Subject: APS Rate Increase Taking Effect in July 2012

Dear Commissioners:

Please find the enclosed 2010 Annual Account Summary for 2010 from APS. According to APS I reduced my electricity use by 8% from 2009 to 2010. Now they want a 7% rate increase in July 2012 on top of the 4 rate increases they have already received in the past couple of years.

If APS would spend as much time running that company more efficiently as they do asking for rate increases we could have a rate reduction.

I voted for the Republicans in the 2008 election that were running for the seats on the Corporation Commission, because they said they would do something about APS' repeated requests for rate increases. Now we'll see if they were serious or if it was all double talk. Please deny this rate increase request. Let their CEO take a pay cut instead. Thank You.
