Patricia C. Ferre

APS Customer Commentary

Please add this to my testimony given on 3/23/2012 at the ACC Workshop on Meter Guidelines,

Docket # E-00000C-11-0328

Please add this two page document on the estimated Arizona population statistics for Severe EHS entitled:

Arizona: 194,475 to 518,600 Suffer Severe EHS
When Do The Numbers Begin to Matter?

Opinion No. 2012 - 103958

Arizona: 194,475 to 518,600 Suffer Severe EHS

When Do The Numbers Begin to Matter?
Docket # E-00000C-11-0328

ARIZONA 194,475 to 518,600 Suffer Severe EHS

The US Census Bureau estimates 6,482,505 people live in Arizona.¹ This Swedish study slide depicted at a San Francisco Tesla Society presentation, depicts a significant Electro-Hyper-Sensitivity (EHS) population involvement.

How many people are affected by EHS? The Swedish study depicts:
* 3% of the population demonstrates symptoms of severe EHS;
* 35% demonstrates moderate EHS symptoms
* 35-50% seem to be more lightly affected.²

Based on the US Census Bureau figure for July 2011 and the Swedish EHS percentages for severe, moderate and light EHS, the Arizona figures are:

- **194,475 Arizona citizens suffer from severe EHS**
- 2,074,401 Arizona citizens suffer from moderate EHS
- Significantly, the Swedish study would designate that up to half of the population Arizona, (3,241,252 people), would be affected to some degree by EHS.

Dr. Joseph Mercola's research extends the Severe EHS estimates by an **additional 5%**. **"It is estimated that 3-8 percent of populations in developed countries**

¹ US Census Bureau <http://quickfacts.census.gov/qfd/states/04000.html>

² San Francisco Tesla Society, "The Dark Side of 'Smart' Meters, Rob States, M.S. 10/10/2010.

² San Francisco Tesla Society, "The Dark Side of 'Smart' Meters, Rob States, M.S. 10/10/2010. <http://www.youtube.com/watch?v=FLeCTaSG2-U>

experience serious electrohypersensitivity symptoms, while 35 percent experience mild symptoms, according to Dr. Thomas Rau, medical director of the world-renowned Paracelsus Clinic in Switzerland. Dr. Rau also believes that 'electromagnetic loads' lead to cancer, concentration problems, ADD, tinnitus, migraines, insomnia, arrhythmia, Parkinson's and even back pain."³

Refining the Arizona population expected to be experiencing Serious EHS symptoms in the light of the 3% to 8% estimate used by Dr. Thomas Rau and Dr. Joseph Mercola, we can expect anywhere from **194,475 to 518,600 Arizona citizens suffer from Severe EHS.**

Statistics from Sweden and from the Swiss Paracelsus Clinic are appropriate because, most EHS research "has been done in Europe, especially Russia and Sweden."⁴ Although, very little help is available to the EHS patient today, the "exception is in Sweden, which has taken the lead from the very start... Swedish social services now often pay to electrically "sanitize" the homes of people with EHS and even rent out remote homes to the severest cases, who cannot live near populated areas. Four Swedish hospitals now have specially outfitted operating rooms and facilities to accommodate people with EHS. There has also been discussion of creating cell-phone-free zones in public areas, such as sections of the Stockholm subway."⁵ Paracelsus Clinic, Lustmühle, Switzerland "is one of the world's most advanced alternative medicine clinics."⁶ By contrast, relative to EHS and electrosmog, we in the USA live in shameful disregard of humanity and our environment. In Arizona, we do not have EPA NEPA protection and currently, our own "ADEQ doesn't have authority or hasn't been commissioned to review or regulate radio frequency emissions." Yes, we have done research on biological microwave health effects, but about 6,000 US Navy, NASA, NIOSH and FDA documents have not been available for the protection of our people and our environment: see "Zory's Archives"^{7 8}
