Subject: Re: APS rate increase

**Arizona Public Service
E-01345A-11-0224**

It seem to me that each time one of our utilities requests a rate increase, it is a rubber stamped yes. Do we ever question why, or when was the last increase. I have done everything in my home to cut back on energy use. Unplug, turn off and do wash/dishwasher only when full and during off peak hours, use energy saver bulbs, etc. At some point it will be impossible for the average person to pay their utility bills. Maybe these companies, including APS should be better stewards of what they have and maybe they should cut some of their costs just as many other entities are doing. If our education system doesn't have enough in the budget, they cut jobs and cut salaries. Maybe APS should look at doing the same thing. These are hard times for everyone. I encourage you and the powers that be to vote no on this increase. Thank you

Wendy Houston

Oct 15, 2011

Commissioner Gary Pierce
1200 W. Washington St.
Phoenix, AZ 85007

Dear Commissioner Pierce,

As an APS customer and an Arizonan who is very concerned about the costs of energy and energy waste, I strongly urge you to support the adoption of both increased energy efficiency measures and decoupling in the APS rate case.

Our current system isn't working for me or others who are interested in conserving energy and lowering utility bills. We are sending billions of dollars and many jobs out of the state to buy fuel for our energy needs. If we don't fix the problem now, we are setting ourselves up to pay higher energy bills because utilities will buy more fuel from out of state and build more infrastructure, including power plants, which we will ultimately pay for on our utility bills. To make matters worse, the current system financially rewards utilities for selling us more energy than we need. This results in wasteful energy use and the construction of more power plants, which we all have to pay for.

The Commission and the utilities should be helping Arizonans lower energy bills. We can do this through increased energy efficiency and through decoupling, which removes the utility incentive to waste.

As an APS ratepayer, I ask that you support both decoupling and energy conservation in this rate case.

Thank you for your consideration.

Sincerely,

Ms. Viola Najjar
