DOCKETED

JUL 11 2011

DOCKETED BY

Dear Mr. President and Members of Congress,

6-22-2011

Nuclear energy and its inherent accidents are expensive, wasteful and dangerous beyond anyone's wildest dream! Can you believe the amount of money: beyond billions that it is going to cost Japan and the world to clean up 1 nuclear facility in the world? The ecological cost to the world's oceans is shameful. No price should ever be put on our earth or oceans. They are priceless; as are the earth's residents! The cost to Japan, the United States, and all of our Northern Hemisphere is truly mind staggering: our water, our food, our air, our health, our children's health and future.

For the 1st time ever, I am not voting Democratic, but instead voting for the Earth. I cannot support a president/congress that ignores the very air we breathe, and the radiation clouds (of xenon, iodine and cesium) that waft our way daily from Japan. Please stop living in denial! These issues MUST BE ADDRESSED NOW!!! Mr. President, I thought you were for the environment, and not against it!! It is time to support energy that is affordable. Nuclear energy is way too expensive, with the accidents/cleanup, and the fact that it can't be insured anymore. We, the taxpayers, will pay for most of the cost of accidents/cleanup: billions of our hard-earned dollars. My family would like to remain in the United States, in the Northern Hemisphere, and not have to think about moving for our health. But we need the leaders of this once great country to HEED THE CALL, TO BE GUARDIANS OF THIS FRAIL EARTH!! I put out a challenge to all of you. This is from a person with Democratic roots (and whose family volunteers often at the local Democratic Party Headquarters),.....I will vote for whomever is: not in denial about the earth and nuclear energy, and not afraid to stand up for this wondrous and beautiful planet we inhabit, be they..... REPUBLICANS, DEMOCRATS, LIBERTARIAN, GREEN PARTY or whatever. And I will strongly urge all of my friends to do the same.

I also strongly urge you to cut the \$36 Billion in loan guarantees to the nuclear industry from the proposed budget next year. Also, please instruct the media and G.E./other nuclear power entities to HALT THE MEDIA BLACKOUT IN THE U.S. ON JAPAN/ALL THINGS NUCLEAR!! Just because G.E. (who created the nuclear reactor in Japan and others in the U.S.) has vested interests in/or owns many of the television stations in the United States, doesn't give them the right to shut down free speech in the

United States!! Along with millions of other Americans, I've had to look up websites and research/articles from other countries and alternative media to keep updated. What a travesty of justice and American Free Speech!! What a sad day for our country. And, millions of Americans are finding this out now, just like me. It is a difficult to sweep nuclear under the carpet, in this, the internet era. Mr. President, we need information for our children's health, for our family's health! You understand that, right? I know you do, because you also have a family with children!

Mr. President and Congress, please follow the example of (or better yet, lead alongside) intelligent countries/leaders of the world who have made the pledge, and are phasing out nuclear and deciding to go green! And, by "green", I'm not referring to the kind of green that glows, causes gene mutations, and birth defects, causes neurological diseases and cancer and a myriad of other health problems, (by the way are you providing extra health insurance for all of this, for the citizens of the United States?), by "green" I mean RENEWABLE ENERGY. I did not sign a waiver as an American, giving away my rights to clean air, water, soil and food. Nuclear is unsafe, costly and toxic. Some nuclear plants in the United States have leaked tritium for years, and as is evidenced in Japan, there is no safe way to store spent nuclear fuel/by products. Mr. President, I know, that you must have cringed when you viewed the nuclear accident in Japan unfolding, and probably questioned your stance on nuclear energy. Let me suggest that the questioning was valid, and that you need to listen to the voice of reason inside of you. And, in conclusion, I'd like to say that I believe you are a man of reason.

Sincerely,

Donna Hand-Olson, M.A.
