To: APS Request to Decouple
Subject:

Dear Mr. Pierce,

Please vote NO on APS's request to decouple. They clearly state that decoupling is necessary if the Company is to spend more than the current \$60million a year on ENERGY-EFFICIENT PROJECTS WITHOUT CUTTING INTO ITS REVENUE!!! But still, they say people will save money on an across the board monthly payment. Some people will use even more electricity if there is one set payment for all. A pay for what you use method is the only fair way to charge for utilities. That gives people an incentive to use LESS. The company cannot bring more money into its coffers if the people will be paying less for their electricity!!! The EPA must be reined in on this mandate as well as all the others proposed by our President. The states should make decisions based on their particular concerns.

The federal government is out of control!!!

Sincerely,

Harold & Elouise Justice
