ATTACHMENT A

Interim Manager Progress Report Concerning Operation of Golden Corridor Water Company

Operations and Environmental Compliance

Arizona Water Company ("the Company") is currently billing 59 Golden Corridor Water Company ("Golden Corridor") customers pursuant to Golden Corridor's approved tariff. There are currently no formal customer complaints on file with the Arizona Corporation Commission.

No further sampling for nitrate is needed as Golden Corridor customers are served water produced by the Company's Pinal Valley water system.

Water delivered to Golden Corridor is being chlorinated with an average of 0.89 mg/L per month. Chlorination results in better protection against bacteria and protection of public health. The Company takes two chlorine residuals monthly at the same locations as the bacteriological samples. There have been no positive bacteriological tests since chlorination.

The Company filed a Disinfectants and Disinfection By-Product Plan for Stage 1 and Stage 2 with the Arizona Department of Environmental Quality in August 2008. As noted, Golden Corridor's water is being chlorinated and sampling for TTHM/HAA5s began in August 2008. Two samples were taken annually and all of the results have been below the maximum contaminant level, therefore, the Arizona Department of Environmental Quality reduced the monitoring to once every three (3) years. The next sample will be taken in 2012.

Lead and Copper samples were taken in June 2011 and all of the results were below the action level. Lead and Copper samples will be taken again in June 2014.
