RE: Docket Number E-01345A-11-0232

AZ CORP COMMISSION
DOCKET CONTROL

Date: March 2012

The following individuals support the APS 2012 Energy Efficiency Implementation Plan and have taken photos with energy efficient products at their homes to encourage your support of existing and new energy efficiency programs.

Arizona Corporation Commission

DOCKETED

MAR 27 2012

DOCKETED BY	<i>mn</i>
-------------	-----------

I like my energy efficient refrigerator because it helps me save on my monthly utilities bill.

Sean Neden
16462 W Dreyfus St.
Surprise, Arizona 85379

Energy efficiency saves money and energy and makes me happy. I did the Energize Phoenix audit and got tons of free upgrades.

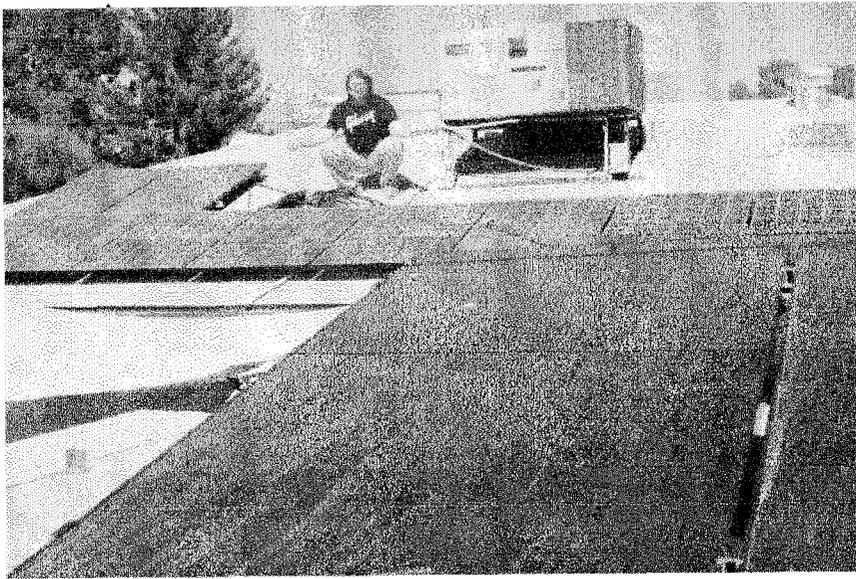

Kate Kunberger
528 W. Lynwood St.
Phoenix, AZ 85003

Sherry Cote - Having a big family means lots of laundry. My efficient washer and dryer help keep costs manageable.

15390 W Old Oak Ln.

Surprise, Arizona 85379

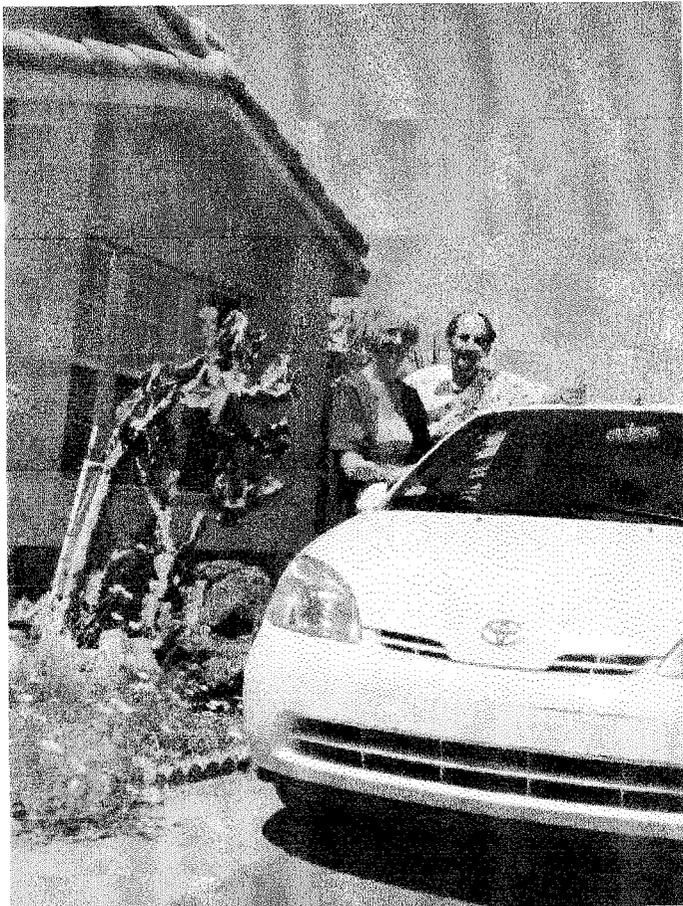

We installed a 21 panel 4.2 Kw system in 2004 to offset peak usage. We began to look for ways to save, starting with CFL bulbs. Later we changed out our refrigerator, our electric stove, our dishwasher, our washer and our dryer going with energy efficient appliances. Our power bills dropped from \$378 per month (annual balanced payment plan) to around \$40 per month with one or two \$120 bills in late summer. We are producing more power than we use five months of the year and providing power for our neighbors. But

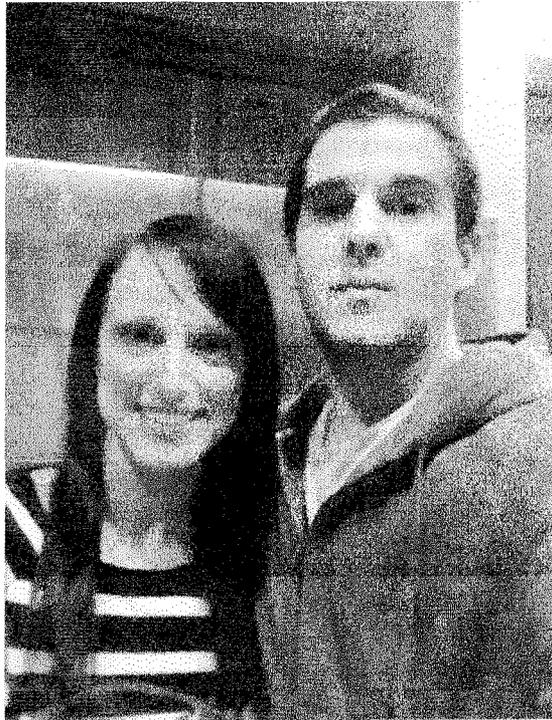

more importantly we are keeping tons (literally tons) of greenhouse gasses from being created by coal burning generating stations. We have now saved more than we spent to have the system installed.

Rick Rose and Carolyn Sechler
921 E Orange Dr.
Phoenix, AZ 85014

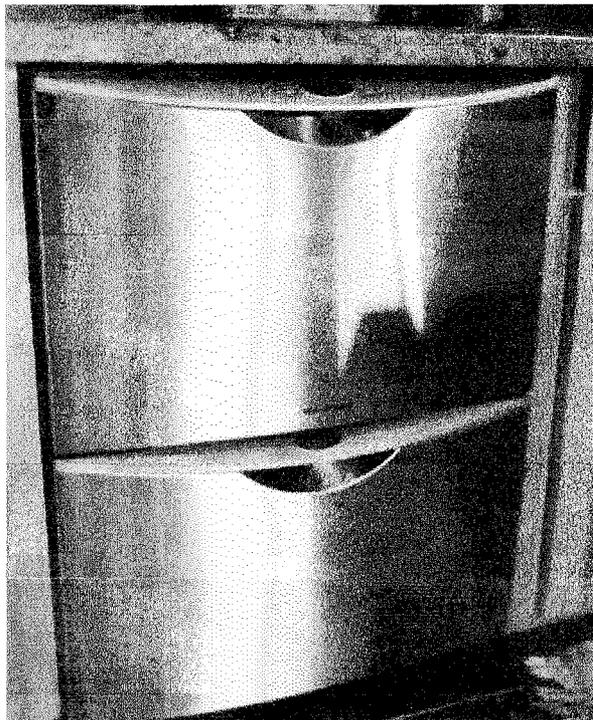

We are Frank Wyse & Barbara Trojan, and we live in Mesa, AZ. We want to pollute less and conserve. By so doing we contribute less to global warming and leave more resources to those who follow.

Frank Wyse & Barbara Trojan
8865 E Baseline Rd # 1501
Mesa, AZ 85209-5309

We are APS customers and we love energy efficiency and our energy efficient refrigerator.

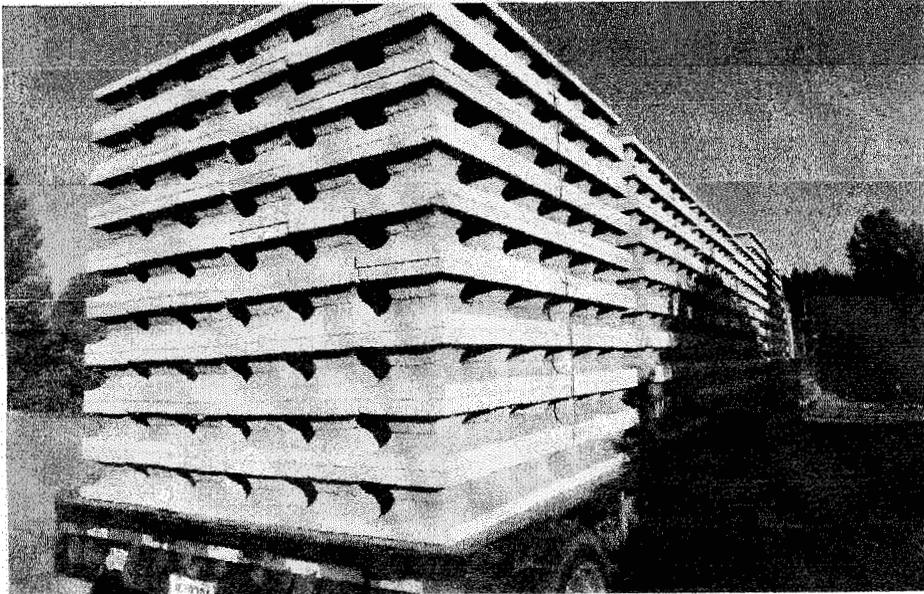

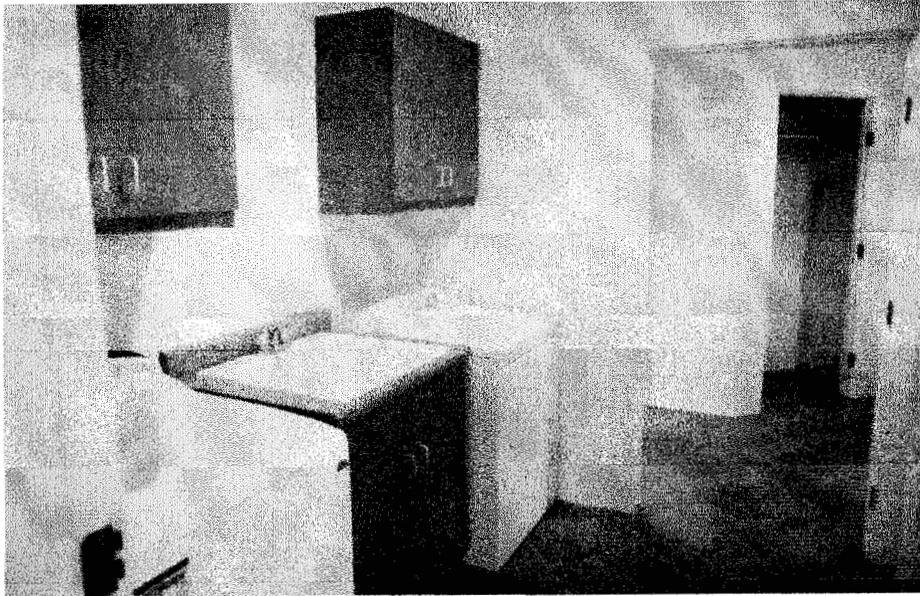

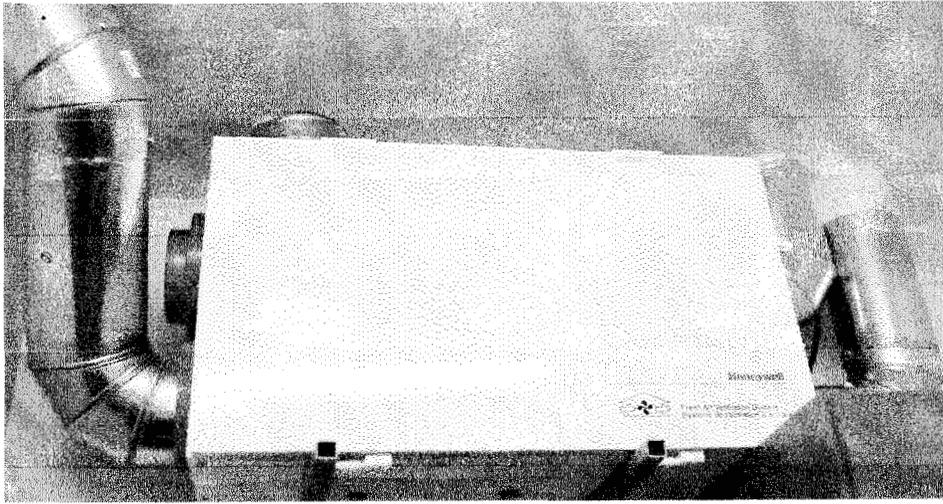

Graig & Jess Guiliani
14884 W. Voltaire st.
Surprise AZ, 85379

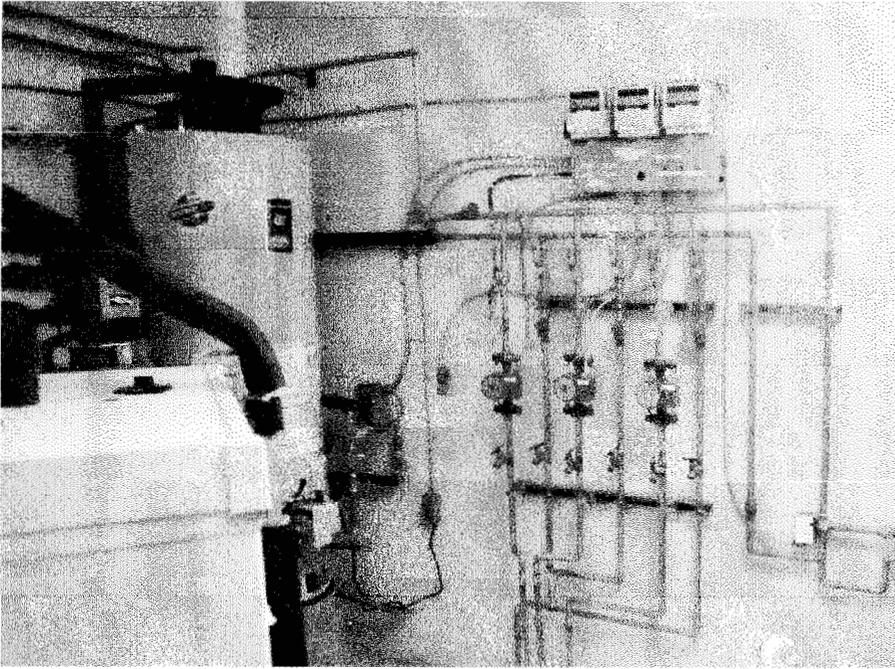

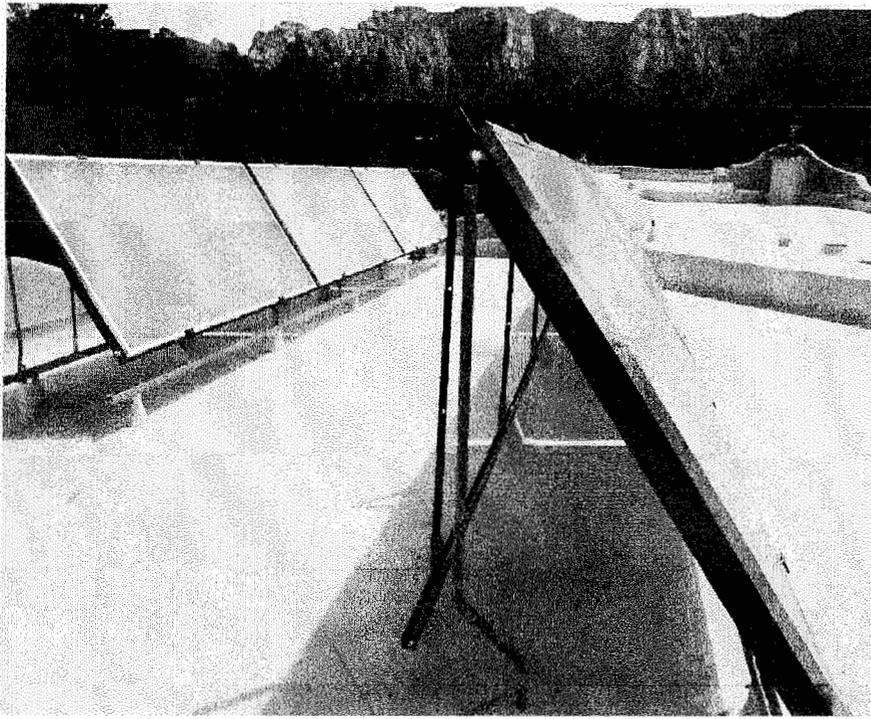

Energy efficiency makes common and economic sense. It reduces our cost of living without hurting our standard of living. For business, energy efficiency improves our profits. In addition, energy efficiency helps the state of Arizona by reducing our dependency on imported, polluting fuel sources.

John Neville

49 Pinon Ct, Sedona AZ 86336

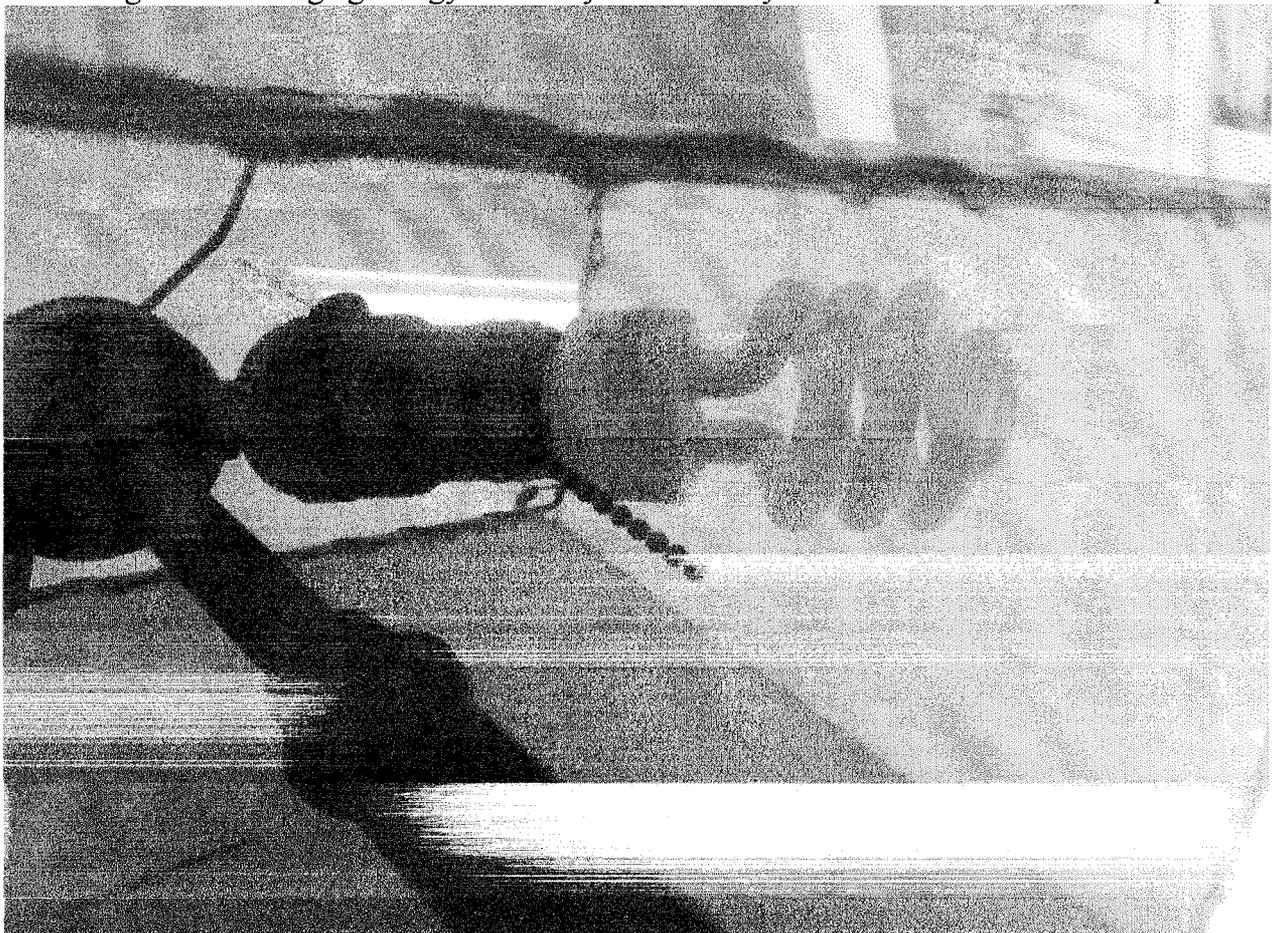

We are off-grid, use energy-efficient 'fridge, w & dryer, watch our water consumption, et all. We do this because we care about the earth, saving energy and being self-sufficient. But! We also encourage others to do everything they can and we have taken advantage of the various tax credits over the years.

Marilyn Markham Petrich, RN
119A Grove Ave.
Prescott, AZ 86301

Stacey Champion
Phoenix, AZ

Promoting and encouraging energy efficiency is a necessity for both our wallets and the planet.

We've always been concerned with appliances being 'energy vampires', more efficient appliances help prevent that.

Diane Williams
15412 W. Alexandria Way
Surprise, Arizona 85379

In this economy, energy efficient appliances help me keep costs low.

Amy Neden
16462 W. Dreyfus Street
Surprise, AZ 85379

Rich Williams - 15412 W Alexandria Way – Surprise, Arizona 85379

I support more energy efficiency programs at APS!
