RE: Arizona Public Service Renewable Energy Implementation Plan E-O1345A-11-0264

Dear Chairman Pierce and Commissioners,

I support strong and consistent investment in solar energy in Arizona, and I am concerned about the potential for undermining this important market in the APS 2012 Renewable Energy Implementation Plan.

The APS 2012 Renewable Energy plan sets the stage for the coming years and will help determine how many solar rooftops we will see on our homes and businesses, how many jobs will be supported by solar industry, and whether or not there will be stability in this important market. This plan should allow us to diversify our energy mix and take advantage of the benefits that solar energy provides to the grid, energy security, and price stability.

I strongly support clean renewable energy such as solar, and I am willing to pay for it, too. Please ensure continued support for this important investment in Arizona's energy future and foster the development of a world-class solar industry in our state. Solar energy installations and manufacturing are critical components to a recovering economy and help attract investment and innovation. This brings new products to the market and lowers the cost of solar energy - creating jobs and making solar more affordable for us all.

Without strong plans that maintain support for residential and commercial solar programs, this market could shrink. That would be devastating for a significant number of solar businesses and would represent a giant step backwards for Arizona.

Six bucks a month is a small price to pay to help our state transition from polluting coal plants to a clean solar future.

Thank you for considering my comments and including them in the docket.

Sincerely,
Mr. Matt Mueller
