ORIGINAL

Well I would like to say, I think raising your rates at this time is really a dumb idea. Do you realize that there is a depression? Well I know they are not actually calling it that to make people think everything is OK. But lets face it, It is tuff right now for people to pay their mortgages and all their utilities and food and gas for their vehicles and just to make ends meet. I do not think APS should raise their rates at this time, and I think it is a selfish move on APS's part. I also think that APS does not care about people and their problems as long as they can get more money. I also think if APS is hurting for money then maybe it is time for a change in executives or elected officials. In my opinion elected or not executives make way more money than they are worth in the first place. I am 60 years old and on a fixed income of \$707.00 a month and I am already paying \$213.00 + for electric and I am on one of APS's economy plans. I can not afford to pay anymore. Neither can a lot of other people. So I really think APS needs to rethink their raise increase.

Subject: Aps rate increase

Vote no on the rate increase. They are already charging 307.00 a month year round and that is with our air conditioning set above 80.

Subject: Hearings on Rate Increase for APS

Mr. Newman,

APS says they have cut expenses some and they are owed an increase. We rate and tax payers are out of money. I used to work for a regulated utility. I saw from the inside, there are massive cuts in administrative overhead and management that can always be made. Please do not allow ANY rate increase for APS, particularly for the stated reasons of growing 'renewal energy sources'. These 'renewal energy sources' have not been shown to be efficient and effective for the Arizona energy consumer. These 'renewal energy sources' are feel good 'solutions'. We rate and tax payers are out of money for these nice to do projects.

If you want our support in the next election, you will deny this rate increase.

Subject: APS proposed rate hike

Dear Mr. Newman:

I recently read in the Daily Courier that APS wants to raise our electricity rate nearly 7 percent, and I would like to vehemently oppose such a raise in our rate!

This is not the time for APS to make expensive system improvements to incorporate more smart technology. They have raised their base rates FOUR TIMES since 2006! IT IS THE TIME TO TIGHTEN THEIR BELTS!!!

Like many in Arizona, we are retired and on a fixed income. We received no raise in our Social Security this year, nor do we expect one next year. When we finally do receive a raise, we expect that it will be nowhere near 7%.

We can and must tighten our belts for our discretionary spending, but we cannot afford to support continued increases in necessary public services such as electricity and natural gas.

PLEASE VOTE NO ON THE APS REQUEST FOR ANOTHER RATE HIKE.

Thank you for your time.

Subject: Rate hike

I implore you to reject the request from APS for their proposed 7% rate hike. How can they expect customers to pay an additional 7% when most of APS users are not receiving any cost of living income increases? This is a very shameful request by a corporation that has control over most of Arizona's electricity users. I would like to see additional options for electricity providers to come into Arizona. This happened in Texas around 2004 and the "fat cat" companies like CPL (Central Power & Light) were forced to compete with smaller companies offering much lower and affordable rates to the public.
