Docket # E-00000C-11-0328

DOCKETED BY

Dear Commissioners,

In regards to APS's plan to replace electric meters with Smart Meters, I am asking that you would allow myself and those of us with hypersensitivity to electronics (and chemical hypersensitivities) to keep our present non communicating meters. We moved to rural Arizona, east of Snowflake, to minimize our symptoms and suffering from the concentration of cell towers, RFI, and other things in cities that we became intolerant of. Since moving here 15yrs ago my health has improved and also my quality of life. It would be a tremendous hardship and impossible cost for some of us to go off the grid with solar power and power line transmission would create problems also. I am willing to mail in or drop off to the Snowflake office monthly readings from my meter. Please allow me and others who need our safe havens to stay safe for us.

Sincerely,

Catherine Sumners

Snowflake, AZ 85937
