Subject: Cox Communication Telephone Rates Increase

ORIGINAL

Cox Communications is proposing to increase many of its maximum rates in its Local Service Tariff on file with Arizona Corporation Commission and is expecting the new rates to become effective on October 1, 2011. They have warned customers that we will be seeing an increase in our bills. Wish I had noticed before. But this week's bill did make the announcement in a separate sheet. I strongly object. I am age 91, but my children and grandchildren also have budget constraints and Cox Communication should be in a position to share in these constraints. This is a time for people and corporations to share in the constraints. I ask the Commission to consider the proposal carefully and consider the impact on many people who are being bombarded with corporate increases.
