Arizona Corporation Commission
Commissioners Wing
1200 West Washington
Phoenix, Az. 85007

Commissioners;

APS lobbying for YET another rate hike, this one approaching 7% is another outrageous display of corporate greed and arrogance simply designed to meet profit expectations, and not the needs of society. Ever since Utilities have been deregulated, the emphasis has shifted away from providing the most efficient and cost effective delivery of energy to satisfying and maximizing profits. Historically, that was never the overriding goal of a public utility. When consumers respond to calls for conservation and more efficient usage of energy, instead of being rewarded for their efforts, they are faced with calls for rate hikes because corporate revenues are declining and profit expectations are dampened. Consumers cannot win with this attitude, so it is essential that the Commissioners redirect this misguided corporate behavior to benefit the public, and not a handful of greedy corporate bureaucrats. Please reject this request, in the strongest of terms !!!

Mr. & Mrs. Bernard M. Cygan
