Arizona Corporation Commission

I think shutting down the Plant for the navajos is not a good thing because I am looking foreword to my future also for a job. This will impact the younger generation for them to look for a job. My concerns for the people working at APS well lose there job and have no where to go if they shut down the units or APS, and for the people live around Four corners area might have to leave there family to go look for other job due to the shut down of the Power Plant.

Sincerely

Arizona Corporation Commission

To: Whom this may concern

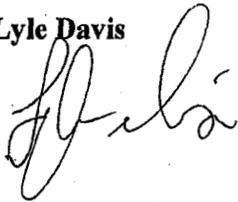

Dear Arizona Corporation Commission,

April 13, 2012

Due to the fact of the shut down of APS power plant, affected me deeply with many concerns about the employees and their families in the local area who depend on this job to pay bills and also put their children through school. Also the affect it will have on the local economy in the Four-Corners area, due to the plant shut down. Also the concern about my future in the company as an employee.

Sincerely

Lyle Davis

Dear Arizona Corporation Commission

If you would shut down aps there will be no jobs for people also any funds to the people. That would affect the whole company and employees, their families and paying their bills. The future of others that would like to work here, but the employees will have to find another company else where. Plus the 4 corners power plant is a great company in the community. Also the future of young workers to work at this company is also being affected by it. My future is in it to be a part of this company.

Sincerely

Dear Arizona Corporation Commission,

I am writing this letter to inform ACC that APS is a good workplace and I really enjoy the safe environment. I am a senior at shiprock high school that plans to go to college and work here at APS part-time because a lot of elders that have retired from here have spoke to me and encourage us to continue working for APS. So if APS is to shut down, my plans for the future of my APS employment will just disappear because I really would like the opportunity to work for this great company.

Cameron Kee

Arizona Coorporation Commission

I think Shutting down APS would be a bad an good idea. My reason for it being bad is because there is a lot of people who come from all around just to work here an fix stuff. The other reason is that it could be good for are environment, the time back then it use to have a lot of moisture here but now that we have power plants that create a lot of pollution that makes our sun send down those killer rays so I think its good an bad other than that we need to work on another way to create energy without hurting our environment.

From: Skylar Begaye

To Whom It May Concern:

Planning on shutting down Arizona Public Service may not be a good thing to do. The working personnel at this site may lose their jobs if that were to happen. When they lose their jobs they may not provide for their family. They may not be able to pay for bills and pay for things they may need in life to survive like food, their house, water, their vehicles, and many more. Also they may not be able to pay for medical bills.

Some of these personnel may have a second job that may not pay as much as their main job, which may be working at APS. If they lose their jobs they may know just one job field or curriculum and it will be hard to find a job then, due to some businesses wanting multitasked workers. Finally, the closing of the power plant may also affect local businesses, companies, and customers that may rely on the power plant to receive what they want or need.

Sincerely ,

From: Nicholas Jones

Subject: Keep the plant open.

Dear: To whom this may concern

Hello my name is Nicholas Jones and I am a trainee here at the Four Corners Power Plant. I've been here for two years now training to be a Maintenance Mechanic. I am Graduating next month in May and was considering a future here at the plant because I gained a lot of knowledge here, and want to continue learning new skills.

If you shut down the plant you would hurt the community of Shiprock, Kirtland, Farmington and all the towns around this area because they continue having the businesses they have because the employees here at the plant buy locally. Also all the employees that work here would have to find different jobs and there aren't too many jobs around here, due to the fact that there are many more people that unemployed here as well.

It is my dream to work out here at the plant because my grandpa use to work here until he past away, I want to make him proud and continue what he use to do. Another reason why I would want to work here is to support my mom and dad and siblings so we can have a good life style.

Sincerely
Nicholas Jones
