Subject: **Pls hand-deliver to Judge Jibilian and post to REST docket**

RECEIVED

AZ CORP COMMISSION
DOCKET CONTROL

Judge Jibilian et al:

Commissioner Newman has asked me to send a very short note on the issues he would like considered in the upcoming REST hearing/workshop/whatever action the Commission decides to take.

Here is a short description of the issues:

- for the Tucson Electric Power (TEP) 2012 REST plan, discuss setting a yearly compliance floor between 2012 and 2016 to avoid a huge dip in installed capacity during that five-year period.
- discuss whether leases should be treated differently from purchased systems
- ongoing discussion of the total costs of SSA or UOG (Utility Owned Generation) solar systems
- the amount of funding for both residential and commercial solar systems
- filing tables and graphs in native format; i.e. including Excel spreadsheet for easier reading and data sorting.
- Cost of RECs v actual kWh produced both in-state and out-of-state
- including information useful to all stakeholders in a spreadsheet, such as TEP's Exhibit 1 in the 2012 REST plan. Information such as dollar amount and % MWh's by rate classification, number and % of customers hitting the rate cap by classification etc. are very helpful and aid in a full vetting.

Thank you for your time and attention to this matter.
