**Re: Tucson Electric Power Company's Application for Approval of its 2011-2012 Energy Efficiency Implementation Plan, E-01933A-11-0055**

Dear Chairman Pierce and Commissioners,

My name is John Wesley Miller and I am the Chair/Builder/Developer of Energy Efficient Homes in Tucson. My company including my dedicated staff have spent more than thirty-nine (39) years helping Tucson residents and businesses gain control over their energy use and costs by providing and implementing energy efficiency services.

We are extremely proud of the work we have done to help Tucson ratepayers save money. Homeowners constantly tell us how much they value our work because they save money and energy on their utility bills, gain control back from their utility and feel more comfortable in their homes. As former Chair of the Arizona Solar Commission under four (4) different Governor's (Governors Babbit, Mecham, Moffat & Symington), I am pleased with our progress and wish to encourage the continuing of our incentives that have worked so well. We are an example to the rest of the country with Armory Park del Sol being our best example: 1. Most Energy Efficient Neighborhood in the US 2. Most water savings in Southern Arizona 3. Currently has the highest resale price per square foot in the Tucson area inspite of the down housing economy.

I strongly encourage you to resolve as quickly as possible the Tucson Electric Power Company's Demand Side Management Plan matter. The hold on these important customer programs has been really detrimental to Tucson ratepayers. As you can imagine, this is typically the time of year when customers want to do all that they can to cut their energy bills in advance of summer. Unfortunately, we have had to turn tens of customers away and have had to postpone projects that would have delivered significant energy and money savings to a number of residents. Without immediate resolution these missed opportunities will only continue.

Sincerely,

*John*
