Petition to Oppose Sewer Rate Increase in the Verrado Community

| | |
|---------------------------------|--|
| Petition summary and background | Arizona-American filed an application proposing de-consolidated sewer rates for two separate Anthem and Agua Fria Wastewater Districts. Verrado would be located in the new Agua Fria Wastewater District. The application proposes new deconsolidated rates that would change the previous rate increase to an overall increase of 139.7% for the Agua Fria Wastewater District, while lowering the Anthem Wastewater District's rate increase to 15.5%. |
| Action petitioned for | We, the undersigned, are concerned residents of the Verrado community who oppose the deconsolidation which does not make sense for several reasons, including: The Commission's order on January 6, 2011 that Arizona-American develop a consolidation proposal that includes all of its systems in a future rate application. Deconsolidation would cause rate shock to customers in a new Agua Fria Wastewater District and is a backward step if consolidation of systems is ordered in the next rate case. Maintaining consolidated systems at this time will preserve the benefits of consolidated systems, including lower administrative and rate case expenses, improved rate stability, and reduced customer confusion. |

Verrado would be located in the new Agua Fria Wastewater District. The application proposes new deconsolidated rates that would change the previous rate increase to an overall increase of 139.7% for the Agua Fria Wastewater District, while lowering the Anthem Wastewater District's rate increase to 15.5%. |
| Action petitioned for | We, the undersigned, are concerned residents of the Verrado community who oppose the deconsolidation which does not make sense for several reasons, including: The Commission's order on January 6, 2011 that Arizona-American develop a consolidation proposal that includes all of its systems in a future rate application. Deconsolidation would cause rate shock to customers in a new Agua Fria Wastewater District and is a backward step if consolidation of systems is ordered in the next rate case. Maintaining consolidated systems at this time will preserve the benefits of consolidated systems, including lower administrative and rate case expenses, improved rate stability, and reduced customer confusion. |

Petition to Oppose Sewer Rate Increase in the Verrado Community

Petition summary and background
 Arizona-American filed an application proposing de-consolidated sewer rates for two separate Anthem and Agua Fria Wastewater Districts. Verrado would be located in the new Agua Fria Wastewater District. The application proposes new deconsolidated rates that would change the previous rate increase to an overall increase of 139.7% for the Agua Fria Wastewater District, while lowering the Anthem Wastewater District's rate increase to 15.5%.

Action petitioned for
 We, the undersigned, are concerned residents of the Verrado community who oppose the deconsolidation which does not make sense for several reasons, including: The Commission's order on January 6, 2011 that Arizona-American develop a consolidation proposal that includes all of its systems in a future rate application. Deconsolidation would cause rate shock to customers in a new Agua Fria Wastewater District and is a backward step. If consolidation of systems is ordered in the next rate case. Maintaining consolidated systems at this time will preserve the benefits of consolidated systems, including lower administrative and rate case expenses, improved rate stability, and reduced customer confusion.
