sewer line B conveys collected waste water directly into proposed onsite water reclamation facility. The water reclamation facility will be designed during improvement plans phase of this development to accommodate the entire Wickenburg Ranch Estates wastewater and limited offsite wastewater as shown in Table 5. Effluent from proposed water reclamation facility will primarily be used to irrigate the proposed 18-hole golf course and some landscape amenities. Solids from water reclamation facility are to be hauled away for treatment at other offsite facilities.

2.2.6 Low Pressure Sewer System (L.P.S)

In addition to the above mentioned gravity system, some of the lots within the proposed site (due to topographic constraints) require Low Pressure System (LPS) relative to sewer services. This LPS is proposed to serve these lots due to the existing natural terrain that would not allow these parcels to be served with a gravity system. The proposed LPS for these lots are specified to utilize an E-One LPS system or approved equal. Such system shall comply with the manufacturer specification for both design and installation. LPS shall also contain terminal flushing connection at its terminus point as well as continuous flushing cleanouts to be located at certain intervals, as shown in the detail in Appendix II of this report. Furthermore, Appendix II presents other various details for the proposed LPS system. The maintenance of the main LPS line, within the tract line (roadway), shall be the responsibility of the Homeowners Association upon its establishment. Individual LPS pumps maintenance, within each lot, outside the tract line (roadway), shall be the responsibility of the Individual homeowner.

*1 - Minimum pipe size based on flowing full at a velocity of 2' / second.

*2 - Pipe capacity based on minimum design slope.

2.2.7 Lift Station

One lift station is proposed for the Wickenburg Ranch Estates development to lift wastewater from the site collection point to the Proposed Water Reclamation Facility. The lift station will be designed, during final improvement plans phase of this development, to accommodate the flows from the backbone sewer line 'A' and force it upstream to the proposed on-site Water Reclamation Facility. Refer to Exhibit 3 for the location of proposed on-site wastewater collection system, lift station, and the proposed on-site water reclamation facility. Conceptual specification is presented in Appendix III of this report. Specific and final design and specification for the proposed Lift Station will be provided during the final improvement phases and associated development phases of this project.

2.2.8 Water Reclamation Facility (WRF)

The on-site Water Reclamation Facility (WRF), proposed for the Wickenburg Ranch Estates, will be designed during final improvement plans phase of this development to accommodate the entire Wickenburg Ranch Estates flows and limited offsite flows. The WRF design will be designed in accordance with the applicable ADEQ Engineering Bulletin No. 11. Table 5 summarizes the required flow for the proposed Water Reclamation Facility. Grade variations for the WRF may necessitate its own lift station at the inlet of the WRF. This and other related requirements such as effluent delivery system will be determined at the initial design of the WRF.

Table 5 – Summary of Projected Water Reclamation Facility Capacity

Wastewater Flow to WRF	Projected Wastewater Flow, MGD				Total
	Line A to Pump Station	Line B Direct Flow to WRF	Total	Total	
	# of Units	Flow mgd	# of Units	Flow mgd	
Low & Medium Density Residential	965	0.1929	988	0.1975	0.3904
Public Facility	6 acres	0.0261			0.0261
High Density Residential			170	0.0340	0.0340
Resort & Timeshare			202	0.0404	0.0404
Club House				0.1000	0.1000
Equestrian Center			32 acres	0.1394	0.1394
Total On-site		0.2190		0.5113	0.7303
Off-site Contribution					
LD Residential	1099	0.2197			0.2197
Total Average Daily Flow to WRF		0.4387		0.5113	0.9500

The proposed water reclamation facility has preliminarily proposed a system with three model HPE-250-sh complete mix activated sludge wastewater treatment system and three model SSF-78 strata-sand tertiary filtration system or equal. Appendix 1 presents the conceptual design of the on-site WRF Package. Effluent from proposed water reclamation facility will primarily be used to irrigate the golf course. Solids from the water reclamation facility are to be hauled-away for treatment at other offsite facilities. Detailed WRF design and specification shall be provided during the final design phase of this project by a consulting design team specializing in this field and shall comply with all applicable ADEQ and Yavapai County design procedures and guidelines.

2.3 CONCLUSION

This wastewater basis of design report will use 3 types of collection systems for the generated wastewater flow, utilizing a combination of a gravity sewer system, low pressure sewer system, and pump station (lift station) to route the flows to the site's Water Reclamation Facility. Generated effluent will be used to irrigate golf course. Generated Solids are to be hauled-away for treatment at other offsite facilities. Following is a summary of some important aspects of the wastewater system:

- The onsite wastewater collection system will consist of a gravity system, low pressure system, and a force main system.
- Considering only on-site sewer flows, 70% of the sewer will flow directly to the WRF (line B), and the remaining 30% will flow to the lift station. Considering the on-site sewer flows plus 1099 off-site units then 53% of the total will flow to the WRF, and 47% of the total will flow to the lift station.
- The main sewer line trunk "A" (see Exhibit 3) has been designed to accommodate onsite generated flow plus 1099 offsite units of flow (from the west side of State Route 89). This line upsized was designed to accommodate potential future development growth of up to 1099 off-site residential units. If elected to tie into this system, they will be able to do so provided that all hook-up and tie-in fees and agreements are met.
- For the purposes of this report all sewer gravity pipes were sized flowing full with minimum velocity of 2/second. In actual conditions no lines will be designed below a minimum grade, however, where there may be lines exceeding the minimum, they shall not exceed the slope where the sewer velocity exceeds 10'/second.
- Due to terrain conditions and a Conceptual Site Plan without final street and lot configurations, this report may be subject to areas with steep slopes, drop manholes, manhole depths in excess of 20 feet, and possible realignment of gravity lines, low pressure lines, and pressure lines upon future final parcel development, street alignment, and lot configurations.
- Lift station and force main will be required to convey a portion of the on-site generated flow to the proposed on-site water reclamation facility. Lift station and

- force main shall be designed in accordance with all applicable governmental agencies' design procedures and guidelines, inclusive of permitting.
- On-site water reclamation facility will be designed to treat the anticipated flows and will be designed in accordance with the applicable ADEQ and Yavapai County design procedures and guidelines.
 - On-site treated effluent water system distribution will consist of adequate size, flow, and pressure to irrigate the golf course. Lakes on the golf course will be designed to store the gray water of irrigation.

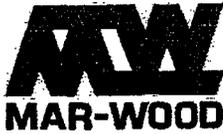

The wastewater calculations were based on an average flows shown on Table 5. The Water Reclamation Facility (WRF) package will be designed to accommodate this calculated flow and will be constructed in phases. However, it should be noted that the calculated flow may not be the actual flow within this region of Wickenburg area. Therefore, it should be noted that after installation and operation of the first phase of the Water Reclamation Facility package, actual flow should be monitored to ascertain the validity of the design flow parameters. If the design flow has been confirmed as actual flow, then subsequent phases of the Water Reclamation Facility package shall be constructed in accordance with the calculations presented in this report. On the other hand if actual flows were proven to be different from design flow parameters used in this report, then the actual monitored flows should be used and the report calculation should be adjusted to the actual magnitude, and subsequent phases of the Water Reclamation Facility package should be constructed in accordance with the actual monitored flow magnitude. The potential for upgrading and continuing to use the existing facility WRF package may be an option but more than likely it will be appropriately removed.

RE: Wickenburg Ranch Wastewater Reclamation Facility

Dear Peter,

Enclosed is Quotation 2435-REV B dated July 3, 2008 which replaces all previous proposals. This quotation is for the system described in our June 9, 2008 letter however we now are including the fiberglass covers and flow equalization as you requested. Although the quotation is quite detailed as to what we are providing, we also have included a Scope of Work specific for this project to detail what is not included by MAR-WOOD, Inc. This list is somewhat general in nature at this point but can be made more specific when the design and drawings are finalized.

Our pricing can be summarized as follows:

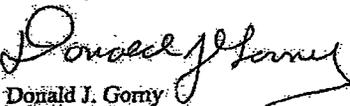

- | | |
|---|--------------------|
| • All precast concrete structures and mechanical equipment as detailed on quotation 2435-REV B. | \$364,976.00 |
| • Add for installation by MAR-WOOD personnel. | \$147,016.00 |
| • Add for six (6) day startup service. | \$8,225.00 |
| • Add for crane to unload and erect. | \$17,480.00 |
| • Delivery to job site. | <u>\$13,082.00</u> |

Total delivered and erected price
(plus applicable taxes) \$550,779.00

We have mailed three (3) copies of this proposal to m3Companies as well. Upon receipt of two (2) signed copies and 5% engineering fee we will continue with the drawings, specifications, etc. necessary for submittal to ADEQ and other regulatory agencies.

Thank you again for considering MAR-WOOD for this project.

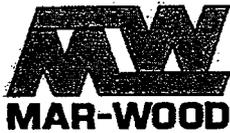

Sincerely,

Donald J. Gorny
Vice President

Project Wickenburg Ranch Quote Number 2435-REV B Date July 3, 2008
 Size 100,000 GPD Dwg# 268-1 Model 1-8-100DN
 Location Wickenburg County Yavapai State AZ

We are pleased to offer this Quotation for this project. This Quotation includes all precast structures, mechanical equipment, start-up and one (1) year warranty. These items are further detailed on page 3 and 4 attached. See separate pricing for delivery to job site, crane and assembly by **MAR-WOOD**.

We have not included permits, site work, excavation, base pad design or construction, backfill, dewatering, electrical wiring or service, emergency power, water supply, fencing or housing, access road, collection system nor effluent disposal system. Purchaser shall furnish and dispose of all water used for construction purposes and hydraulic testing, if required.

The payment terms are as follows: 5% with order. 5% upon submittal of drawings. Progress payments shall be made on or about the 20th of each month for work completed to date. **MAR-WOOD** to retain title to this equipment until paid for in full. These installments represent the fair and accurate valuation of the work done on each stage of manufacture and construction and shall constitute a liquidated sum immediately due and payable upon the completion of each stage. The payment terms are independent of, and are not contingent upon, the time or manner in which the Purchaser may receive payment from others.

The price quoted is F.O.B. Peoria, Arizona with freight allowed and is firm for thirty (30) days providing shipment may be made within six (6) months of acceptance. The Purchaser shall have the responsibility for the protection of the equipment and material after they are delivered to the job site, whether caused by the elements, theft, vandalism or any other cause.

The Purchaser has submitted, with this Quotation, property information on page 5 which Purchaser represents as true and correct, and the information submitted is made a part hereof. Purchaser agrees to secure written authorization before incurring any costs or back charges for **MAR-WOOD**.

Should you have any questions, please call our Sales Department at (623) 486-9445.

Thank you for considering **MAR-WOOD, INC.**

If Purchaser holds a valid Seller's permit, please provide the following:

TERMS & CONDITIONS

All Quotations are made and all orders accepted are subject to the following conditions which are part of the Quotation made on the reverse side hereof.

1. Purchaser's execution of this Quotation constitutes an offer to MAR-WOOD which shall become a Contract only upon acceptance by an Executive Officer of MAR-WOOD at headquarters in Peoria, Arizona.
2. Credit references and financial statements are to be supplied to MAR-WOOD Credit Department upon request. Purchaser to furnish MAR-WOOD the names and addresses of Owner(s) of property upon which equipment is to be installed, together with a full and complete legal description thereof.
3. Contracts based upon this Quotation are not subject to cancellation unless mutually agreed to in writing by Purchaser and Seller.
4. Purchaser shall be invoiced for each payment when due. Payments must be made within 30 days from the date of the invoice. Failure of Purchaser to provide MAR-WOOD with written notice of objection to payment of invoice within the time prescribed for payment shall operate as a waiver to any objections to payment and said amount shall be conclusively presumed to be due. Payments not made within 30 days from the date of an invoice shall then bear interest at the rate of 18% per annum compounded until paid. In addition to all other remedies, Purchaser's non-payment within the time prescribed shall operate to make the entire balance of payment immediately due and owing. Unless the full balance of payment is immediately paid upon written demand, MAR-WOOD shall further have the right to discontinue any further work and recommence work only upon terms and payment adjustments to this agreement acceptable to MAR-WOOD. If delivery is delayed by Purchaser, payments due upon delivery shall be due when the item is ready for delivery and so invoiced. The payment terms are independent of, and are not contingent upon the time or manner in which the Purchaser may receive payment from others. Should it be necessary for either party to engage legal counsel to collect any indebtedness due hereunder, or enforce any provision hereof, the losing party shall be obligated to pay all reasonable attorney's fees and costs of collection incurred, including any fees and costs incurred upon an appeal.
5. Any clerical errors herein are subject to correction.
6. All taxes which may be levied on this material or apparatus are Purchaser's liability, unless stated otherwise on the reverse side hereof.
7. The issuance of this Quotation does not guarantee the quantities and specifications of any of the apparatus, material or labor herein to be in accord with any job plans or specifications, other than being in compliance with the MAR-WOOD plans and specifications approved for construction by the Purchaser or its representative.
8. The title and right of possession of any apparatus and material sold hereunder shall remain MAR-WOOD's personal property until all payments hereunder have been made in full in cash and the Purchaser agrees to do all acts necessary to perfect and maintain such right and title in MAR-WOOD's ownership.
9. MAR-WOOD shall not be held responsible for delays in delivery due to fire, acts of God, labor disturbances, accidents, car shortage, truck shortage, delays in transportation or other conditions or causes beyond their control.
10. All orders accepted for shipment by truck shall be to closest point to job site which truck can reach under its own power. In the event delivery by truck is prohibited, material shall be shipped by rail or motor freight to the nearest dock or siding to the project. No allowance will be made by MAR-WOOD for hauling material from dock or siding to project or job site.
11. Assembly, if included, begins at influent point, and ends at effluent point. Electrical service to the prewired control panel(s) IS NOT included.
12. State and County Health Department approval is mandatory to this project and installation, and is the responsibility of others.
13. No permits or fees are included as part of this Quotation.
14. No materials shall be returned for credit without prior written approval of MAR-WOOD.
15. This Quotation includes two (2) standard maintenance or service manuals. A charge of \$50.00 (subject to change without notice) will be made for each additional copy.
16. Operating instruction by MAR-WOOD personnel is not included in this Quotation, unless otherwise stated on reverse side hereof. A factory trained instructor is available on a per diem basis.
17. No waiver, alteration or modification of any of the provisions herein shall be binding unless in writing and signed by an Executive Officer of MAR-WOOD at its headquarters in Peoria, Arizona. This Contract constitutes the entire agreement between the parties hereto, and specifically supersedes any and all prior written or oral agreements in conjunction herewith.
18. This Quotation applies only to the apparatus, material and labor herein mentioned as included and none other is implied.
19. The Purchaser understands the amounts shown on this Contract shall be paid in full in cash as agreed with NO RETAINAGE ALLOWED.
20. FACTORY-BUILT EQUIPMENT WARRANTY: MAR-WOOD warrants all new MAR-WOOD factory-built equipment to be free from functional defects, material and workmanship, when used under normal conditions for a period of one (1) year from the date of shipment, provided the installation, operation and maintenance of the equipment is in accordance with the Company's Instructions and written notice of said alleged defect is immediately given to MAR-WOOD. In the event any new MAR-WOOD factory-built equipment, or any part thereof, should prove to be functionally defective within a period of one (1) year from the date of shipment, acknowledged as such by MAR-WOOD, due to faulty materials or workmanship, MAR-WOOD's total obligation under this warranty shall be the repair of such items of material or workmanship, F.O.B. point of manufacture. This warranty is expressly in lieu of all other warranties and representations expressed or implied, and of all other obligations or liabilities on the part of MAR-WOOD. MAR-WOOD shall not be liable for consequential damages for any breach of warranty. This warranty expressly excludes items of equipment manufactured by others, and those items normally consumed in service, such as light bulbs, oil, grease, seals, packing, etc. This warranty shall be effective only when all sums due MAR-WOOD are paid in full, without deductions or set-off. This warranty is expressly contingent upon prompt start-up of unit, upon completion of installation, and continuous proper operation within factory specifications incorporated herein and made a part hereof by reference.
21. Responsibility for compliance with OSHA requirements for excavation, etc. rests with the Buyer.
22. Commencement of work shall be authorized by the date set forth on the reverse side hereof and work shall be allowed by Purchaser to continue without delay or interruption. Should MAR-WOOD not be allowed to commence work or continue with work as provided herein, MAR-WOOD shall have the right, in addition to all other remedies, to terminate this agreement, retain all monies paid, and receive full payments for costs and expenses incurred for work in progress remaining unpaid to the date of termination together with loss of profits in the sum of 25% of the total unpaid amount of this Agreement.

RE: Wickenbug Ranch, AZ -- Low Pressure Sewer

Mr. Gushgari,

Attached please find the Low Pressure Sewer (LPS) analysis using the Environment One (E-One) Grinder Pumps for the Pusch Ridge Subdivision Project. The sewer analysis was completed by E-One and it provides us with the number of sumps, clean out ports, length and size of piping required and other important information. Using this information, we are able to give you a budgetary material cost for this project.

In addition to the material costs that you can find in the attached spread sheet, we are providing you with the detailed analysis from E-One for the LPS, specifications and details for the sumps/pumps, detailed drawings for the piping system, installation instructions for the E-One sumps/pumps.

The design analysis provided by E-One examines the use of a low pressure sewer system utilizing Environment One Grinder Pumps. The low pressure sewer approach provides not only a technical solution, but also an economic advantage to be realized with low up front capital expenditure and overall operation and maintenance costs.

Using the data that was provided by you to the E-One team, the enclosed pressure sewer pipe sizing analysis was generated. This was run through their Low Pressure Sewer Design Software that employs their Flow Velocity and Friction Head Loss vs. Pumps in Simultaneous Operation spreadsheet.

Computations are based on the Hazen-Williams formula for friction loss, using calculations of cross-sectional area and flow rate to determine pipe sizes that create "self-cleaning" velocities of 2.0 fps or higher. A "C" factor of 140, SDR 11 HDPE pipe, and flows per unit per the ADEQ requirement of 200 gpd are also used in this analysis.

Page 2 of 2

The following hydraulic model is comprised of 71 zones, each representing a length of pipe of specific diameter and hydraulic characteristics, and includes a total of 191 GP 2000 Series grinder pump stations.

Configuration as such, the highest total Dynamic Head generated in the system is approximately in 127 ft. This is below our pump's continuous-run rating of 138 ft, and is well within its intermittent (i.e. normal) operating range. Flow velocity exceeds 2 fps throughout the project. These characteristics and short retention times indicate that this will be a reliable, low maintenance system.

General recommendations for valve placement are: Flushing valves at 1,000 to 1,500 ft intervals and at branch ends and junctions; isolation valves at branch junctions; and air release valves at peaks of 25 ft or more and/or at intervals of 2,000 to 2,500 ft.

Quantities of grinder pumps, pipe, and appurtenances are indicated on the budgetary pricing spreadsheet.

We appreciate this opportunity to provide this proposal and welcome any questions that you may have.

Best regards,

A handwritten signature in cursive script that reads "Tracy Dillie".

Notes:																									

GP2010

Patent Numbers: 5,752,315
5,562,254 5,439,180

* Discharge data includes loss through check valve, which is minimal.

PA1346P01 Rev. D, 1/02

General Applications

The size, efficiency and operating economy of the GP 2010 make it your best choice for single dwellings, waterfront property, subdivision developments and marinas. The GP 2010 is ideally suited for both new and existing communities.

General Features

The GP 2010 Grinder Pump is a complete unit that includes: the grinder pump, check valve, HDPE (high density polyethylene) tank and controls. The GP 2010 is packaged into a single complete unit, ready for installation.

All solids are ground into fine particles, allowing them to pass easily through the pump, check valve and small diameter pipelines. Even objects not normally found in sewage, such as plastic, rubber, fiber, wood, etc., are ground into fine particles.

The 1 1/4-inch discharge connection is adaptable to any piping materials, thereby allowing us to meet your local code requirements.

The tank is made of tough corrosion-resistant HDPE. The optimum tank capacity of 70 gallons is based on computer studies of water usage patterns. A single GP 2010 is ideal for one, average single-family home and can also be used for up to two average single-family homes where codes allow and with consent of the factory. This model can accommodate flows of 700 GPD.

The internal check valve assembly, located in the grinder pump, is custom-designed for non-clog, trouble-free operation.

The grinder pump is automatically activated and runs infrequently for very short periods. The annual energy consumption is typically that of a 40-watt light bulb.

Units are available for indoor and outdoor installations. Outdoor units are designed to accommodate a wide range of burial depths.

Operational Information

Motor

1 hp, 1,725 rpm, high torque, capacitor start, thermally protected, 120/240V, 60 Hz, 1 phase

Inlet Connections

4-inch inlet grommet standard for DWV pipe. Other inlet configurations available from the factory.

Discharge Connections

Pump discharge terminates in 1 1/4-inch NPT female thread. Can easily be adapted to 1 1/4-inch PVC pipe or any other material required by local codes.

Discharge*

15 gpm at 0 psig

11 gpm at 40 psig

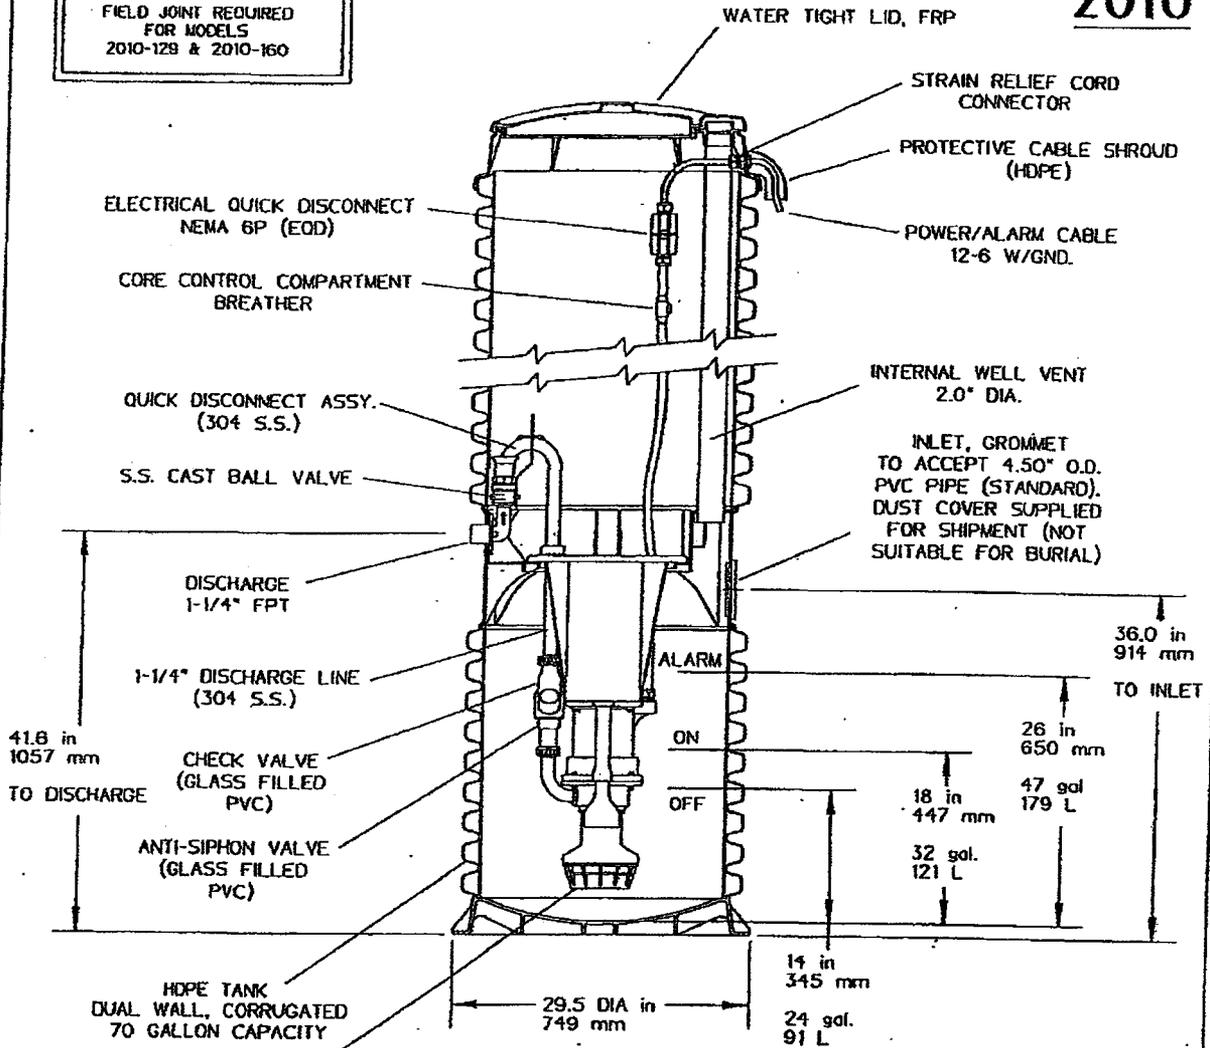

9 gpm at 60 psig

Overload Capacity

The maximum pressure that the pump can generate is limited by the motor characteristics. The motor generates a pressure well below the rating of the piping and appurtenances. The automatic reset feature does not require manual operation following overload.

Limited Warranty

1000 Series, 2000 Series, AMGP

Environment One Corporation offers a limited warranty that guarantees its product to be free from defects in material and factory workmanship for a period of two years from the date of installation, or 27 months from the date of shipment, whichever occurs first, provided the product is properly installed, serviced and operated under normal conditions and according to manufacturer's instructions. Repair or parts replacement required as a result of such defect will be made free of charge during this period upon return of the defective parts or equipment to the manufacturer or its nearest authorized service center.

User Instructions for the Environment One Grinder Pump

General Information

In order to provide you with suitable wastewater disposal, your home is served by a low pressure sewer system. The key element in this system is an Environment One grinder pump. The tank collects all solid materials and effluent from the house. The solid materials are then ground to a small size suitable for pumping as a slurry with the effluent water. The grinder pump generates sufficient pressure to pump this slurry from your home to the wastewater treatment receiving line and/or disposal plant.

Congratulations on your Environment One grinder pump investment. With proper care and by following a few guidelines, your grinder pump will give you years of dependable service.

Care and Use of your Grinder Pump

The Environment One grinder pump is capable of accepting and pumping a wide range of materials. Regulatory agencies advise that the following items should not be introduced into any sewer, either directly or through a kitchen waste disposal unit:

Glass	Diapers, socks, rags or cloth
Metal	Plastic objects (toys, utensils, etc.)
Seafood shells	Sanitary napkins or tampons
Goldfish stone	Kitty litter

In addition, you must never introduce into any sewer:

Explosives	Strong chemicals
Flammable material	Gasoline
Lubricating oil and/or grease	

Periods of Disuse

If your home or building is left unoccupied for longer than a couple of weeks, perform the following procedure:

Purge the System. Run clean water into the unit until the pump activates. Immediately turn off the water and allow the grinder pump to run until it shuts off automatically.

Duplex Units. Special attention must be taken to ensure that both pumps turn on when clean water is added to the tank.

Caution: Do not disconnect power to the unit

Power Failure

Your grinder pump cannot dispose of wastewater without electrical power. If electrical power service is interrupted, keep water usage to a minimum.

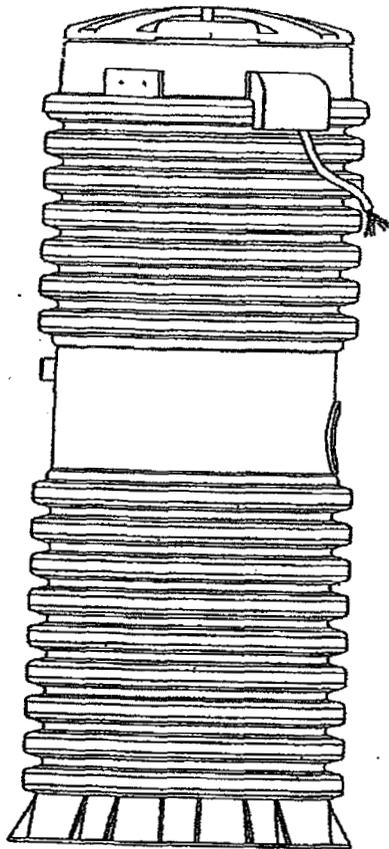

Pump Failure Alarm

Your Environment One grinder pump has been manufactured to produce an alarm signal (120 volt) in the event of a high water level in the basin. The installer must see that the alarm signal provided is connected to an audible and/or visual alarm in such a manner as to provide adequate warning to the user that service is required. During the interim prior to the arrival of an authorized service technician, water usage must be limited to the reserve capacity of the tank.

For service, please call your local distributor:

GP 2010

**TYPICAL
INSTALLATION
INSTRUCTIONS
& WARRANTY
INFORMATION**

Environment One Grinder Pump Feature Identification

1. **GRINDER PUMP BASIN** – High density polyethylene (HDPE).
2. **ACCESSWAY COVER** – FRP
3. **ELECTRICAL QUICK DISCONNECT (EQD)** – Cable from pump core terminates here.
4. **POWER AND ALARM CABLE** – Circuits to be installed in accordance with local codes.
5. **ALARM PANEL** – NEMA 4X enclosure. Equipped with circuit breakers. Locate according to local codes.
6. **ALARM DEVICE** – Every installation is to have an alarm device to alert the homeowner of a potential malfunction. Visual devices should be placed in very conspicuous locations.
7. **INLET** – EPDM grommet (4.5" ID). For 4.5" OD DWV pipe.
8. **WET WELL VENT** – 2.0" tank vent, supplied by factory in units with accessways.
9. **GRAVITY SERVICE LINE** – 4" DWV, (4.5" OD). Supplied by others.
- 9a. **STUB-OUT** – 4" X 5' Long watertight stub-out, to be installed at time of burial unless the gravity service line is connected during installation. Supplied by others.
10. **DISCHARGE VALVE** – 1-1/4" Female pipe thread.
11. **DISCHARGE LINE** – 1-1/4" Nominal pipe size. Supplied by others.
12. **CONCRETE ANCHOR** – See Ballast Calculations for specific weight for station height. Supplied by others.
13. **BEDDING MATERIAL** – 6" minimum depth, round aggregate, (gravel). Supplied by others.
14. **FINISHED GRADE** – Grade line to be 1" to 4" below removable lid and slope away from the station.
15. **VENT** – Indoor installation. See section 6, Venting, on page 6.
16. **VALVE** – Full ported ball valve. Recommended option; for use during service operations. Supplied by others.
17. **CONDUIT** – 1" or 1-1/4", material and burial depth as required per national and local codes. Conduit must enter panel from bottom and be sealed per NEC section 300.5 & 300.7. Supplied by others.
18. **UNION** – 1-1/4" or compression type coupling. Supplied by others. (Do not use rubber sleeve and hose clamp type coupling.)
19. **VALVE** – Ball valve, must provide a full-ported 1-1/4" round passage when open. Supplied by others.
20. **REBAR** – Required to lift tank after ballast (concrete anchor) has been attached, 4 places, evenly spaced around tank.

**FAILURE TO COMPLY
WITH INSTALLATION
INSTRUCTIONS WILL
VOID WARRANTY**

Installation Instructions for Model 2010 Grinder Pump

The Environment One Grinder Pump is a well engineered, reliable and proven product: proper installation will assure years of trouble-free service. The following instructions define the recommended procedure for installing the Model 2010 Grinder Pump. These instructions cover the installation of units with and without accessways.

This is a sewage handling pump and must be vented in accordance with local plumbing codes. This pump is not to be installed in locations classified as hazardous in accordance with National Electric Code, ANSI / NFPA 70. All piping and electrical systems must be in compliance with applicable local and state codes.

1. REMOVE PACKING

MATERIAL: The User Instructions must be given to the home owner. Hardware supplied with the unit, if any, will be used at installation.

2. TANK INSTALLATION:

The tank is supplied with a standard grommet for connecting the 4" DWV (4.50" outside Dia.) incoming sewer drain. Other inlet types and sizes are optional (caution 4" DR-35 pipe is of smaller diameter and won't create a water tight joint with the standard grommet). Please confirm that you have the correct inlet before continuing. If a concrete ballast is attached to the tank lift only by the lifting eyes, (rebar) embedded in the concrete. Do not drop, roll, or lay tank on its side. This will damage the unit and void the warranty.

If the tank has no accessway (Fig. 1b) (Indoor Installation): The pump may be installed on or in the basement floor (see Fig. 1b). If the tank is to be set on the floor it must be a flat and level bearing surface. If the tank is to go into the basement floor, it must be anchored to prevent unit from floating due to high ground water (see Chart 1, page 12 for weight).

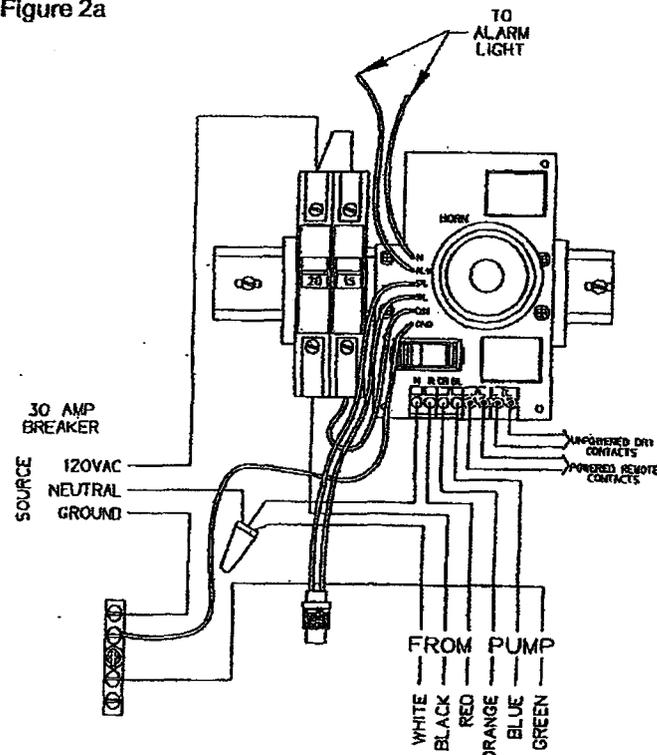

If the tank is to go in the floor: A hole of the correct width and depth should be excavated. The tank must be placed on a 6" bed of gravel made up of naturally rounded aggregate, clean and free flowing, with particle size not less than 1/8" or more than 3/4" in diameter.

The wet well should be leveled and filled with water prior to pouring the concrete to prevent the tank from shifting. If it's necessary to pour the concrete to a level above the inlet, the inlet must be sleeved with an 8" tube before pouring.

There must be a minimum clearance of three feet directly above the tank to allow for removal of the pump core.

If the tank has an accessway (Fig. 1a): Excavate a hole to a depth, so that the removable cover extends above the finished grade line. The grade should slope away from the unit. The diameter of the hole must be large enough to allow for a concrete anchor. Place the unit on a bed of

Figure 2a

120 VOLT WIRING

gravel, naturally rounded aggregate, clean and free flowing, with particles not less than 1/8" or more than 3/4" in diameter. The concrete anchor is not optional. (See Chart 1 on page 12 for specific requirements for your unit)

The unit should be leveled and the wet well filled with water to the bottom of the inlet to help prevent the unit from shifting while the concrete is being poured. The concrete must be vibrated to ensure there are no voids.

If it is necessary to pour the concrete to a higher level than the inlet, the inlet must be sleeved with an 8" tube before pouring.

If your unit is a model taller than 93" it may be shipped in

two sections, requiring field assembly. See Field Joint Assembly Instructions on page 8 for additional information.

3. INLET PIPE

INSTALLATION: Mark the Inlet Pipe 3 1/2" from the end to be inserted. Inlet pipe should be chamfered and lubricated with a soap solution. Lubricate the inlet grommet with soap solution as well. Insert the pipe into the grommet up to the 3 1/2" mark. Inspect to ensure the grommet has remained intact and in place.

4. DISCHARGE: The use of 1-1/4" PVC pressure pipe Schedule 40 and polyethylene pipe SDR 11 or SDR 7 are recommended. If polyethylene is chosen use compression type fittings to provide a smooth

inner passage. It is recommended that a Redundant Check Valve Assembly (E/One part no. PC0051GXX) be installed between the pump discharge and the street main on all installations. Never use a ball type valve as a check valve. We recommend the valve be installed as close to the public right-of-way as possible. Check local codes for applicable requirements.

CAUTION: Redundant check valves on station laterals and anti-siphon/check valve assemblies on grinder pump cores should not be used as system isolation valves during line tests.

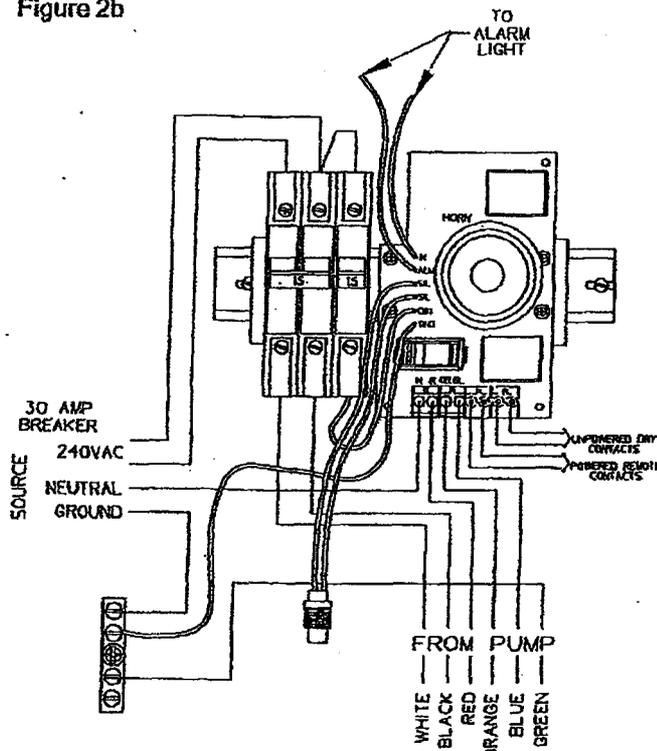

If the tank has no accessway: (Indoor Installation) The discharge connection is a 1-1/4" male NPT. The discharge piping must incorporate a shut-off valve and a union with a minimum pressure rating of 160 PSI, or a suitable piping disconnect to allow for removal of the pump core. The valve should be of the type that provides a full-ported passage (i.e. a ball or gate valve). A standard 1-1/4" union or a compression type coupling should be used as a disconnect joint.

If the tank has an accessway: There is a ball valve and a quick disconnect pre-installed in the accessway. There is a 1-1/4" female NPT discharge connection on the outside of the tank 41" above the bottom of the tank.

5. BACKFILL

REQUIREMENTS: Proper backfill is essential to the long term reliability of any underground structure. Several

Figure 2b

240 VOLT WIRING

methods of backfill are available to produce favorable results with different native soil conditions.

The most highly recommended method of backfilling is to surround the unit to grade using Class I or Class II backfill material as defined in ASTM 2321. Class 1A and Class 1B are recommended where frost heave is a concern, Class 1B is a better choice when the native soil is sand or if a high, fluctuating water table is expected. Class I, angular crushed stone offers an added benefit in that it needs minimal compaction. Class II, naturally rounded stone, may require more compactive effort, or tamping, to achieve the proper density.

If the native soil condition consist of clean compactible soil, with less than 12% fines, free of ice, rocks, roots, and organic material it may be an acceptable backfill. Such soil must be compacted in lifts not to exceed one foot to reach a final Proctor Density of between 85% and 90%. Non-compatible clays and silts are not suitable backfill for this or any underground structure such as inlet or discharge lines. If you are unsure of the consistency of the native soil it is recommended that a geotechnical evaluation of the material be obtained before specifying backfill.

Another option is the use of a flowable fill (i.e., low slump concrete). This is particularly attractive when installing grinder pump stations in augured holes where tight clearances make it difficult to assure proper backfilling and

compaction with dry materials. Flowable fills should not be dropped with more than four feet between the discharge nozzle and the bottom of the hole since this can cause separation of the constituent materials.

6. VENTING: The unit must be properly vented to assure correct operation of the pump. If you have an indoor unit it can be vented through the 2" port supplied at the top of the wet well or through the incoming sewer line with a 2" pipe (the vent must be within four feet of the grinder pump, and before the first change of direction fitting).

The outdoor units are supplied with a vent pipe from the wet well to the top of the accessway.

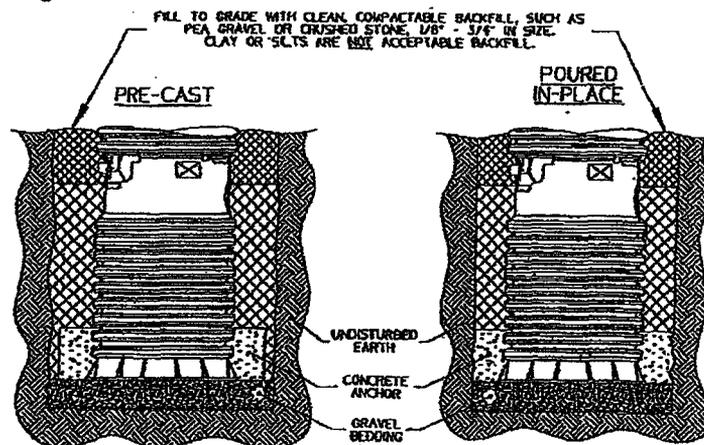

Failure to properly vent the tank will result in faulty operation and will void the warranty.

7. ELECTRICAL CONNECTION: (Supply panel to E/One Alarm Panel) Before proceeding verify that the service voltage is the same as the motor voltage shown on the name plate. An alarm device is to be installed in a conspicuous location where it can be readily seen by the home owner. An alarm device is required on every installation. There shall be no exceptions.

Wiring of supply panel and Environment One Alarm Panel shall be per figures 2a and 2b, Alarm Panel wiring diagrams and local codes.

8. ELECTRICAL CONNECTION: (Pump to Panel) (Fig. 4) The Environment One GP2000 grinder pump station is provided with a cable for connection between the station and the alarm panel, (The Supply Cable). The supply cable is shipped inside the station with a small portion fed

Figure 3

TYPICAL IN-GROUND SECTION VIEW

through the cable connector mounted on the wall of the fiberglass shroud. The supply cable, a six conductor tray cable, meets NEC requirements for direct burial as long as a minimum of 24" burial depth is maintained. Those portions of the cable which have less than 24" of cover must be contained in suitable conduit. This includes the vertical portion dropping to a 24" depth at the station and the length rising out of the ground at the control panel. **NOTE: Wiring must be installed per national and local codes. Conduit must enter panel from bottom and be sealed per NEC section 300.5 & 300.7.**

8a. Procedure for installing E/One supply cable:

1) Open the lid of the station. Locate the cable and the feed-thru connector on the wall of the shroud. If the station has a field joint and was delivered in

two pieces be sure the 2 halves of the EQD are securely assembled together. Loosen the nut on the connector and pull the supply cable out through the connector until it hits the crimped on stop feature on the cable, approximately 24" from the EQD. ****IMPORTANT: All but 24" of the cable must be pulled out of the station, and the portion of the cable between the EQD and the molded in cable breather should be secured in the hook provided to ensure that the pump functions properly. Do not leave the excess cable in the station.**

2) Retighten the nut. This connection must be tight or ground water will enter the station.

3) Feed the wire through the length of conduit (contractor provided) which will protect it until it is below the 24" burial depth.

4) Position the conduit vertically below the cable

connector along side of the station reaching down into the burial depth. Attach the small fiberglass guard (protective shroud) provided with the station to protect the exposed cable where it enters the station. Four self tapping screws are provided.

5) Run the cable underground, in a trench or tunnel, to the location of the E/One panel. Leave a 6-12 inch loop of cable at each end to allow for shifting and settling. Connections made at the panel are shown in the panel wiring diagram (Fig. 2a and 2b).

9. DEBRIS REMOVAL: Prior to start-up test procedure, the core must be removed and the incoming sewer line flushed to force all miscellaneous debris into the tank. Next, all liquid and debris must be removed. Once tank is clean, re-install the pump and proceed with the test.

10. TEST PROCEDURE: When the system is complete and ready for use, the following steps should be taken to verify proper installation and operation:

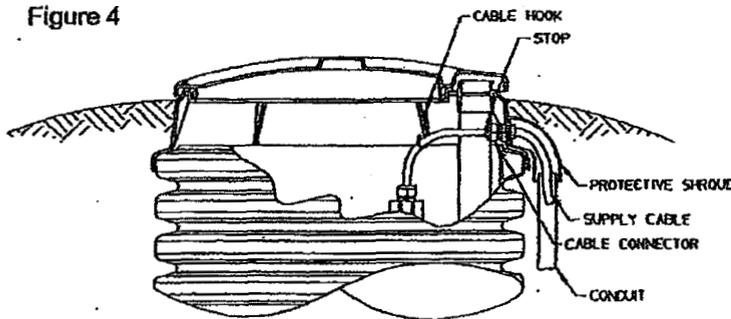

a) Make sure that the discharge shutoff valve is fully open. This valve must not be closed when the pump is operating. In some installations there may be a valve, or valves, at the street main that must also be open.

b) Turn ON the alarm power circuit breaker.

c) Fill tank with water until the alarm turns ON. Shut off water.

d) Turn ON pump power circuit breaker; the pump should turn on immediately. Within one minute the alarm will turn off. Within three minutes the pump will turn off.

Figure 4

Supply Cable Voltage Drop:

120 VAC Pump = .195 Volts per Foot of Cable
 240 VAC Pump = .098 Volts per Foot of Cable
 (Maximum Recommended Length = 100 Feet)

TYPICAL SUPPLY CABLE CONFIGURATION

Field Joint Assembly Instructions

IT IS EXTREMELY IMPORTANT THAT THE JOINT IS SEALED PROPERLY BEFORE BACKFILLING. EXCAVATING A UNIT FOR REPAIR IS VERY EXPENSIVE AND CAN BE EASILY AVOIDED BY USING PROPER CAUTION DURING THE FOLLOWING PROCEDURE.

Parts included in Field Joint Kit: Identify all parts before proceeding with installation.

- (16) 3/8-16 X 1-1/2 long screws
- (16) 3/8-16 Elastic Stop Nuts
- (32) Flat Washers
- (1) Length Sealant (Sika) Tape
- (1) Hole Punch
- (1) Vent Pipe Extension

1) Carefully clean and dry both accessway flanges with solvent. **IMPORTANT: Sealing surfaces must be dry to ensure the sealant adheres correctly.**

2) Starting at one hole of tank flange, apply two layers of Sika Tape around the inside half of the flange. Align the outside edge of the tape with the bolt circle. Move to the adjacent hole and apply one layer of Sika Tape around the outside of the flange. Align inside of tape with the bolt circle. Remove the backing paper as you lay the adhesive on the flange. **Do not stretch Sika tape during application, it may result in a leak.** The tape should overlap at the end by approximately 1/2 inch, as shown in Fig. 5a. If a section of Sika Tape is misapplied, the bad section may be cut out and replaced. Cut away the poorly laid portion cleanly with a knife and be sure to overlap the tape at each end about 1/2 inch.

3) Using the tool provided, punch a hole through the tape at each of the 16 existing bolt holes in the flange. Be careful to keep the exposed sealant

clean and dry.

4) Insert three of the sixteen 3/8-16 x 1-1/2" long bolts, with a flat washer, into the flange attached to the upper part of the accessway. These will act as guides while aligning the bolt pattern of the two flanges.

5) Support the upper accessway section a few inches over the tank with the green stripes on each lined up. Once aligned, lower the upper section onto the mating flange using the three bolts to guide it to the proper position. See Fig. 5b.

6) Insert the remaining 13 bolts with flat washers into the flanges. Place a flat washer and elastic stop nut on the end of each bolt, turning the nut on just enough to hold the washer in place.

7) Tighten up the bolts until the sealant begins to squeeze out from between the flanges. To ensure a consistent, sturdy seal tighten them in the following sequence: 1, 9; 5, 13; 3, 11; 7, 15; 2, 10; 4, 12; 6, 14; 8, 16. Always be sure to tighten

one bolt and then the bolt at the position 180° from it, see figure 1 for position numbers.

8) Using the same sequence as in step 7 tighten each bolt to 60 in-lbs. Visually inspect the joint, each bolt and each nut should have a flat washer between it and the flange, and a uniform amount of sealant should be protruding from the seam along the entire perimeter.

In the event that there are any voids in the sealant, the joint may leak. Take corrective actions if necessary and be sure that the joint is leak free before continuing.

9) Install the vent pipe extension piece which was shipped inside the upper piece of the accessway. Push the extension pipe into the bell mouth fitting on the pipe installed in the wet well tank. Be sure the pipe is seated correctly. Slide the top end of the extension pipe into the receptacle on the bottom of the lid.

Figure 5a

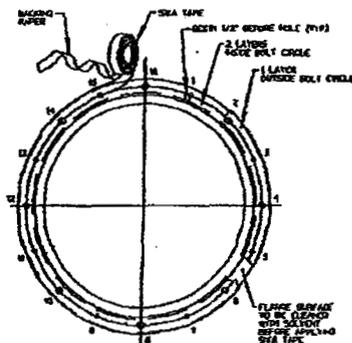

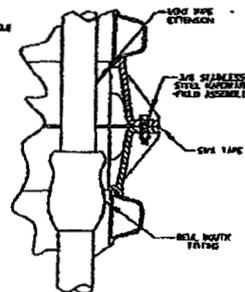

Figure 5b

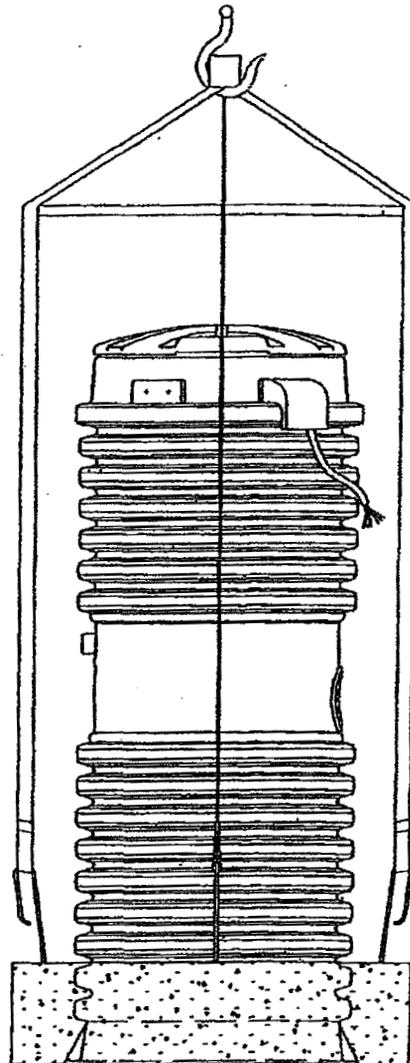

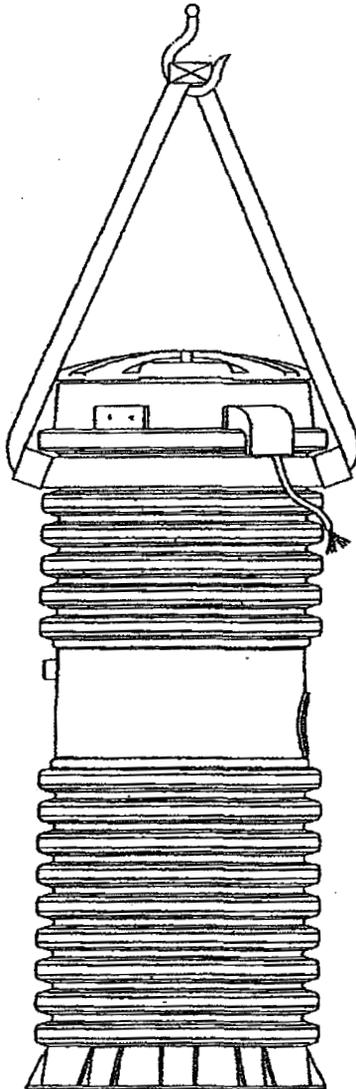

Lifting Instructions

FAILURE TO FOLLOW THESE INSTRUCTIONS COMPLETELY WILL VOID THE WARRANTY.

1. **Transporting unit to installation site:** Always lift a unit from the bottom for the purpose of transportation. The station should be received attached to a pallet for this purpose. Never roll a station or move it on its side.

2. **No Ballast (to be poured in place):** If the concrete anchor is to be poured while the station is in place lift the unit using 2 nylon straps wrapped around the accessway making a sling, as shown below. Keep station oriented vertically to avoid any damage. Only lift from the accessway to put unit in hole, not for moving any distance.

3. **Precast Ballast:** Never lift a station that has a ballast attached by any means except the rebar. The weight of the concrete will damage the station if you attempt to lift it from any part of the station.

E/One Series 2000 Grinder Pump Station Ballast Calculations

Any buried vessel that is submerged, or partially submerged, in water will be acted on by an upward buoyant force that attempts to return the vessel to a non-submerged state. The magnitude of this buoyant force is equal to the volume of the vessel that is submerged multiplied by the density of water. On most in-ground installations a ballast, or concrete anchor, of proper volume and weight is required to resist the buoyant force. The amount of ballast required for a given set of installation site conditions may be calculated as follows.

Installation Site Assumptions

1. Low water table – under worst case ground water or flood conditions only the wet well portions of the E/One grinder pump stations will be submerged.
2. Backfill materials are per E/One Installation Instructions (Models 2010, 2012, 2014, 2015 & 2016).
3. The consulting engineer should perform a soil test to determine if the assumptions that have been made are valid for the specific installation site. If the site conditions differ from these assumptions, then the consulting engineer must revise the calculations as shown in this document.

Physical Constants

1. Density of Water = 62.4 lb/cu ft
2. Density of Concrete = 150 lb/cu ft (in air)
3. Density of Concrete = 87.6 lb/cu ft (in water)
4. Density of Dry Compacted Backfill = 110 lb/cu ft
5. Density of Saturated Backfill = 70 lb/cu ft

Procedure

A. Determine The Buoyant Force Exerted On The Station

1. Determine the buoyant force that acts on the grinder pump station when the wet well is submerged in water.
2. Subtract the weight of the station from the buoyant force due to the submerged wet well to determine the net buoyant force acting on the station.

B. Determine The Ballast Force Exerted On The Station

1. Determine the ballast force applied to the station from the concrete, saturated soil and dry soil.

C. Subtract The Ballast Force From the Buoyant Force.

1. Note – if the installation site conditions are different from those listed above, the consulting engineer should recalculate the concrete ballast.

Ballast Calculations

The following calculations are to outline the areas used to determine the volumes of the different materials for the ballast. All sections referred to in the calculations are marked on the accompanying drawing.

E/One Series 2000 Grinder Pump Station Ballast Calculations

Sample Calculation GP 2010-93 Station

Volume of Station Wet Well = 13.2 cu ft
Station Weight = 270 lb
Station Height = 91.8 in

A. Buoyant Force

1. The buoyant force acting on the submerged GP 2010-93 is equal to the weight of the displaced water for the section of the tank that is submerged (wet well).

$$\begin{aligned}F_{\text{buoyant}} &= (\text{density of water})(\text{volume of 2010-93 wet well}) \\ &= (62.4 \text{ lb/cu. ft})(13.2 \text{ cu. ft}) \\ &= 823.7 \text{ lb}\end{aligned}$$

2. The net buoyant force acting on the station ($F_{\text{net-buoyant}}$) is equal to the buoyant force (F_{buoyant}) minus the weight of the grinder pump station.

$$\begin{aligned}F_{\text{net-buoyant}} &= 823.7 \text{ lb} - 270 \text{ lb} \\ &= 553.7 \text{ lb}\end{aligned}$$

B. Ballast Force

1. Determine the volume of concrete (if applicable) & soil (saturated and dry)

Section I: Used To Determine The Volume Of Concrete

$$\begin{aligned}\text{Area} &= (\text{Height})(\text{Width}) \\ &= (10'')[(36'' - 26.4'')/2] \\ &= 48\text{in}^2\end{aligned}$$

$$\begin{aligned}\text{Volume} &= (\text{Area})(\text{Average Perimeter of the cylinder}) \\ &= (48\text{in}^2)(\pi)((36'' + 26.4'')/2) \\ &= (4704.8 \text{ in}^3)(1/1728 \text{ ft}^3/\text{in}^3) \\ &= 2.7 \text{ ft}^3\end{aligned}$$

Section II: Used To Determine The Volume Of Saturated Soil

$$\begin{aligned}\text{Area} &= (\text{Height})(\text{Width}) \\ &= (28.5'')[(36'' - 26.4'')/2] \\ &= 136.8\text{in}^2\end{aligned}$$

$$\begin{aligned}\text{Volume} &= (\text{Area})(\text{Average Perimeter of the cylinder}) \\ &= (136.8\text{in}^2)(\pi)((36'' + 26.4'')/2) \\ &= (13408.8\text{in}^3)(1/1728 \text{ ft}^3/\text{in}^3) \\ &= 7.8 \text{ ft}^3\end{aligned}$$

E/One Series 2000 Grinder Pump Station Ballast Calculations

Sample Calculation GP 2010-93 Station Continued

Section III: Used To Determine The Volume Of Dry Soil

$$\begin{aligned} \text{Area} &= (\text{Height})(\text{Width}) \\ &= (50.3\text{in})[(36\text{in} - 26.4\text{in})/2] \\ &= 241.4\text{in}^2 \end{aligned}$$

$$\begin{aligned} \text{Volume} &= (\text{Area})(\text{Average Perimeter of the cylinder}) \\ &= (241.4\text{in}^2)(\pi)((36" + 26.4")/2) \\ &= (23661.5 \text{ in}^3)(1/1728 \text{ ft}^3/\text{in}^3) \\ &= 13.7 \text{ ft}^3 \end{aligned}$$

2. Determine the combined ballast

Ballast (total) = Ballast (concrete) + Ballast (saturated soil) + Ballast (dry soil)

$$\begin{aligned} &= (V_{\text{concrete}})(\text{density concrete in water}) + (V_{\text{soil}})(\text{density wet soil}) + (V_{\text{soil}})(\text{density dry soil}) \\ &= (2.7 \text{ cu ft})(87.6 \text{ lb/ft}^3) + (7.8 \text{ cu ft})(70 \text{ lb/ft}^3) + (13.7 \text{ cu ft})(110 \text{ lb/ft}^3) \\ &= 236.5 \text{ lb} + 546.0 \text{ lb} + 1507.0 \text{ lb} \\ &= 2289.5 \text{ lb} \end{aligned}$$

C. Subtract the buoyant force from the ballast force to determine the final condition

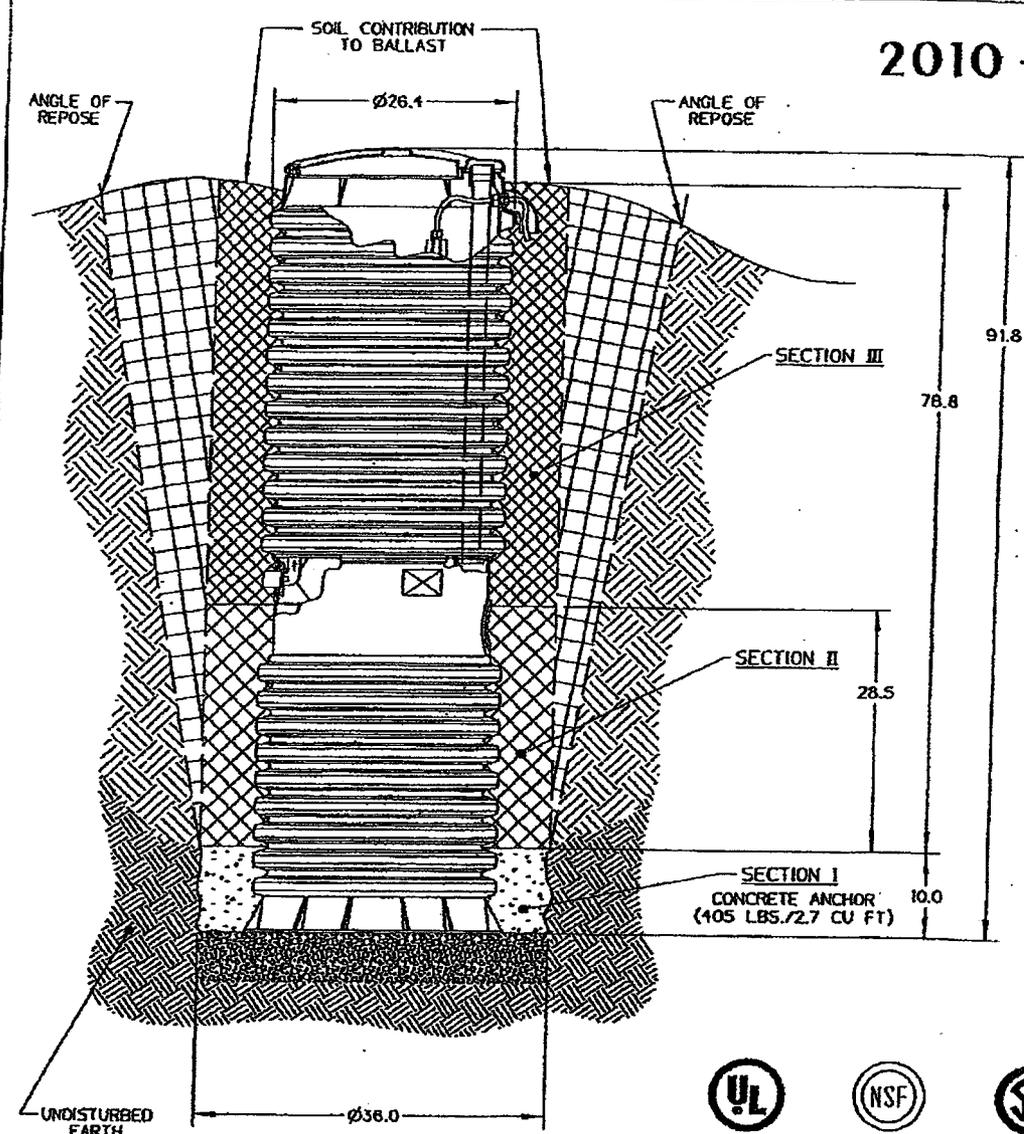

$$\begin{aligned} \text{Final Condition} &= \text{Ballast Force} - \text{Buoyant Force} \\ &= 2289.5 \text{ lb} - 553.7 \text{ lb} \\ &= 1735.8 \text{ lb} \end{aligned}$$

The approach outlined above may be used to calculate the ballast requirements listed below.

GP Model	Wet Well Volume (cu ft)	FNet-Buoyant (lb)	Station Weight (lb)	Fballast (lb)	Volume Concrete (cu ft)	Weight Concrete in Air (lb)
2010-61	13.2	582.7	241	1332.5	2.7	405
2010-74	13.2	569.7	254	1717.5	2.7	405

Adjusting the Height of a 2000 Series Grinder Pump Station

REMOVE EXISTING COVER ASSEMBLY (Fig. 6)

If your existing station has a welded-on cover shroud you will need the appropriate replacement cover kit (see Table 2, page 15).

1. Turn off all power to the grinder pump station.
2. Remove the tank lid and the electrical shroud.
3. Unplug the electrical quick disconnect (EQD) and remove the EQD from the supply cable. *Note: DO NOT CUT CABLE.* Loosen liquid tight cable connector and pull the supply cable out through the connector on the side of tank.

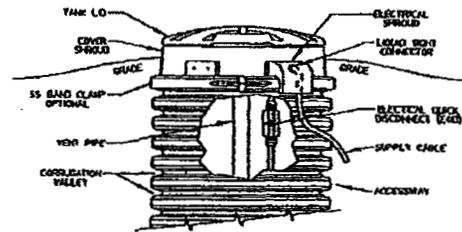

Figure 6

4. Tape the pump breather cable to the vent pipe in the tank.

5. Remove the soil around the tank, exposing three of the tank corrugations below grade. Use caution not to damage buried cable.

6. Remove existing cover shroud.

6a. Welded-on shroud (standard) - Using a hand saw, cut the tank in the valley between the two corrugations at grade, discard existing welded-on shroud and attached corrugations (*shroud is not to be reused*). *Caution: Be careful not to cut either the vent pipe or the pump breather cable.*

6b. Clamped-on shroud - Remove band clamp and cover shroud.

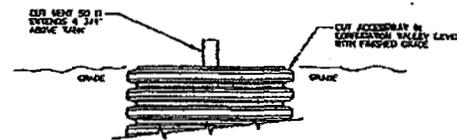

Figure 7

REDUCING STATION HEIGHT (Fig. 7)

7. Using a hand saw, cut the tank in the valley between the two corrugations at grade.

8. Cut vent pipe 4 3/4" above the cut made on the tank.

Proceed to step 16.

INCREASING STATION HEIGHT (Fig. 8 and Fig. 9)

9. Remove the soil around the tank exposing it 18" deeper than the extension being installed. For example, if you have a 2' extension (not including the coupler) you must dig down 3'6" minimum from grade; if you have a 4' extension (not including the coupler) you must dig down 5'6" minimum from grade. Use caution not to damage buried cable.

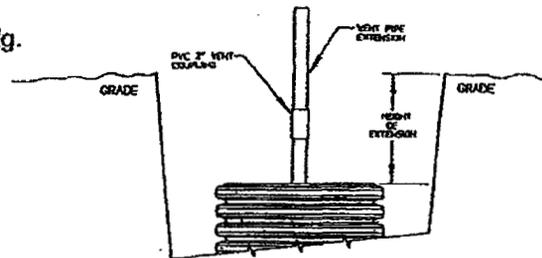

Figure 8

10. Measure from grade down 2' (for a 2' extension) or 4' (for a 4' extension) and mark accessway. Using a hand saw, cut the tank in the valley between the two corrugations that are closest to your mark. *Note: Make sure the welded-on shroud of the extension will be at grade level. Be sure you are not cutting into the wet well and you must have two corrugations below your cut, if there are less than two corrugations, this extension kit can not be used.*

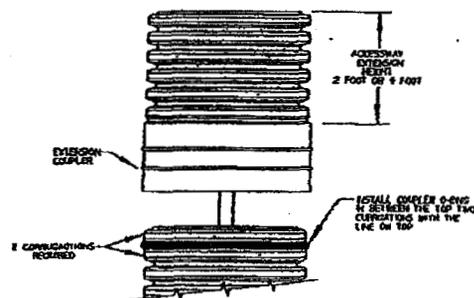

Figure 9

Caution: Be careful not to cut either the vent pipe or the pump breather cable.

11. Attach the vent pipe extension with the 2" vent coupling, bringing the vent well above grade.
12. Clean all dirt and debris from top four corrugations on tank. Install the 24" coupler O-ring on the tank between the top two corrugations with the white or yellow line facing out and on top.
13. Lube extension coupler and coupler O-ring with pipe lube or dish soap.
14. Manually press coupling evenly over lubricated O-ring. If additional force is needed, place a plywood cover over the accessway and apply gentle mechanical pressure to the coupler. *Note: Care must be used when pushing down on the coupler. Excessive force or impact may result in damage and leakage.*
15. Frequent visual inspections during installation must be performed to determine when the tank has fully engaged the coupler.

INSTALL REPLACEMENT COVER ASSEMBLY (Fig. 10)

16. Clean top corrugation on accessway extension and mating surface of replacement shroud with acetone.
17. Liberally apply the silicone sealer provided to the under side of the replacement shroud where it will come in contact with the accessway extension.
18. Lube wet well vent grommet and vent pipe extension with pipe lube, non-grit hand cleaner or dish soap and slide vent pipe through grommet until tank shroud seats to accessway.

19. Place SS band clamp around top corrugation and the replacement shroud. Tap with a mallet around clamp to help seat the clamp. Torque stud assembly on band clamp to a maximum 125 inlb.

20. Reinstall the supply cable, EQD**, tank lid and electrical shroud and tighten cable connector. (**See "EQD wiring order," Table 1)

21. Follow start-up procedures to ensure proper pump operation (you will find the start-up instructions in our service manual or the station installation instruction guide).

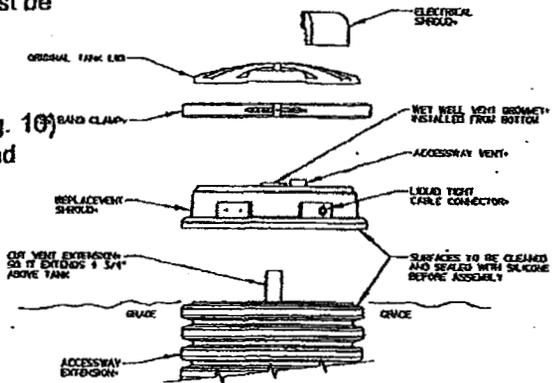

Figure 10

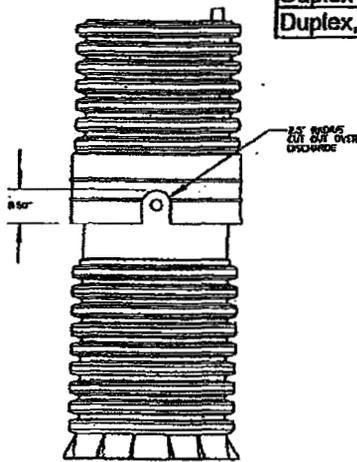

Figure 11

NOTE: IF EXISTING ACCESSWAY HAS ONLY 2 CORRUGATIONS (Fig. 11)

- If the coupler will not engage completely because the discharge piping is in the way, and it doesn't have a cut out, you will need to cut a slot in the coupler.

- Using a hand, reciprocating or hole saw, cut an arch in the coupler; the cut-out is not to exceed 5.50" tall or 5.00" wide.

Typical Specifications

D5430MV (210-440 Frame)

General

Furnish and install a quantity of 2 Fairbanks Morse Pump 4 Model D5430MV pull-up submersible pumping unit(s), UL Listed for explosion proof Class I, Division 1, Groups C and D hazardous locations. The pumps shall be clockwise rotation and connect to the discharge piping when lowered into place.

Conditions of Operation

Each pump shall provide the following hydraulic conditions:

Design Condition	Primary Condition	Secondary Condition
Capacity	<u>1060</u> GPM	_____ GPM
Total Dynamic Head	<u>172</u> TDH	_____ TDH
Maximum Speed	<u>1780</u> RPM	_____ RPM
Efficiency (min. hydraulic)	<u>20</u> %	_____ %
Minimum Wire-to-Water Efficiency	_____ %	_____ %
Shutoff Head	<u>227</u> Feet	_____ Feet
NPSHR	<u>16.5</u> Feet	_____ Feet
Minimum Spherical Solid Size	<u>3</u> Inches	_____ Inches

Minimum net positive suction head available (NPSHA) at the center line of the pump impeller is _____ feet at _____ GPM.

Liquid is _____ with a maximum temperature of _____ ° F.

Impeller

Impeller shall be matched to its constant velocity equalizing pressure volute, and be of the one-piece, single suction, enclosed two-vane (or bladeless), radial flow design with large openings, blunt well-rounded leading edges thick hydrofoil shape tapered to the trailing edge, and a circular flow pattern to prevent the accumulation of solids and stringy material. It is to be balanced and secured to the shaft by means of a key and fastener. Wiper vanes are not allowed. Impeller waterways and clearance between the pump's full diameter impeller periphery and volute cutwater shall be capable of passing a _____ solid sphere. Impeller shall be trimmed to specifically meet the conditions of operation [and be fitted with an axial (face-type), stainless steel wear ring with a minimum 300-350 Brinell hardness]. The impeller is adjustable by the use of shims to restore the wear ring clearance in the field.

Volute and Sliding Bracket

Volute is to be cast with extra thick walls made of close-grained cast iron conforming to ASTM A48, Class 30. It is to be one-piece, constant velocity equalizing pressure (except 4" 5435 which is specifically designed with a circular volute to minimize radial loads at low flows) with smooth fluid passages large enough to pass any size solid that can pass through the impeller. The volute shall have an integral tapered suction inlet area to

direct flow to the impeller eye and have a centerline flanged discharge. Volute discharge shall be minimum 4" diameter as measured on the inside diameter of the discharge flange opening. [Volute shall be fitted with an axial (face-type), stainless steel wearing ring with a minimum 410-484 Brinell hardness.]

The sliding bracket assembly shall be a part of the pumping unit constructed so that when lowered to the discharge base/elbow, the knifing action of the vertical metal-to-metal seal provides a self-cleaning, non-clogging, non-sparking UL Listed explosion-proof assembly.

Guide Rail/Bracket

Two rails shall be provided to guide the pump when being raised or lowered in the sump and mount on the discharge base/elbow. Single rail or cable guide systems are not acceptable. The rails shall align the pump with the discharge elbow as it is lowered into place. A ductile iron upper rail guide bracket shall be furnished to support and align the rails at the top of the sump. For rail lengths greater than 20 feet, a stainless steel intermediate rail guide bracket shall be included.

Discharge Base

The installation shall include a rigid discharge base-elbow to support the total weight of the pumping unit. The base is to be bolted directly to the floor with the 90 degree elbow having a 125 lb. ANSI flange discharging vertically.

Motor

Pump(s) shall be driven by completely sealed, electric submersible squirrel cage induction motors with a maximum NEMA nameplate rating of 2.5 HP, 1.15 service factor, 1780 RPM, 240 volts, 3-phase, 60 Hertz. The motor nameplate horsepower rating should exceed the brake horsepower requirements of the specified head and capacity conditions and have a minimum full load efficiency of _____ %.

Submersible equipment shall be UL Listed for Class I, Division 1, Groups C and D explosion-proof hazardous locations as defined by the National Electric Code. All electrical parts shall be housed in an air-filled (or oil-filled in 210 frame construction) cast iron, watertight enclosure which is sealed by the use of O-rings and rabbeted joints with extra large overlaps.

The stator-winding and lead shall be insulated with moisture-resistant Class F insulation for continuous duty in 40 degree C ambient. The motor shall be designed for continuous duty capable of ten (10) starts per hour. Automatic reset, normally closed thermal overloads shall be imbedded in the motor windings to provide overheating protection. Motor winding thermostats must be connected to an electric controller per local and state codes and the National Electric Code.

Motor shaft shall be one-piece, 416 stainless steel. Carbon steel shafts or shaft sleeves are not acceptable. Rotor is to be dynam-

ically balanced to meet NEMA vibration limits; all external hardware is to be stainless steel.

Cable leads are to enter at the top of the motor, and are to allow the cable-to-motor connection to be accomplished in the field without soldering. All power and control lead wires are to be double sealed as it enters the motor in such a manner that cable-wicking will not occur. This sealing system shall consist of a rubber grommet followed by epoxy that is high in adhesive qualities and has a low coefficient of expansion. Each cable wire is to have a small section of insulation removed to establish a window area of bare wire and each wire is to be untwisted and surrounded by epoxy potting material. A cable strain relief mechanism shall be an integral part of this sealing system. Cable sealing system shall be capable of withstanding an external pressure test of 1200 PSI as well as a cable assembly pull test as required by Underwriters Laboratories. Singular grommet or other similar sealing systems are not acceptable. Motor shall be supplied with _____ feet of multi-conductor type "SOW-A" or "W" power cable and control cable. Cable sizing shall conform to NEC specifications and be UL listed.

Power and control leads shall be terminated on a sealed terminal board. The terminal board and its bronze lugs shall be O-ring sealed.

Pump(s) shall be provided with two separate tandem-mounted mechanical seals to prevent the pumped liquid from entering the rotor/stator cavity area to ensure reliability of operation. The upper and lower seals are mounted to rotate in the same direction.

The upper seal is to be completely immersed in an oil bath and seals the oil chamber and the motor housing. The lower seal mating surfaces are to be immersed in the oil bath sealing the pump volute and the oil chamber. Each seal shall be held in contact by its own spring system and require neither maintenance nor adjustment, but shall be easily inspected and replaceable. The lower seal spring shall be protected from trash in the pumped fluid by a spring cover which extends over the entire length of the compressed seal spring. Pressure generated by the pump assists in sealing the mating surfaces of the lower seal.

Seal materials for the upper seal shall be stainless steel and Buna-N components, carbon rotating face and Ni-resist stationary face. Lower seal construction shall be stainless steel and

Buna-N components, carbon (silicon carbide on 400 & 440 frames) rotating face and ceramic (tungsten carbide on 400 & 440 frames) stationary face [silicon carbide rotating face against tungsten carbide stationary face].

Two moisture detection probes shall be installed so that they will detect moisture in either the seal or stator cavity measuring resistivity between the probes. They shall be wired internally to the control cable connection at the top of the motor. Float type devices located in the rotor/stator area or single probe-to-ground moisture detectors measuring continuity are not acceptable. O-ring sealed inspection plugs shall be provided in the mechanical seal oil chamber for ease in inspection, draining and filling of oil.

The pump shall rotate on a grease lubricated-for-life thrust bearing (oil lubricated in 210 frame) and oil lubricated radial bearing with a minimum L10 life of _____ hours. Lower shaft bearings shall be locked in place to prevent shaft movement and to take thrust loads.

A heavy-duty stainless steel lifting bail shall be included and be of adequate strength to lift the entire pump and motor assembly.

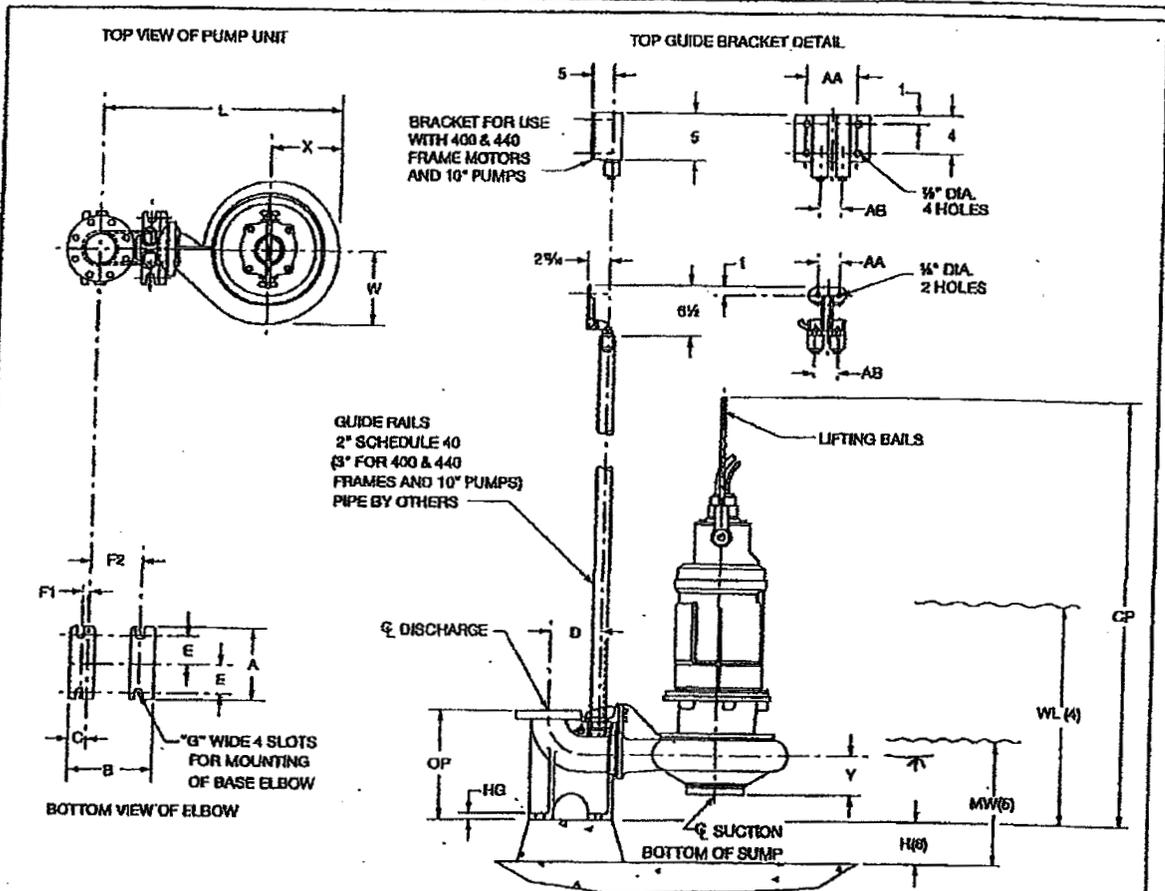

Quality Assurance

Pumps and motors are to be engineered, manufactured and assembled in the United States under a written Quality Assurance program. This written Quality Assurance program shall have been in effect for at least five (5) years, and include a written record of periodic internal and external audits to confirm compliance with UL Quality Assurance specifications.

ISO-9001 Certification

Pumps and motors shall be manufactured by ISO-9001 certified companies only.

Notes:

- (1) Ratings are for constant speed drivers. For use with variable frequency drives, contact Application Engineering.
- (2) Motor must have an operational moisture detection system or the warranty is voided.
- (3) Moisture detection system installed must be compatible with the two moisture detecting probes in the motor and the remaining pump control system.
- (4) Requirements of a complete moisture detection system are met by the installation of the standard pump controllers offered by Fairbanks Morse with the specified motor.
- (5) All thermostats incorporated in this motor are automatic reset type and are current limited to 3 amps @ 125 volts, 1.5 amps @ 230 volts and 0.75 amps @ 460 volts, in the control circuitry.
- (6) Thermal protectors will be installed in all motors regardless of horsepower or frame size.
- (7) Thermostats are normally closed and connected in series with the holding coil of the

- magnetic switch. When motor temperature reaches a certain preset point, the thermostat will open and cause the holding coil in the magnetic switch to open thereby cutting the power to the motor.
- (8) Thermostats connected to auxiliary signaling devices are available provided the device is approved by Fairbanks Morse.
- (9) Control cable has an outside diameter of .492 inches and includes five #18 wire, two for thermostats two for moisture detectors and one ground.
- (10) Need to add for threaded motor housing cover casting to accept conduit. Standard construction is without threads.
- (11) Refer to factory for 208 volt cable sizes not shown.
- (12) Refer to the Application & Reference section for definitions of duty ratings.

250, 320, 360, 365, 400 & 440 Frame Submersible Motors UL Listed Explosion Proof

Fairbanks Morse Pump submersible motors are manufactured to the highest standards. This rugged, heavy duty design and construction is an integral part of the complete submersible pump system.

The motor consists of a heavy duty cast iron frame which houses a silicon steel laminated stator, a reliable die-cast rotor and 416 stainless steel one-piece shaft in a high efficiency motor design.

Two separate tandem-mounted mechanical seals protect the motor from the pumped liquid in this critical area for added assurance of product reliability. Standard seals consist of the inner seal using carbon against Ni-resist faces, with the outer seal using carbon against ceramic faces (except 400 and 440 frame outer seal faces are standard silicon carbide on tungsten carbide). Optional seal material include silicon carbide against tungsten carbide, and other materials.

Electric power and control cable assemblies are epoxy sealed at the motor's entry point to prevent wicking and prevents moisture from entering the motor housing. Automatic-resetting thermostats are imbedded in the motor windings to protect from overheating.

The oil filled seal cavity and stator housing are fitted with dual moisture detectors to transmit a signal to a compatible controller when moisture is detected in this cavity. The seal cavity shall have two (2) [three (3) on the 440 frame] plugged ports for filling and draining the oil.

Motors are constructed with Class F insulation and rated with a 1.15 service factor and continuous duty at 40 degree C ambient temperature. The motor enclosure is sealed using O-rings, and has rabbet fits with extra large overlaps.

UL Listed Motors

Fairbanks Morse submersible motors are Listed by Underwriters Laboratories, having met stringent testing and design standards for operation in Class I, Division 1, Group C and D hazardous locations, and feature explosion-proof construction.

UL approves the design of all motor fits, joints and openings to ensure required flame paths and properly sealed for severe environments. All materials used in construction are tested to ensure their proper, intended function.

UL Listed motors must pass a series of stringent tests, including:

- Hydrostatic test of the complete motor without failure.
- External pressure test of the cable connection to 1200 psi without leakage.
- Separate cable assembly pull test for the smaller control cable and the power cable.
- Load test to confirm the function of the built-in thermostats. These tests require the motor to run submerged, non-

submerged, short time duty in air and non-submerged with cooling jacket.

- Motors must pass a surface temperature test confirming the motor frame surface temperatures do not exceed 160 degrees C under operating conditions. Locked rotor tests are run on the motor while operating submerged, non-submerged, short time duty in air and non-submerged with cooling jacket, and required to be below the minimum allowable skin temperature of 160 degrees C.

UL Listing requires detailed inspection of design and construction. UL issues product review instructions so that local UL inspectors can inspect the product on a regular basis. These inspections are done at a minimum quarterly interval at the Fairbanks Morse manufacturing facility to monitor machining and assembly procedures and include:

- Detailed-dimensional inspection of each motor component and the witness of the assembly of the complete motor.
- Witness of high voltage dielectric insulation test.
- Witness the no-load electrical running test.
- Review test logs of UL motors shipped since the previous inspection.
- Review calibration of motor test equipment.
- Check purchasing procedures for proper material control.

The stringent standards as defined and required by Underwriters Laboratories ensures a quality product.

Submersible Motor Cooling Jacket System

Fairbanks Morse features a unique motor cooling jacket design for use when required by the motor to run fully loaded non-submerged. The cooling system is completely internal to the pumping unit requiring no external hose, pipe or connections to an outside cooling source.

Located behind the pump impeller is a stainless steel, self-cleaning, rotating flow-control disc which virtually prevents any solids from entering and accumulating behind the impeller and in the cooling water jacket. This results in longer mechanical seal life, and a clean cooling system, to prevent service shutdown and greatly increasing pump life.

Cooling liquid enters the bottom of the water jacket and a baffle guides the liquid to move completely around the motor frame. A still tube located in the cooling water jacket allows for air to escape as the cooling liquid enters, filling the jacket to the top of the cooling jacket chamber completely surrounding the motor frame promoting excellent heat dissipation. Heated water exits through the still tube returning to the rotating flow control disk that acts as a heat exchange area behind the impeller. Pressure differentials between the rotating flow-control disc and pump volute forces the necessary water circulation in and around the motor.

Units are UL Listed, explosion-proof, for Class 1, Division 1, Groups C & D and manufactured by Fairbanks Morse in our dedicated Kansas City, Kansas manufacturing facility ensuring compatibility, quality assurance, and reliability of the complete unit.

Heavy cast iron motor housing, silicon steel laminations, centrifugally die-cast rotor matched to the stator for high efficiency. Constructed with Class "F" insulation and rated with a 1.15 service factor and continuous duty at 40 degree C ambient temperatures, air filled.

High motor and hydraulic (wire-to-water) efficiencies ensure low operating costs.

CABLE

Power and control cable are UL Listed and MSA approved.

ELECTRICAL CONNECTION

Double-seal system with strain relief, consisting of rubber grommet followed by epoxy. Individual wires have insulation removed and epoxy potted to prevent wicking into the motor.

Wires are terminated with connectors secured to bronze lugs on the O-ring sealed terminal board. Stator and control leads from the motor are attached to the underside of the lugs.

SHAFT

Large diameter one-piece 416 stainless steel, precision machined over its entire length to ensure a tight fit of the impeller and rotor to the shaft.

MECHANICAL SEALS

Two separate seals, tandem mounted to protect the motor from the pumped liquid. Upper seal uses carbon against Ni-resist faces and the lower seal uses carbon against ceramic faces as standard. The lower seal also incorporates a protective cup to prevent trash, grit, or stringy material from interfering with the mechanical seal. Optional silicon carbide against tungsten carbide seal faces are also available to provide added assurance of product reliability.

STAINLESS STEEL BOLTING

External bolting is stainless steel as standard for ease of maintenance.

IMPELLER

Solids-handling enclosed radial flow, two-vane, or bladeless design, having blunt well rounded leading edges and thick hydrofoil shape to pass large solids and stringy material. One-piece cast impellers are designed for circular flow and matched to the equalizing pressure, constant-velocity thick well volute. Impeller is trimmed to meet conditions of operation.

WEAR RINGS

Impeller and volute may be fitted with axial wear rings of hardened 300-350 Bhn or higher stainless steel.

SOLIDS PASSING

Spherical solids which pass through the impeller and volute passageways can also pass between the volute cutwater and a full diameter impeller.

PULL-UP SYSTEM

Two rails mounted on the discharge base/elbow provide a guide to the pump when raised or lowered in the sump.

THERMOSTATS

Embedded in the motor windings to protect from overheating. These devices are reset automatically. Excessive heat will cause the normally closed contact to open, stopping the motor.

BEARING LIFE

Grease lubricated thrust bearing and radial bearing with an L10 bearing life of 50,000 hours at BEP. For higher bearing load applications, optional bearing construction is available. Optional RTD available for the thrust bearing.

TWO MOISTURE DETECTORS

Detect moisture entering the oil cavity or stator housing and send a signal to a compatible controller.

OIL INSPECTION PLUGS

Convenient, removable O-ring sealed plugs for inspection and ease of changing oil in the mechanical seal chamber.

DISCHARGE BASE/ELBOW

Rigid, heavy-duty cast iron, with 125 lb. ANSI flange supports the total weight of the pumping unit.

SLIDING BRACKET ASSEMBLY

Non-sparking, UL Listed explosion-proof bronze. Constructed so when lowered onto the discharge base/elbow, a knifing action of the vertical metal-to-metal, self-cleaning non-clogging connection is secured.

DRAFT

Gary Edwards
Town Manager
155 N. Tegner, Suite A
Wickenburg Arizona 85390

Dear Mr. Edwards:

On _____, Wickenburg Ranch Wastewater, LLC filed with the Arizona Corporation Commission ("Commission") an application for authority to provide sewer service to Wickenburg Ranch in the area (see attached map and legal description). The Commission has designated this matter as docket no. _____.

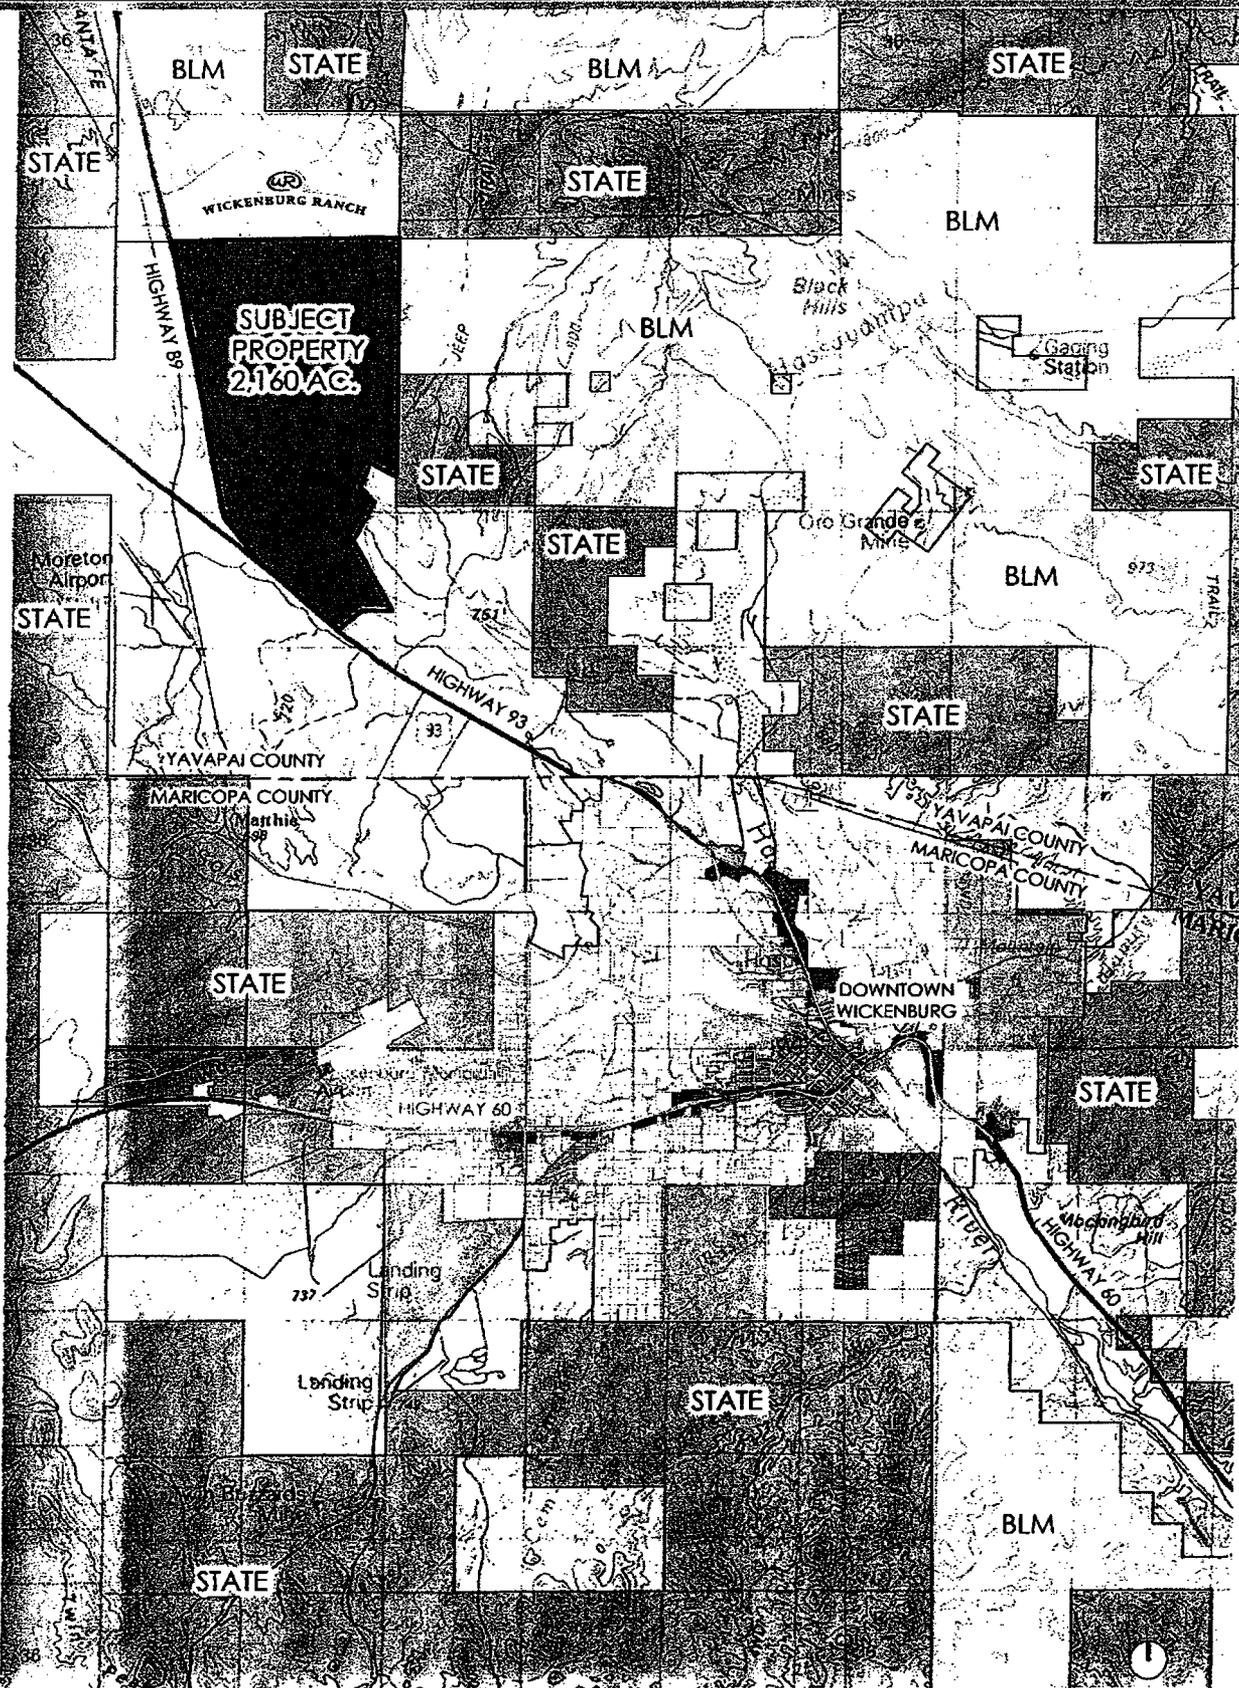

The application is available for inspection during regular business hours at the offices of the Commission at 1200 West Washington Street, Phoenix, Arizona 85007, and at Wickenburg Ranch Wastewater, LLC, c/o M3 Companies, 4222 East Camelback Road, Suite H-100, Phoenix, Arizona 85018. If you have any questions about this application, or if you would like to obtain a copy of the application, you may contact Wickenburg Ranch management, whose contact information is below:

William I. Brownlee
Manager, The M3 Companies LLC
4222 East Camelback Road
Suite H-100
Phoenix, Arizona 85018
602-386-1307

You may also contact the Consumer Services Section of the Commission at 1200 West Washington Street, Phoenix, Arizona 85007 or call 1-800-222-7000.

Respectfully,

William I. Brownlee

Service Area Legal Description
Parcel No 1

All that portion of Sections 7, 8, 17 and 18, Township 8 North, Range 5 West of the Gila and Salt River Base and Meridian, Yavapai County, Arizona, more particularly described as follows:

BEGINNING at the Northeast Corner of said Section 7, point also being the Northwest corner of said Section 8;

Thence North 89 degrees 58 minutes 15 seconds East, 639.21 feet along the North line of said Section 8;

Thence South 17 degrees 27 minutes 50 seconds East, 913.00 feet;

Thence South 20 degrees 28 minutes 12 seconds East, 802.26 feet;

Thence South 39 degrees 20 minutes 49 seconds East, 1119.67 feet;

Thence South 17 degrees 52 minutes 53 seconds East, 402.20 feet;

Thence South 12 degrees 51 minutes 26 seconds West, 249.52 feet;

Thence South 01 degrees 07 minutes 38 seconds West, 411.79 feet;

Thence South 23 degrees 07 minutes 02 seconds East, 236.98 feet;

Thence South 38 degrees 58 minutes 00 seconds East, 329.01 feet;

Thence South 54 degrees 59 minutes 00 seconds East, 1101.16 feet;

Thence South 13 degrees 43 minutes 16 seconds West, 1068.17 feet to a point from which the South Quarter corner of said Section 8 bears North 34 degrees 30 minutes 42 seconds West, 471.28 feet;

Thence North 85 degrees 04 minutes 37 seconds West, 417.23 feet;

Thence North 74 degrees 12 minutes 30 seconds West, 384.82 feet;

Thence North 85 degrees 59 minutes 26 seconds West, 252.71 feet;

Thence South 87 degrees 41 minutes 42 seconds West, 678.82 feet;

Thence North 78 degrees 08 minutes 06 seconds West, 799.05 feet;

Thence North 69 degrees 14 minutes 01 seconds West, 601.69 feet to a point from which the corner common to said Sections 7, 8, 17 and 18, bears South 50 degrees 33 minutes 43 seconds East, 192.62 feet;

Thence South 06 degrees 07 minutes 06 seconds West, 642.74 feet;

Thence South 23 degrees 44 minutes 04 seconds East, 565.53 feet;

Thence South 05 degrees 31 minutes 57 seconds West, 817.18 feet;

Thence South 11 degrees 54 minutes 27 seconds West, 1042.85 feet;

Thence South 74 degrees 13 minutes 56 seconds West, 437.84 feet;

Thence South 82 degrees 21 minutes 15 seconds West, 62.17 feet;

Thence North 78 degrees 05 minutes 33 seconds West, 964.58 feet to a point on the East right-of-way of United States Highway 89;

Thence North 10 degrees 49 minutes 30 seconds West, 7191.87 feet along the said East right-of-way to a point on a tangent curve concave to the West and having a radius of 11,510.00 feet and a center point which bears South 79 degrees 06 minutes 51 seconds West;

Thence continuing along said curve through a central angle of 02 degrees 43 minutes 45 seconds and an arc length of 548.27 feet;
Thence North 13 degrees 31 minutes 56 seconds West, 496.30 feet along the East right-of-way to a point on the North line of said Section 7;
Thence South 89 degrees 59 minutes 56 seconds East, 925.02 feet along the said North line to the North Quarter corner of said Section 7;
Thence South 89 degrees 56 minutes 00 seconds East, 2368.78 feet to the Northeast corner of said Section 7 and the POINT OF BEGINNING.

EXCEPTING there from that portion of the Southeast quarter of the Northwest (SE ¼, NW ¼) of Section 7, Township 8 North, Range 5 West of the Gila and Salt River Base and Meridian, Yavapai County, Arizona, conveyed to the State of Arizona in Deed recorded in Book 4159 of Official Records, Page 828, records of Yavapai County, Arizona, described as follows:

COMMENCING at an aluminum cap marking the West quarter corner of said Section 7 from which a rebar marking the East quarter corner of said Section 7 bears South 89 degrees 06 minutes 17 seconds East, 5288.84 feet;
Thence along the East-West mid section line of said Section 7, South 89 degrees 06 minutes 17 seconds East 2483.49 feet to the existing right of way centerline of State Route 89 (Wickenburg-Prescott Highway);
Thence along said existing right of way centerline of State Route 89 North 10 degrees 18 minutes 52 seconds West 144.20 feet;
Thence North 79 degrees 41 minutes 08 seconds East 50.00 feet to the said existing Easterly right of way line of said State Route 89 and the Point of Beginning;
Thence South 55 degrees 18 minutes 52 seconds East 29.70 feet;
Thence South 10 degrees 18 minutes 52 seconds East, 50.00 feet;
Thence South 33 degrees 21 minutes 12 seconds West 30.41 feet to said existing Easterly right of way line of said State Route 89;
Thence along said existing Easterly right of way line of State Route 89, North 10 degrees 18 minutes 52 seconds West 93.00 feet to the Point of Beginning.

AND EXCEPTING that portion of the Southwest quarter of the Southeast quarter (SW ¼, Se ¼) of said Section 7, Township 8 North, Range 5 West of the Gila and Salt River Base and Meridian, Yavapai County, Arizona, described as follows;

COMMENCING at a rebar marking the South quarter corner of said Section 7 from which a marked stone marking the Southeast corner of said Section 7 bears South 89 degrees 32 minutes 23 seconds East 2643.46 feet;
Thence along the South line of said Section 7 South 89 degrees 32 minutes 23 seconds East 347.08 feet to said existing right of way centerline of State Route 89;
Thence along said existing right of way centerline of State Route 89 North 10 degrees 18 minutes 52 seconds West 898.02 feet;
Thence North 79 degrees 41 minutes 08 seconds East 50.00 feet to the existing right of way line State Route 89 and the Point of Beginning;
Thence South 55 degrees 18 minutes 52 seconds East 7.07 feet;
Thence South 10 degrees 18 minutes 52 seconds East 76.00 feet;

Thence South 34 degrees 41 minutes 08 seconds West 7.07 feet to said existing Easterly right of way line of State Route 89;
Thence along said existing Easterly right of way line of State Route 89 North 10 degrees 18 minutes 52 seconds West 86.00 feet to the Point of Beginning;

AND EXCEPTING that portion of the Northwest quarter of the Northeast quarter (NW ¼, NE ¼) of Section 18, Township 8 North, Range 5 West of the Gila and Salt River Base and Meridian, Yavapai County, Arizona, conveyed to the State of Arizona in Deed recorded in Book 4159 of Official Records, Page 828, records of Yavapai County,

Arizona, described as follows:

COMMENCING at a marked stone marking the Northeast corner of said Section 18 from which a rebar marking the North quarter corner of said Section 18 bears North 89 degrees 35 minutes 35 seconds West 2643.46 feet;

Thence along the North line of said Section 18, North 89 degrees 35 minutes 33 seconds West, 2296.38 feet to said existing right of way centerline of State Route 89;

Thence along said existing right of way centerline of said State Route 89, South 10 degrees 18 minutes 52 seconds East 616.98 feet;

Thence North 79 degrees 41 minutes 08 seconds East 50.00 feet to said existing Easterly right of way line of said State Route 89 and the Point of beginning;

Thence South 55 degrees 18 minutes 52 seconds East 24.04 feet;

Thence South 10 degrees 18 minutes 52 seconds East 20.00 feet;

Thence South 34 degrees 41 minutes 08 seconds West 24.04 feet to said existing right of way line of said State Route 89;

Thence along said existing Easterly right of way line of State Route 89, North 10 degrees 18 minutes 52 seconds West 54.00 feet to the Point of Beginning;

AND EXCEPT all minerals and all uranium, thorium, or any other material which is or may be determined to be peculiarly essential to the production of fissionable materials, whether or not of commercial value, as reserved in Patent from United States of America, recorded in Book 192 of Deeds, Page 423 and in Book 10 of Official Records, Page 406, records of Yavapai County, Arizona.

(Reservoir Site 2008)

AND EXCEPT that portion of the Northwest quarter of said Section 7, Township 8 North, Range 5 West of the Gila and Salt River Base and Meridian, Yavapai County, Arizona, more particularly described as follows:

COMMENCING at the North quarter corner of said Section 7;

Thence North 89 degrees 59 minutes 56 seconds West along the North line of said Northwest quarter a distance of 476.65 feet to the TRUE POINT OF BEGINNING;

Thence South 00 degrees 00 minutes 00 seconds East, leaving said North line a distance of 193.27 feet;

Thence South 75 degrees 41 minutes 21 seconds East a distance of 318.69 feet to a point on a curve the radius of which bears South 45 degrees 19 minutes 13 seconds East a distance of 42.50 feet;

Thence Southerly along the arc of said curve through a central angle of 41 degrees 35 minutes 32 seconds a distance of 30.85 feet;

Thence North 75 degrees 18 minutes 54 seconds West, leaving said curve a distance of 308.93 feet;

Thence South 16 degrees 29 minutes 36 seconds West a distance of 65.66 feet;

Thence South 00 degrees 00 minutes 00 seconds East a distance of 21.39 feet to the TRUE POINT OF BEGINNING;

Thence continuing South 00 degrees 00 minutes 00 seconds East a distance of 224.22 feet;

Thence South 76 degrees 45 minutes 28 seconds West a distance of 141.74 feet;

Thence North 58 degrees 42 minutes 37 seconds West a distance of 98.50 feet;

Thence North 13 degrees 31 minutes 56 seconds West a distance of 211.40 feet;

Thence North 90 degrees 00 minutes 00 seconds East a distance of 271.61 feet, to the TRUE POINT OF BEGINNING.

(Well 4 site 2008)

AND EXCEPT That portion of the Southeast quarter of Section 7, of Township 8 North, Range 5 West of the Gila and Salt River Base and Meridian, Yavapai County, Arizona, more particularly described as follows:

COMMENCING at the East quarter Corner of said Section 7, from which the Southeast corner of said Section 7, bears South 00 degrees 00 minutes 08 seconds West a distance of 2641.48 feet;

Thence South 89 degrees 06 minutes 17 seconds East along the North line of said Southeast quarter a distance of 2468.03 feet;

Thence South 00 degrees 53 minutes 43 seconds West leaving said North line a distance of 663.59 feet to the TRUE POINT OF BEGINNING;

Thence North 83 degrees 04 minutes 35 seconds East a distance of 76.74 feet, to a point on a curve the radius of which bears South 83 degrees 04 minutes 35 seconds West a distance of 784.00 feet;

Thence Southerly along the arc of said curve through a central angle of 09 degrees 11 minutes 41 seconds a distance of 125.82 feet to a point of tangency;

Thence South 02 degrees 16 minutes 16 seconds West a distance of 28.78 feet;

Thence North 87 degrees 43 minutes 44 seconds West a distance of 52.84 feet;

Thence North 10 degrees 49 minutes 30 seconds West a distance of 145.58 feet to the TRUE POINT OF BEGINNING.

Service Area Legal Description
Parcel No 2

All that portion of Sections 7, 8, 17, 18, 19, 20 and 21, Township 8 North, Range 5 West of the Gila and Salt River Base and Meridian, Yavapai County, Arizona, more particularly described as follows:

Commencing at the Northwest Corner of said Section 8, point also being the Northeast corner of said Section 7;

Thence North 89 degrees 58 minutes 15 seconds East, 639.21 feet along the North line of said Section 8 to the POINT OF BEGINNING;

Thence continuing North 89 degrees 58 minutes 15 seconds East, 4633.71 feet to the Northeast corner of said Section 8;

Thence South 00 degrees 05 minutes 03 seconds East, 2642.77 feet to the East quarter corner of said Section 8;

Thence South 00 degrees 01 minutes 00 seconds East, 2643.56 feet to the South east corner of said Section 8, point also being the northeast corner of said Section 17;

Thence South 00 degrees 00 minutes 39 seconds East, 3940.42 feet;

Thence North 63 degrees 02 minutes 31 seconds West, 1071.34 feet;

Thence North 20 degrees 06 minutes 58 seconds East, 432.62 feet;

Thence North 42 degrees 25 minutes 18 seconds West, 173.13 feet;

Thence North 07 degrees 17 minutes 47 seconds West, 783.65 feet;

Thence North 05 degrees 50 minutes 06 seconds West, 1558.35 feet;

Thence North 36 degrees 37 minutes 10 seconds West, 2501.12 feet;

Thence South 10 degrees 26 minutes 30 seconds East, 1885.29 feet;

Thence South 12 degrees 35 minutes 38 seconds East, 1051.68 feet;

Thence South 61 degrees 23 minutes 09 seconds East, 972.18 feet;

Thence North 62 degrees 23 minutes 49 seconds East, 135.52 feet;

Thence South 49 degrees 22 minutes 53 seconds East, 66.84 feet;

Thence South 01 degrees 17 minutes 16 seconds East, 176.23 feet;

Thence South 23 degrees 00 minutes 31 seconds West, 142.25 feet;

Thence South 20 degrees 51 minutes 27 seconds West, 70.97 feet;

Thence South 15 degrees 04 minutes 21 seconds West, 231.46 feet;

Thence South 06 degrees 02 minutes 25 seconds West, 150.25 feet;

Thence South 03 degrees 24 minutes 22 seconds East, 175.23 feet;

Thence South 35 degrees 59 minutes 53 seconds East, 291.77 feet;

Thence South 61 degrees 34 minutes 03 seconds East, 135.59 feet;

Thence North 86 degrees 33 minutes 04 seconds East, 303.77 feet;

Thence North 64 degrees 28 minutes 47 seconds East, 159.98 feet;

Thence North 20 degrees 06 minutes 58 seconds East, 540.85 feet;

Thence South 39 degrees 08 minutes 40 seconds East, 821.85 feet;

Thence South 29 degrees 01 minutes 10 seconds West, 1653.95 feet;

Thence South 29 degrees 47 minutes 42 seconds East, 3182.75 feet to a point on the line common to said Sections 20 and 21;

Thence South 89 degrees 58 minutes 04 seconds West, 1096.09 feet;

Thence South 51 degrees 09 minutes 49 seconds West, 1161.14 feet to a point on the East right-of-way of United States Highway 89 and a point on a non-tangent curve to the northeast and having a radius of 21,243.59 feet and a center point which bears North 38 degrees 50 minutes 07 seconds East;
 Thence continuing along said curve through a central angle of 03 degrees 26 minutes 23 seconds and an arc length of 1275.14 feet;
 Thence North 47 degrees 44 minutes 17 seconds West, 2961.13 feet along said right-of-way to a point from which the section corner common to Sections 17, 18, 19 and 20 bears North 03 degrees 37 minutes 04 seconds West, 1875.90 feet;
 Thence North 38 degrees 48 minutes 50 seconds West, 1374.84 feet along said right-of-way to a point on a tangent curve to the Northeast and having a radius of 2810.00 feet and a center point which bears North 51 degrees 09 minutes 42 seconds East;
 Thence continuing along said curve through a central angle of 28 degrees 02 minutes 55 seconds and an arc length of 1375.61 feet;
 Thence North 10 degrees 49 minutes 30 seconds West, 2087.00 feet along said right-of-way;
 Thence South 78 degrees 05 minutes 33 seconds East, 964.58 feet;
 Thence North 82 degrees 21 minutes 15 seconds East, 62.17 feet;
 Thence North 74 degrees 13 minutes 56 seconds East, 437.84 feet to a point from which the East Quarter corner of said Section 18, bears North 44 degrees 24 minutes 42 seconds East, 402.14 feet;
 Thence North 11 degrees 54 minutes 27 seconds East, 1042.85 feet;
 Thence North 05 degrees 31 minutes 57 seconds East, 817.18 feet;
 Thence North 23 degrees 44 minutes 04 seconds West, 565.53 feet;
 Thence North 06 degrees 07 minutes 06 seconds East, 642.74 feet to a point from which the Section corner common to Sections 7, 8, 17 and 18, bears South 50 degrees 33 minutes 43 seconds East, 192.62 feet;
 Thence South 69 degrees 14 minutes 01 seconds East, 601.69 feet;
 Thence South 78 degrees 08 minutes 06 minutes East, 799.05 feet;
 Thence North 87 degrees 41 minutes 42 seconds East, 678.82 feet;
 Thence South 85 degrees 59 minutes 26 seconds East, 252.71 feet;
 Thence South 74 degrees 12 minutes 30 seconds East, 384.82 feet;
 Thence South 85 degrees 04 minutes 37 seconds East, 417.23 feet to a point from which the South Quarter corner of said Section 8, bears North 34 degrees 30 minutes 42 seconds West, 471.28 feet;
 Thence North 13 degrees 43 minutes 16 seconds East, 1068.17 feet;
 Thence North 54 degrees 59 minutes 00 seconds West, 1101.16 feet;
 Thence North 38 degrees 58 minutes 00 seconds West, 329.01 feet;
 Thence North 23 degrees 07 minutes 02 seconds West, 236.98 feet;
 Thence North 01 degrees 07 minutes 38 seconds East, 411.79 feet;
 Thence North 12 degrees 51 minutes 26 seconds East, 249.52 feet;
 Thence North 17 degrees 52 minutes 53 seconds West, 402.20 feet;
 Thence North 39 degrees 20 minutes 49 seconds West, 1119.67 feet;
 Thence North 20 degrees 28 minutes 12 seconds West, 802.26 feet;
 Thence North 17 degrees 27 minutes 50 seconds West, 913.00 feet to the POINT OF BEGINNING.

EXCEPTING there from that portion of the West half of the Southeast quarter (W1/2 SE 1/4) of Section 18, Township 8 North, Range 5 West of the Gila and Salt River Base and Meridian, Yavapai County, Arizona, conveyed to the State of Arizona in Deed recorded in Book 4159 of Official Records, Page 828, records of Yavapai County, Arizona, described as follows:

COMMENCING at a rebar marking the West quarter corner of said Section 18 being North 89 degrees 29 minutes 14 seconds West 5285.91 feet from the unmonumented East quarter corner of said Section 18 said unmonumented corner being South 00 degrees 33 minutes 47 seconds West 65.85 feet from a stone marked "1/4 W.C." marking the witness monument to said East quarter corner;

Thence along the East-West mid section line of said Section 18 South 89 degrees 29 minutes 14 seconds East 3495.54 feet to said existing right of way centerline of State Route 89;

Thence along said existing right of way centerline of State Route 89 South 10 degrees 18 minutes 52 seconds East 1324.17 feet;

Thence North 79 degrees 41 minutes 08 seconds East 50.00 feet to said existing Easterly right of way line of State Route 89 and the Point of Beginning;

Thence North 34 degrees 41 minutes 08 seconds East 70.71 feet;

Thence North 10 degrees 18 minutes 52 seconds West 97.00 feet;

Thence South 79 degrees 41 minutes 08 seconds West 50.00 feet to said existing Easterly right of way line of State Route 89;

Thence along existing right of way line of State Route 89 South 10 degrees 18 minutes 52 seconds East 147.00 feet to the Point of Beginning;

AND EXCEPTING that portion of the Northeast quarter of the Northeast quarter (NE 1/4 NE 1/4) of Section 19, Township 8 North, Range 5 West of the Gila and Salt River Base and Meridian, Yavapai County, Arizona, conveyed to the State of Arizona in Deed recorded in Book 4159 of Official Records, Page 828, records of Yavapai County, Arizona, described as follows;

COMMENCING at a 1/2 inch stainless steel rod with an aluminum cap marking the Northeast corner of said Section 19 from which a marked stone marking the North quarter corner of said Section 19 bears North 89 degrees 27 minutes 57 seconds West, 2641.50 feet;

Thence along the North line of said Section 19 North 89 degrees 27 minutes 57 seconds West 1249.77 feet to said existing right of way centerline of State Route 89;

Thence along said existing right of way centerline of State Route 89, from a local tangent bearing of South 10 degrees 18 minutes 52 seconds East, along a curve to the left, having a radius of 2865.00 feet a length of 748.40 feet;

Thence North 55 degrees 53 minutes 23 seconds East 50.00 feet to said Easterly right of way line of said State Route 89 and the Point of Beginning;

Thence North 11 degrees 48 minutes 05 seconds East 37.76 feet;

Thence North 33 degrees 21 minutes 37 seconds West 20.44 feet;

Thence North 79 degrees 36 minutes 45 seconds West, 37.09 feet to said existing Easterly right of way line of State Route 89;

Thence along said existing Easterly right of way line of State Route 89 from a local tangent bearing of South 32 degrees 37 minutes 50 seconds East along a curve to the left having a radius of 2815.00 feet, length of 72.71 feet to the Point of Beginning;

AND EXCEPT all minerals and all uranium, thorium, or any other material which is or may be determined to be peculiarly essential to the production of fissionable materials, whether or not of commercial value, as reserved in Patent from United States of America, recorded in Book 192 of Deeds, Page 423 and in Book 10 of Official Records, Page 406, records of Yavapai County, Arizona.

(WWTP 2008)

AND EXCEPT That portion of the Southeast quarter of Section 17, Township 8 North, Range 5 West of the Gila and Salt River Base and Meridian, Yavapai County, Arizona, more particularly described as follows:

COMMENCING at the Southeast corner of said Section 17;
Thence North 89 degrees 55 minutes 20 seconds West along the South line of said southeast quarter of Section 17, a distance of 1621.90 feet;
Thence North 00 degrees 04 minutes 40 seconds East leaving said South line a distance of 309.24 feet to the TRUE POINT OF BEGINNING;
Thence South 90 degrees 00 minutes 00 seconds West a distance of 424.78 feet;
Thence North 00 degrees 00 minutes 00 seconds East a distance of 164.42 feet;
Thence North 90 degrees 00 minutes 00 seconds East a distance of 424.78 feet;
Thence South 00 degrees 00 minutes 00 seconds East a distance of 164.42 feet to the TRUE POINT OF BEGINNING.

(Lift Station Site 2008)

AND EXCEPT That portion of the Northeast quarter of Section 20, Township 8 North, Range 5 West of the Gila and Salt River Base and Meridian, Yavapai County, Arizona, more particularly described as follows:

COMMENCING at the East quarter corner of said Section 20;
Thence South 89 degrees 58 minutes 26 seconds West along the South line of said Northeast quarter, a distance of 2352.09 feet;
Thence North 00 degrees 01 minutes 34 seconds West leaving said South line a distance of 680.23 feet to the TRUE POINT OF BEGINNING;
Thence South 87 degrees 44 minutes 44 seconds West distance of 60.00 feet;
Thence North 02 degrees 15 minutes 16 seconds West a distance of 85.00 feet;
Thence North 87 degrees 44 minutes 44 seconds East a distance of 60.00 feet;
Thence South 02 degrees 15 minutes 16 seconds East a distance of 85.00 feet to the TRUE POINT OF BEGINNING.

Parcel 2
WR Wastewater Service Area
3-17-09

Wickenburg Ranch Wastewater, LLC
Service Area Legal Description
Parcel No. 3

All that portion of Section 17, Township 8 North, Range 5 West of the Gila and Salt River Base and Meridian, Yavapai County, Arizona, more particularly described as follows:

BEGINNING at the Southwest corner of said Section 17, from which the Northwest corner bears North 00 degrees 02 minutes 17 seconds East a distance of 5281.72 feet; Thence North 33 degrees 08 minutes 10 seconds East a distance of 3560.09 feet to the TRUE POINT OF BEGINNING, said point being on the West boundary of "The Wickenburg Inn Tennis and Guest Ranch" recorded in Book 17 of Maps, Page 18, records of Yavapai County, Arizona;

Thence along said boundary, North 10 degrees 26 minutes 30 seconds West a distance of 1885.29 feet (record North 10 degrees 25 minutes 50 seconds West, 1885.15 feet); Thence South 86 degrees 37 minutes 10 seconds East a distance of 2501.12 feet (record South 86 degrees 37 minutes 21 seconds East a distance of 2501.02 feet); Thence South 05 degrees 50 minutes 06 seconds East a distance of 1558.35 feet (record South 05 degrees 50 minutes 05 seconds East a distance of 1558.42 feet); Thence South 07 degrees 17 minutes 47 seconds East a distance of 783.65 feet (record South 07 degrees 17 minutes 30 seconds East); Thence leaving said boundary, South 42 degrees 25 minutes 18 seconds East a distance of 173.13 feet;

Thence South 20 degrees 06 minutes 58 seconds West a distance of 1979.10 feet; Thence South 64 degrees 28 minutes 47 seconds West a distance of 159.98 feet; Thence South 86 degrees 33 minutes 04 seconds West a distance of 303.77 feet; Thence North 61 degrees 34 minutes 03 seconds West a distance of 135.59 feet; Thence North 35 degrees 59 minutes 53 seconds West a distance of 291.77 feet; Thence North 03 degrees 24 minutes 22 seconds West a distance of 175.23 feet; Thence North 06 degrees 02 minutes 25 seconds East a distance of 150.25 feet; Thence North 15 degrees 04 minutes 21 seconds East a distance of 231.46 feet; Thence North 20 degrees 51 minutes 27 seconds East a distance of 70.97 feet; Thence North 23 degrees 00 minutes 31 seconds East a distance of 142.25 feet; Thence North 01 degrees 17 minutes 17 seconds West a distance of 176.23 feet; Thence North 49 degrees 22 minutes 53 seconds West a distance of 66.84 feet to a point on the South boundary of said Wickenburg Inn Tennis and Guest Ranch;

Thence along said Boundary, South 62 degrees 23 minutes 49 seconds West a distance of 135.52 feet (record South 62 degrees 23 minutes 50 seconds West); Thence North 61 degrees 23 minutes 09 seconds West a distance of 972.18 feet (record North 61 degrees 23 minutes 10 seconds West a distance of 972.26 feet); Thence North 12 degrees 35 minutes 40 seconds West a distance of 1051.68 feet (record North 12 degrees 37 minutes 10 seconds West a distance of 1051.93 feet), to the TRUE POINT OF BEGINNING.

EXCEPT all minerals and all Uranium, Thorium, or any other Materials which is or may be determined to be peculiarly essential to the production of fissionable materials, whether or not of commercial value, as reserved in Patent from United States of America.

(WWTP 2008 Site)

AND EXCEPTING That portion of the Southeast quarter of Section 17, Township 8 North, Range 5 West of the Gila and Salt River Base and Meridian, Yavapai County, Arizona, more particularly described as follows:

COMMENCING at the Southeast corner of said Section 17;
Thence North 89 degrees 55 minutes 20 seconds West along the South line of said southeast quarter of Section 17, a distance of 1621.90 feet;
Thence North 00 degrees 04 minutes 40 seconds East leaving said South line a distance of 309.24 feet to the TRUE POINT OF BEGINNING;
Thence South 90 degrees 00 minutes 00 seconds West a distance of 424.78 feet;
Thence North 00 degrees 00 minutes 00 seconds East a distance of 164.42 feet;
Thence North 90 degrees 00 minutes 00 seconds East a distance of 424.78 feet;
Thence South 00 degrees 00 minutes 00 seconds East a distance of 164.42 feet to the TRUE POINT OF BEGINNING.

November 15, 2010
Mr. Robert Bott
Arizona Public Service
Land Services
P.O. Box 53933, MS 3016
Phoenix, Arizona 85072-3933

Dear Bob:

As you know, the landowner of Wickenburg Ranch recently dedicated one acre of land, parcel no. 201-02-158T, to Arizona Public Service Company ("APS") for the Flores Substation. Pursuant to Arizona Corporation Commission ("Commission") rule R14-2-602, any person applying for a Certificate of Convenience and Necessity ("CC&N") must provide written notice to all landowners within the proposed service area of the application.

Wickenburg Ranch Wastewater, LLC ("WRW") intends to submit to the Commission an application for authority to provide sewer service for Wickenburg Ranch (see enclosed map and legal description) on or after November 16, 2010. The above-described land owned by APS is within this proposed service area. If the application is granted, WRW will be the exclusive provider of wastewater service within the area and will be required by the Commission to provide those services under rates and charges and terms and conditions established by the Commission. The CC&N does not prohibit persons from providing services only to themselves using their own facilities on their own property although other applicable laws may restrict such activity.

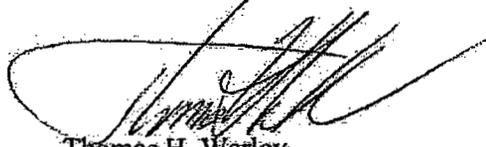

Once filed, the application will be available for inspection during regular business hours at the offices of the Commission at 1200 West Washington Street, Phoenix, Arizona 85007, and at Wickenburg Ranch Wastewater, LLC, c/o M3 Companies, 4222 East Camelback Road, Suite H-100, Phoenix, Arizona 85018. The Commission will hold a hearing on the application. APS may have the right to intervene in the proceeding and may appear at the hearing and make a statement on its behalf even if APS does not intervene. You may contact the Commission for the date and time of the hearing and for information on intervention. You may not receive any further notice of the application proceeding unless requested.

If you want to: (a) obtain a copy of the application; (b) have any questions or concerns about this application; make a statement in support of the application; or (d) object to the approval of the application, you may contact Wickenburg Ranch Wastewater management, whose contact information is below:

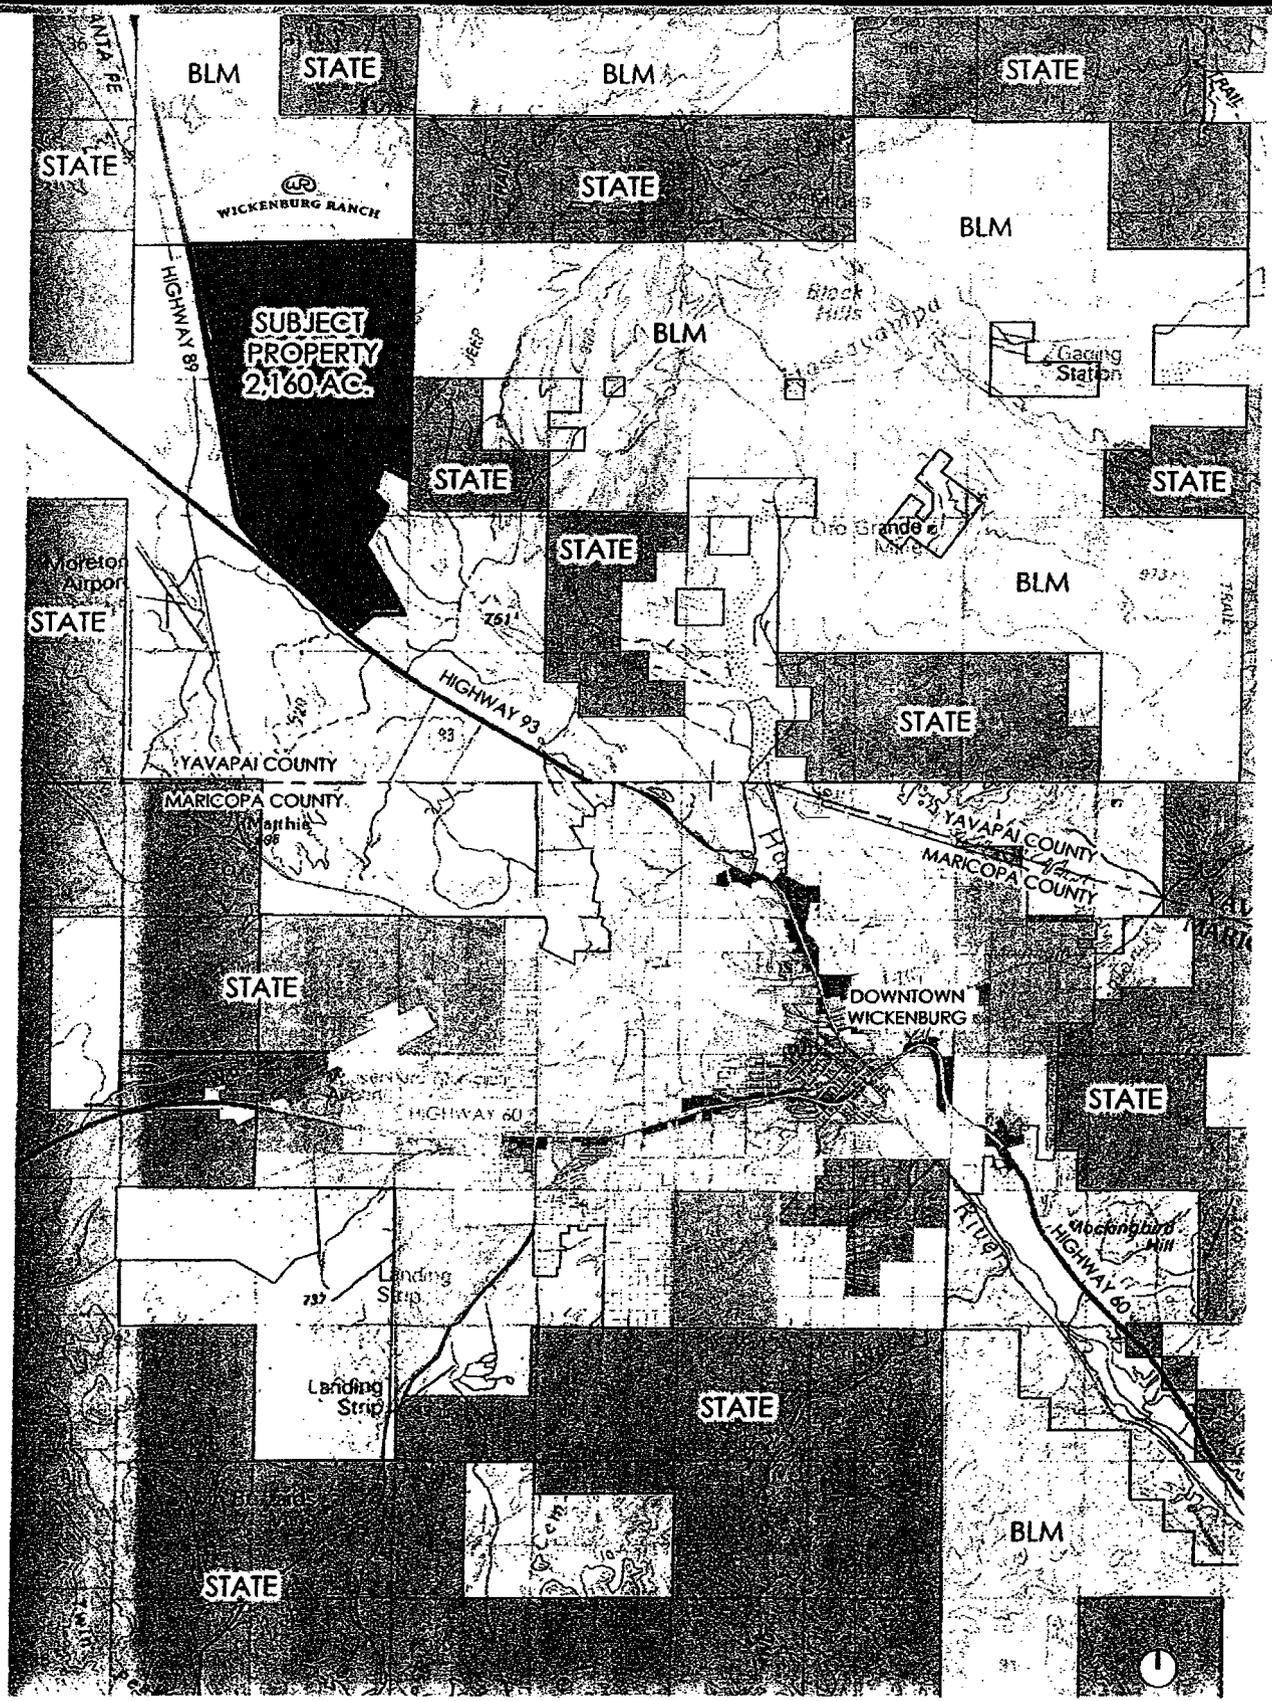

**Bill Brownlee
M3 Builders, LLC
4222 E. Camelback Road
Suite H100
Phoenix, Arizona 85018
602-386-1307**

You may also contact the Consumer Services Section of the Commission at 1200 West Washington Street, Phoenix, Arizona 85007 or call 1-800-222-7000.

Very Truly Yours,

**Thomas H. Warley

Wickenburg Ranch Wastewater, LLC
Service Area Legal Description
Parcel No 1

All that portion of Sections 7, 8, 17 and 18, Township 8 North, Range 5 West of the Gila and Salt River Base and Meridian, Yavapai County, Arizona, more particularly described as follows:

BEGINNING at the Northeast Corner of said Section 7, point also being the Northwest corner of said Section 8;
Thence North 89 degrees 58 minutes 15 seconds East, 639.21 feet along the North line of said Section 8;
Thence South 17 degrees 27 minutes 50 seconds East, 913.00 feet;
Thence South 20 degrees 28 minutes 12 seconds East, 802.26 feet;
Thence South 39 degrees 20 minutes 49 seconds East, 1119.67 feet;
Thence South 17 degrees 52 minutes 53 seconds East, 402.20 feet;
Thence South 12 degrees 51 minutes 26 seconds West, 249.52 feet;
Thence South 01 degrees 07 minutes 38 seconds West, 411.79 feet;
Thence South 23 degrees 07 minutes 02 seconds East, 236.98 feet;
Thence South 38 degrees 58 minutes 00 seconds East, 329.01 feet;
Thence South 54 degrees 59 minutes 00 seconds East, 1101.16 feet;
Thence South 13 degrees 43 minutes 16 seconds West, 1068.17 feet to a point from which the South Quarter corner of said Section 8 bears North 34 degrees 30 minutes 42 seconds West, 471.28 feet;
Thence North 85 degrees 04 minutes 37 seconds West, 417.23 feet;
Thence North 74 degrees 12 minutes 30 seconds West, 384.82 feet;
Thence North 85 degrees 59 minutes 26 seconds West, 252.71 feet;
Thence South 87 degrees 41 minutes 42 seconds West, 678.82 feet;
Thence North 78 degrees 08 minutes 06 seconds West, 799.05 feet;
Thence North 69 degrees 14 minutes 01 seconds West, 601.69 feet to a point from which the corner common to said Sections 7, 8, 17 and 18, bears South 50 degrees 33 minutes 43 seconds East, 192.62 feet;
Thence South 06 degrees 07 minutes 06 seconds West, 642.74 feet;
Thence South 23 degrees 44 minutes 04 seconds East, 565.53 feet;
Thence South 05 degrees 31 minutes 57 seconds West, 817.18 feet;
Thence South 11 degrees 54 minutes 27 seconds West, 1042.85 feet;
Thence South 74 degrees 13 minutes 56 seconds West, 437.84 feet;
Thence South 82 degrees 21 minutes 15 seconds West, 62.17 feet;
Thence North 78 degrees 05 minutes 33 seconds West, 964.58 feet to a point on the East right-of-way of United States Highway 89;
Thence North 10 degrees 49 minutes 30 seconds West, 7191.87 feet along the said East right-of-way to a point on a tangent curve concave to the West and having a radius of 11,510.00 feet and a center point which bears South 79 degrees 06 minutes 51 seconds West;

Thence continuing along said curve through a central angle of 02 degrees 43 minutes 45 seconds and an arc length of 548.27 feet;
Thence North 13 degrees 31 minutes 56 seconds West, 496.30 feet along the East right-of-way to a point on the North line of said Section 7;
Thence South 89 degrees 59 minutes 56 seconds East, 925.02 feet along the said North line to the North Quarter corner of said Section 7;
Thence South 89 degrees 56 minutes 00 seconds East, 2368.78 feet to the Northeast corner of said Section 7 and the POINT OF BEGINNING.

EXCEPTING there from that portion of the Southeast quarter of the Northwest (SE ¼, NW ¼) of Section 7, Township 8 North, Range 5 West of the Gila and Salt River Base and Meridian, Yavapai County, Arizona, conveyed to the State of Arizona in Deed recorded in Book 4159 of Official Records, Page 828, records of Yavapai County, Arizona, described as follows:

COMMENCING at an aluminum cap marking the West quarter corner of said Section 7 from which a rebar marking the East quarter corner of said Section 7 bears South 89 degrees 06 minutes 17 seconds East, 5288.84 feet;
Thence along the East-West mid section line of said Section 7, South 89 degrees 06 minutes 17 seconds East 2483.49 feet to the existing right of way centerline of State Route 89 (Wickenburg-Prescott Highway);
Thence along said existing right of way centerline of State Route 89 North 10 degrees 18 minutes 52 seconds West 144.20 feet;
Thence North 79 degrees 41 minutes 08 seconds East 50.00 feet to the said existing Easterly right of way line of said State Route 89 and the Point of Beginning;
Thence South 55 degrees 18 minutes 52 seconds East 29.70 feet;
Thence South 10 degrees 18 minutes 52 seconds East, 50.00 feet;
Thence South 33 degrees 21 minutes 12 seconds West 30.41 feet to said existing Easterly right of way line of said State Route 89;
Thence along said existing Easterly right of way line of State Route 89, North 10 degrees 18 minutes 52 seconds West 93.00 feet to the Point of Beginning.

AND EXCEPTING that portion of the Southwest quarter of the Southeast quarter (SW ¼, Se ¼) of said Section 7, Township 8 North, Range 5 West of the Gila and Salt River Base and Meridian, Yavapai County, Arizona, described as follows:

COMMENCING at a rebar marking the South quarter corner of said Section 7 from which a marked stone marking the Southeast corner of said Section 7 bears South 89 degrees 32 minutes 23 seconds East 2643.46 feet;
Thence along the South line of said Section 7 South 89 degrees 32 minutes 23 seconds East 347.08 feet to said existing right of way centerline of State Route 89;
Thence along said existing right of way centerline of State Route 89 North 10 degrees 18 minutes 52 seconds West 898.02 feet;
Thence North 79 degrees 41 minutes 08 seconds East 50.00 feet to the existing right of way line State Route 89 and the Point of Beginning;
Thence South 55 degrees 18 minutes 52 seconds East 7.07 feet;
Thence South 10 degrees 18 minutes 52 seconds East 76.00 feet;

Thence South 34 degrees 41 minutes 08 seconds West 7.07 feet to said existing Easterly right of way line of State Route 89;
Thence along said existing Easterly right of way line of State Route 89 North 10 degrees 18 minutes 52 seconds West 86.00 feet to the Point of Beginning;

AND EXCEPTING that portion of the Northwest quarter of the Northeast quarter (NW $\frac{1}{4}$, NE $\frac{1}{4}$) of Section 18, Township 8 North, Range 5 West of the Gila and Salt River Base and Meridian, Yavapai County, Arizona, conveyed to the State of Arizona in Deed recorded in Book 4159 of Official Records, Page 828, records of Yavapai County, Arizona, described as follows:

COMMENCING at a marked stone marking the Northeast corner of said Section 18 from which a rebar marking the North quarter corner of said Section 18 bears North 89 degrees 35 minutes 35 seconds West 2643.46 feet;
Thence along the North line of said Section 18, North 89 degrees 35 minutes 33 seconds West, 2296.38 feet to said existing right of way centerline of State Route 89;
Thence along said existing right of way centerline of said State Route 89, South 10 degrees 18 minutes 52 seconds East 616.98 feet;
Thence North 79 degrees 41 minutes 08 seconds East 50.00 feet to said existing Easterly right of way line of said State Route 89 and the Point of beginning;
Thence South 55 degrees 18 minutes 52 seconds East 24.04 feet;
Thence South 10 degrees 18 minutes 52 seconds East 20.00 feet;
Thence South 34 degrees 41 minutes 08 seconds West 24.04 feet to said existing right of way line of said State Route 89;
Thence along said existing Easterly right of way line of State Route 89, North 10 degrees 18 minutes 52 seconds West 54.00 feet to the Point of Beginning;

AND EXCEPT all minerals and all uranium, thorium, or any other material which is or may be determined to be peculiarly essential to the production of fissionable materials, whether or not of commercial value, as reserved in Patent from United States of America, recorded in Book 192 of Deeds, Page 423 and in Book 10 of Official Records, Page 406, records of Yavapai County, Arizona.

(Reservoir Site 2008)

AND EXCEPT that portion of the Northwest quarter of said Section 7, Township 8 North, Range 5 West of the Gila and Salt River Base and Meridian, Yavapai County, Arizona, more particularly described as follows:

COMMENCING at the North quarter corner of said Section 7;
Thence North 89 degrees 59 minutes 56 seconds West along the North line of said Northwest quarter a distance of 476.65 feet to the TRUE POINT OF BEGINNING;
Thence South 00 degrees 00 minutes 00 seconds East, leaving said North line a distance of 193.27 feet;
Thence South 75 degrees 41 minutes 21 seconds East a distance of 318.69 feet to a point on a curve the radius of which bears South 45 degrees 19 minutes 13 seconds East a distance of 42.50 feet;

Thence Southerly along the arc of said curve through a central angle of 41 degrees 35 minutes 32 seconds a distance of 30.85 feet;

Thence North 75 degrees 18 minutes 54 seconds West, leaving said curve a distance of 308.93 feet;

Thence South 16 degrees 29 minutes 36 seconds West a distance of 65.66 feet;

Thence South 00 degrees 00 minutes 00 seconds East a distance of 21.39 feet to the TRUE POINT OF BEGINNING;

Thence continuing South 00 degrees 00 minutes 00 seconds East a distance of 224.22 feet;

Thence South 76 degrees 45 minutes 28 seconds West a distance of 141.74 feet;

Thence North 58 degrees 42 minutes 37 seconds West a distance of 98.50 feet;

Thence North 13 degrees 31 minutes 56 seconds West a distance of 211.40 feet;

Thence North 90 degrees 00 minutes 00 seconds East a distance of 271.61 feet, to the TRUE POINT OF BEGINNING.

(Well 4 site 2008)

AND EXCEPT That portion of the Southeast quarter of Section 7, of Township 8 North, Range 5 West of the Gila and Salt River Base and Meridian, Yavapai County, Arizona, more particularly described as follows:

COMMENCING at the East quarter Corner of said Section 7, from which the Southeast corner of said Section 7, bears South 00 degrees 00 minutes 08 seconds West a distance of 2641.48 feet;

Thence South 89 degrees 06 minutes 17 seconds East along the North line of said Southeast quarter a distance of 2468.03 feet;

Thence South 00 degrees 53 minutes 43 seconds West leaving said North line a distance of 663.59 feet to the TRUE POINT OF BEGINNING;

Thence North 83 degrees 04 minutes 35 seconds East a distance of 76.74 feet, to a point on a curve the radius of which bears South 83 degrees 04 minutes 35 seconds West a distance of 784.00 feet;

Thence Southerly along the arc of said curve through a central angle of 09 degrees 11 minutes 41 seconds a distance of 125.82 feet to a point of tangency;

Thence South 02 degrees 16 minutes 16 seconds West a distance of 28.78 feet;

Thence North 87 degrees 43 minutes 44 seconds West a distance of 52.84 feet;

Thence North 10 degrees 49 minutes 30 seconds West a distance of 145.58 feet to the TRUE POINT OF BEGINNING.

Thence North 82 degrees 21 minutes 15 seconds East, 62.17 feet;
Thence North 74 degrees 13 minutes 56 seconds East, 437.84 feet to a point from which the East Quarter corner of said Section 18, bears North 44 degrees 24 minutes 42 seconds East, 402.14 feet;
Thence North 11 degrees 54 minutes 27 seconds East, 1042.85 feet;
Thence North 05 degrees 31 minutes 57 seconds East, 817.18 feet;
Thence North 23 degrees 44 minutes 04 seconds West, 565.53 feet;
Thence North 06 degrees 07 minutes 06 seconds East, 642.74 feet to a point from which the Section corner common to Sections 7, 8, 17 and 18, bears South 50 degrees 33 minutes 43 seconds East, 192.62 feet;
Thence South 69 degrees 14 minutes 01 seconds East, 601.69 feet;
Thence South 78 degrees 08 minutes 06 minutes East, 799.05 feet;
Thence North 87 degrees 41 minutes 42 seconds East, 678.82 feet;
Thence South 85 degrees 59 minutes 26 seconds East, 252.71 feet;
Thence South 74 degrees 12 minutes 30 seconds East, 384.82 feet;
Thence South 85 degrees 04 minutes 37 seconds East, 417.23 feet to a point from which the South Quarter corner of said Section 8, bears North 34 degrees 30 minutes 42 seconds West, 471.28 feet;
Thence North 13 degrees 43 minutes 16 seconds East, 1068.17 feet;
Thence North 54 degrees 59 minutes 00 seconds West, 1101.16 feet;
Thence North 38 degrees 58 minutes 00 seconds West, 329.01 feet;
Thence North 23 degrees 07 minutes 02 seconds West, 236.98 feet;
Thence North 01 degrees 07 minutes 38 seconds East, 411.79 feet;
Thence North 12 degrees 51 minutes 26 seconds East, 249.52 feet;
Thence North 17 degrees 52 minutes 53 seconds West, 402.20 feet;
Thence North 39 degrees 20 minutes 49 seconds West, 1119.67 feet;
Thence North 20 degrees 28 minutes 12 seconds West, 802.26 feet;
Thence North 17 degrees 27 minutes 50 seconds West, 913.00 feet to the POINT OF BEGINNING.

EXCEPTING there from that portion of the West half of the Southeast quarter (W1/2 SE 1/4) of Section 18, Township 8 North, Range 5 West of the Gila and Salt River Base and Meridian, Yavapai County, Arizona, conveyed to the State of Arizona in Deed recorded in Book 4159 of Official Records, Page 828, records of Yavapai County, Arizona, described as follows:

COMMENCING at a rebar marking the West quarter corner of said Section 18 being North 89 degrees 29 minutes 14 seconds West 5285.91 feet from the unmonumented East quarter corner of said Section 18 said unmonumented corner being South 00 degrees 33 minutes 47 seconds West 65.85 feet from a stone marked "1/4 W.C." marking the witness monument to said East quarter corner;

Thence along the East-West mid section line of said Section 18 South 89 degrees 29 minutes 14 seconds East 3495.54 feet to said existing right of way centerline of State Route 89;

Thence along said existing right of way centerline of State Route 89 South 10 degrees 18 minutes 52 seconds East 1324.17 feet;

Thence North 79 degrees 41 minutes 08 seconds East 50.00 feet to said existing Easterly right of way line of State Route 89 and the Point of Beginning;

Thence North 34 degrees 41 minutes 08 seconds East 70.71 feet;

Thence North 10 degrees 18 minutes 52 seconds West 97.00 feet;

Thence South 79 degrees 41 minutes 08 seconds West 50.00 feet to said existing Easterly right of way line of State Route 89;

Thence along existing right of way line of State Route 89 South 10 degrees 18 minutes 52 seconds East 147.00 feet to the Point of Beginning;

AND EXCEPTING that portion of the Northeast quarter of the Northeast quarter (NE 1/4 NE 1/4) of Section 19, Township 8 North, Range 5 West of the Gila and Salt River Base and Meridian, Yavapai County, Arizona, conveyed to the State of Arizona in Deed recorded in Book 4159 of Official Records, Page 828, records of Yavapai County, Arizona, described as follows;

COMMENCING at a 1/2 inch stainless steel rod with an aluminum cap marking the Northeast corner of said Section 19 from which a marked stone marking the North quarter corner of said Section 19 bears North 89 degrees 27 minutes 57 seconds West, 2641.50 feet;

Thence along the North line of said Section 19 North 89 degrees 27 minutes 57 seconds West 1249.77 feet to said existing right of way centerline of State Route 89;

Thence along said existing right of way centerline of State Route 89, from a local tangent bearing of South 10 degrees 18 minutes 52 seconds East, along a curve to the left, having a radius of 2865.00 feet a length of 748.40 feet;

Thence North 55 degrees 53 minutes 23 seconds East 50.00 feet to said Easterly right of way line of said State Route 89 and the Point of Beginning;

Thence North 11 degrees 48 minutes 05 seconds East 37.76 feet;

Thence North 33 degrees 21 minutes 37 seconds West 20.44 feet;

Thence North 79 degrees 36 minutes 45 seconds West, 37.09 feet to said existing Easterly right of way line of State Route 89;

Thence along said existing Easterly right of way line of State Route 89 from a local tangent bearing of South 32 degrees 37 minutes 50 seconds East along a curve to the left having a radius of 2815.00 feet, length of 72.71 feet to the Point of Beginning;

AND EXCEPT all minerals and all uranium, thorium, or any other material which is or may be determined to be peculiarly essential to the production of fissionable materials, whether or not of commercial value, as reserved in Patent from United States of America, recorded in Book 192 of Deeds, Page 423 and in Book 10 of Official Records, Page 406, records of Yavapai County, Arizona.

(WWTP 2008)

AND EXCEPT That portion of the Southeast quarter of Section 17, Township 8 North, Range 5 West of the Gila and Salt River Base and Meridian, Yavapai County, Arizona, more particularly described as follows:

COMMENCING at the Southeast corner of said Section 17;
Thence North 89 degrees 55 minutes 20 seconds West along the South line of said southeast quarter of Section 17, a distance of 1621.90 feet;
Thence North 00 degrees 04 minutes 40 seconds East leaving said South line a distance of 309.24 feet to the TRUE POINT OF BEGINNING;
Thence South 90 degrees 00 minutes 00 seconds West a distance of 424.78 feet;
Thence North 00 degrees 00 minutes 00 seconds East a distance of 164.42 feet;
Thence North 90 degrees 00 minutes 00 seconds East a distance of 424.78 feet;
Thence South 00 degrees 00 minutes 00 seconds East a distance of 164.42 feet to the TRUE POINT OF BEGINNING.

Subject: Wickenburg Ranch Wastewater, LLC – Application for Sewer Franchise

Dear Mr. Warley:

Pursuant to our telephone conversation on April 22, 2009, I'm returning the letter requesting a sewer franchise for the above referenced project along with the application and voided check. The roads in Wickenburg Ranch and the adjacent service area are not under County jurisdiction; as such, a sewer franchise agreement is not required.

If you have any questions or comments regarding this matter, please contact me or Laura Bunn at 928-771-3183. Thank you.

Sincerely,

A handwritten signature in black ink, appearing to read "Joe Huot".

Subject: Wickenburg Ranch Wastewater, LLC - Application for Sewer Franchise

Dear Mr. Thrift:

On Behalf of Wickenburg Ranch Wastewater, LLC, please find the documents attached and outlined below, for the Sewer Franchise application for Wickenburg Ranch.

1. Check in the amount of \$250, payable to the Yavapai County Board of Supervisors.
2. Application.
3. Franchise Agreement.
 - a. Please note a change was made in Paragraph 12. The amount of time to procure a Certificate of Convenience and Necessity from the Arizona Corporation Commission was extended to one (1) year, as opposed to six (6) months, due to the current Arizona Corporation Commission review time.
4. Financial Statement.
5. Legal Description.
6. Map of proposed service area.

If you have any questions or comments, please contact me at 602-386-1317.

Sincerely,

A handwritten signature in black ink, appearing to read "Thomas H. Warley", is written over a large, stylized, circular scribble.

**YAVAPAI COUNTY, ARIZONA
APPLICATION FOR WATER/SEWER FRANCHISE**

Applicant Information

Applicant's Name: Wickenburg Ranch Wastewater, LLC
Address: 4222 East Camelback H100 City Phoenix State Arizona Zip 85018
Telephone: 602-386-1325 Emergency Telephone: 602-604-2189

Person(s) who will operate the system, if other than applicant:

Name: Peter Chan
Address: 4535 East Broadway Road City Phoenix State Arizona Zip 85040
Telephone: 602-454-9100 Emergency Telephone: 602-604-2189

Is applicant a partnership or joint venture? NO If the answer is yes, please supply the names and addresses of at least two partners:

Name: _____
Home Address: _____ City _____ State _____ Zip _____
Business Address: _____ City _____ State _____ Zip _____
Business Telephone: _____ Home Telephone: _____

Name: _____
Home Address: _____ City _____ State _____ Zip _____
Business Address _____ City _____ State _____ Zip _____
Business Telephone: _____ Home Telephone: _____

Is applicant a corporation? _____ If the answer is yes, please attach a copy of the most recent annual report filed with the Arizona Corporation Commission.

Does the applicant have an existing or proposed agreement with anyone proposing to have an ownership interest in the franchise? NO If the answer is yes, please attach a statement setting forth the name(s) and address(es) of the person(s) with such ownership interest, and a copy of the agreement.

What is the applicant's experience in providing service for the utility for which applicant is applying for a franchise? Wickenburg Ranch Wastewater, LLC ("Company") is managed by M3 Companies, which is primarily responsible for utility planning, construction, and operations. M3 Companies managers have been active in Arizona real estate for more than two decades, including the construction and operation of wastewater systems such as the American Ranch Domestic Water Improvement District wastewater system. Peter Chan of GHD, Inc. will operate the system. Chan is certified to operate both collection and treatment systems. His design, retrofit, and start-up operation experience includes the Arrowhead Ranch, Gold Canyon, and Quintero Water Reclamation Facility projects.

How many people do you anticipate serving with this utility? At full build-out, Wickenburg Ranch will have 1,724 homes, 600 multi-family units, and commercial facilities.

BEFORE THE BOARD OF SUPERVISORS

OF

YAVAPAI COUNTY, ARIZONA

In the Matter of Wickenburg
Ranch Wastewater, LLC for a
Sewer Franchise

FRANCHISE

WHEREAS, Wickenburg Ranch Wastewater, LLC filed its application pursuant to A.R.S. §40-283, for a franchise to construct and/or maintain and operate sewer lines for a period of fifteen (15) years, along, upon, under and across public highways, roads, alleys and thoroughfares (excepting State Highways) within that portion of Yavapai County, Arizona, described as follows:

EXHIBIT A

and that said area described in Exhibit A above is not within the limits of any incorporated city or town, and,

WHEREAS, this is the time and place set for hearing of said application and due and regular notice was given by publication of notice once a week for three consecutive weeks prior to this time of hearing and proof of publication has been filed herein, and

WHEREAS, all protests to granting such application have been considered, the Board of Supervisors of Yavapai County, Arizona, hereby grants to the Wickenburg Ranch Wastewater, LLC the right, privilege, license and franchise to construct, maintain and operate sewer collection systems for a period of fifteen (15) years from the date hereof, along, upon, under and across the public highways of Yavapai County, Arizona, within the above described area of Yavapai County, which area is not within the limits of any incorporated city or town, upon the following terms and conditions:

RESTRICTIONS AND LIMITATIONS

1. All rights and privileges hereunder are granted under the express condition that the Board of Supervisors shall have the power at any time to impose such additional and further restrictions and limitations and to make such regulations on such highways, roads, thoroughfares, alleys, and public ways as may be deemed best for the public safety, welfare and convenience. No

construction of improvements within a County road right-of-way shall be made without a permit from the Yavapai County Engineer first being obtained.

2. Yavapai County ("Grantor") will notify Wickenburg Ranch Wastewater, LLC ("Grantee") if Grantor determines that any lines are located at a depth which interferes with road maintenance. Any such lines shall be buried at a sufficient depth upon receipt of notice. In the event that sewer lines must be relocated due to road construction or because of inadequate depth, the Grantee shall bear the cost of such relocation.

3. All rights and privileges hereunder shall be exercised so as to not interfere or conflict with any easements or rights-of-way heretofore granted by said Board of Supervisors and now in force.

4. All equipment and facilities constructed, installed, erected, used and maintained under this franchise shall in all respects be adequate, sufficient and substantial in design and workmanship and shall be so located, erected and maintained so as not to interfere with the full use and enjoyment of the public and so not to endanger life or property.

5. All rights and privileges hereunder shall be exercised so as not to interfere or conflict with any easement, either public or private, of whatsoever nature, which has been acquired in or to the proper use of said highways, roads, thoroughfares, alleys and public ways, or any portion thereof.

6. Grantee shall bear all expenses, including damages and compensation to any aggrieved third parties, incurred or expended for the alteration of the course, direction, surface, grade or alignment of any of the said highways, roads, thoroughfares, alleys, and public ways necessarily made by or for Grantee for the purpose of exercising any right under this franchise, and said Grantee shall indemnify and hold harmless the County of Yavapai and the Board of Supervisors thereof from any and all suits, claims, damages and judgments resulting from injuries to persons or property due to the placing, location and maintenance of equipment and facilities upon, in or under the provisions hereof. Grantee shall maintain its equipment and facilities at its own cost and expense and will make all necessary repairs from time to time as the same may be needed without the necessity of notice from Yavapai County.

7. The Grantee shall be required to secure and maintain in force for the duration of the franchise general comprehensive liability insurance insuring against all damages charged to the County or the Grantee resulting from the installation, development, maintenance or expansion of the Grantee's system, as follows:

(a) Five Hundred Thousand Dollars (\$500,000) for

bodily injury or death to any one person with an aggregate limit for any one occurrence of One Million Dollars (\$1,000,000) for bodily injury or death.

(b) Two Hundred Fifty Thousand Dollars (\$250,000) for property damage resulting from any one accident.

(c) Fifty Thousand Dollars (\$50,000) for all other types of liability.

Yavapai County, Arizona, shall be named on the aforesaid policy as a coinsured, or added thereon by endorsement as a named insured. A certificate of insurance as well as a copy of the policy shall be filed with the Public Works Director. The certificate shall provide that if the policy shall be cancelled by the insurance company or the Grantee during the term of the policy, ten (10) days written notice prior to the effective date of such cancellation shall be given the Public Works Director of Yavapai County, Arizona.

8. This franchise shall not be deemed to be exclusive and the Board of Supervisors hereby expressly reserves the right and power from time to time to grant similar franchises and privileges over the same territory and highways, roads, thoroughfares, alleys, and public ways.

9. Grantee certifies that all sewer operations shall be supervised by a duly authorized local operator, whose name, address, and phone number shall be kept in the records of the Public Works Director. Grantee shall notify the Public Works Director of any operator changes.

10. Grantee shall notify the Public Works Director of any assignment of this franchise, including assignee's name, address and phone number.

11. Grantee shall apply for renewal of this franchise not less than sixty (60) days prior to its expiration. In the event required notice, public hearings and official action cannot be taken prior to expiration due to no fault of Grantee, this franchise shall continue until final action by Grantor has been taken.

12. This franchise is granted upon the express condition subsequent that a Certificate of Convenience and Necessity be procured from the Arizona Corporation Commission within one year from the date of granting of this franchise; and if such Certificate is not granted within one year from said date, then this franchise to be void, otherwise to be in full force and effect for the time herein specified.

RE: Wickenburg Ranch Water Reclamation Facility

Dear Mr. Thrift,

This letter is in regard to Wickenburg Ranch Wastewater, LLC and its financial ability to construct major capital infrastructure related to the Wickenburg Ranch Wastewater Treatment Plant.

Vanwick, LLC is the sole member and manager of Wickenburg Ranch Wastewater, LLC. Larry Van Tuyl is the sole member of Vanwick, LLC which is managed by VTwick, Inc. Mr. Van Tuyl is the president of VTwick, Inc.

In the past Chase Bank has participated with Mr. Van Tuyl and his related entities in financing \$30,000,000 for development activities. Chase Bank has had a satisfactory relationship with Mr. Van Tuyl and his related entities for over 25 years.

With respect to the financial resources necessary to construct the subject wastewater treatment plant for Wickenburg Ranch, Chase Bank can state that Wickenburg Ranch Wastewater, LLC and its affiliates have access to funds in an amount of not less than \$20,000,000.

Should you have any further questions regarding this matter, please feel free to contact me directly at 602-221-6379. Thank you.

Sincerely,

Bill Snodgrass

**Construction Authorization
 For Sewage Collection Facilities**

Y. C. D. S.-E.U. File No: A52008001385
System Name: Wickenburg Ranch Wastewater
System Owner/Address: Wickenburg Ranch Wastewater, LLC 4222 E. Camelback Rd., Suite H-100, Phoenix, AZ 85018
Project Name: Wickenburg Ranch Estates
Project Owner/Address: JVT Investors, LLC, C/O M3 Companies, LLC 4222 E. Camelback Rd., Suite H100, Phoenix, AZ 85018
Project Location: Wickenburg, Arizona
Project Description: Construction of sewer lines to serve Wickenburg Ranch Estates

Approval to construct the above-described facilities, as represented in the approved plan documents on file at Yavapai County Development Services-Environmental Unit, is hereby subject to the following Provisions:

- ARV's will be added as appropriate to the low pressure sewer line.
- Sewage Treatment Facility Capacity Assurance document to be submitted before a Discharge Authorization will be issued.
- Discharge Authorization will not be issued until an Engineer's Certificate of Completion has been submitted to Arizona Department of Environmental Quality for the waste water treatment plant.
- Construction shall be in accordance with plans and specifications stamped "YCDS-EU Construction Authorization (Approval to Construct)", which are dated and signed by the authorized Environmental Unit staff.

~~Issuance of this "Approval to Construct" does not authorize construction in any County Down, City or State road rights-of-way for this project. A separate permit may be required. Please contact the appropriate jurisdiction for this permit.~~

Provisions are continued on the attached pages.

In accordance with the Arizona Administrative Code Title 18, Chapter 9, Article 3, the permittee is granted a Construction Authorization for the above project. The state law, A. R. S. §49-104.b.10, requires that construction of the project must be in accordance with rule and regulations of Arizona Department of Environmental Quality. The permittee has two years from the approval date of this document to complete construction and submit the applicable verification documents specified in Arizona Administrative Code R18-9-Article 3. Construction shall conform with the record documents.

- The Project Owner shall retain the services of a professional engineer before starting project construction to provide detailed construction inspection of this project.
- Upon completion of construction an applicant shall:
 - Supply a signed, dated, and scaled Engineer's Certificate of Completion in a format approved by the Department that provides the following:
 - Confirmation that the project was completed in compliance with the requirements of this Chapter, as described in the plans and specifications corresponding to the Construction Authorization issued by the Director, or with changes that are reflected in as-built plans submitted with the Engineer's Certificate of Completion;
 - As-built plans, if required, that are properly identified and numbered; and
 - Satisfactory field test results from deflection, leakage, and uniform slope testing;
 - Provide any other relevant information required by the Department to determine that the facility conforms to the terms of the 4.01 General Permit; and
 - Provide a signed certification on a form approved by the Department that:
 - Confirms that an operation and maintenance manual exists for the sewage collection system;
 - Confirms that the operation and maintenance manual addresses components of operation and maintenance specified on the certification form;
 - Provides the 24-hour emergency number of the owner or operator of the sewage collection system; and
 - Provides an address where the operation and maintenance manual is maintained and confirms that the manual is available for inspection at that address by the Department on request.
- The Project Owner shall not begin operation of the newly constructed facility until a Discharge Authorization has been issued by the Department.
- Construction Authorization is based on plans submitted by SEG Enterprises, INC signed by Shakir K. Gushgari, PE and dated June 16, 2008.
- This approval does not supersede or eliminate the necessity of obtaining permits or approvals from other county, state or federal agencies or departments.
- Perform a deflection test of the total length of all sewer lines made of flexible materials to ensure that the installation meets or exceeds the manufacturer's recommendations and record the results;
- Test each segment of the sewer line for leakage using the applicable method below and record the results:
 - "Standard Test Method for Installation of Acceptance of Plastic Gravity Sewer Lines Using Low-Pressure Air, F1417-92(1998)," published by the American Society for Testing and Materials;
 - "Standard Practice for Testing Concrete Pipe Sewer Lines by Low-Pressure Air Test Method, C924-02 (2002)," published by the American Society for Testing and Materials;
 - "Standard Test Method for Low-Pressure Air Test of Vitrified Clay Pipe Lines, C828-03 (2003)," published by the American Society for Testing and Materials;
 - "Standard Test Method for Hydrostatic Infiltration Testing of Vitrified Clay Pipe Lines, C1091-03a (2003)," published by the American Society for Testing Materials;
 - "Standard Practice for Infiltration and Exfiltration Acceptance Testing of Installed Precast Concrete Pipe Sewer Lines, C969-02 (2002)," published by the American Society for Testing Material; or
 - "Standard Practice for Underground Installation of Thermoplastic Pipe for Sewers and Other Gravity-Flow Applications, D2321-00 (2000)," published by the American Society for Testing Materials; or
 - The material listed in subsections (D)(2)(f)(i) through (vi) is incorporated by reference and does not include any later amendments or editions of the incorporated material. Copies of the incorporated material are available for inspection at the Arizona Department of Environmental Quality, 1110 W. Washington, Phoenix, AZ 85007 or may be obtained from the American

Society for Testing and Materials International, 100 Barr Harbor Drive, West Conshohocken, PA 19428-2959;

- Test the total length of the sewer line for uniform slope by lamp lighting, remote camera, or similar method approved by the Department, and record the results.
- Minimize the planting within the disturbed area of new sewage collection system construction of plant species having roots that are likely to reach and damage the sewer or impair the operation of the sewer or visual and vehicular access to any manhole.
- The applicant shall test each manhole using one of the following test protocols:
 - Watertightness testing by filling the manhole with water. The applicant shall ensure that the drop in water level following presoaking does not exceed 0.0034 of total manhole volume per hour;
 - Negative air pressure testing using the "Standard Test Method for Concrete Sewer Manholes by Negative Air Pressure (Vacuum) Test, C1244-02e1 (2002)," published by the American Society for Testing and Materials. This material is incorporated by reference, does not include any later amendments or editions of the incorporated material and may be viewed at the Arizona Department of Environmental Quality, 1110 W. Washington, Phoenix, AZ 85007, or obtained from the American Society for Testing and Materials International, 100 Barr Harbor Drive, West Conshohocken, PA 19428-2959; or
 - Holiday testing of a lined manhole constructed with uncoated rebar using the "High-Voltage Electrical Inspection of Pipeline Coatings, RPO274-2004 (2004)," published by the National Association of Corrosion Engineers (NACE International). This material is incorporated by reference as modified below, does not include any later amendments or editions of the incorporated material and may be viewed at the Arizona Department of Environmental Quality, 1110 W. Washington, Phoenix, AZ 85007 or obtained from NACE International, 1440 South Creek Drive, Houston, Texas 77084-4906. The following substitutions apply:
 - Where the word "metal" is used in the standard, use the word "surface" instead; and
 - Where the words "pipe" or "pipeline" are used, use the word "manhole" instead.
- The applicant shall perform manhole testing after installation of the manhole cone or top riser to verify watertightness integrity of the manhole from the top of the cone or riser down.
 - Upon satisfactory test results, the applicant shall install the manhole ring and any spacers, complete the joints, and seal the manhole to a watertight condition.
 - If the applicant can install the manhole cone or top riser, spacers, and ring to final grade without disturbance or adjustment by later construction, the applicant may perform the testing from the top of the manhole ring on down.

Re: Designation of Adequate Water Supply (DWR No. 40-700417.0000) CDC Wickenburg Water, LLC

Dear Mr. Rowley:

I am pleased to inform you that the Department of Water Resources has approved the application for a Designation of Adequate Water Supply for CDC Wickenburg Water. We have enclosed the formal Decision and Order. The Decision and Order includes an itemization of CDC Wickenburg Water's responsibilities in maintaining the Designation.

CDC Wickenburg Water's status as a designated water provider demonstrates that CDC Wickenburg Water is taking a long-term perspective in managing water resources. CDC Wickenburg Water's commitment to long term planning represents a major contribution to the State's water management goal.

If you have any questions regarding these documents, please contact me at (602) 771-8585.

Sincerely,

A handwritten signature in black ink, appearing to read "John Schneeman", written over a circular stamp or mark.

John Schneeman, Manager
Office of Assured & Adequate Water Supply

DEPARTMENT OF WATER RESOURCES
BEFORE THE DIRECTOR

IN THE MATTER OF THE APPLICATION OF)	AWS No. 2007-009
CDC WICKENBURG WATER, LLC)	
FOR A DESIGNATION AS HAVING AN)	DECISION AND ORDER
ADEQUATE WATER SUPPLY)	
_____		No. 40-700417.0000

I. INTRODUCTION

On September 25, 2007, the Department of Water Resources (Department) received an application from CDC Wickenburg Water, LLC (CDC Water) requesting that the Department designate CDC Water as having an adequate water supply pursuant to A.R.S. § 45-108 and A.A.C. R12-15-714.

After receiving CDC Water's application for a designation of adequate water supply, the Department reviewed relevant information regarding the designation request, including: 1) the hydrologic information on file with the Department for the proposed source of groundwater supply; and 2) information regarding CDC Water's financial capability to construct the necessary delivery system, treatment works and storage facilities. Based on that information, the Department makes the following Findings of Fact, Conclusions of Law, and Order of Designation and Conditions of Designation:

II. FINDINGS OF FACT

A. General

1. CDC Water is a private water company, subject to the jurisdiction of the Arizona Corporation Commission (ACC).
2. CDC Water provides water service within the territorial boundaries of its certificate of convenience and necessity (CC&N), as approved by the ACC.
3. CDC Water currently serves water through its distribution system to its customers.

19
20
21
22
23
24
25

B. Water Demands

- 4. CDC Water's current demand as of calendar year 2006 is 278.44 acre-feet per year (current demand).
- 5. CDC Water's committed demand as of calendar year 2006 is 0.00 acre-feet per year (committed demand).
- 6. CDC Water's projected demand in 2013, the sixth calendar year from the date of application, is 945.54 acre-feet (2013 projected demand). The 2013 projected demand does not include the current demand or the committed demand, but does include the annual demand at build-out of plats reasonably projected to be approved and customers reasonably projected to be added through calendar year 2013.
- 7. CDC Water's annual estimated water demand in 2013, which is the sum of its current demand, committed demand, and 2013 projected demand, is 1224.00 acre-feet per year.

C. Groundwater: Physical, Continuous and Legal Availability

- 8. CDC Water has the right to withdraw and deliver groundwater to its customers pursuant to A.R.S. § 45-453.
- 9. Historic hydrologic information demonstrates that depth-to-static water levels within the CDC Water service area currently average 425 feet below land surface.
- 10. CDC Water has demonstrated that after withdrawing 1224.00 acre-feet per year of groundwater for 100 years, the depth-to-static water level within CDC Water's service area is not expected to exceed 1200 feet below land surface.
- 11. CDC Water has demonstrated that it has wells of sufficient capacity to satisfy its annual estimated groundwater demand of 1224.00 acre-feet per year for at least 100 years.

D. Water Quality

- 12. CDC Water will be regulated by the Arizona Department of Environmental Quality as a public water system pursuant to A.R.S. §§ 49-351, et seq.

25

E. Financial Capability

- 13. On June 29, 2007, a "Water Facilities Extension Agreement" (Agreement) was executed between CDC Water and JVT Investors, LLC, an Arizona limited liability company (JVT). The Agreement states that JVT shall fund construction of water system improvements including: distribution lines, wells, storage tanks, and booster stations to support water service by CDC Water in the existing CC&N. Upon completion of construction, said improvements shall become the sole property of CDC Water.
- 14. CDC Water has demonstrated capability for financing the construction of adequate delivery, storage, production and treatment works through the Agreement.

III. CONCLUSIONS OF LAW

Having reviewed the Findings of Fact, the Department makes the following Conclusions of Law:

- 1. CDC Water has demonstrated that 1224.00 acre-feet per year of groundwater will be physically available, continuously available and legally available for at least 100 years, which is sufficient to meet its annual estimated water demand in 2013, of 1224.00 acre-feet per year. See A.A.C. R12-15-716, R12-15-717 and R12-15-718.
- 2. The water supply served by CDC Water will be of adequate quality pursuant to A.A.C. R12-15-719.
- 3. CDC Water has satisfied the financial capability criteria prescribed in A.A.C. R12-15-720.
- 4. CDC Water has satisfied all the requirements for a designation of an adequate water supply.

IV. ORDER OF DESIGNATION AND CONDITIONS OF DESIGNATION

Having reviewed the Findings of Fact and Conclusions of Law, the Director hereby issues this Decision and Order designating CDC Water as having an adequate water supply, subject to the following conditions:

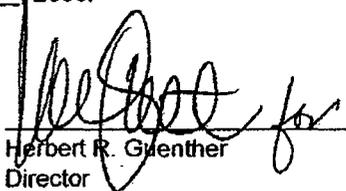

- 1. The Director reserves the right under A.A.C. R12-15-715(C) to periodically review and modify the designation for good cause as conditions warrant.

- 1 2. Pursuant to A.A.C. R12-15-715, the Director may revoke this designation at any time if the
2 findings of fact or the conclusions of law upon which the designation is based change or are
3 invalid, or if an adequate water supply no longer exists.
- 4 3. The Director's determination that an adequate water supply exists for CDC Water is based on its
5 review of the water supply pledged by CDC Water.
- 6 4. CDC Water shall submit an application to modify this decision and order designating CDC Water
7 as having an adequate water supply to increase the term of the designation when the sum of
8 CDC Water's current demand, committed demand and two-year projected demand exceeds
9 1224.00 acre-feet, or by January 1, 2012, whichever is earlier.
- 10 5. Pursuant to A.A.C. R12-15-719, CDC Water shall satisfy any state water quality requirements
11 established for its proposed use after the date of this designation.
- 12 6. CDC Water shall annually provide to the Department the following information in the manner
13 prescribed in A.A.C. R12-15-715:
- 14 a. The projected demand at build-out for customers with which CDC Water has entered
15 into a notice of intent to serve agreement in the calendar year.
- 16 b. An estimate of the demand of platted, undeveloped lots located in CDC Water's service
17 area.
- 18 c. A report regarding CDC Water's compliance with water quality requirements.
- 19 d. The depth-to-static water level of all wells from which CDC Water withdrew water during
20 the calendar year.
- 21 e. The total quantity of water from any source, withdrawn, diverted, or received by CDC
22 Water for its customers' residential and non-residential use during the previous calendar
23 year.
- 24
25

1 f. Any other information requested by the Director to determine whether CDC Water is
2 continuing to meet all the requirements necessary to maintain this designation of
3 adequate water supply.

4
5 **IT IS HEREBY ORDERED THAT CDC WICKENBURG WATER, LLC BE DESIGNATED AS**
6 **HAVING AN ADEQUATE WATER SUPPLY UNTIL DECEMBER 31, 2013.**

7 DATED this 11th day of FEBRUARY, 2008.

DOCKETED BY

IN THE MATTER OF THE
APPLICATION OF WICKENBURG
RANCH WASTEWATER, AN
ARIZONA LIMITED LIABILITY
COMPANY, FOR A CERTIFICATE OF
CONVENIENCE AND NECESSITY TO
PROVIDE WASTEWATER SERVICE
IN YAVAPAI COUNTY

Docket No. SW-20769A-10-0469

RESPONSE TO STAFF'S LETTER OF
INSUFFICIENCY

Wickenburg Ranch Wastewater ("Company") hereby responds to Staff's Letter of
Insufficiency as follows:

1. Please provide a copy of the Applicant's Certificate of Good Standing with the
Commission's Corporation Division.

Response: See Attachment 1.

2. Please indicate the status of the application for an Aquifer Protection permit for
the proposed wastewater treatment facilities ("WWTF").

Response: The Aquifer Protection Permit was granted administrative
completeness and moved to the substantive review phase. The start of the
substantive review was pending submittal of the letter of credit for the closure and
post-closure costs, which was done on December 27, 2010.

EXHIBIT
tabbles
A-2
ADMITTED

1
2 3. Please provide a copy of the approved NACOG 208 Plan for the proposed CC&N
3 area.

4 **Response:** See Attachment 2.¹ ADEQ submitted the 208 Amendment Plan for
5 EPA approval on February 22, 2010. The EPA did not comment on the plan within
6 the 120-day review period, and therefore, the plan received final approval by
7 operation of law on June 22, 2010.

8 4. Please verify and coordinate the timeline described in the submitted Application
9 (Sections "Z" and "R"):

10 a. Based on the information presented in Section "Z", Staff concludes that the
11 daily wastewater flows are projected as follows: Please verify the information.

12

Year 1	22,780 GPD
Year 2	95,530 GPD
Year 3	155,980 GPS
Year 4	237,855 GPD
Year 5	357, 730 GPD

13
14
15

16 **Response:** The facilities construction timeline described in Section "R" is accurate
17 based on the current anticipated market conditions, which will dictate the start of
18 construction. Additionally, the daily wastewater flows in the table above represent
19 the average daily wastewater flows projected for the given year.
20

21 b. According to Section "R", there are three phases of the WWTF
22 construction. Please verify and explain items marked as "?" in the Table below.
23
24
25
26
27

28

¹ The Wickenburg Ranch Water Reclamation Facility 208 Amendment submitted to the Northern Arizona Council of Governments is designated as a "draft". Once approved by NACOG, ADEQ, and the EPA, it becomes final.

Phase No.	Projected WWFT Capacity (GPD)	Estimated Completion year	Projected wastewater Flow (GPD)
1	100,000	2012	22,780 (Year 1?)
2	415,000 (or 315,000?)	2013?	95,530 (Year 2?)
3	730,000 (or 630,000?)	2019?	357,730 (Year 5?)
Full build out ²	950,000	?	?

Response: In Year 1 of operation, the average daily volume of wastewater generated is projected to be 22,780 GPD. The Phase 1 WWTF will be used in years 1 and 2 of operations. Pursuant to Arizona Department of Environmental Quality ("ADEQ") rules and policies, Phase 2 of the WWTF will need to be constructed in 2013 to ensure that there is sufficient physical capacity to treat the projected influent generated by the homes being platted at that time. The platted lots will not generate wastewater for approximately 12 months. Nevertheless, the WWTF must be constructed. This same approach will apply to the Phase 3 construction of the WWTF, which will increase the overall capacity from 415,000 GPD to 730,000 GPD. Thus, the estimated completion dates for Phases 1 through 3 are correct.

The full build-out capacity of the WWTF is 950,000 GPD. Based on regional planning as mandated by ADEQ, the WWTF must be able to be expanded to serve other property outside Wickenburg Ranch. The Company is not aware of any development of property outside of Wickenburg Ranch that will utilize the WWTF. Nonetheless, to accommodate ADEQ's regional planning efforts, the WWTF is being designed to accommodate the expansion from 730,000 GPD to 950,000 GPD. The timing and cost of that expansion, however, is unknown at this time.

c. Please clarify the proposed WRF Phase 2 and 3 capacities. According to Section "R", and Exhibit 4/Section 2.3, page 16, more likely the existing WRF package (100,000 GPD extended aeration package plant installed in Phase I) will be removed, and the second and third phases will switch to MBR process. Does it mean that the WRF projected capacity is 315,000 GPD in the second phase and 630,000 GPD in the third phase?

² See Exhibit 4, Table 5.

1 **Response:** When the Phase II plant (315,000 GPD capacity) is installed, it will take
2 all normal flows to ensure the equipment's minimum flow requirements and allow
3 for efficient operation. The Phase I package plant will continue to operate to meet
4 peak flow demands. When the Phase III plant is installed, the two MBR trains will
5 take all normal flows and the Phase I equipment will continue to supply additional
6 capacity and emergency flow relief.

7
8 5. There is conflicting cost estimate information in the submitted Application. It is
9 not clear if the submitted spreadsheet in Exhibit 5 represents estimated wastewater plant-
10 in-service costs for the first five years or at the full build-out. Exhibit 5 / Cost Estimate,
11 totaling \$11,228,886.35, includes costs for the WWTF phase 1 and 2. However,
12 Application/Section "0" states that the full build-out cost is \$11,228,886.35 (the projected
13 WWTF capacity at full build-out is 950,000 GPD). Please verify/revise and include
14 documentation to support the estimates.

15 **Response:** The submitted spreadsheet only includes the costs associated with
16 Phase 1 and Phase 2 of the WWTF. The costs for Phase 3 and the full build-out
17 capacity are not included in the Exhibit 5 Cost Estimate as they are not pertinent in
18 calculating rates, which are based on the first five (5) years of operations.

19 6. Referring to Exhibit 5 and 6:

20 a. Please verify if all proposed major components (such as, sewer collection
21 mains, trunk lines, lift stations, WWTF and effluent disposal system) are listed in Exhibit
22 5;

23 **Response:** All of the major components required to construct the first two phases
24 of the WWTF and associated enabling infrastructure are included in the Exhibit 5
25 Cost Estimate.

26 b. Indicate the NARUC plant account number for each component listed in
27 Exhibit 5;

28 **Response:** See Attachment 3.

1 c. Coordinate Estimated Costs listed in Exhibit 5 and Plant Additions by Year
2 listed in CS-4 – Exhibit 6. For example, in CS-4 Exhibit 6, Plant Additions Year 1,
3 Account No. 380 Treatment & Disposal Equipment – cost \$2,215,952. How was this
4 cost derived? Provide an itemized cost breakdown and cross-reference these plant items
5 and costs with Exhibit 5;

6 **Response:** See Attachment 4.

7 d. Please elaborate on the following item listed in Exhibit 5/page2: OSLS-
8 WRF Force Main Boring, cost \$725,000. How was this cost derived?

9 **Response:** See Attachment 5 at p. 2 (addendum to the Exhibit 5 Cost Estimate
10 showing OSLS-WRF Force Main and Boring costs).

11 e. Please elaborate on the following items listed in Exhibit 5/page 3: Service
12 Line Installations – cost \$522,900 and APS – cost \$275,445.33. How was this cost
13 derived;

14 **Response:** See Attachment 5 at p. 1-2 (addendum to the Exhibit 5 Cost Estimate
15 showing APS and Service Line Installation costs).

16 f. Provide an itemized breakdown of costs totaling \$1,734,903 for the WWTF
17 Phase 1. How was this cost derived?; (Quotation from Mar-Wood indicates \$550,779
18 for 100,000 GPD);

19 **Response:** See Attachment 5 at p. 1 (addendum to the Exhibit 5 Cost Estimate
20 showing the itemized breakdown of the Phase 1 WWTF).

21 g. Indicate capacities of the proposed wastewater and irrigation lift stations;

22 **Response:** The Off-site Wastewater Lift Station will have a capacity of 882 gpm
23 (1.3 MGD). The Effluent Pump Station at the WRF will be phased as follows:
24

25

<u>Phase</u>	<u>Capacity</u>
I	333 gpm (480,000 GPD)
II	1330 gpm (1.9 MGD)
III	2000 gpm (2.9 MGD)

26
27
28

1 h. Please provide a corresponding map clearly identifying location of the
2 proposed major wastewater components listed in Exhibit 5. For example, clearly identify
3 location of Merv Griffin Way, Miners Pass, Cutting Horse Trail sewers, Force Main
4 Boring, wastewater lift station, force mains, WWTF, irrigation pumps station, irrigation
lake, reuse piping system;

5 **Response:** See Attachment 6.

6 i. Provide estimated starting and completion dates of these components and,
7 if construction is to be phased, a description of each separate phase of construction.

8
9 **Response:** The anticipated construction start date for the Phase 1 WWTF is
10 September 2011 and the completion date is June 2012. The anticipated construction
11 start date for the Phase 2 WWTF is September 2012 and the completion date is June
12 2013. The anticipated construction start date for the Lift Station is November 2012
13 and the completion date is June 2013. The anticipated construction start date for the
14 Force Main and Force Main Boring is December 2012 and the estimated completion
15 date is June 2013. The irrigation lake, irrigation pump station and reuse piping
16 system were installed in conjunction with the golf course improvements. In order to
17 comply with construction permit requirements, the sewer mains on Merv Griffin
18 Way, Miners Pass and Cutting Horse Trail were completed in conjunction with the
19 grading and drainage improvements.

20 7. Referring to Exhibit 4 – Section 2.2.6 Low Pressure System (page 11): It indicates
21 that “the maintenance of the main LPS line, within the tract line (roadway), shall be the
22 responsibility of the Homeowners Association upon its establishment.” Please state who
will own this main LPS Line.

23 **Response:** The initial Basis of Design Report did assume the main LPS line would
24 be owned and maintained by the homeowners association. However, that is no
25 longer the case. All sewer mains and service lines will be owned and maintained by
26 Wickenburg Wastewater LLC. The operational costs associated with maintaining
27 the LPS main are included in the pro forma presented in the Application for a
28 Certificate of Convenience and Necessity, Exhibit 6.

1
2 8. Please provide a description of commercial customers referenced in Applications
3 Section "Z".

4 **Response:** The commercial customers will include the golf maintenance facility,
5 golf pro shop, golf clubhouse, athletic club, homeowners' association facility,
6 equestrian facility, and fire station.

7 9. Please provide the name of the water system provider within the requested area.
8

9 **Response:** Wickenburg Ranch Water, LLC.

10 10. Please state if the water service provider is serving any customers within the
11 requested area.

12 **Response:** Not at this time.

13 11. Please provide a schedule of projected advances in aid of construction ("AIAC")
14 and repayments for years one through five.

15 **Response:** See Attachment 7.

16 12. Attachment C the proforma balance sheet is undated. Please provide the position
17 date of this proforma balance sheet.

18 **Response:** See Attachment 8. Note that this projected balance sheet has been
19 superseded by the five-year projected balance sheets contained within the response
20 to Insufficiency Item #13, the difference being customer security deposits.
21

22 13. Please provide in conjunction with Attachment C (Exhibit 6) a schedule showing
23 what the balance sheet will look like (e.g. fixed assets, LT debt, Advances, etc.) for years
24 two through five.

25 **Response:** See Attachment 9.

26 14. Please provide a 5 year projection for estimated customer deposits and refunds.
27

28 **Response:** See Attachment 10.

1 15. On the application, page six, it discusses the construction being done in three
2 phases with the third phase being completed in the third quarter of 2019. However, only
3 five years of construction and operating data is provided. Please reconcile this apparent
4 discrepancy.

5 **Response: Per the Arizona Corporation Commission guidelines, only the first five**
6 **years of construction and operations costs are used to develop the rates that will be**
7 **established for the service area.**

8 16. Please provide a projected capital structure for the first five years showing all
9 short and long term debt balances, equity balances, etc.

10 **Response: See Attachment 11.**

11 17. Please provide electronic copies of the supporting worksheets with formulas
12 attached for schedules of Exhibits 5 and 6 (i.e. estimated cost to construct, proforma
13 balance sheet, proforma income statement, proforma plant in service schedule for years
14 one through 5, etc.).

15 **Response: The electronic copies will be provided to Staff within one business day**
16 **following the filing of this response with Docket Control.**

17 18. Have any of the owners/operators been accused of allegations of political
18 corruption (including but not limited to campaign violations and election law violations);
19 allegations of construction violations; allegations of misconduct; and filings at
20 administrative hearings, at the local, state, or federal agencies, including at the Federal
21 Elections Commission, Registrar of Contractors, or any violations of law? If so, please
22 provide a comprehensive list of the entities that have been accused of the above-
23 mentioned allegations; the litigation history; and the individual case disposition.

24 **Response: To the best of our knowledge, no.**

25 19. Have any of the persons or entities listed in No. 18 above been convicted or
26 admitted to any of the allegations listed?

27 **Response: No.**

28 20. Have the owners/operators ever filed for bankruptcy?

Response: No.

1 21. Please identify any and all mechanics, tax or other liens that have been assessed
2 against Wickenburg Ranch or the owners/operators.

3 **Response:** No liens have been assessed upon the project.

4 22. Describe the role of the management contact listed as William Brownlee, M3
5 Companies, and relationship to the owners/developers. Describe the organizational
6 structure of the Company.

7 **Response:** The M3 Companies is the project manager for the owners. M3
8 manages the day-to-day construction operations of the development and the utility
9 operations. William I. Brownlee is the Manager of The M3 Companies.

10 From an organizational standpoint, The Company will own the wastewater
11 company assets, and the operations will be managed by the M3 Companies. The
12 Company is owned by VanWick LLC. VanWick, LLC is managed by VTWick, Inc.
13 and Larry Van Tuyl is a member.

14 23. Provide any correspondence to and/or from APS concerning ownership/use of land
15 within the proposed CC&N area.

16 **Response:** See Attachment 12 for documentation.

17 24. Please file an amended legal description as discussed with Barbara Wells of the
18 Engineering Section.

19 **Response:** This correction was filed in the docket on December 22, 2010. On
20 January 4, 2011, Staff confirmed this correction has been made. See Attachment 13.

Attachment 1

STATE OF ARIZONA

Office of the
CORPORATION COMMISSION
CERTIFICATE OF GOOD STANDING

To all to whom these presents shall come, greeting:

I, Ernest G. Johnson, Executive Director of the Arizona Corporation Commission, do hereby certify that

*****WICKENBURG RANCH WASTEWATER, LLC*****

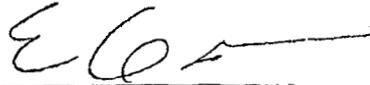

a domestic limited liability company organized under the laws of the State of Arizona, did organize on the 25th day of May 2007.

I further certify that according to the records of the Arizona Corporation Commission, as of the date set forth hereunder, the said limited liability company is not administratively dissolved for failure to comply with the provisions of A.R.S. section 29-501 et seq., the Arizona Limited Liability Company Act; and that the said limited liability company has not filed Articles of Termination as of the date of this certificate.

This certificate relates only to the legal existence of the above named entity as of the date issued. This certificate is not to be construed as an endorsement, recommendation, or notice of approval of the entity's condition or business activities and practices.

IN WITNESS WHEREOF, I have hereunto set my hand and affixed the official seal of the Arizona Corporation Commission. Done at Phoenix, the Capital, this 3rd Day of January, 2011, A. D.

Executive Director

Attention: Mr. Chris Fetzer, Environmental Planning Director

Re: Yavapai County, Wickenburg Ranch WWTP Clean Water Act, Section 208 Water Quality Management Plan Amendment

Dear Mr. Fetzer:

Yavapai County submits herewith this application requesting an amendment to the Section 208 Water Quality Management Plan in order to accommodate the new Wickenburg Ranch WWTP. The new facility will consist of an extended aeration permanent package plant system with sand filtration and disinfection, producing A+ Reclaimed Water for irrigation and landscape reuse. The WWTP will be located approximately one (1) mile northeast of the intersection of State Route 89 and US Highway 93, serving the Wickenburg Ranch development and selected parcels in the immediate area. The County looks forward to working with NACOG throughout the amendment process. Please feel free to contact me at 928-442-5408.

Sincerely,

A handwritten signature in black ink, appearing to read "Geoffrey Meek".

Re: **Yavapai County, Wickenburg Ranch WWTP
Clean Water Act, Section 208
Water Quality Management Plan Amendment**

Dear Mr. Fetzer:

The Town of Wickenburg submits herewith this application requesting an amendment to the Section 208 Water Quality Management Plan in order to accommodate the new Wickenburg Ranch WWTP. The new facility will consist of an extended aeration permanent package plant system with sand filtration and disinfection, producing A+ Reclaimed Water for irrigation and landscape reuse.

The WWTP will be located approximately one (1) mile northeast of the intersection of State Route 89 and US Highway 93, serving the Wickenburg Ranch development and selected parcels in the immediate area.

This document is submitted to the Department because the new facility is located within three miles of the town limits of Wickenburg.

The Town looks forward to working with NACOG throughout the amendment process.

Sincerely,

Re: Wickenburg Ranch Water Reclamation Facility
Clean Water Act, 208 Plant Review

Dear Mr. Fetzer:

In a transmittal dated April 29, 2008, CSA Engineering submitted the document *Wickenburg Ranch Water Reclamation Facility, Yavapai County, 208 Amendment - DRAFT, April 2008* to Maricopa County Environmental Services Department (Department). The Facility will be located near the intersection of US93 and SR89, in Yavapai County, north of the Town of Wickenburg.

The document was submitted to the Department because it is located within three miles of unincorporated areas of Maricopa County.

Based on a review of the proposed 208 Amendment, the Department has determined that the proposed plant does not conflict with Maricopa County plans for the area..

If you have any questions or comments, please feel free to contact Mr. Kenneth James, PE, or myself at 506-6666.

Sincerely,

A handwritten signature in black ink that reads "Kevin Chadwick".

208 AMENDMENT CHECKLIST

Section 208 Clean Water Act

40 CFR Part 130.6

REQUIREMENT	PROVIDE BRIEF SUMMARY ON HOW REQUIREMENTS ARE ADDRESSED	ADDRESSED ON PAGE:
<p><u>AUTHORITY</u></p> <p>Proposed Designated Management Agency (DMA) shall self-certify that it has the authorities required by Section 208(c)(2) of the Clean Water Act to implement the plan for its proposed planning and service areas. Self-certification shall be in the form of a legal opinion by the DMA or entity attorney.</p>	<p>The Wickenburg Ranch Water Reclamation Facility is located in unincorporated county lands, outside of the function of any DMA. The nearest DMA is the town of Wickenburg, Arizona in Maricopa County.</p>	<p>Page 1, Appendix D</p>
<p><u>20-YEAR NEEDS</u></p> <p>Clearly describe the existing wastewater (WWT) treatment facilities:</p> <ul style="list-style-type: none"> - Describe existing WWT facilities. 	<p>The Town of Wickenburg operates a 1.2 MGD facility in central Wickenburg, approximately 6 miles to the Southeast in Maricopa County. The facility has no lines to serve outside of Maricopa County, and has no plans to operate collections in Yavapai County. There are no other existing treatment facilities in the area.</p>	<p>Page 2, Appendix D</p>
<ul style="list-style-type: none"> - Show WWT certified and service areas for private utilities and sanitary district boundaries if appropriate. 	<p>There are no private utilities or sanitary districts for sewage systems within the planned sewer service area for this facility.</p>	<p>Page 5</p>
<p>Clearly describe alternatives and the recommended WWT plan:</p> <ul style="list-style-type: none"> - Provide POPTAC population estimates (or COG-approved estimates only where POPTAC not available) over 20-year period. 	<p>The service area for the Wickenburg Ranch falls under the Congress Census County Division (CCD) of Yavapai. This division covers a large area, and is further divided into city areas of which this service area is not a part. Current POPTAC population for the remainder of the CCD is approximately 1500 people. The 2028 POPTAC population estimate is approximately 2,000 people.</p>	<p>Figure 3, Page 3</p>
<ul style="list-style-type: none"> - Provide wastewater flow estimates over the 20-year planning period. 	<p>Estimated sewage flow is projected to be 950,000 gallons per day by 2028, as shown in Figure 3.</p>	<p>Figure 3, Page 3</p>
<ul style="list-style-type: none"> - Illustrate the WWT planning and service areas. 	<p>The Wickenburg Ranch Service Area is shown in Figure 2.</p>	<p>Figure 2</p>
<ul style="list-style-type: none"> - Describe the type and capacity of the recommended WWT plant. 	<p>The extended aeration treatment process was selected for the initial phase of the WRF. Peripheral facility components include headworks, sand filtration and disinfection. Ultimate capacity at buildout of the service area is estimated to be 950,000 gpd. The initial phase will be 100,000 gpd.</p>	<p>Figure 4, Page 4</p>
<ul style="list-style-type: none"> - Identify water quality problems, consider alternative control measures, and recommend solution for implementation. 	<p>No water quality problems are anticipated. Effluent will be A+ and will be sufficient to meet requirements of:</p> <ul style="list-style-type: none"> • APP Permit requirements for protection of aquifers. • AZDES Permit requirements for surface discharges. 	<p>Page 5</p>
<ul style="list-style-type: none"> - If private WWT utilities with certified areas are within the proposed regional service area; define who (municipal or private utility) serves what area and when. Identify whose sewer lines can be approved in what areas and when? 	<p>There are no existing wastewater service providers in the proposed service area.</p>	<p>Page 5</p>
<ul style="list-style-type: none"> - Describe method of effluent disposal and reuse sites (if appropriate). 	<p>Effluent disposal will be accomplished by irrigation reuse. An AZPDES discharge to the nearby Martinez Wash will only be used as an emergency back-up. The AZPDES discharge point is shown in Figure 2.</p>	<p>Page 5, Figure 2</p>

- If Sanitary Districts are within a proposed planning or service area, describe who serves the Sanitary Districts and when.	There are no sanitary districts within the proposed planning or service areas.	Page 5
- Describe ownership of land proposed for plant sites and reuse areas.	The land is owned by JVT Investors, LLC, the developer of Wickenburg Ranch	Page 2
- Address time frames in the development of the treatment works.	The initial phase (100,000 gpd) of the Wickenburg Ranch WRF is scheduled for construction beginning the third quarter 2008 with facility commissioning to be completed by fourth quarter 2009. Later phases will be added as required by development in the area. Phases II and III will have capacities of 315,000 gallons per day each.	Figures 3 & 5
- Address financial constraints in the development of the treatment works.	The water reclamation facility will be funded with monies from JVT Investors, LLC, and impact fees from new development. No financial constraints are expected for the reclamation facility.	Page 7
- Describe how discharges will comply with EPA municipal and industrial stormwater discharge regulations (Section 405, CWA).	Through the use of grading and retention areas, all storm water will be contained onsite at the water reclamation facilities. There will be no non-point discharges from the water reclamation facilities. A SWPPP will be in place to govern best management practices for storm water control.	Page 5
- Describe how open areas & recreational opportunities will result from improved water quality and how those will be used.	The reuse of effluent will safely enhance golf courses, parks, and other open space landscaping while minimizing use of groundwater for irrigation.	Page 5
- Describe potential use of lands associated with treatment works and increased access to water-based recreation, if applicable.	Not applicable.	Not applicable
REGULATIONS		
- Describe types of permits needed, including NPDES, APP and reuse.	The Wickenburg Ranch WRF will require the following permits: ATC, AOC, vault and haul, air quality, and annual operation permit – permitting agency is Yavapai County; APP, Reuse and AZPDES – permitting agency is ADEQ; underground storage facility and water storage facility permit – permitting agency is ADWR.	Page 6
- Describe restrictions on NPDES permits, if needed, for discharge and sludge disposal.	No discharge restrictions are known to be needed since the WRF will produce Class A+ effluent. Sludge will be produced as a Class B and deposited in a regional landfill.	Pages 5, 6 & 7
- Provide documentation of communication with ADEQ Permitting Section 30 to 60 days prior to public hearing regarding the need for specific permits.	An Aquifer Protection Permit (APP) pre-application meeting was held with ADEQ on April 28 th , 2008. Meeting minutes are shown in Appendix C.	Appendix C
- Describe pretreatment requirements and method of adherence to requirements (Section 208 (b)(2)(D), CWA).	There are no industrial users in the proposed service area, nor any current plans for future industrial users.	Page 6
- Identify, if appropriate, specific pollutants that will be produced from excavations and procedures that will protect ground and surface water quality (Section 208(b)(2)(K) and Section 304, CWA).	Not applicable.	Not applicable
- Describe alternatives and recommendation in the disposition of sludge generated. (Section 405 CWA)	Sludge will be Class B and will be deposited in Northwest Regional Landfill. On-site sludge will be dewatered and temporarily stored in covered bins.	Pages 6 - 7
- Define any nonpoint issues related to the proposed facility and outline procedures to control them.	Not applicable.	Not applicable
- Describe process to handle all mining runoff, orphan sites and underground pollutants, if applicable.	Not applicable.	Not applicable

- If mining related, define where collection of pollutants has occurred, and what procedures are going to be initiated to contain contaminated areas.	Not applicable.	Not applicable
- If mining related, define what specialized procedures will be initiated for orphan sites, if applicable.	Not applicable.	Not applicable
CONSTRUCTION Define construction priorities and time schedules for initiation and completion.	Construction of the initial phase is scheduled to begin the first quarter of 2009. The completion date for construction of the Phase I infrastructure improvements is estimated to be the fourth quarter of 2009.	Page 7
Identify agencies that will construct, operate and maintain the facilities and otherwise carry out the plan.	JVT Investors will construct the Wickenburg Ranch WRF. They will own and maintain the wastewater collection system and the wastewater treatment facilities for the WRF. Operation will be by CSA Engineering, operating under contract with JVT Investors. The corporation Board of Directors will provide management direction and oversight for and will hire sufficient staff to provide for on-going operation and maintenance of the wastewater systems.	Page 7
Identify construction activity-related sources of pollution and set forth procedures and methods to control, to the extent feasible, such sources.	Pollutants associated with construction activities are expected to be those typically generated at a construction site such as; fugitive dust, non-hazardous solid waste materials and VOCs from paints and adhesives. The contractor will be required to comply with all State, County, and City regulations pertaining to pollution control.	Pages 5 & 7
FINANCING AND OTHER MEASURES NECESSARY TO CARRY OUT THE PLAN - If plan proposes to take over certificated private utility, describe how, when and financing will be managed.	Not applicable.	Not applicable
- Describe any significant measure necessary to carry out the plan, e.g., institutional, financial, economic, etc.	Additional phased construction will be financed through developer contributions/impact fees. As shown in appendix B, the financing arrangement will be in place to implement the necessary infrastructure.	Page 7 and Appendix B
- Describe proposed methods(s) of community financing.	JVT Investors, LLC will finance the initial phase construction and will seek reimbursement through sewer service fees from users of the WRF. The estimated annual operating revenue and operating expenses for each of the first five years of operation is summarized in Table 5.1. JVT Investors, LLC has access to funds sufficient to cover initial WRF construction and first year's operating expenses.	Page 7 and Appendix B
- Provide financial information to assure DMA has financial capability to operate and maintain wastewater system over its useful life.	Financial information is discussed in Appendix B	Appendix B
- Provide a timeline outlining period of time necessary for carrying out implementation of Plan.	A timeline for carrying out the implementation of the Plan is shown in Figure 5.	Figure 5
- Provide financial information indicating the method and measures necessary to achieve project financing. (Section 201 CWA or Section 604 may apply.)	Initial financing for the Wickenburg Ranch WRF will be provided by JVT Investors, the developer of Wickenburg Ranch. This initial financing will cover the capital costs and operating costs for the WRF until sufficient customers are connected to the wastewater system and payment of monthly sewer service charges are being collected. No financial constraints are expected for the treatment facility.	Page 7

IMPLEMENTABILITY		
Describe impacts and implementability of Plan:		
- Describe impacts on existing wastewater (WW) facilities, e.g., Sanitary district, infrastructure/facilities and certificated areas.	The Town of Wickenburg operates a 1.2 MGD facility in central Wickenburg, approximately 6 miles to the Southeast. The proposed service area for the Wickenburg Ranch WRF is outside the service area for the existing facility and therefore there should be no impact. There are no other existing treatment facilities in the area.	Page 2
- Describe how and when existing package plants will be connected to a regional system.	There are no existing operational package plants.	Page 5
- Describe the impact on communities and businesses affected by the plan.	There will be no negative impacts on communities or businesses anticipated.	Page 8
- If a municipal wastewater (WWT) system is proposed, describe how WWT service will be provided until the municipal system is completed: i.e. will package plants and septic systems be allowed and under what circumstances. (Interim services)	Packaged plants and/or interim services will not be required due to the phasing of the proposed WRF. Septic systems will not be allowed for individual users, but minor systems will be in place to serve the golf course as shown in Appendix A.	Page 8, Appendix E
PUBLIC PARTICIPATION		
- Submit copy of mailing list used to notify the public of the public hearing on the 208 amendment. (40 CFR, Chapter 1, Part 25.5)	Public participation requirements will be satisfied through NACOG.	Page 8
- List location where documents are available for review at least 30 days before public hearing.	Public participation requirements will be satisfied through NACOG	Page 8
- Submit copy of the public notice of the public hearing as well as an official affidavit of publication from the area newspaper. Clearly show the announcement appeared in the newspaper at least 45 days before the hearing.	Public participation requirements will be satisfied through NACOG.	Page 8
- Submit affidavit of publication for official newspaper publication.	Public participation requirements will be satisfied through NACOG.	Page 8
- Submit responsiveness summary for public hearing.	Public participation requirements will be satisfied through NACOG.	Page X

1.0 Executive Summary

In accordance with Section 208 of the Clean Water Act, the Northern Arizona Council of Governments (NACOG) is the Designated Regional Water Quality Management Planning Agency. This application is to request an amendment to the NACOG 208 Water Quality Management Plan for the proposed Wickenburg Ranch Water Reclamation Facility (WRF) located in unincorporated Yavapai County near Wickenburg, Arizona. The reclamation facility will be designed for an ultimate hydraulic capacity of 950,000 gallons per day on an average annual basis and will serve the Wickenburg Ranch development.

The proposed service area for the Wickenburg Ranch WRF is located northeast of the intersection of State Routes 89 and 93, as shown in Figure 2. Service to this area will be provided by the construction of a new WRF. The initial phase of construction will have a treatment capacity of 100,000 gpd. Future expansion of the reclamation facility will be built as market forces dictate growth rates in the master planned communities and undeveloped areas within the service area boundaries. For planning purposes, the Phase II design will begin and will have the Approval to Construct prior to the approval of Phase I construction.

The Wickenburg Ranch WRF will produce Class A+ effluent that will be primarily disposed of as reuse water at the development's golf course (located at 33°29'44" N, 112°55'17" W). Full reuse consumption is expected, but any excess flows will be released through an AZPDES discharge. The AZPDES permit will be obtained for disposal of treated effluent into the nearby Martinez Wash in case of emergency discharge needs.

Construction for the initial 100,000 gpd phase, see Figure 4, will be scheduled to begin in the third quarter of 2008 and commissioned for operation during the fourth quarter of 2009. Ownership and operational responsibilities will come through JVT Investors, LLC. in perpetuity. A letter describing the financial commitments to this project is attached in Appendix B.

A summary of the amendment request is provided in accordance with the Clean Water Act, Section 208 checklist. The checklist references where various issues were addressed within the document.

2.0 Authority

The purpose of this application to the Northern Arizona Council of Governments (NACOG) is to amend the NACOG 208 Water Quality Management Plan to include the Wickenburg Ranch WRF. NACOG is the Designated Planning Agency with the authority required by Section 208 (a)(2)(B) of the Clean Water Act to amend the Water Quality Management Plan for the Yavapai County Planning Area. NACOG has the authority to implement the plan for the proposed planning and services areas as outlined in this amendment application. The proposed facility is to be located within the planning area for Yavapai County.

3.0 Twenty Year Needs

A description of the 20-year needs, including adjacent area wastewater facilities, growth estimates during the 20-years, as well as descriptions of the proposed Wickenburg Ranch WRF is addressed in this section.

3.1 Description of Existing Water Reclamation Facilities

There is a currently existing, but non-operational wastewater treatment facility located in the Wickenburg Ranch development. There are no plans to operate this facility to provide service to the development. As the facility is currently not operating, there will be no negative impact to users in the service area.

The nearest operational wastewater facility is located southeast of the Wickenburg Ranch development in the Town of Wickenburg in Maricopa County, Arizona, approximately 6 miles to the southeast. This facility has a treatment capacity of 1.2 MGD, but has no capability or plans to serve areas outside of its Maricopa County 208 planning area, shown in Appendix D.

3.2 Description of the Proposed Wickenburg Ranch Water Reclamation Facility

3.2.1 Site Location and Property Ownership

The proposed service area is located north of U.S. Highway 93 and east of State Route 89 as described in Figure 2. The service area consists of the 1,250 acre Wickenburg Ranch development.

The Wickenburg Ranch development will be accessible through entrances from both State Route 89 and U.S. Highway 93.

The development plan for the Wickenburg Ranch development has been submitted to Yavapai County for review. Currently a portion of the property is developed, but is not currently being used, as a resort area, while the remainder is vacant, unimproved desert. Existing developments will be removed or incorporated into the new development.

As seen in Figure 1, the proposed site of the Wickenburg Ranch WRF is in the eastern edge of the Wickenburg Ranch development; longitude 34°01'46" N and latitude 112°47'48" W. This site is currently owned by JVT Investors, LLC, the developer for this project.

3.2.2 Topographic Conditions

The existing ground within the proposed service slopes generally to the south and southeast, with varying grades. The land consists of undeveloped ground cover typically classified as desert brush. Vegetation includes various types of cacti, mesquite trees, creosote bush, Palo Verde trees, and scattered short grasses. No fissures have been found on the property.

3.2.3 Service Area and Population Estimates

The service area for the Wickenburg Ranch WRF falls under the Congress Census County Division (CCD) of Yavapai. This division covers a large area, and is further divided into city areas of which this service area is not a part. Current POPTAC population for the remainder of the CCD is approximately 1500 people. The 2028 POPTAC population estimate is approximately 2,000 people.

The Wickenburg Ranch specific population estimates are based upon land use planning for the existing Development Master Plan as well as the remaining off-site areas. The total area considered is as shown in Figure 2. The projected number of residential dwelling units in the service area is approximately 3,400. At an estimated 2.0 - 2.5 capita per dwelling unit (depending on density), service area population is projected to be approximately 10,500.

The existing population in the service area is estimated to be less than 500. The developments in the service area will be phased to meet the demand in the region as the population grows over time. See Figure 3 for the 20-year growth projection for the service area.

3.2.4 Estimated Wastewater Flow

The wastewater flow into the Wickenburg Ranch WRF will come from three main sources: sewage flows from developments in the service area, a clubhouse, and an equestrian center, both parts of the Wickenburg Ranch development. Overall sewage flows can be estimated from predicted population densities in the service area. The following table identifies the population estimates and sewage flow summary.

Table 3.1 Flow Summaries

Land Use Type	# of Units (D.U.)	Average Daily Flow (gpcd)	Persons per D.U.	Average Daily Flow (gpd)
Residential				
Low and Medium Density	1,953	80	2.5	390,600
High Density	170	100	2.0	34,000
Resort / Time Share	202	100	2.0	40,400
Excess Capacity	1,099	80	2.5	219,800
Club House	1,000 members @ 100 gpcd			100,000
Equestrian Center	32 acres @ 0.1 gal/sf			139,392
Public Facility				26,100
Total	3,424			950,292

3.2.5 WRF Description

The initial phase of the Wickenburg Ranch WRF will be an extended aeration permanent package plant system. Construction of the WRF will be phased beginning with an initial 100,000 gpd phase, with expansion areas provided for two additional 315,000 gpd trains to serve the Wickenburg Ranch Development,

and a final 220,000 gpd train, to create the ultimate 950,000 gpd capacity. The initial phase will consist of the following process units:

- Influent pump station with pumping equipment
- Headworks to consist of flow metering and screening.
- Oxidic and aeration chambers
- Aeration will be supplied using positive displacement blowers.
- Clarifier
- Disinfection.
- MCC and electrical system.
- Reuse system

The design layout for the initial 100,000 gpd hydraulic phase will be constructed in such a way as to allow for the expansion and addition of two 315,000 gpd increments to better accommodate growth rate in the area. Design will be based upon a hydraulic loading of 80-100 gallons per capita per day average annual daily flow with an average capita per dwelling unit of 2.0 - 2.5 persons. Biological loading will be designed for maximum month (MM) values of 300 mg/L BOD, 300 mg/L suspended solids and 48 mg/L total nitrogen daily loading factors.

The treated effluent will meet ADEQ Title 18, Chapter 11 requirements for Class A+ reclaimed water, and the effluent water quality will conform to the following:

- Turbidity < 2 NTU (24 hour mean)
- Turbidity < 5 NTU (any time)
- Fecal Coliform = none detected (4 or 7 samples)
- Fecal Coliform < 23 CFU/100mL (any time)
- Total Nitrogen < 10 mg/L (5 day mean)

Because the initial introduction of sewage from a hydraulic standpoint will be dictated by the rate of home building in the service area, a vault and haul disposal process may be required until such time as the facility inflow reaches a treatable level (approximately 10,000 gpd). If vault and haul operations are required, influent flows will be stored in the treatment basins for removal to a designated treatment facility. A vault and haul contract has been signed with A-American Septic Services who will haul the flows to Resource Recovery of Arizona in Phoenix, Arizona. This mode of operation will continue until the hydraulic loading to the facilities reach treatable capacity levels. The vault and haul operation will be permitted as required.

Water reuse will be primarily to the golf courses and other landscape irrigation requirements of the Wickenburg Ranch development. Reuse lines, storage and pumps will all be provided to transport treated effluent to designated reuse sites.

Sludge from the treatment process will be digested in treatment basins, and stored for removal as required.

3.2.5.1 Effluent Disposal and Quality Requirements

Effluent disposal options for the Wickenburg Ranch WRF will primarily be through reuse for golf courses and other landscape irrigation in the development. Full reuse consumption is expected to account for the discharge of all treated

effluent. The other disposal option will be in the form of an AZPDES permit to allow for emergency discharge of treated effluent in the minor wash adjacent to the reclamation facility site as shown in Figure 2. Martinez Wash is a dry wash that runs along the eastern edge of the Wickenburg Ranch Development, towards the south east.

Effluent quality will be classified as A+ Reclaimed Water. This level of water quality will meet the requirements for all types of reuse and will comply with effluent reuse regulations of the Arizona Administration Code, Title 18, Chapter 9.

3.2.5.2 Storm Water Discharge

The Wickenburg Ranch WRF will be designed with grading and retention areas so that all storm water is contained on site. In this manner, there will be no non-point discharges of storm water from the facility. Upon completion of grading and drainage plans, the Stormwater Pollution Prevention Plan (SWPPP) will be submitted to Yavapai. The SWPPP will outline the best management practices (BMP) for controlling storm water run off during construction. Before construction begins at the WRF, a Notice of Intent (NOI) will be submitted to ADEQ with a copy sent to the county.

3.3 Sanitary Districts, Private Utilities, and WRF Service Areas

The location of the Wickenburg Ranch WRF and proposed service area are shown in Figure 2. There is an existing 30,000 gpd treatment facility located in the Wickenburg Ranch development. However, this facility was removed from active service in early 2008. There are no other existing private wastewater treatment or collection facilities, sanitary districts, or certified service areas that would be impacted from a process treatment standpoint. There will be no septic systems for private users in the development, however small septic systems will be in place to serve the golf course as shown in Appendix E.

Wickenburg Ranch infrastructure will include water distribution and sewer collection. Sewer outfall pipelines to the Wickenburg Ranch WRF will be sized to accommodate the ultimate planned sewerage flows (950,000 gpd) from the service area shown in Figure 2. Reuse lines will be sized based on reuse demands as required.

3.4 Summary of Alternatives

In the design of this WRF, various different alternatives were considered representing a variety of technologies and manufacturers. Due to low maximum flow conditions, many technologies would be too inefficient to implement for this project. A permanent packaged plant system was selected as the best technology for treating small flow capacities while ensuring high treatment standards.

The WRF equipment will be selected from a packaged plant equipment manufacturer who has proven equipment used in the Arizona.

3.5 Permitting Requirements

The Wickenburg Ranch WRF will require the following permits:

Permit	Permitting Agency
Approval to Construct (ATC)	Yavapai County
Approval of Construction (AOC)	Yavapai County
Aquifer Protection Permit (APP)	Arizona Department of Environmental Quality
Reuse Permit	Arizona Department of Environmental Quality
Underground Storage Facility Permit Water Storage Permit	Arizona Department of Water Resources
Arizona Pollutant Discharge Elimination System (AZPDES) Permit	Arizona Department of Environmental Quality
Vault and Haul Permit	Yavapai County
Air Quality Permit	Yavapai County
Annual Operation Permit	Yavapai County
Construction General Permit	Arizona Department of Environmental Quality

An APP pre-application meeting for the Wickenburg Ranch WRF was held with ADEQ in April of 2008. Meeting documentation is located in Appendix C.

3.6 Pretreatment Requirements

There are no industrial users located in the service area, and there are no plans for industrial users in the development. Therefore, no pretreatment will be required for the WRF. Any industrial users will require a separate 208.

3.7 Sludge Management

Sludge processing will include digestion, thickening and dewatering for the Wickenburg Ranch WRF. During the startup period of the initial phase, sewage will be temporarily stored on site in a sludge holding tank equipped with aeration and disinfection. At a predetermined frequency, the sewage will be hauled to another treatment facility for additional treatment. A contract has been signed with A-American Septic Services for hauling to Resource Recovery of Arizona in Phoenix, Arizona.

In later phases of expansion, sludge vault and haul operations for the WRF will become undesirable. Sludge dewatering equipment will be added to the WRF during an expansion phase. Thereafter, waste activated sludge will be digested, thickened, and dewatered using high solids centrifuges or presses. Because the sludge will be deposited in a landfill, stabilization will not be required. The dewatered sludge will be stored in haul-off containers and periodically hauled to Northwest Regional landfill for final disposal. Sludge will be Class B in accordance with R18-9-1006. There is not an end user identified for this product at this time. However the options for sludge disposal will remain open. Until such time as there is a market for the sludge, it will be delivered to the landfill for disposal. A valid sludge hauler and sludge disposal permit will be obtained from Yavapai County.

4.0 Construction and Operation Responsibility

Construction of the Wickenburg WRF will be the responsibility of the developer, JVT Investors, LLC. In order to accommodate the residential building schedule in the service area, the 100,000 gpd initial phase treatment facility must be started no later than the third quarter of 2008 with an anticipated facility commissioning to occur during the fourth quarter of 2009. A critical path schedule is shown in Figure 5.

The corporation will provide management direction and oversight for the operation and will hire staff/contract operators to provide for on-going and perpetual operations and maintenance.

4.1 Sources of Construction Pollution

Construction of the Wickenburg Ranch WRF will not be a pollution intensive activity. Anticipated pollutants may include dust from construction activities, construction related solid waste, and disposal of other inert materials. The construction will be conducted under an Air Quality Permit from Yavapai County, and will comply with the provisions of the permit. Any wastes generated during construction will be properly managed and disposed of at a regional landfill.

5.0 Financing

5.1 Financing Plan

Financing for the initial 100,000 gpd phase is budgeted in the amount of approximately \$2 million. JVT Investors, LLC has access to funds sufficient for the construction and operation of the WRF, as described in appendix B. As noted in Section 3.2, Description of the Proposed Facility, the initial phase is projected to satisfy first phase capacity requirements for the service area. Anticipated financing and other measures for future construction phases will come from JVT Investors, LLC and sewer service charges. JVT Investors, LLC proposes to establish monthly sewer service charges sufficient to provide full funding for all costs of management, operation, maintenance, and capital recovery. The rate structure and rates will be submitted to the Arizona Corporation Commission for approval prior to implementation.

The Wickenburg Ranch sewer collection system will be designed to receive ultimate service area build out flows in its collection system as well as the sewer outfall pipelines. Outfall sewer pipelines will be designed and constructed for the ultimate service area flows of 950,000 gpd.

6.0 Impacts and Implementation

6.1 Implementation Plan

This application identifies a service area for the Wickenburg Ranch WRF. The initial phase is anticipated to be completed by the fourth quarter of 2009. The

initial phase is anticipated to have a hydraulic treatment capacity of 100,000 gpd. Remaining phases will be added as needed depending on market demand for housing. Design of Phase II will begin as soon as construction of Phase I commences. In general, design for each additional phase should begin when 70 percent of the hydraulic/biological loading capacity has been reached. At that time actual sewage flows per dwelling unit will be known from historical flow measurement by which treatment capacity needs will be known. Construction for each expansion phase should begin when 80 percent of the capacity has been reached. Ultimate capacity of the WRF will be 950,000 gpd. A start-up plan will be submitted to Yavapai County once a contract has been awarded for design of the reclamation facility.

6.2 Impacts of the Proposed Plan

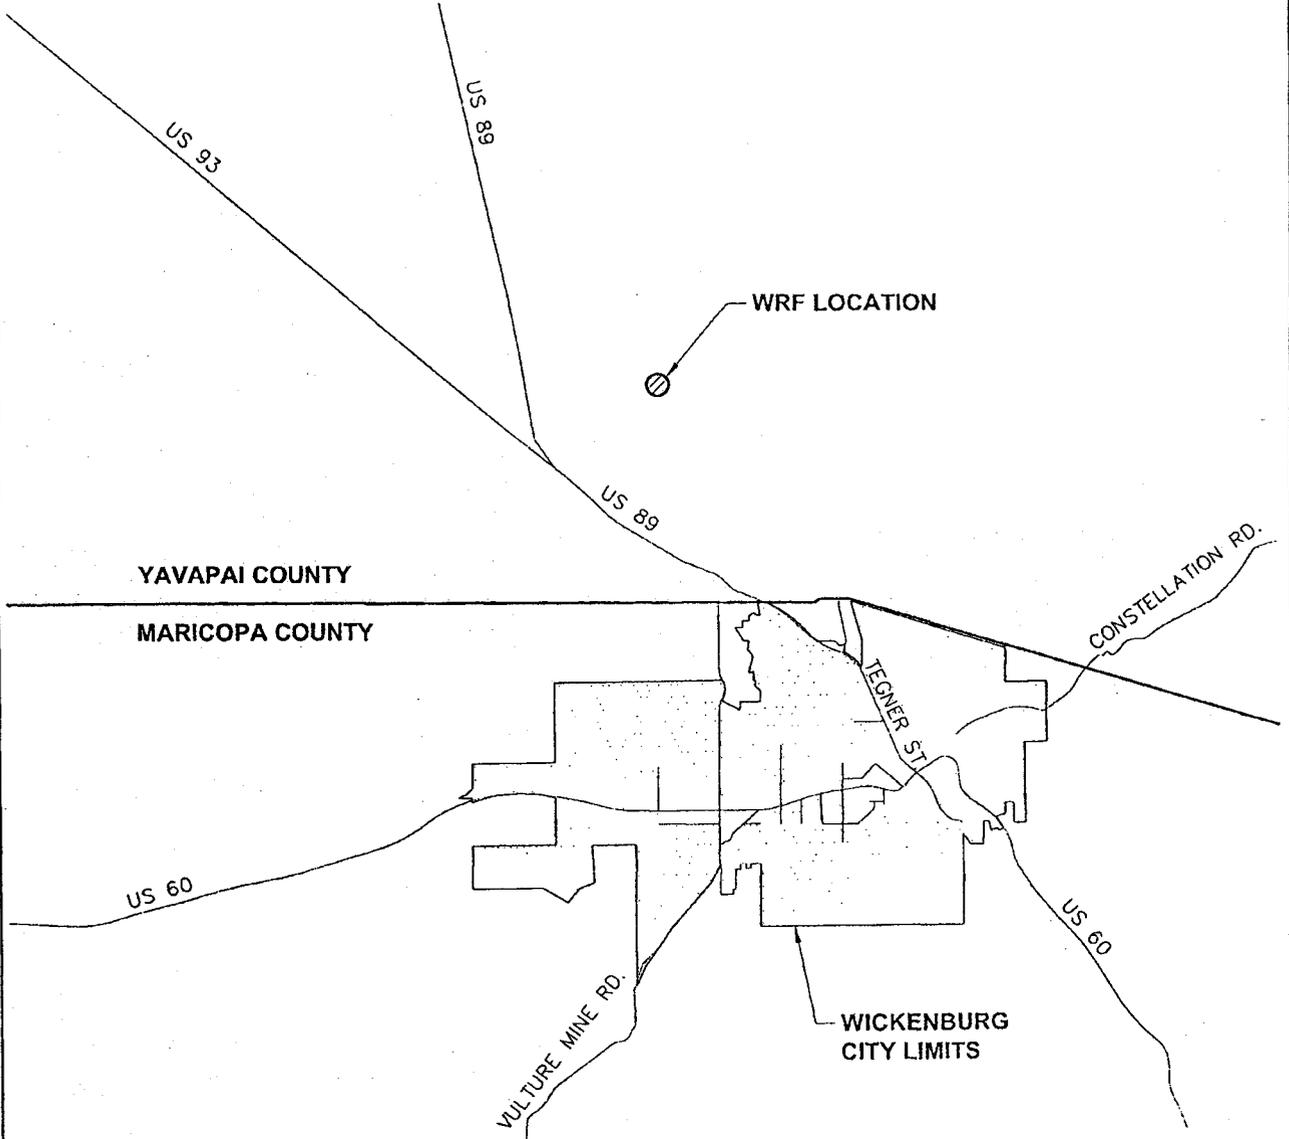

The implementation of Wickenburg Ranch WRF is not anticipated to have any negative impacts on the adjacent communities. The treated effluent reuse is not anticipated to increase odor or vector concern. Rather, it is expected that the WRF will bring a much needed municipal sewer service to this un-incorporated area of Yavapai County.

7.0 Public Participation

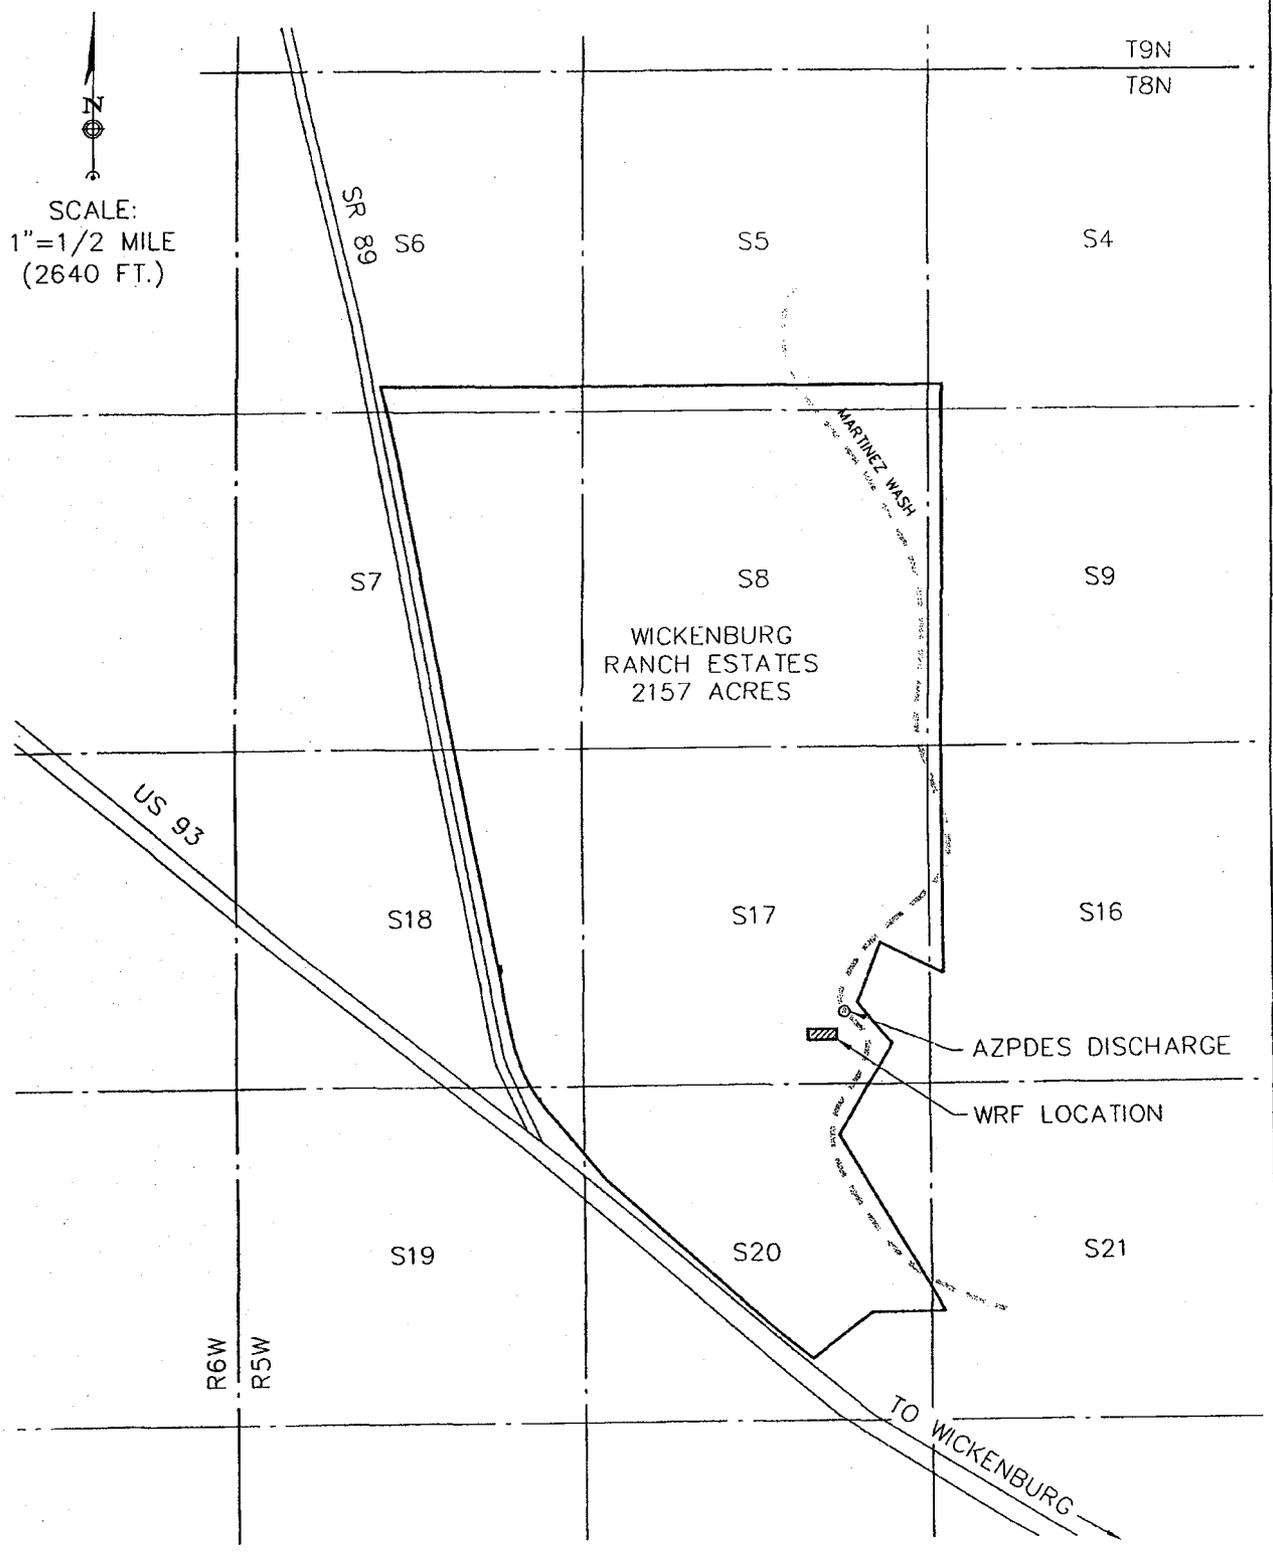

NACOG is responsible, with the cooperation of Yavapai County as sponsoring agency, for ensuring that required public participation requirements are followed as outlined in 40 CFR 25. The following constitute the minimum requirements:

- Submittal of a mailing list used to notify the public of the public hearing.
- Listing of locations where documents are available for review at least 30 days prior to the public hearing.
- Publication of public notice for the public hearing with information on time, date, subject, and location of public hearing at least 45 days prior to the public hearing.
- Submittal of an affidavit of publication for official newspaper publication.
- Submittal of a responsiveness summary following the public hearing.

Financial Assurance

June 10, 2008

Mr. Chris Fetzer
NACOG
119 East Aspen Avenue
Flagstaff, AZ 86001

RE: Wickenburg Ranch Water Reclamation Facility

Dear Mr. Fetzer,

This letter is in regard to Wickenburg Ranch Wastewater, LLC and its financial ability to construct major capital infrastructure related to the Wickenburg Ranch wastewater treatment plant.

Vanwick, LLC is the sole member and manager of Wickenburg Ranch Wastewater, LLC. Larry Van Tuyl is the sole member of Vanwick, LLC which is managed by VTwick, Inc. Mr. Van Tuyl is the president of VTwick, Inc.

In the past Chase Bank has participated with Mr. Van Tuyl and his related entities in financing \$100,000,000 for development activities. Chase Bank has had a satisfactory relationship with Mr. Van Tuyl and his related entities for over 25 years.

With respect to the financial resources necessary to construct the subject wastewater treatment plant for Wickenburg Ranch, Chase Bank can state that Wickenburg Ranch Wastewater LLC and its affiliates have access to funds in an amount of not less than \$20,000,000.

Should you have any further questions regarding this matter, please feel free to contact me directly at 602-221-6379. Thank you.

Sincerely,

Bill Spodgrass
Vice President and Relationship Manager
Chase Bank
201 N Central Ave
Phoenix, AZ 85004

Appendix C

APP Pre-Application Meeting Minutes

**APP Pre-Application Meeting
Wickenburg Ranch WRF**

April 28th, 2008
10:00 a.m. - ADEQ

ATTENDEES

Bob Manley, ADEQ
Mohamed Hegazy, ADEQ
Jeanette Black, ADEQ
Peter Chan, CSA Engineering
John Tyldesley, CSA Engineering
Steve Corell, Clear Creek and Associates
Brian Helm, SKG
Brad Miller, Prescor Management
Rick Radavich, Prescor Management
David Green, M3 Companies

MINUTES

1. Jeanette Black will serve as Project Hydrologist. Mohamed Hegazy will be the project engineer. Bob Manley will serve as Project Officer subject to reassignment.
2. CSA presented the proposed extended aeration permanent package plant system, along with the intention to use the existing 20,000 gpd plant in the area as a scalping plant to reduce requirements for vault and haul operations.
3. ADEQ could require that the implementation of each phase be less than 5 year. If it exceeds 5 years, then the BADCT requirements will be re-evaluated.
4. Total capacity will be 950,000 gpd. Permit will be for some phased capacity appropriate to timing requirements.
5. If multiple phases are covered in the submittal, design drawings will be kept separate by phase when submitted.
6. ADEQ requires the ability to release or recharge all effluent produced. Reuse does not count towards this requirement. Reuse will be the primary disposal

method, but an AZPDES permit will be applied for in order to meet ADEQ disposal requirements. An AZPDES pre-application meeting is recommended.

7. Document any wells within ½ mile radius.
8. 8 periodic samples will be required to provide existing condition data. Data may be from PoC prior to any discharge activities, or from a well upstream of the discharge point. Potable well data is not applicable.
9. Groundwater recharge impact study will be submitted with the application. An analytical method may be used to determine the discharge impact area.
10. The APP application must include construction cost, O&M costs, and closure cost based on current figures.
11. R18-9-A203 outlines the financial requirements. *Financial assurance is required for permit issuance, will not be required for review phases.*

ATTACHMENT 12-1

**MEMORANDUM OF AGREEMENT
BETWEEN ARIZONA PUBLIC SERVICE COMPANY
AND VAN DEVELOPMENT CO, INC, 5860 DEVELOPMENT, INC, JVT
INVESTORS, LLC, and VANWICK, LLC**

This Memorandum of Agreement (the "MOA") is entered into this 28 day of August, 2009 by and between **Arizona Public Service Company**, an Arizona corporation ("APS"), **Van Development Co., Inc.**, a Kansas corporation ("VDC"), **5860 Development, Inc.**, an Arizona corporation ("5860"), **JVT Investors, LLC**, an Arizona limited liability company ("JVT"), and **Vanwick, LLC**, an Arizona limited liability company ("VWICK"), (VDC, 5860, JVT, and VWICK are collectively referred to as "Owner").

RECITALS

- A. Owner is the owner of the Wickenburg Ranch Resort, an approximately 2160 acre golf resort located on the east side of Highway 89, in sections 7, 8, 17, 18, 19, and 20, Township 8 North, Range 5 West, in Yavapai County, Arizona, which is legally described on **Exhibit "A"** attached hereto and by this reference incorporated herein (the "Property"). That portion of the Property to be affected by the facilities and easements described in this MOA, and the locations of such facilities and easements, are depicted on the Site Plan attached hereto as **Exhibit "B"** and by this reference incorporated herein (the "Site Plan").
- B. Based on planning studies, APS intends to construct and install a new 69/12kV Substation, which shall be known as the Congress Substation (the "Substation"), which will provide electric service to the Property.
- C. Owner has agreed to (a) donate the site required to house the Congress Substation in the approximate location and configuration of Tract C as reflected on the Site Plan (the "Substation Site") and to provide an access easement to the Substation Site across the area identified as Tract D on the Site Plan (the "Access Easement").
- D. Owner has requested that APS install 69kV overhead power lines within the 30 foot-wide APS Utility Easement and Trail Easement along the northern boundary of the Property as reflected on the Site Plan (the "APS/Trail Easement"). The proposed in and out 69kV overhead lines exiting Congress Substation will extend and connect to the existing White Spar to Wickenburg 69kV overhead line for an approximate distance of 3.61 miles.

AGREEMENT

In consideration of the foregoing premises and the mutual covenants and agreements set forth herein, the parties hereby agree as follows:

1. Promptly following execution of this MOA, Owner shall convey fee title to the Substation Site to APS by Special Warranty Deed in the form appearing as **Exhibit "C"** attached hereto and by this reference incorporated herein. In addition, Owner shall, through easement documentation reasonably acceptable to Owner and APS:
 - a. establish a dedicated, exclusive, uniform ten-foot wide safety zone easement around the perimeter of the Substation Site (the "Safety Zone Easement");
 - b. establish a non-exclusive thirty (30) foot wide easement in favor of APS within the area identified on the Site Plan and referred to herein as the "APS/Trail Easement" for the installation and maintenance of the in and out 69kV overhead power lines out of Congress Substation, subject to the conditions stated in Sections 9 and 10 of this MOA; and
 - c. establish a non-exclusive access easement in favor of APS over and through the Access Easement area reflected on the Site Plan, lying between the Substation Site and the APS/Trail Easement (the "Access Easement") which shall be shared with VWICK which will be maintaining facilities immediately south of the Substation Site on Exception Parcel 1 as reflected on the Site Plan ("Exception Parcel 1").
2. Owner shall cause its engineers to prepare legal descriptions for use in conveying the above described Substation Site and establishing the above described easements which are an accurate representation of the Substation Site, the Safety Zone Easement, the APS/Trail Easement and the Access Easement depicted on the Site Plan.
3. Owner shall include full depiction and name designations of the Substation Site, the Safety Zone Easement, the APS/Trail Easement and the Access Easement on any subdivision plat(s) encompassing such areas which are ultimately recorded in the Yavapai County records.
4. The above described easements shall further delineate APS' rights and responsibilities with respect to the APS/Trail Easement, the Safety Zone Easement and the Access Easement.

5. Owner shall grant to APS all necessary temporary construction easements to provide for ingress and egress across the Property to and from the overhead 69kV alignment contemplated in this MOA. Said ingress and egress routes shall be mutually determined by the Owner and APS and APS shall provide an easement instrument to the Owner for signature prior to APS' usage thereof.
6. Owner shall provide APS a temporary construction "lay down" area easement approximately 300 feet X 300 feet for the purpose of material/equipment storage and provide for helicopter operations relating to the construction of the 69kV overhead power lines. Said lay down area shall be located on the Property at a mutually acceptable location.
7. The above referenced Substation Site, Safety Zone Easement, Access Easement, APS/Trail Easement, the temporary ingress/egress and lay down area easements shall be provided to APS at no cost.
8. APS will bear the full cost for the design and construction of its new 69kV overhead lines and Substation, except as otherwise provided in this MOA and unless the Owner requests additional construction for its benefit.
9. Owner will not allow any future utility lines or facilities to be constructed within the APS/Trail Easement without the prior written consent of APS' authorized representative. Owner shall promptly notify APS in writing of any requests for construction of utility lines or other facilities within the APS/Trail Easement. If APS believes such lines or other facilities may be detrimental to or interfere with the operation, maintenance, upgrading, repair or removal of its overhead 69kV electric lines, then APS can deny such request. If APS and Owner cannot agree as to whether any future utility lines or other facilities will likely interfere with or be detrimental to the overhead 69kV electric lines, APS shall have final authority to decide whether such future utility lines or other facilities shall be permitted and under what terms and conditions.
10. If future utility lines or other facilities are permitted to be constructed by Owner or are constructed by Owner within the APS/Trail Easement without APS' approval, Owner shall require the owner of such utility lines or facilities to promptly remove or relocate them (at the expense of the Owner) if and when in APS' opinion an actual or a reasonably threatened conflict or interference with APS' operation, use or maintenance of the overhead 69kV electric lines arises.
11. At this time, Owner and APS do not contemplate that APS will be required to disturb any previously delineated 404 jurisdictional waterways within the boundaries of the Property in order to install the 69kV overhead lines. Should it be determined in the future that APS will need to disturb previously delineated 404 jurisdictional waterways within the boundaries of the Property to install the 69kV overhead lines, Owner and APS agree to mutually cooperate in resolving the 404 disturbance issues to avoid violating the terms of the Owner's existing

404 permit. If any such resolution requires an amendment to such 404 permit or the issuance of a new or supplemental permit, APS shall be responsible for the processing and cost of acquiring the same.

12. APS will construct a low profile-type Substation that will have 10 ft high block wall. The Owner will have the opportunity to review the site design and provide input regarding the aesthetic treatment to the Substation walls. The perimeter wall shall be approved by the Owner and shall be aesthetically compatible with the Wickenburg Ranch Resort. Owner's approval shall not be unreasonably withheld, conditioned or delayed.
13. The Owner has completed grading and compaction of the Substation Site in accordance with the grading plans prepared by SKG under its Job#154-1 dated August 11, 2008, a copy of which has been provided to and accepted by APS. APS has inspected such work and hereby confirms that such work has been performed in accordance with the Grading Plans, and is in accordance with APS standards. APS shall provide all final grading, excluding retention grading, as may be required in conjunction with the construction of the Substation. All storm water detention and/or retention basins required for the Substation Site shall be located on Exception Parcel 1. The Substation Site will drain to locations away from the Substation Site.
14. Private access to the Substation Site will be accommodated with two points of access off the Access Easement as generally depicted on the Site Plan. The roadway to the Access Easement will be structurally constructed by the Owner, in compliance with AASHTO Standard HS-20 Loading Requirements. A forty (40) foot minimum radius will be installed for access driveways to accommodate large truck and trailer vehicles. The roadway will comply with Yavapai County or ADOT standards (as applicable) for access to the Substation Site. It shall be surfaced from SR89 to the Access Easement, and shall incorporate locked gates to limit travel from SR89 across the Access Easement to authorized APS and Water Company personnel and contractors, and shall include turn lanes, if required by Yavapai County or ADOT. APS and the Owner shall share equally in the cost of all of the work described in this Section 14.
15. **INTENTIONALLY OMITTED.** [Note: the improvements previously described in this Section 15 are incorporated into the scope of work described in Section 14 above.]
16. Owner agrees to operate and maintain any ADOT mandated improvements within SR89 at Owner's sole expense, unless maintenance is performed by ADOT or Yavapai County.

17. Owner agrees that APS shall have permanent emergency access to and from the Congress Substation via the Access Easement contemplated hereunder as well as upon surface streets interior to the Property and linking to Highway 89 and Highway 93.
18. No encroachment into or landscaping or other improvements shall be permitted within the Access Easement, the APS/Trail Easement and the Safety Zone Easement without prior written approval of APS' authorized representative.
19. Owner will be responsible for the management of storm water drainage onto Exception Parcel 1 from the Substation Site. Owner will be responsible for any landscaping requirements and maintenance outside of the Safety Zone Easement.
20. Owner will diligently prepare and submit to APS any landscape plans for the surface surrounding the perimeter of the Access Easement, the Safety Zone Easement, and the APS/Trail Easement, including any plans for an irrigation system, for its comments and written approval prior to installation of such improvements adjacent thereto. Such approval shall not be unreasonably withheld, conditioned or delayed by APS. Upon APS' approval of Owner's landscape and irrigation system plans, the Owner may install landscape materials and the irrigation system in accordance with the APS-approved plans after the completion of the Substation and installation of the power lines contemplated in this MOA (collectively, the "Project").
21. This Agreement will be effective when it has been signed by duly authorized representatives of both parties.
22. The parties may, from time to time, amend or supplement this MOA but to be legally binding upon the parties, the amendment or supplement must be in writing, and signed by authorized representatives of the parties.
23. Nothing contained in the MOA will be considered to be a formation of a partnership, joint venture or other legal entity, nor shall the parties be authorized to represent one another. The parties' relationship under this MOA is that of independent contractors.
24. Each party (the "Indemnifying Party") shall indemnify and hold harmless the other party and its directors, officers, agents, and employees (the "Indemnified Parties") from and against any and all claims, demands, suits, cost of defense, attorneys' fees, witness fees of any type, losses, damages, expenses, and liabilities arising as a result of injury to or death of any person or persons or damage to or loss of tangible property to which the Indemnified Parties may be put or subject, but only to the extent caused by any act, action, omission, negligence or default on the part of the Indemnifying Party or any of its employees, agents, or contractors.

25. If Owner defaults in any of its obligations hereunder and as a result of such default APS can not complete the Project, Owner will pay APS for any actual costs incurred by APS as of the effective date of cancellation associated with the Project, including without limitation, engineering, right-of-way acquisitions, and materials within thirty (30) days following receipt of APS' invoice. In the determination of actual costs incurred by APS as a result of Owner's untimely cancellation, APS shall mitigate such costs as much as is commercially reasonable and possible.
26. All cost, material, and technical specifications involved with the Project are deemed confidential and proprietary and shall not be shared with any third parties without the prior written consent of APS.

GENERAL PROVISIONS

- a. Force Majeure: Notwithstanding any other term, condition or provision hereof to the contrary, in the event either Party hereto is precluded from satisfying or fulfilling any duty or obligation imposed upon such party by the terms hereof (excluding the obligation to make payments called for by this MOA) due to labor strikes, material shortages, war, civil disturbances, severe weather conditions, natural disasters, acts of God, or other events beyond the control of such party, the time period provided herein for the performance by such party of such duty or obligations shall be extended for a period equal to the delay occasioned by such events.
- b. Timing: Time is of the essence in implementing the terms of this MOA.
- c. Other Acts: Each of the parties hereto shall promptly and expeditiously execute and deliver all such documents and perform all such acts as reasonably necessary, from time to time, to carry out the matters contemplated by this MOA.
- d. Waiver: No delay in exercising any right or remedy by either APS or Owner shall constitute a waiver thereof. Any waiver of the provisions of this MOA must be in writing and signed by the appropriate officials or officers of the APS or Owner. The failure of any party to enforce the provisions of the MOA or require performance of any of its provisions shall not be construed as a waiver of such provisions or affect the right of the party to enforce all of the provisions of the MOA. Waiver of any breach of this MOA shall not be held to be a waiver of any preceding or subsequent breach of the same or any other covenant or condition of this MOA.
- e. This MOA shall be interpreted and enforced in accordance with the laws of the State of Arizona without application of its rules related to Conflicts of Laws.

WARRANTY DEED EXHIBIT "1"

That certain parcel of land situated in the Northwest quarter of Section 7, Township 8 North, Range 5 West Gila and Salt River Meridian, Yavapai County, Arizona, more particularly described as follows:

COMMENCING at the North quarter corner of Said Section 7

THENCE: North 89° 59' 56" West along the North line of the Northwest quarter of said Section 7 a distance of 517.86 feet;

THENCE: Departing said North line on a bearing of South 00° 00' 00" East, a distance of 98.43 feet to the TRUE POINT OF BEGINNING;

THENCE: continuing on a bearing of South 00° 00' 00" East, a distance of 207.24 feet;

THENCE: South 90° 00' 00" West, a distance of 210.23 feet;

THENCE: North 00° 00' 00" East, a distance of 207.24 feet;

THENCE: North 90° 00' 00" East, a distance of 210.23 feet to the TRUE POINT OF BEGINNING. Said parcel encompassing 1.00 acres.

ATTACHMENT 12-3

November 18, 2010
Mr. Gary Edwards, Town Manager
Town of Wickenburg
155 N. Tegner, Suite A
Wickenburg Arizona 85390

Dear Mr. Edwards:

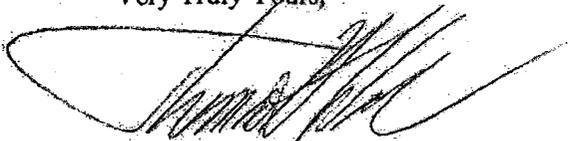

On November 16, 2010, Wickenburg Ranch Wastewater, LLC filed with the Arizona Corporation Commission ("Commission") an application for authority to provide sewer service to Wickenburg Ranch in the area (see attached map and legal description). The Commission has designated this matter as docket no. SW-20769A-10-0469.

The application is available for inspection during regular business hours at the offices of the Commission at 1200 West Washington Street, Phoenix, Arizona 85007, and at Wickenburg Ranch Wastewater, LLC, c/o M3 Companies, 4222 East Camelback Road, Suite H-100, Phoenix, Arizona 85018. If you have any questions about this application, or if you would like to obtain a copy of the application, you may contact Wickenburg Ranch Wastewater management, whose contact information is below:

Bill Brownlee
M3 Builders, LLC
4222 East Camelback Road
Suite H-100
Phoenix, Arizona 85018

Programs & Projects Specialist
Utilities Division

THRU: Del Smith *DS*
Engineering Supervisor
Utilities Division

DATE: January 4, 2011

RE: **WICKENBURG RANCH WASTEWATER (DOCKET NO. SW-20769A-10-0469)**
AMENDED LEGAL DESCRIPTION

RECEIVED

JAN 05 2010

MOYES SELLERS

The area requested by Wickenburg for a CC#N for sewer service has been plotted using an amended legal description correcting two minor errors on Page 1-4 of the Company's Exhibit 1, which has been docketed. The remaining pages of the original legal description remain unchanged. The attached legal description includes the corrected page and should be used in place of the original description (in its entirety) submitted with the application.

Also attached is a copy of the map for your files.

Wickenburg Ranch Wastewater, I.L.C.
Service Area Legal Description
Parcel No 1

All that portion of Sections 7, 8, 17 and 18, Township 8 North, Range 5 West of the Gila and Salt River Base and Meridian, Yavapai County, Arizona, more particularly described as follows:

BEGINNING at the Northeast Corner of said Section 7, point also being the Northwest corner of said Section 8:

Thence North 89 degrees 58 minutes 15 seconds East, 639.21 feet along the North line of said Section 8;

Thence South 17 degrees 27 minutes 50 seconds East, 913.00 feet;

Thence South 20 degrees 28 minutes 12 seconds East, 803.26 feet;

Thence South 39 degrees 20 minutes 49 seconds East, 1119.67 feet;

Thence South 17 degrees 52 minutes 53 seconds East, 402.20 feet;

Thence South 12 degrees 51 minutes 26 seconds West, 249.52 feet;

Thence South 01 degrees 07 minutes 38 seconds West, 411.79 feet;

Thence South 23 degrees 07 minutes 02 seconds East, 236.98 feet;

Thence South 38 degrees 58 minutes 00 seconds East, 329.01 feet;

Thence South 54 degrees 59 minutes 00 seconds East, 1101.16 feet;

Thence South 13 degrees 43 minutes 16 seconds West, 1068.17 feet to a point from which the South Quarter corner of said Section 8 bears North 34 degrees 30 minutes 42 seconds West, 471.28 feet;

Thence North 85 degrees 04 minutes 37 seconds West, 417.23 feet;

Thence North 74 degrees 12 minutes 30 seconds West, 384.82 feet;

Thence North 85 degrees 59 minutes 26 seconds West, 252.71 feet;

Thence South 87 degrees 41 minutes 42 seconds West, 678.82 feet;

Thence North 78 degrees 08 minutes 06 seconds West, 799.05 feet;

Thence North 69 degrees 14 minutes 01 seconds West, 601.69 feet to a point from which the corner common to said Sections 7, 8, 17 and 18, bears South 50 degrees 33 minutes 43 seconds East, 192.62 feet;

Thence South 06 degrees 07 minutes 06 seconds West, 642.74 feet;

Thence South 23 degrees 44 minutes 04 seconds East, 565.53 feet;

Thence South 05 degrees 31 minutes 57 seconds West, 817.18 feet;

Thence South 11 degrees 54 minutes 27 seconds West, 1042.85 feet;

Thence South 74 degrees 13 minutes 56 seconds West, 437.84 feet;

Thence South 82 degrees 21 minutes 15 seconds West, 62.17 feet;

Thence North 78 degrees 05 minutes 33 seconds West, 964.58 feet to a point on the East right-of way of United States Highway 89:

Thence North 10 degrees 49 minutes 30 seconds West, 7191.87 feet along the said East right-of-way to a point on a tangent curve concave to the West and having a radius of 11,510.00 feet and a center point which bears South 79 degrees 06 minutes 51 seconds West;

Thence continuing along said curve through a central angle of 02 degrees 43 minutes 45 seconds and an arc length of 548.27 feet;
Thence North 13 degrees 31 minutes 56 seconds West, 496.30 feet along the East right-of-way to a point on the North line of said Section 7;
Thence South 89 degrees 59 minutes 56 seconds East, 925.02 feet along the said North line to the North Quarter corner of said Section 7;
Thence South 89 degrees 56 minutes 00 seconds East, 2368.78 feet to the Northeast corner of said Section 7 and the POINT OF BEGINNING.

EXCEPTING there from that portion of the Southeast quarter of the Northwest (SE ¼, NW ¼) of Section 7, Township 8 North, Range 5 West of the Gila and Salt River Base and Meridian, Yavapai County, Arizona, conveyed to the State of Arizona in Deed recorded in Book 4159 of Official Records, Page 828, records of Yavapai County, Arizona, described as follows:

COMMENCING at an aluminum cap marking the West quarter corner of said Section 7 from which a rebar marking the East quarter corner of said Section 7 bears South 89 degrees 06 minutes 17 seconds East, 5288.84 feet;
Thence along the East-West mid section line of said Section 7, South 89 degrees 06 minutes 17 seconds East 2483.49 feet to the existing right of way centerline of State Route 89 (Wickenburg-Prescott Highway);
Thence along said existing right of way centerline of State Route 89 North 10 degrees 18 minutes 52 seconds West 144.20 feet;
Thence North 79 degrees 41 minutes 08 seconds East 50.00 feet to the said existing Easterly right of way line of said State Route 89 and the Point of Beginning;
Thence South 55 degrees 18 minutes 52 seconds East 29.70 feet;
Thence South 10 degrees 18 minutes 52 seconds East, 50.00 feet;
Thence South 33 degrees 21 minutes 12 seconds West 30.41 feet to said existing Easterly right of way line of said State Route 89;
Thence along said existing Easterly right of way line of State Route 89, North 10 degrees 18 minutes 52 seconds West 93.00 feet to the Point of Beginning.

AND EXCEPTING that portion of the Southwest quarter of the Southeast quarter (SW ¼, SE ¼) of said Section 7, Township 8 North, Range 5 West of the Gila and Salt River Base and Meridian, Yavapai County, Arizona, described as follows;
COMMENCING at a rebar marking the South quarter corner of said Section 7 from which a marked stone marking the Southeast corner of said Section 7 bears South 89 degrees 32 minutes 23 seconds East 2643.46 feet;
Thence along the South line of said Section 7 South 89 degrees 32 minutes 23 seconds East 347.08 feet to said existing right of way centerline of State Route 89;
Thence along said existing right of way centerline of State Route 89 North 10 degrees 18 minutes 52 seconds West 898.02 feet;
Thence North 79 degrees 41 minutes 08 seconds East 50.00 feet to the existing right of way line State Route 89 and the Point of Beginning;
Thence South 55 degrees 18 minutes 52 seconds East 7.07 feet;
Thence South 10 degrees 18 minutes 52 seconds East 76.00 feet;

Thence South 34 degrees 41 minutes 08 seconds West 7.07 feet to said existing Easterly right of way line of State Route 89;
Thence along said existing Easterly right of way line of State Route 89 North 10 Degrees 18 minutes 52 seconds West 86.00 feet to the Point of Beginning;

AND EXCEPTING that portion of the Northwest quarter of the Northeast quarter (NW ¼, NE ¼) of Section 18, Township 8 North, Range 5 West of the Gila and Salt River Base and Meridian, Yavapai County, Arizona, conveyed to the State of Arizona in Deed recorded in Book 4159 of Official Records, Page 828, records of Yavapai County,

Arizona, described as follows:

COMMENCING at a marked stone marking the Northeast corner of said Section 18 from which a rebar marking the North quarter corner of said Section 18 bears North 89 degrees 35 minutes 35 seconds West 2643.46 feet;

Thence along the North line of said Section 18, North 89 degrees 35 minutes 33 seconds West, 2296.38 feet to said existing right of way centerline of State Route 89;

Thence along said existing right of way centerline of said State Route 89, South 10 degrees 18 minutes 52 seconds East 616.98 feet;

Thence North 79 degrees 41 minutes 08 seconds East 50.00 feet to said existing Easterly right of way line of said State Route 89 and the Point of beginning;

Thence South 55 degrees 18 minutes 52 seconds East 24.04 feet;

Thence South 10 degrees 18 minutes 52 seconds East 20.00 feet;

Thence South 34 degrees 41 minutes 08 seconds West 24.04 feet to said existing right of way line of said State Route 89;

Thence along said existing Easterly right of way line of State Route 89, North 10 degrees 18 minutes 52 seconds West 54.00 feet to the Point of Beginning;

AND EXCEPT all minerals and all uranium, thorium, or any other material which is or may be determined to be peculiarly essential to the production of fissionable materials, whether or not of commercial value, as reserved in Patent from United States of America, recorded in Book 192 of Deeds, Page 423 and in Book 10 of Official Records, Page 406, records of Yavapai County, Arizona.

(Reservoir Site 2008)

AND EXCEPT that portion of the Northwest quarter of said Section 7, Township 8 North, Range 5 West of the Gila and Salt River Base and Meridian, Yavapai County, Arizona, more particularly described as follows:

COMMENCING at the North quarter corner of said Section 7;

Thence North 89 degrees 59 minutes 56 seconds West along the North line of said Northwest quarter a distance of 476.65 feet to the TRUE POINT OF BEGINNING;

Thence South 00 degrees 00 minutes 00 seconds East, leaving said North line a distance of 193.27 feet;

Thence South 75 degrees 41 minutes 21 seconds East a distance of 318.69 feet to a point on a curve the radius of which bears South 45 degrees 19 minutes 13 seconds East a distance of 42.50 feet;

Thence Southerly along the arc of said curve through a central angle of 41 degrees 35 minutes 32 seconds a distance of 30.85 feet;

Thence North 75 degrees 18 minutes 54 seconds West, leaving said curve a distance of 308.93 feet;

Thence South 16 degrees 29 minutes 36 seconds West a distance of 65.66 feet;

Thence South 00 degrees 00 minutes 00 seconds East a distance of 21.39 feet to the TRUE POINT OF BEGINNING;

Thence continuing South 00 degrees 00 minutes 00 seconds East a distance of 224.22 feet;

Thence South 76 degrees 45 minutes 28 seconds West a distance of 141.74 feet;

Thence North 58 degrees 42 minutes 37 seconds West a distance of 98.50 feet;

Thence North 13 degrees 31 minutes 56 seconds West a distance of 211.40 feet;

Thence North 90 degrees 00 minutes 00 seconds East a distance of 271.61 feet, to the TRUE POINT OF BEGINNING.

(Well 4 site 2008)

AND EXCEPT That portion of the Southeast quarter of Section 7, of Township 8 North, Range 5 West of the Gila and Salt River Base and Meridian, Yavapai County, Arizona, more particularly described as follows:

COMMENCING at the East quarter Corner of said Section 7, from which the Southeast corner of said Section 7, bears South 00 degrees 00 minutes 08 seconds West a distance of 2641.48 feet;

Thence North 89 degrees 06 minutes 17 seconds West along the North line of said Southeast quarter a distance of 2468.03 feet;

Thence South 00 degrees 53 minutes 43 seconds West leaving said North line a distance of 663.59 feet to the TRUE POINT OF BEGINNING;

Thence North 83 degrees 04 minutes 35 seconds East a distance of 76.74 feet, to a point on a curve the radius of which bears South 83 degrees 04 minutes 35 seconds West a distance of 784.00 feet;

Thence Southerly along the arc of said curve through a central angle of 09 degrees 11 minutes 41 seconds a distance of 125.82 feet to a point of tangency;

Thence South 02 degrees 16 minutes 16 seconds West a distance of 28.78 feet;

Thence North 87 degrees 43 minutes 44 seconds West a distance of 52.84 feet;

Thence North 10 degrees 49 minutes 30 seconds West a distance of 145.58 feet to the TRUE POINT OF BEGINNING.

Parcel 1

WR Wastewater, Service Area

5-7-09

Wickenburg Ranch Wastewater, LLC
Service Area Legal Description
Parcel No 2

All that portion of Sections 7, 8, 17, 18, 19, 20 and 21, Township 8 North, Range 5 West of the Gila and Salt River Base and Meridian, Yavapai County, Arizona, more particularly described as follows:

Commencing at the Northwest Corner of said Section 8, point also being the Northeast corner of said Section 7:

Thence North 89 degrees 58 minutes 15 seconds East, 639.21 feet along the North line of said Section 8 to the POINT OF BEGINNING;

Thence continuing North 89 degrees 58 minutes 15 seconds East, 4633.71 feet to the Northeast corner of said Section 8;

Thence South 00 degrees 05 minutes 03 seconds East, 2642.77 feet to the East quarter corner of said Section 8;

Thence South 00 degrees 01 minutes 00 seconds East, 2643.56 feet to the South east corner of said Section 8, point also being the northeast corner of said Section 17;

Thence South 00 degrees 00 minutes 39 seconds East, 3940.42 feet;

Thence North 63 degrees 02 minutes 31 seconds West, 1071.34 feet;

Thence North 20 degrees 06 minutes 58 seconds East, 432.62 feet;

Thence North 42 degrees 25 minutes 18 seconds West, 173.13 feet;

Thence North 07 degrees 17 minutes 47 seconds West, 783.65 feet;

Thence North 05 degrees 50 minutes 06 seconds West, 1558.35 feet;

Thence North 86 degrees 37 minutes 10 seconds West, 2501.12 feet;

Thence South 10 degrees 26 minutes 30 seconds East, 1885.29 feet;

Thence South 12 degrees 35 minutes 38 seconds East, 1051.68 feet;

Thence South 61 degrees 23 minutes 09 seconds East, 972.18 feet;

Thence North 62 degrees 23 minutes 49 seconds East, 135.52 feet;

Thence South 49 degrees 22 minutes 53 seconds East, 66.84 feet;

Thence South 01 degrees 17 minutes 16 seconds East, 176.23 feet;

Thence South 23 degrees 00 minutes 31 seconds West, 142.25 feet;

Thence South 20 degrees 51 minutes 27 seconds West, 70.97 feet;

Thence South 15 degrees 04 minutes 21 seconds West, 231.46 feet;

Thence South 06 degrees 02 minutes 25 seconds West, 150.25 feet;

Thence South 03 degrees 24 minutes 22 seconds East, 175.23 feet;

Thence South 35 degrees 59 minutes 53 seconds East, 291.77 feet;

Thence South 61 degrees 34 minutes 03 seconds East, 135.59 feet;

Thence North 86 degrees 33 minutes 04 seconds East, 303.77 feet;

Thence North 64 degrees 28 minutes 47 seconds East, 159.98 feet;

Thence North 20 degrees 06 minutes 58 seconds East, 540.85 feet;

Thence South 39 degrees 08 minutes 40 seconds East, 821.85 feet;

Thence South 29 degrees 01 minutes 10 seconds West, 1653.95 feet;

Thence South 29 degrees 47 minutes 42 seconds East, 3182.75 feet to a point on the line common to said Sections 20 and 21;

Thence South 89 degrees 58 minutes 04 seconds West, 1096.09 feet;

Thence South 51 degrees 09 minutes 49 seconds West, 1161.14 feet to a point on the East right-of-way of United States Highway 89 and a point on a non-tangent curve to the northeast and having a radius of 21,243.59 feet and a center point which bears North 38 degrees 50 minutes 07 seconds East;

Thence continuing along said curve through a central angle of 03 degrees 26 minutes 23 seconds and an arc length of 1275.14 feet;

Thence North 47 degrees 44 minutes 17 seconds West, 2961.13 feet along said right-of-way to a point from which the section corner common to Sections 17, 18, 19 and 20 bears North 03 degrees 37 minutes 04 seconds West, 1875.90 feet;

Thence North 38 degrees 48 minutes 50 seconds West, 1374.84 feet along said right-of-way to a point on a tangent curve to the Northeast and having a radius of 2810.00 feet and a center point which bears North 51 degrees 09 minutes 42 seconds East;

Thence continuing along said curve through a central angle of 28 degrees 02 minutes 55 seconds and an arc length of 1375.61 feet;

Thence North 10 degrees 49 minutes 30 seconds West, 2087.00 feet along said right-of-way;

Thence South 78 degrees 05 minutes 33 seconds East, 964.58 feet;

Thence North 82 degrees 21 minutes 15 seconds East, 62.17 feet;

Thence North 74 degrees 13 minutes 56 seconds East, 437.84 feet to a point from which the East Quarter corner of said Section 18, bears North 44 degrees 24 minutes 42 seconds East, 402.14 feet;

Thence North 11 degrees 54 minutes 27 seconds East, 1042.85 feet;

Thence North 05 degrees 31 minutes 57 seconds East, 817.18 feet;

Thence North 23 degrees 44 minutes 04 seconds West, 565.53 feet;

Thence North 06 degrees 07 minutes 06 seconds East, 642.74 feet to a point from which the Section corner common to Sections 7, 8, 17 and 18, bears South 50 degrees 33 minutes 43 seconds East, 192.62 feet;

Thence South 69 degrees 14 minutes 01 seconds East, 601.69 feet;

Thence South 78 degrees 08 minutes 06 minutes East, 799.05 feet;

Thence North 87 degrees 41 minutes 42 seconds East, 678.82 feet;

Thence South 85 degrees 59 minutes 26 seconds East, 252.71 feet;

Thence South 74 degrees 12 minutes 30 seconds East, 384.82 feet;

Thence South 85 degrees 04 minutes 37 seconds East, 417.23 feet to a point from which the South Quarter corner of said Section 8, bears North 34 degrees 30 minutes 42 seconds West, 471.28 feet;

Thence North 13 degrees 43 minutes 16 seconds East, 1068.17 feet;

Thence North 54 degrees 59 minutes 00 seconds West, 1101.16 feet;

Thence North 38 degrees 58 minutes 00 seconds West, 329.01 feet;

Thence North 23 degrees 07 minutes 02 seconds West, 236.98 feet;

Thence North 01 degrees 07 minutes 38 seconds East, 411.79 feet;

Thence North 12 degrees 51 minutes 26 seconds East, 249.52 feet;

Thence North 17 degrees 52 minutes 53 seconds West, 402.20 feet;

Thence North 39 degrees 20 minutes 49 seconds West, 1119.67 feet;

Thence North 20 degrees 28 minutes 12 seconds West, 802.26 feet;

Thence North 17 degrees 27 minutes 50 seconds West, 913.00 feet to the POINT OF BEGINNING.

EXCEPTING there from that portion of the West half of the Southeast quarter (W1/2 SE 1/4) of Section 18, Township 8 North, Range 5 West of the Gila and Salt River Base and Meridian, Yavapai County, Arizona, conveyed to the State of Arizona in Deed recorded in Book 4159 of Official Records, Page 828, records of Yavapai County, Arizona, described as follows:

COMMENCING at a rebar marking the West quarter corner of said Section 18 being North 89 degrees 29 minutes 14 seconds West 5285.91 feet from the unmonumented East quarter corner of said Section 18 said unmonumented corner being South 00 degrees 33 minutes 47 seconds West 65.85 feet from a stone marked "1/4 W.C." marking the witness monument to said East quarter corner;

Thence along the East-West mid section line of said Section 18 South 89 degrees 29 minutes 14 seconds East 3495.54 feet to said existing right of way centerline of State Route 89;

Thence along said existing right of way centerline of State Route 89 South 10 degrees 18 minutes 52 seconds East 1324.17 feet;

Thence North 79 degrees 41 minutes 08 seconds East 50.00 feet to said existing Easterly right of way line of State Route 89 and the Point of Beginning;

Thence North 34 degrees 41 minutes 08 seconds East 70.71 feet;

Thence North 10 degrees 18 minutes 52 seconds West 97.00 feet;

Thence South 79 degrees 41 minutes 08 seconds West 50.00 feet to said existing Easterly right of way line of State Route 89;

Thence along existing right of way line of State Route 89 South 10 degrees 18 minutes 52 seconds East 147.00 feet to the Point of Beginning;

AND EXCEPTING that portion of the Northeast quarter of the Northeast quarter (NE 1/4 NE 1/4) of Section 19, Township 8 North, Range 5 West of the Gila and Salt River Base and Meridian, Yavapai County, Arizona, conveyed to the State of Arizona in Deed recorded in Book 4159 of Official Records, Page 828, records of Yavapai County, Arizona, described as follows;

COMMENCING at a 1/2 inch stainless steel rod with an aluminum cap marking the Northeast corner of said Section 19 from which a marked stone marking the North quarter corner of said Section 19 bears North 89 degrees 27 minutes 57 seconds West, 2641.50 feet;

Thence along the North line of said Section 19 North 89 degrees 27 minutes 57 seconds West 1249.77 feet to said existing right of way centerline of State Route 89;

Thence along said existing right of way centerline of State Route 89, from a local tangent bearing of South 10 degrees 18 minutes 52 seconds East, along a curve to the left, having a radius of 2865.00 feet a length of 748.40 feet;

Thence North 55 degrees 53 minutes 23 seconds East 50.00 feet to said Easterly right of way line of said State Route 89 and the Point of Beginning;

Thence North 11 degrees 48 minutes 05 seconds East 37.76 feet;

Thence North 33 degrees 21 minutes 37 seconds West 20.44 feet;

Thence North 79 degrees 36 minutes 45 seconds West, 37.09 feet to said existing Easterly right of way line of State Route 89;

Thence along said existing Easterly right of way line of State Route 89 from a local tangent bearing of South 32 degrees 37 minutes 50 seconds East along a curve to the left having a radius of 2815.00 feet, length of 72.71 feet to the Point of Beginning;

AND EXCEPT all minerals and all uranium, thorium, or any other material which is or may be determined to be peculiarly essential to the production of fissionable materials, whether or not of commercial value, as reserved in Patent from United States of America, recorded in Book 192 of Deeds, Page 423 and in Book 10 of Official Records, Page 406, records of Yavapai County, Arizona.

(WWTP 2008)

AND EXCEPT That portion of the Southeast quarter of Section 17, Township 8 North, Range 5 West of the Gila and Salt River Base and Meridian, Yavapai County, Arizona, more particularly described as follows:

COMMENCING at the Southeast corner of said Section 17;
Thence North 89 degrees 55 minutes 20 seconds West along the South line of said southeast quarter of Section 17, a distance of 1621.90 feet;
Thence North 00 degrees 04 minutes 40 seconds East leaving said South line a distance of 309.24 feet to the TRUE POINT OF BEGINNING;

EXECUTIVE SUMMARY
WICKENBURG RANCH WASTEWATER, LLC
DOCKET NO. SW-20769A-10-0469

On November 16, 2010, Wickenburg Ranch Wastewater LLC ("Wickenburg" or "Company") filed an application with the Arizona Corporation Commission ("Commission or "ACC") for a new Certificate of Convenience and Necessity ("CC&N") to provide wastewater services in Yavapai County, Arizona.

Van Wick, LLC is the sole member and manager of Wickenburg Ranch Wastewater, LLC. Larry Van Tuyl is the sole member of Van Wick, LLC. The land in the proposed service area, other than the APS parcel, is owned by Vanwick, LLC; Van Development Co., Inc.; 5860 Development Inc.; and JVT Investors, LLC (jointly the "Van Tuyl entities"). All of these entities with the exception of Van Development Co., Inc. are in Good Standing with the ACC Corporations Division. According to ACC Corporations Division records, Van Development Co. Inc.'s corporate status was revoked in 2000 for failure to file an annual report.

The Community is planned to consist of 1,724 single family home lots, 600 multi-family units (2,324 housing units total), and commercial units known as Wickenburg Ranch. The commercial customers will include a golf maintenance facility, golf pro shop, golf clubhouse, athletic club, homeowners' association facility, equestrian facility, and fire station. Wickenburg Ranch Wastewater, LLC, is in good standing with the Corporations Division of the ACC. The Company projects that construction of the wastewater treatment facility will consist of three phases, and projects that construction of the first phase will commence in the third quarter of 2011 and will be completed in the second quarter of 2012. Further, it is anticipated that construction of the second phase will commence in the third quarter of 2012 and will be completed in the second quarter of 2013. The Company also projects that the third phase will commence in the first quarter of 2019 and will be completed in the third quarter of 2019.

Staff concludes that Wickenburg Ranch Wastewater, LLC, has the financial, technical, and managerial ability to own and operate a wastewater facility in Arizona.

Staff concludes that the Company's proposed wastewater system will have adequate capacity to serve the requested area.

Staff concludes that the proposed wastewater plant facilities and costs are reasonable and appropriate. However, no "used and useful" determination of this plant -in-service was made, and no particular future treatment should be inferred for rate making or rate base purposes in the future.

The Company's proposed wastewater infrastructure has not been constructed; therefore, compliance status from ADEQ or its delegated agent, the Yavapai County Development Services, is not applicable at this time.

Staff recommends:

- That Van Development, LLC, be brought into compliance with the ACC Corporations Annual Report requirements by the time of the hearing in this matter.
- Approval of Staff's rates and charges as shown on Schedule GTM-4. In addition to collection of its regular rates, the Company may collect from its customers a proportionate share of any privilege, sales or use tax.
- The Company be required to file a letter in Docket Control within 15 days of providing service to its first customer notifying the Commission that it has initiated provision of service.
- The Company be required to file a rate application no later than three months following the fifth anniversary of the date the Company begins providing service to its first customer.
- The Company be required to maintain its books and records in accordance with the NARUC Uniform System of Accounts for Water and Wastewater Utilities.
- The Company be required to file with Docket Control, as a compliance item in this docket, a copy of the Aquifer Protection Permit within (2) two years after the effective date of the decision in this case. If the Company fails to meet this filing requirement within this timeframe specified, the CC&N shall be considered null and void after due process.
- The Company use the wastewater depreciation rates by individual NARUC category as delineated in Table A of Exhibit 2.
- Approval of the application subject to the conditions listed above.

INTRODUCTION

On November 16, 2010, Wickenburg Ranch Wastewater LLC ("Wickenburg" or "Company") filed an application with the Arizona Corporation Commission ("Commission or "ACC") for a new Certificate of Convenience and Necessity ("CC&N") to provide wastewater services in Yavapai County, Arizona.

On December 17, 2010, the ACC Utilities Division ("Staff's") filed an Insufficiency Letter indicating that the Company's application did not meet the sufficiency requirements of Arizona Administrative Code ("A.A.C.") R14-6-402. A copy of the Insufficiency Letter was sent to the Company via U. S. certified mail. In that letter, Staff listed the deficiencies to be cured for administrative purposes.

On February 9, 2011, the Company filed its response to Staff's Insufficiency Letter and provided additional documentation to support its application. On March 10, 2011, Staff filed a Sufficiency Letter indicating that the application had met the sufficiency requirements of the A.A.C.

On March 15, 2011, the Procedural Order was issued setting the matter for hearing on May 6, 2011.

BACKGROUND

Wickenburg Ranch Wastewater, LLC, filed with the ACC an application for a CC&N to provide wastewater utility service to customers in Yavapai County, Arizona, in an area approximately 5 miles north of the Town of Wickenburg ("Town") and directly adjacent to State Route 89 and U.S. Highway 93. Specifically, Wickenburg seeks to serve an area projected to include a proposed 2,162-acre master-planned community, known as Wickenburg Ranch, and a one-acre parcel dedicated to Arizona Public Service Company ("APS") for construction of a substation (collectively "the proposed service area"). Wickenburg Ranch Wastewater, LLC, is in good standing with the Corporations Division of the ACC.

Van Wick, LLC is the sole member and manager of Wickenburg Ranch Wastewater, LLC. Larry Van Tuyl is the sole member of Van Wick, LLC. The land in the proposed service area, other than the APS parcel, is owned by Vanwick, LLC; Van Development Co., Inc.; 5860 Development Inc.; and JVT Investors, LLC (jointly the "Van Tuyl entities"). All of these entities with the exception of Van Development Co., Inc. are in Good Standing with the ACC Corporations Division. According to ACC Corporations Division records, Van Development Co. Inc., corporate status was revoked in 2000 for failure to file an annual report.

The Community is planned to consist of 1,724 single family home lots, 600 multi-family units (2,324 housing units total), and commercial units. The commercial customers will include a golf maintenance facility, golf pro shop, golf clubhouse, athletic club, homeowners' association facility, equestrian facility, and fire station. The Company projects that construction of the

wastewater treatment facility will consist of three phases, and projects that construction of the first phase will commence in the third quarter of 2011 and will be completed in the second quarter of 2012. Further, it is anticipated that construction of the second phase will commence in the third quarter of 2012 and will be completed in the second quarter of 2013. The Company also projects that the third phase will commence in the first quarter of 2019 and will be completed in the third quarter of 2019.

A Memorandum of Agreement was entered into between the Van Tuyl entities and APS on August 28, 2009, concerning the one-acre parcel referenced above. The Van Tuyl entities are the developers for Wickenburg Ranch, which is to consist of 1,724 single-family home lots, 600 multi-family units, and commercial units. The Van Tuyl entities desire wastewater service for Wickenburg Ranch to be provided by the Company. Staff's legal description and engineering maps of the service area are attached as Exhibit 1.

MANAGERIAL AND TECHNICAL CAPABILITY TO PROVIDE REQUESTED SERVICES

The Company has advised that M3 Companies, LLC ("M3 Companies") will be the manager of Wickenburg and address all of the administrative and regulatory matters as well as hire qualified people or entities to operate the system. M3 Companies hired GHD, Inc. ("GHD") and has identified Peter Chan as the responsible person to operate the system. Mr. Chan's role as a certified operator is to properly operate the plant to ensure safe, reliable wastewater service that meets all applicable rules and regulations concerning such service. The extent of managerial and technical experience is indicated below.

Managerial Expertise

William I. Brownlee is the managing partner of the M3 companies primarily responsible for contract negotiations, feasibility analysis, equity and financing, land and community planning, entitlements, engineering and development, as well as legal and accounting. Mr. Brownlee has been active in Arizona real estate for more than two decades. During that time, he has been involved with the construction of water and wastewater systems necessary to develop property. Mr. Brownlee has helped form the American Ranch Domestic Water Improvement district and served as a director. Director responsibilities include governing and managing district operations. M3 Companies have been managing Wickenburg Ranch Water, LLC, and its predecessor for more than 5 (five) years.

Technical Expertise

According to the Company, CSA Engineering was recently purchased by GHD Inc. However, the former president of CSA Engineering, Peter Chan, PD (AZ 30677), Certified Operator No. 26138, is GHD Inc.'s Project Manager and remains the proposed certified operator for the Company. Mr. Chan is currently employed as a professional engineer specializing in water and wastewater treatment systems. Mr. Chan has over 20 years experience and has helped

design both the wastewater treatment facilities and collection system that will be constructed at Wickenburg Ranch.

FINANCIAL CAPABILITY TO PROVIDE REQUESTED SERVICES

As indicated in the Background Section above, the Company's application states that the land being developed is owned by Vanwick, LLC, Van Development Co., 5680 Development Inc., and JVT Investors, LLC, collectively known as the "Van Tuyl entities." Van Wick, LLC is the sole member and manager of Wickenburg Ranch Wastewater, LLC. Larry Van Tuyl is the sole member of Van Wick, LLC. A letter dated April 2, 2009, to Yavapai County from a vice president at Chase Bank states that "Wickenburg Ranch Wastewater LLC and its affiliates have access to funds in an amount of not less than \$20,000,000." Based on this representation, Staff concludes that Wickenburg Ranch has sufficient access to capital to fund capital and operating requirements for its requested CC&N area.

WICKENBURG'S PROPOSED WASTEWATER SYSTEM

As indicated in the Staff's Engineering Report, Exhibit 2, the Company is proposing to construct a wastewater reclamation facility ("WRF") sewer collection system and effluent disposal system at a total projected cost of approximately \$11,200,000.

The proposed WRF will be constructed in phases designed to meet the needs of development growth patterns. Initial WRF capacity will be 100,000 gallon per day ("GPD"), and the build-out capacity is projected at 950,000 GPD.

The WRF Phase 1 will consist of a 100,000 GPD extended aeration treatment process, filtration and UV disinfection. The WRF Phase 2 will switch to a membrane bioreactor ("MBR") treatment process. The anticipated completion date for the WRF Phase 1 is June 2012.

The sewer collection system will consist of a gravity system, low pressure system, a sewer lift station and force main system.

Effluent disposal will be accomplished by reuse on the golf course and some landscape amenities. Effluent storage will be provided by the golf course lake (reservoir). Effluent reuse infrastructure will consist of reservoir, pump station and distribution piping.

The Company is projected to serve 190 residential customers and 3 commercial customers in the first (1st) year, and 1,487 residential customers and 7 commercial customers by the fifth (5th) year.

ENGINEERING'S COST ANALYSIS

The Company submitted spreadsheets with a breakdown of the proposed collection, treatment and reuse infrastructure costs for the first five years. Total projected cost for this

period was \$11,228,886. The total projected cost includes Phase 1 and Phase 2 expansion of the WRF which will provide a total capacity of 415,000 GPD. A breakdown of the total projected cost is shown in Exhibit 2.

According to the Company, a combination of equity and advances in aid in construction will fund the cost of the proposed infrastructure needed to service the requested service area. More discussion of this funding is included in Staff's Financial and Rate Analysis Report, Exhibit 3.

Staff has reviewed the proposed wastewater infrastructure along with the breakdown of the Company's total cost estimate and concludes that the proposed plant facility and its associated cost is reasonable and appropriate to serve the requested service area. However, approval of this CC&N application does not imply any particular future treatment for determining the rate base. No "used and useful" determination of the proposed plant-in-service was made, and no conclusions should be inferred for ratemaking or rate base purposes in the future.

WICKENBURG'S FAIR VALUE RATE BASE

Consistent with Commission rules, the Company's filing included the required five-year projections for plant values, operating revenues, operating expenses, and the number of customers. Due to the lack of historical information, Staff used projections and assumptions to establish the initial rates for providing a fair value rate of return. In this proceeding, original cost rate base is the fair value rate base.

As indicated in Staff's Financial and Rate Analysis Report (Appendix 3), Staff reviewed the Company's proposed Plant in Service and has concluded that the proposed facilities and the projected costs are reasonable and appropriate to serve the requested service area. Staff projects \$11,200,000 million of Plant in Service for the wastewater system five years after service is initiated (see Schedule GTM-2 in Appendix 3).

Staff reviewed the Company's projected accumulated depreciation and concurs with the Company's proposed \$1,700,000 million balance at the end of the fifth year of operation (see Schedule GTM-3 in Appendix 3). Staff's recommended depreciation rates are presented in the Staff Engineering Report, Appendix 2, under the Wastewater Depreciation Rate Section.

Staff reviewed the Company's projected advances-in-aid of construction ("AIAC") and concurs with the Company's proposed \$2,600,000 million balance at the end of the fifth year of operation (see Schedule GTM-5 in Exhibit 3). The Company is not proposing any contributions-in-aid-of-construction ("CIAC"), and Staff concurs.

REVENUE AND EXPENSES

The Company developed projections for its operating expenses in support of its proposed initial rates. The Company's proposed rates provide projected year-five operating revenues of \$1,509,680 and matched with projected operating expenses of \$883,912 result in an operating income of \$625,768. Staff reviewed the Company's revenue and expense projections and found them to be reasonable. Staff calculated that a year-five revenue requirement of \$1,509,680 would cover \$883,912 of operating expenses and provide \$625,758 in operating income and a 9.1 percent rate of return on Staff's projected \$6.9 million year-five rate base (see Schedule GTM-1 in Staff's Financial and Analysis Report, Appendix 3).

CAPITAL STRUCTURE

The Company proposes a capital structure of no less than 70.0 percent equity and no more than 30.0 percent combined AIAC and CIAC. The Company anticipates receiving AIAC through collection of a service line connection charge ("SLCC") and \$1,212,498 of advances from the developer in each of the first two years of operations. The Company is not proposing debt issuance or collection of CIAC; accordingly, its capital structure is comprised only of equity and AIAC. Staff typically recommends a capital structure composed of no less than 70 percent equity, 0 percent debt, and up to 30 percent combined AIAC and CIAC for initial CC&Ns. Schedule GTM-6 in Exhibit 3 presents Staff's projected capital structure for the first five years of operation. These projections show the following equity to total capital percentages: year one, 63.00 percent; year two, 72.07 percent; year three, 72.18 percent; year four, 75.34; and year five, 76.29 percent. The remaining capital is comprised of AIAC. Staff concludes that the projected capital structures are reasonable and acceptable.

RATE DESIGN

As previously noted, the Company projects to have 1,487 residential and 7 commercial wastewater customers and 2 effluent customers five years after initiating provision of service. Thus, the Company projects generating revenues primarily from the residential customer class. The Company's proposed wastewater rates consist of a fixed monthly fee and a volumetric charge based on metered water use. Although the Company's proposed volumetric charge is uniform within the residential and commercial customer classes, it is greater for commercial customers than for residential customers. The difference between the commercial and residential volumetric rates recognizes the incremental cost difference typically required for commercial wastewater treatment.

Staff concurs with the Company's proposed rate design for wastewater service. The Company proposed and Staff recommended rates are presented in Schedule GTM-4 of Exhibit 3.

Staff recommends approval of the Company's proposed service charges with three exceptions: Establishment of Service (After Hours); Reconnection/Delinquent (After Hours); and Deposit Interest. Staff agrees that additional compensation for service provided after normal

business hours is appropriate when such service is at the customer's request or for the customer's convenience. Such a tariff compensates the utility for additional expenses incurred from providing after-hours service. However, Staff concludes that it is appropriate to apply an after-hours service charge in addition to the charge for any utility service provided after-hours at the customer's request or for the customer's convenience. Therefore, Staff recommends denial of the Company's requested Establishment (after-hours) and Reconnection (Delinquent) After-Hours charge. Instead, Staff recommends the creation of a separate \$50 after-hours service. For example, under Staff's proposal, the customer would be subject \$50 Establishment fee if it is done during normal business hours, but would pay an additional \$50 after-hours fee if the customer request that the establishment be done after normal business hours. Staff recommends a six percent interest. This is consistent with the deposit interest charges authorized for most other utilities. Staff also recommends a 1.5 percent per month charge for customer deferred payments. This is also consistent with the tariffs approved for most other utilities. See Schedule GTM-4 in Exhibit 3.

As indicated in Staff's Engineering Report, Exhibit 2, the Company requested a Service Line Connection Charge of \$350. Staff has reviewed the proposed charge and found it to be reasonable.

ARIZONA DEPARTMENT OF ENVIRONMENTAL QUALITY ("ADEQ") COMPLIANCE

Compliance Status

The Company's proposed wastewater infrastructure has not been constructed; therefore, compliance status from ADEQ or its delegated agent, the Yavapai County Development Services, is not applicable at this time.

Acquifer Protection Permit ("APP")

The Company has not yet obtained an APP for the proposed wastewater plant facilities from ADEQ. Since the APP represents fundamental authority for the designation of a wastewater service area and a wastewater provider, Staff recommends that the Company file with docket Control, as a compliance item in this docket, a copy of the APP within two years after the effective date of the decision in this case.

CUSTOMER NOTICE

As directed by the Procedural Schedule in this docket, Wickenburg docketed on March 30, 2011, its Certification of Mailing of Public Notice of Hearing to the Town of Wickenburg and each landowner within the proposed CC&N. On March 30, 2011, as required by the ACC's wastewater rules, Wickenburg also advised the Town of Wickenburg at the same time of filing its application with the ACC for a CC&N.

CONCLUSIONS AND RECOMMENDATIONS

Staff concludes that Wickenburg Ranch Wastewater, LLC, has the financial, technical, and managerial ability to own and operate a wastewater facility in Arizona.

Staff concludes that the Company's proposed wastewater system will have adequate capacity to serve the requested area.

Staff concludes that the proposed wastewater plant facilities and costs are reasonable and appropriate. However, no "used and Useful" determination of this plant -in-service was made, and no particular future treatment should be inferred for rate making or rate base purposes in the future.

The Company's proposed wastewater infrastructure has not been constructed; therefore, compliance status from ADEQ or its delegated agent, the Yavapai County Development Services, is not applicable at this time.

Staff recommends:

- That Van Development, LLC, be brought into compliance with the ACC Corporations Annual Report requirements by the time of the hearing in this matter.
- Approval of Staff's rates and charges as shown on Schedule GTM-4. In addition to collection of its regular rates, the Company may collect from its customers a proportionate share of any privilege, sales or use tax.
- The Company be required to file a letter in Docket Control within 15 days of providing service to its first customer notifying the Commission that it has initiated provision of service.
- The Company be required to file a rate application no later than three months following the fifth anniversary of the date the Company begins providing service to its first customer.
- The Company be required to maintain its books and records in accordance with the NARUC Uniform System of Accounts for Water and Wastewater Utilities.
- The Company be required to file with Docket Control, as a compliance item in this docket, a copy of the Aquifer Protection Permit within (2) two years after the effective date of the decision in this case. If the Company fails to meet this filing requirement within this timeframe specified, the CC&N shall be considered null and void after due process.

Wickenburg Ranch Wastewater, L.L.C.

Docket No. SW-20769A-10-0469

Page 8

- The Company use the wastewater depreciation rates by individual NARUC category as delineated in Table A of Exhibit 2.
- Approval of the application subject to the conditions listed above.

MEMORANDUM

TO: Vicki Wallace
Executive Consultant III
Utilities Division

FROM: Lon H. Miller
Programs & Projects Specialist
Utilities Division

THRU: Del Smith
Engineering Supervisor
Utilities Division

DATE: January 4, 2011

RE: **WICKENBURG RANCH WASTEWATER (DOCKET NO. SW-20769A-10-0469)**
AMENDED LEGAL DESCRIPTION

RECEIVED

JAN 05 2010

MOYES SELLERS

The area requested by Wickenburg for a CC#N for sewer service has been plotted using an amended legal description correcting two minor errors on Page 1-4 of the Company's Exhibit 1, which has been docketed. The remaining pages of the original legal description remain unchanged. The attached legal description includes the corrected page and should be used in place of the original description (in its entirety) submitted with the application.

Also attached is a copy of the map for your files.

EXHIBIT 1

Wickenburg Ranch Wastewater, L.L.C.
Service Area Legal Description
Parcel No 1

All that portion of Sections 7, 8, 17 and 18, Township 8 North, Range 5 West of the Gila and Salt River Base and Meridian, Yavapai County, Arizona, more particularly described as follows:

BEGINNING at the Northeast Corner of said Section 7, point also being the Northwest corner of said Section 8:
Thence North 89 degrees 58 minutes 15 seconds East, 639.21 feet along the North line of said Section 8;
Thence South 17 degrees 27 minutes 50 seconds East, 913.00 feet;
Thence South 20 degrees 28 minutes 12 seconds East, 802.26 feet;
Thence South 39 degrees 20 minutes 49 seconds East, 1119.67 feet;
Thence South 17 degrees 52 minutes 53 seconds East, 402.20 feet;
Thence South 12 degrees 51 minutes 26 seconds West, 249.52 feet;
Thence South 01 degrees 07 minutes 38 seconds West, 411.79 feet;
Thence South 23 degrees 07 minutes 02 seconds East, 236.98 feet;
Thence South 38 degrees 58 minutes 00 seconds East, 329.01 feet;
Thence South 54 degrees 59 minutes 00 seconds East, 1101.16 feet;
Thence South 13 degrees 43 minutes 16 seconds West, 1068.17 feet to a point from which the South Quarter corner of said Section 8 bears North 34 degrees 30 minutes 42 seconds West, 471.28 feet;
Thence North 85 degrees 04 minutes 37 seconds West, 417.25 feet;
Thence North 74 degrees 12 minutes 30 seconds West, 384.82 feet;
Thence North 85 degrees 59 minutes 26 seconds West, 252.71 feet;
Thence South 87 degrees 41 minutes 42 seconds West, 678.82 feet;

Thence North 78 degrees 08 minutes 06 seconds West, 799.05 feet;
Thence North 69 degrees 14 minutes 01 seconds West, 601.69 feet to a point from which the corner common to said Sections 7, 8, 17 and 18, bears South 50 degrees 33 minutes 43 seconds East, 192.62 feet;
Thence South 06 degrees 07 minutes 06 seconds West, 642.74 feet;
Thence South 23 degrees 44 minutes 04 seconds East, 565.53 feet;
Thence South 05 degrees 31 minutes 57 seconds West, 817.18 feet;
Thence South 11 degrees 54 minutes 27 seconds West, 1042.85 feet;
Thence South 74 degrees 13 minutes 56 seconds West, 437.84 feet;
Thence South 82 degrees 21 minutes 15 seconds West, 62.17 feet;
Thence North 78 degrees 05 minutes 33 seconds West, 964.58 feet to a point on the East right-of-way of United States Highway 89;
Thence North 10 degrees 49 minutes 30 seconds West, 7191.87 feet along the said East right-of-way to a point on a tangent curve concave to the West and having a radius of 11,510.00 feet and a center point which bears South 79 degrees 06 minutes 51 seconds West;

Thence continuing along said curve through a central angle of 02 degrees 43 minutes 45 seconds and an arc length of 548.27 feet;
Thence North 13 degrees 31 minutes 56 seconds West 496.30 feet along the East right-of-way to a point on the North line of said Section 7;
Thence South 89 degrees 59 minutes 56 seconds East 925.02 feet along the said North line to the North Quarter corner of said Section 7;
Thence South 89 degrees 56 minutes 00 seconds East 2368.78 feet to the Northeast corner of said Section 7 and the POINT OF BEGINNING.

EXCEPTING there from that portion of the Southeast quarter of the Northwest (SE ¼, NW ¼) of Section 7, Township 8 North, Range 5 West of the Gila and Salt River Base and Meridian, Yavapai County, Arizona, conveyed to the State of Arizona in Deed recorded in Book 4159 of Official Records, Page 828, records of Yavapai County, Arizona, described as follows:

COMMENCING at an aluminum cap marking the West quarter corner of said Section 7 from which a rebar marking the East quarter corner of said Section 7 bears South 89 degrees 06 minutes 17 seconds East, 5288.84 feet;
Thence along the East-West mid section line of said Section 7, South 89 degrees 06 minutes 17 seconds East 2483.49 feet to the existing right of way centerline of State Route 89 (Wickenburg-Prescott Highway);
Thence along said existing right of way centerline of State Route 89 North 10 degrees 18 minutes 52 seconds West 144.20 feet;
Thence North 79 degrees 41 minutes 08 seconds East 50.00 feet to the said existing Easterly right of way line of said State Route 89 and the Point of Beginning;
Thence South 55 degrees 18 minutes 52 seconds East 29.70 feet;
Thence South 10 degrees 18 minutes 52 seconds East, 50.00 feet;
Thence South 33 degrees 21 minutes 12 seconds West 30.41 feet to said existing Easterly right of way line of said State Route 89;
Thence along said existing Easterly right of way line of State Route 89, North 10 degrees 18 minutes 52 seconds West 93.00 feet to the Point of Beginning.

AND EXCEPTING that portion of the Southwest quarter of the Southeast quarter (SW ¼, Se ¼) of said Section 7, Township 8 North, Range 5 West of the Gila and Salt River Base and Meridian, Yavapai County, Arizona, described as follows:

COMMENCING at a rebar marking the South quarter corner of said Section 7 from which a marked stone marking the Southeast corner of said Section 7 bears South 89 degrees 32 minutes 23 seconds East 2643.46 feet;
Thence along the South line of said Section 7 South 89 degrees 32 minutes 23 seconds East 347.08 feet to said existing right of way centerline of State Route 89;
Thence along said existing right of way centerline of State Route 89 North 10 degrees 18 minutes 52 seconds West 898.02 feet;
Thence North 79 degrees 41 minutes 08 seconds East 50.00 feet to the existing right of way line State Route 89 and the Point of Beginning;
Thence South 55 degrees 18 minutes 52 seconds East 7.07 feet;
Thence South 10 degrees 18 minutes 52 seconds East 76.00 feet;

Thence South 34 degrees 41 minutes 08 seconds West 7.07 feet to said existing Easterly right of way line of State Route 89;
Thence along said existing Easterly right of way line of State Route 89 North 10 degrees 18 minutes 52 seconds West 86.00 feet to the Point of Beginning;

AND EXCEPTING that portion of the Northwest quarter of the Northeast quarter (NW ¼, NE ¼) of Section 18, Township 8 North, Range 5 West of the Gila and Salt River Base and Meridian, Yavapai County, Arizona, conveyed to the State of Arizona in Deed recorded in Book 4159 of Official Records, Page 828, records of Yavapai County, Arizona, described as follows:

COMMENCING at a marked stone marking the Northeast corner of said Section 18 from which a rebar marking the North quarter corner of said Section 18 bears North 89 degrees 35 minutes 35 seconds West 2643.46 feet;
Thence along the North line of said Section 18, North 89 degrees 35 minutes 33 seconds West, 2296.38 feet to said existing right of way centerline of State Route 89;
Thence along said existing right of way centerline of said State Route 89, South 10 degrees 18 minutes 52 seconds East 616.98 feet;
Thence North 79 degrees 41 minutes 08 seconds East 50.00 feet to said existing Easterly right of way line of said State Route 89 and the Point of beginning;
Thence South 55 degrees 18 minutes 52 seconds East 24.04 feet;
Thence South 10 degrees 18 minutes 52 seconds East 20.00 feet;
Thence South 34 degrees 41 minutes 08 seconds West 24.04 feet to said existing right of way line of said State Route 89;
Thence along said existing Easterly right of way line of State Route 89, North 10 degrees 18 minutes 52 seconds West 54.00 feet to the Point of Beginning;

AND EXCEPT all minerals and all uranium, thorium, or any other material which is or may be determined to be peculiarly essential to the production of fissionable materials, whether or not of commercial value, as reserved in Patent from United States of America, recorded in Book 192 of Deeds, Page 423 and in Book 10 of Official Records, Page 406, records of Yavapai County, Arizona.

(Reservoir Site 2008)

AND EXCEPT that portion of the Northwest quarter of said Section 7, Township 8 North, Range 5 West of the Gila and Salt River Base and Meridian, Yavapai County, Arizona, more particularly described as follows:

COMMENCING at the North quarter corner of said Section 7;
Thence North 89 degrees 59 minutes 56 seconds West along the North line of said Northwest quarter a distance of 476.65 feet to the TRUE POINT OF BEGINNING;
Thence South 00 degrees 00 minutes 00 seconds East, leaving said North line a distance of 193.27 feet;
Thence South 75 degrees 41 minutes 21 seconds East a distance of 318.69 feet to a point on a curve the radius of which bears South 45 degrees 19 minutes 13 seconds East a distance of 42.50 feet.

Thence Southerly along the arc of said curve through a central angle of 41 degrees 35 minutes 32 seconds a distance of 30.85 feet;

Thence North 75 degrees 18 minutes 54 seconds West, leaving said curve a distance of 308.93 feet;

Thence South 16 degrees 29 minutes 36 seconds West a distance of 65.66 feet;

Thence South 00 degrees 00 minutes 00 seconds East a distance of 21.39 feet to the TRUE POINT OF BEGINNING;

Thence continuing South 00 degrees 00 minutes 00 seconds East a distance of 224.22 feet;

Thence South 76 degrees 45 minutes 28 seconds West a distance of 141.74 feet;

Thence North 58 degrees 42 minutes 37 seconds West a distance of 98.50 feet;

Thence North 13 degrees 31 minutes 56 seconds West a distance of 211.40 feet;

Thence North 90 degrees 00 minutes 00 seconds East a distance of 271.61 feet, to the TRUE POINT OF BEGINNING.

(Well 4 site 2008)

AND EXCEPT That portion of the Southeast quarter of Section 7, of Township 8 North, Range 5 West of the Gila and Salt River Base and Meridian, Yavapai County, Arizona, more particularly described as follows:

COMMENCING at the East quarter Corner of said Section 7, from which the Southeast corner of said Section 7, bears South 00 degrees 00 minutes 08 seconds West a distance of 2641.48 feet;

Thence North 89 degrees 06 minutes 17 seconds West along the North line of said Southeast quarter a distance of 2468.03 feet;

Thence South 00 degrees 53 minutes 43 seconds West leaving said North line a distance of 663.59 feet to the TRUE POINT OF BEGINNING;

Thence North 83 degrees 04 minutes 35 seconds East a distance of 76.74 feet, to a point on a curve the radius of which bears South 83 degrees 04 minutes 35 seconds West a distance of 784.00 feet;

Thence Southerly along the arc of said curve through a central angle of 09 degrees 11 minutes 41 seconds a distance of 125.82 feet to a point of tangency;

Thence South 02 degrees 16 minutes 16 seconds West a distance of 28.78 feet;

Thence North 87 degrees 43 minutes 44 seconds West a distance of 52.84 feet;

Thence North 10 degrees 49 minutes 30 seconds West a distance of 145.58 feet to the TRUE POINT OF BEGINNING.

TO: Vicki Wallace
Executive Consultant

FROM: Katrin Stukov *KS*
Utilities Engineer

RE: Wickenburg Ranch Wastewater, LLC
Docket No. SW-20769A-10-0469 (CC&N – Wastewater)

Introduction

On November 16, 2010, Wickenburg Ranch Wastewater, LLC (“Company”) submitted an application for a Certificate of Convenience and Necessity (“CC&N”) to provide wastewater service to a proposed 2,162-acres or 3.7 square-mile master-planned development known as Wickenburg Ranch in Yavapai County. The requested area is located north of the Town of Wickenburg, just north of State Route (“SR”) 93 and east of SR 89.

The Wickenburg Ranch Development will be comprised of 2,324 housing units and commercial customers¹ at full build-out.

Company’s Proposed Wastewater System

The Company is proposing to construct a wastewater reclamation facility (“WRF”), sewer collection system and effluent disposal system at a total projected cost of approximately \$11.2 million.

The proposed WRF will be constructed in phases designed to meet the needs of development growth patterns. Initial WRF capacity will be 100,000 gallon per day (“GPD”), and the build-out capacity is projected at 950,000 GPD.

The WRF Phase 1 will consist of a 100,000 GPD extended aeration treatment process, filtration and UV disinfection. The WRF Phase 2 will switch to membrane bioreactor (MBR) treatment process. The anticipated completion date for the WRF Phase 1 is June 2012².

Sewer collection system will consist of a gravity system, low pressure system, a sewer lift station and force main system.

¹ According to the Company, the commercial customers will include golf and equestrian facilities, athletic facilities, homeowner’s association facilities and fire station.

² Per Company response to Letter of Insufficiency (item 6-i) filed February 9, 2011.

Effluent disposal will be accomplished by reuse on the golf course and some landscape amenities. Effluent storage will be provided by the golf course lake (reservoir). Effluent reuse infrastructure will consist of reservoir, pump station and distribution piping.

The Company is projected to serve 190 residential customers and 3 commercial customers in the first year, and 1,487 residential customers and 7 commercial customers by the fifth year.

Cost Analysis

The Company submitted spreadsheets with a breakdown of the proposed collection, treatment and reuse infrastructure costs for the first five years. Total projected cost for this period was \$11,228,886. The total projected cost includes Phase 1 and Phase 2 expansion of the WRF which will provide a total capacity of 415,000 GPD. A breakdown of the total projected cost is tabulated below:

Plant	Cost of Plant Additions by Year ³					
	Year 1	Year 2	Year 3	Year 4	Year 5	Subtotal
WRF Phase 1 100,000 GPD	\$2,215,952 ⁴					\$2,215,952
WRF Phase 2 315,000 GPD		\$5,620,019				\$5,620,019
Collection Sewers	\$672,795	\$260,436		\$125,338		\$1,058,569
Force Main				\$812,000		\$812,000
Sewer lift station				\$420,177		\$420,177
Reuse Reservoir	\$168,000					\$168,000
Reuse Pump Station	\$24,640					\$24,640
Reuse Piping	\$386,629					\$386,629
Services	\$67,550 (300)	\$84,350 (375)	\$101,850 (453)	\$128,100 (569)	\$141,050 (627)	\$522,900 (2,324)
Subtotal	\$3,535,566	\$5,964,805	\$101,850	\$1,485,615	\$141,050	\$11,228,886

According to the Company, a combination of equity and advances in aid of construction will fund the cost of the proposed infrastructure needed to serve the requested extension area.

Staff has reviewed the proposed wastewater infrastructure along with the breakdown of the Company's total cost estimate and concludes that the proposed plant facility and its associated cost is reasonable and appropriate to serve the requested service area. However, approval of this CC&N application does not imply any particular future treatment for determining the rate base. No "used and useful" determination of the proposed plant-in-service

³ Costs include fees for Survey, Engineering and Contingency @ 12 percent.

⁴ The amount includes on-site Influent and Effluent Lift Stations costs.

was made, and no conclusions should be inferred for rate making or rate base purposes in the future.

Service Line Connection Charge

The Company has requested a Service Line Connection Charge of \$350. Staff has reviewed the proposed charge and found it to be reasonable.

Arizona Department of Environmental Quality ("ADEQ") Compliance

Compliance Status

The Company's proposed wastewater infrastructure has not been constructed; therefore, compliance status from ADEQ or its delegated agent, the Yavapai County Development Services, is not applicable at this time.

Aquifer Protection Permit ("APP")

The Company has not yet obtained an APP for the proposed wastewater plant facilities from ADEQ. Since an APP represents fundamental authority for the designation of a wastewater service area and a wastewater provider, Staff recommends that the Company file with Docket Control, as a compliance item in this docket, a copy of the APP within two years after the effective date of the decision in this case.

Wastewater Depreciation Rates

The Company has adopted Staff's typical and customary Wastewater Depreciation Rates. These rates are presented in Table A and it is recommended that the Company use these depreciation rates by individual NARUC category as delineated in the attached Table A.

Summary

Conclusions

1. Staff concludes that the Company's proposed wastewater system will have adequate capacity to serve the requested area.
2. Staff concludes that the proposed wastewater plant facilities and costs are reasonable and appropriate. However, no "used and useful" determination of this plant-in-service was made, and no particular future treatment should be inferred for rate making or rate base purposes in the future.

3. The Company's proposed wastewater infrastructure has not been constructed therefore, compliance status from ADEQ or its delegated agent, the Yavapai County Development Services, is not applicable at this time.
4. Staff concludes that the proposed Service Line Connection Charge of \$350 is reasonable.

Recommendations

1. Staff recommends that the Company file with Docket Control, as a compliance item in this docket, a copy of the APP within two years after the effective date of the decision in this case.
2. Staff recommends that the Company use the wastewater depreciation rates by individual NARUC category as delineated in the attached Table A.

Table A. Wastewater Depreciation Rates

NARUC Acct. No.	Depreciable Plant	Average Service Life (Years)	Annual Accrual Rate (%)
354	Structures & Improvements	30	3.33
355	Power Generation Equipment	20	5.00
360	Collection Sewers – Force	50	2.0
361	Collection Sewers- Gravity	50	2.0
362	Special Collecting Structures	50	2.0
363	Services to Customers	50	2.0
364	Flow Measuring Devices	10	10.0
365	Flow Measuring Installations	10	10.00
366	Reuse Services	50	2.00
367	Reuse Meters & Meter Installations	12	8.33
370	Receiving Wells	30	3.33
371	Pumping Equipment	8	12.50
374	Reuse Distribution Reservoirs	40	2.50
375	Reuse Transmission & Distribution System	40	2.50
380	Treatment & Disposal Equipment	20	5.0
381	Plant Sewers	20	5.0
382	Outfall Sewer Lines	30	3.33
389	Other Plant & Miscellaneous Equipment	15	6.67
390	Office Furniture & Equipment	15	6.67
390.1	Computers & Software	5	20.0
391	Transportation Equipment	5	20.0
392	Stores Equipment	25	4.0
393	Tools, Shop & Garage Equipment	20	5.0
394	Laboratory Equipment	10	10.0
395	Power Operated Equipment	20	5.0
396	Communication Equipment	10	10.0
397	Miscellaneous Equipment	10	10.0
398	Other Tangible Plant	----	----

NOTE: Acct. 398, Other Tangible Plant may vary from 5 percent to 50 percent. The depreciation rate would be set in accordance with the specific capital items in this account.

MEMORANDUM

Public Utilities Analyst IV – Utilities Division

Date: April 8, 2011

RE: WICKENBURG RANCH WASTEWATER, LLC. APPLICATION FOR NEW
CERTIFICATE OF CONVENIENCE AND NECESSITY
DOCKET NO. SW-20769A-10-0469

Introduction

On November 16, 2010, Wickenburg Ranch Wastewater, LLC. (“Company” or “Wickenburg Ranch”) submitted an application to the Arizona Corporation Commission (“Commission”) for a Certificate of Convenience and Necessity (“CC&N”) to provide public utility wastewater services in Yavapai County, Arizona. On March 10, 2011, the application was determined to have met sufficiency by the Utilities Division of the Arizona Corporation Commission (“Staff”). The application indicates that there are presently no customers receiving wastewater service in the area of the requested CC&N. The Company projects that five years after initiating service it will be providing wastewater service to 1,487 residential and seven commercial customers and to two effluent customers.

Financial Capability to Provide Requested Service

The Company’s application states that the land being developed is owned by Vanwick, LLC, Van Development Co., 5680 Development Inc., and JVT Investors, LLC, collectively known as the “Van Tuyl entities.” Van Wick, LLC is the sole member and manager of Wickenburg Ranch Wastewater, LLC. Larry Van Tuyl is the sole member of Van Wick, LLC. A letter dated April 2, 2009, to Yavapai County from a vice president at Chase Bank states that “Wickenburg Ranch Wastewater LLC and its affiliates have access to funds in an amount of not less than \$20,000,000.” Based on this representation, Staff concludes that Wickenburg Ranch has sufficient access to capital to fund capital and operating requirements for its requested CC&N area.

Fair Value Rate Base

Consistent with Commission rules, the Company’s filing included the required five-year projections for plant values, operating revenues, operating expenses, and the number of customers. Due to the lack of historical information, projections and assumptions necessarily

provide the basis for establishing the initial rates that provide a fair value rate of return. In this proceeding, original cost rate base is the fair value rate base.

Staff reviewed the Company's proposed Plant in Service and has concluded that the proposed facilities and the projected costs are reasonable and appropriate to serve the requested service area. Staff projects \$11.2 million of Plant in Service for the wastewater system five years after service is initiated (see Schedule GTM-2).

Staff reviewed the Company's projected accumulated depreciation and concurs with the Company's proposed \$1.7 million balance at the end of the fifth year of operation (see Schedule GTM-3). Staff's recommended depreciation rates are presented in the Staff Engineering Report.

Staff reviewed the Company's projected advances-in-aid of construction ("AIAC") and concurs with the Company's proposed \$2.6 million balance at the end of the fifth year of operation (see Schedule GTM-5). The Company is not proposing any contributions-in-aid-of-construction ("CIAC"), and Staff concurs.

Revenue and Expenses

The Company developed projections for its operating expenses in support of its proposed initial rates. The Company's proposed rates provide projected year-five operating revenues of \$1,509,680 and matched with projected operating expenses of \$883,912 result in an operating income of \$625,768. Staff reviewed the Company's revenue and expense projections and found them to be reasonable. Staff calculated that a year-five revenue requirement of \$1,509,680 would cover \$883,912 of operating expenses and provide a \$625,758 operating income and a 9.1 percent rate of return on Staff's \$6.9 million year-five projected rate base (see Schedule GTM-1).

Capital Structure

The Company proposes a capital structure of no less than 70.0 percent equity and no more than 30.0 percent combined AIAC and CIAC. The Company anticipates receiving AIAC through collection of a service line connection charge ("SLCC") and \$1,212,498 of advances from the developer in each of the first two years of operations. The Company is not proposing debt issuance or collection of CIAC; accordingly, its capital structure is comprised only of equity and AIAC. Staff typically recommends a capital structure composed of no less than 70 percent equity, 0 percent debt, and up to 30 percent combined AIAC and CIAC for initial CC&Ns. Schedule GTM-6 presents Staff's projected capital structure for the first five years of operation. These projections show the following equity to total capital percentages: year one, 63.00 percent; year two, 72.07 percent; year three, 72.18 percent; year four, 75.34; and year five, 76.29 percent with the remaining capital comprised of AIAC. Staff concludes that the projected capital structures are reasonable and acceptable.

Rate Design

As previously noted, five years after initiating provision of service the Company projects to have 1,487 residential and seven commercial wastewater customers and two effluent customers. Thus, the Company projects to generate revenues primarily from the residential customer class. The Company's proposed wastewater rates consist of a fixed monthly fee and a volumetric charge based on metered water use. The Company's proposed volumetric charge is uniform within the residential and commercial customer classes. However, the volumetric charge is greater for commercial customers than for residential customers. The difference between the commercial and residential volumetric rates recognizes the incremental cost difference typically required for commercial wastewater treatment.

Staff concurs with the Company's proposed rate design for wastewater service. The Company proposed and Staff recommended rates are presented in Schedule GTM-4.

Staff recommends approval of the Company's proposed service charges with three exceptions: Establishment of Service (After Hours); Reconnection/Delinquent (After Hours); and Deposit Interest. Staff agrees that an additional fee for any service provided after normal business hours is appropriate when such service is at the customer's request or for the customer's convenience. Such a tariff compensates the utility for additional costs incurred from providing after-hours service. Therefore, Staff recommends adoption of a separate \$50 After-Hours service charge that is applicable to each service to be performed after normal business hours when done at the customer's request or for the customer's convenience. Under Staff's recommendation, when a service is performed after normal business hours at the request or convenience of the customer, the \$50 After-Hours service is applicable in addition to the authorized standard service charge for that service. For deposit interest Staff recommends a six percent interest rate. This is consistent with the deposit interest charges authorized for most other utilities and rule R14-2-402(b)(3). Staff also recommends a 1.5 percent per month charge for customer deferred payments. This is also consistent with the tariff approved for most other utilities. See Schedule GTM-4.

Recommendations

Staff recommends:

- Approval of Staff's rates and charges as shown on Schedule GTM-4. In addition to collection of its regular rates, the Company may collect from its customers a proportionate share of any privilege, sales or use tax.
- Requiring the Company to file a letter in Docket Control within 15 days of providing service to its first customer notifying the Commission that it has initiated provision of service.

- Requiring the Company to file a rate application no later than three months following the fifth anniversary of the date the Company begins providing service to its first customer.
- Requiring the Company to maintain its books and records in accordance with the NARUC Uniform System of Accounts for Water and Wastewater Utilities.
- Requiring the Company to use the depreciation rates recommended by Staff for wastewater utilities.
