Hello Jennifer,
Unfortunately I have another commitment and cannot wait for the agenda item to be called, as it is now 2:50 pm.

We certainly have major critiques of the claims of the companies including Reclamation Power's incorrect claim in their July 8th letter that there would not necessarily be dioxin and furan emissions.

The truth is that every garbage incinerator in the world emits dioxins as an accidental byproduct of the combustion process. Reclamation Power's claim that the dioxin would be in the waste and then destroyed is not the real issue - the real issue is that dioxins and furans are created by the incineration of garbage containing chlorine.

Thanks for keeping us informed and I am disappointed that Greenaction will not be able to speak during today's hearing.

Bradley Angel
