NEWMAN PROPOSED AMENDMENT NO. 2

0000132824

TIME/DATE PREPARED: December 12, 2011

COMPANY: Tucson Electric Power Company

AGENDA ITEM NO. 16

DOCKET NO(S). E-01933A-11-0269

OPEN MEETING DATE: December 13-14, 2011

Page 35, line 3, **INSERT** New Finding of Fact:

"The Commission finds that because of the rapid reduction in cost of solar (60% drop in 3 years), the enormous value of solar to Arizona, Arizonans overwhelming support of solar (94% support solar per the 2010 APS/Morrison survey), the rapid changes in electricity generation markets such as the Fukushima nuclear power plant tragedy, the findings by the RW Beck study in January 2009 that the value of distributed solar in Arizona is 7.9 to 14.1 cents/kWh, we agree that we will continue to discuss solar rebates, incentive levels, and solar issues as needed. In times of rapid change, and with the enormous value that solar has for our very sunny state, we believe that it's our duty to explore other funding sources should the REST funds run out ahead of schedule."

Page 37, line 28, **INSERT** New Ordering Paragraph:

"IT IS FURTHER ORDERED that if the funding in various incentive budgets runs out, we will promptly and thoroughly investigate alternative sources of funding for solar."

Male All Conforming Changes.
