W-03936A-12-0073

Eagletail Water Co., LLC is seeking permission to apply to WIFA and ADEQ for a long term loan and grant.

We have currently applying for a rate increase, ref Docket # W-03936A-11-0418. As we stated in our rate application we are having difficulty paying our bills. We are presently operating with volunteer workers. Our customer base consists of only 56 customers with the average bill being \$44.00 per month.

The well pump is failing and the estimate to repair it is \$65,000. The pump is getting worse daily dropping from a normal flow rate of 400 gal/min to 200 gal/min output. The output is not enough to completely fill our reservoir causing us to run the pump more frequently. This in turn raises our monthly electricity cost. We do not have any funds to repair or replace the well pump and will be forced to shut down when the pump fails completely.

Respectfully,  
Eagletail Water Co., LLC

Re: Information Requested.

Mr. Liu,

Our Company is old, in existence since the 1970's. Leaks occur all the time for one reason or another.

We have approximately 137,280 ft. of main line pipe as old as the company.

We don't have the money for parts or man power to replace anything. Volunteers manage to fix leaks ASAP. Leaks caused by stolen meters ripped out take longer. All this makes our water loss higher. All we can do is be more vigilant checking for leaks.

It would cost approximately \$600,000. to replace all the mains and repair the well, pump, bowls, step and replace pipe in the well.

Sincerely,  
Eagletail Water Co.
