RE: Smart Meter Guidelines

I am disabled due to severe chemical and electromagnetic sensitivities. Because of this, I live on a 40-acre parcel of land in a rural area east of Snowflake, Arizona, in a dwelling that was constructed specifically to minimize exposures to radio frequencies, wi-fi, and electronic emissions, as well as electromagnetic emissions given off by everyday household appliances. The installation of a Smart Meter on this property would create emissions that would negate the care I have taken to avoid exposure to electromagnetic frequencies that are harmful to my health.

As a member of Snowflake's disabled EHS community, I support the establishment of an opt-out program and other measures to protect APS' disabled EHS customers as stated in the three documents filed to Docket #E-00000C-11-0328 by Safer Utilities Network on September 20 and October 31, 2011. I would ask you to please give careful consideration to the measures recommended in these documents during your workshop on Smart Meter guidelines.

Thank you for your time and assistance.
