Nature of Complaint:

Docket No. E-01933A-11-0269

Customer is upset at the fact that TEP's REST are set up to pass along the cost to all consumers whether or not they are participating in Solar Energy for their own consumption. Customer said that the Commissioners should take this into account before allowing the majority of TEP customers to pay for the equipment and the savings that those who do participate are realizing. These costs should be borne by the customers that with to install Solar and the Solar Equipment companies and providers.

Customer does not believe it is fair that most of TEP customers have to continue to pay for something that does not necessarily benefit them but instead benefits the few that can afford this Solar System in the first place.
