RE: Consumer comments supporting Energy Efficiency Programs in Tucson Electric Power's Energy Efficiency Implementation Plan, E-01933A-11-0055

Dear Chairman Pierce and Commissioners,

I am a Tucson Electric Power (TEP) customer who wants you to support the energy efficiency programs and program budgets proposed in the TEP Modified Energy Efficiency Plan.

Being a stock holder and customer, I am disappointed at TEP's request for the same rights given to the Southwest natural gas industry. If one tries to conserve by using less, then one acquires a penalty for not using enough. This also is the practice of propane company- supplier (Ferrell Gas) to include such a phrase in their contract. So where is the advantage here. Naturally, all try to conserve during these times of economic recovery. The route you are taking will only cause more Coal to be fired up, causing more pollution and causing hardships on your customers.

Why not invest in solar and wind energy? This state is perfect for both. Get in on the ground floor, for it will be the future. I am aware of the effort you have put forth on green energy, but it is more for show than a serious attempt at getting the ball rolling and ending Coal's reign of king energy supplier and polluter.

I am willing to invest in energy efficiency on my bill because I understand that energy conservation programs will keep energy costs lower for everyone, reduce pollution and water use, and create jobs in my community. If we don't invest in energy efficiency, we guarantee ourselves higher energy bills in the future as TEP will build unnecessary infrastructure and buy more fuel from and send jobs out of state.

Programs such as home energy audits, weatherization, and Energy Star lighting can make a huge difference on the electric bills for me and other TEP customers.

I do not support allowing TEP to opt out of the Energy Efficiency Standard requirements. It should be promoting the strongest energy efficiency programs possible and seeking a full decoupling program in its next rate case.

I encourage you to protect the interests of today and tomorrow's ratepayers by supporting these important energy efficiency programs.

Thank you for considering my comments.

Sincerely,
Mr. Paul Rodgers

RE: Consumer comments supporting Energy Efficiency Programs in Tucson Electric Power's Energy Efficiency Implementation Plan, E-01933A-11-0055

Dear Chairman Pierce and Commissioners,

As a resident of Tucson, I was hoping to take advantage of TEP's \$100 energy audit to find out how I could improve energy efficiency in my home, cut down on my energy consumption, and save myself a few dollars on my utility bill, and do the right thing for the environment at the same time. Imagine my surprise and disappointment when I called to schedule such an audit only to find out the program had been cancelled as part of a more than 50% cutback in energy efficiency programs.

We should be investing more in energy efficiency at this time, not cutting back. As a ratepayer I would happily pay a few extra dollars a month for programs for energy audits, weatherization, conversion to energy star appliances, and the like. Paying a little more now will help reap a larger benefit and could avoid excess infrastructure costs in the future. It will help our local community's economy now by preserving the jobs associated with energy efficiency monitoring. I'm a retired teacher and have worked for the last six years as a substitute. I have been in too many classrooms where you either freeze or fry. I can guarantee that addressing school building energy inefficiencies is the right thing to do. It will save districts money contribute to better learning outcomes. Our children deserve no less.

To the conservatives on the Commission, let's conserve! Energy is a terrible thing to waste. Live up to your conservative values and empower TEP to maintain the 2011 level of energy efficiency programs.

Thank you for considering my comments.

Sincerely,
Ms. Susan Waites

RE: Consumer comments supporting Energy Efficiency Programs in Tucson Electric Power's Energy Efficiency Implementation Plan, E-01933A-11-0055

Dear Chairman Pierce and Commissioners,

I am a Tucson Electric Power (TEP) customer who wants you to support the energy efficiency programs and program budgets proposed in the TEP Modified Energy Efficiency Plan, because I'm also a person who believes that climate change is happening due to excessive greenhouse gases in the atmosphere and we are running out of time to mitigate the problem.

I am willing to invest in energy efficiency on my bill because I understand that energy conservation programs will keep energy costs lower for everyone, reduce pollution and water use, and create jobs in my community. If we don't invest in energy efficiency, we guarantee ourselves higher energy bills in the future as TEP will build unnecessary infrastructure and buy more fuel from and send jobs out of state. Plus, energy efficiency is the quickest and cheapest way to reduce greenhouse gases, and we need to act quickly to bring CO2 levels down to 350 ppm or less.

Programs such as home energy audits, weatherization, and Energy Star lighting can make a huge difference on the electric bills for me and other TEP customers, while also reducing CO2 emissions.

I do not support allowing TEP to opt out of the Energy Efficiency Standard requirements. It should be promoting the strongest energy efficiency programs possible and seeking a full decoupling program in its next rate case.

I urge you to protect the interests of today and tomorrow's ratepayers and the interests of the global climate by supporting these important energy efficiency programs.

Thank you for considering my comments.

Sincerely,
Ms. Susan Willis

RE: Consumer comments supporting Energy Efficiency Programs in Tucson Electric Power's Energy Efficiency Implementation Plan, E-01933A-11-0055

Dear Chairman Pierce and Commissioners,

I am asking you to support the energy efficiency programs and an increased program budget for TEP in the energy efficiency implementation plan. In 2011 TEP invested \$11 million in energy efficiency programs. For 2012, it will likely only be \$5 million. That means loss of programs and jobs associated with those programs.

I am willing to invest my ratepayer dollars in these programs through my electric bill in an effort to keep costs lower and reduce pollution as well as create jobs in my community now and in the future. This will help avoid excess infrastructure and costs for me and for future TEP customers as well.

Programs such as offering energy audits, weatherization assistance, Energy Star lighting and appliances and others can make a large difference for us and other TEP customers. We are disappointed that current funding does not allow implementation of several new programs that would provide small businesses and schools with additional ways to address building inefficiencies and upgrade facilities. Conservation programs for multi-family housing provide opportunities for those who rent to reduce their electric bills and the appliance recycling program would help to move more efficient appliances into homes, while making sure the old ones are recycled appropriately.

We encourage you (the Commission) to act to protect the interests of today's as well as tomorrow's ratepayers by supporting these very important energy efficiency programs.

Thank you for considering my comments.

Sincerely,
Ms. Sonja Webster

RE: Consumer comments supporting Energy Efficiency Programs in Tucson Electric Power's Energy Efficiency Implementation Plan, E-01933A-11-0055

Dear Chairman Pierce and Commissioners,

I gladly pay extra on my electric bill through the Bright Solutions program, in order to support clean energy. Tucson should be a world leader in solar energy.

Tucson and Arizona have the opportunity to be world leaders in clean energy. Instead I see reports that Germany recently achieved a day of 50% clean energy usage. Why isn't Arizona in the vanguard?

As a Tucson Electric Power (TEP) customer, I am asking you to support the energy efficiency programs and an increased program budget for TEP in the energy efficiency implementation plan. In 2011 TEP invested \$11 million in energy efficiency programs. For 2012, it will likely only be \$5 million. That means loss of programs and jobs associated with those programs.

RE: Consumer comments supporting Energy Efficiency Programs in Tucson Electric Power's Energy Efficiency Implementation Plan, E-01933A-11-0055

Dear Chairman Pierce and Commissioners,

I was watching a German engineer on TV. I cannot remember exactly what channel it was, I think it was NBC or CNN? Anyway, this guy was telling how much sun Germany gets. I was surprised to find out that it was about the same as Alaska. Most German people, culture are willing to use Solar energy. I used to live in Germany during the 1970-1983. There were no solar panels on the roof tops during those years. Now, most German houses have solar panels on their roof tops.

According to my understanding, this German engineer, said, if Arizona, California and Nevada takes advantage of the solar energy that they have, it will be enough for the whole United States of America. After this interview with the German engineer, I started thinking, We have all the Sun and natural resources, why can't we use solar energy? I personally had the experience using solar energy when we lived in Turkey during 2004-2008. Our house was located very close to Mediterranean sea. We had 3 floor house and on the roof, we had 3 panels, those were approximately 60x34 inch each. I remember hiring a guy who does not have anymore than high school education, he installed the panels and we also had the hot water tank on the roof. The whole set up did not go over \$1000.

Wow, if Turks can do it, why can't we do it in here? We can do even better. I am all for the solar energy. Let's think about making it cheaper and and cleaner, and affordable for everyone.

Gulden

Conservation programs for multi-family housing provide opportunities for those who rent to reduce their electric bills and the appliance recycling program would help to move more efficient appliances into homes, while making sure the old ones are recycled appropriately.

We have tried to conserve energy in our home. We have spent a considerable amount of money on solar panels & a solar hot water system, plus a solar heated pool. The TEP assistance has helped. BUT, we are only ONE house.

Arizona simply MUST ensure that the newly proposed programs get implemented (that's where the big savings will be generated).

We encourage you (the Commission) to act to protect the interests of today's as well as tomorrow's ratepayers by supporting these very important energy efficiency programs.

Thank you for considering my comments.

RE: Consumer comments supporting Energy Efficiency Programs in Tucson Electric Power's Energy Efficiency Implementation Plan, E-01933A-11-0055

Dear Chairman Pierce and Commissioners,

My church, Dove of Peace, Tucson, has just decided to go SOLAR, thanks to the help from TEP. I returned from the Netherlands last week, people there are investing a lot in Solar and wind energy, It is ridiculous that a sonny state like AZ does not. We are sooo behind in going to renewable energy while the ice melts, the oceans rise, the storm intensify as the earth warms!

As a Tucson Electric Power (TEP) customer, I am asking you to support the energy efficiency programs and an increased program budget for TEP in the energy efficiency implementation plan. In 2011 TEP invested \$11 million in energy efficiency programs. For 2012, it will likely only be \$5 million. That means loss of programs and jobs associated with those programs

Programs such as home energy audits, weatherization, and Energy Star lighting can make a huge difference on the electric bills for me and other TEP customers.

I do not support allowing TEP to opt out of the Energy Efficiency Standard requirements. It should be promoting the strongest energy efficiency programs possible and seeking a full decoupling program in its next rate case.

I encourage you to protect the interests of today and tomorrow's ratepayers by supporting these important energy efficiency programs.

Thank you for considering my comments.

RE: Consumer comments supporting Energy Efficiency Programs in Tucson Electric Power's Energy Efficiency Implementation Plan, E-01933A-11-0055

Dear Chairman Pierce and Commissioners,

I support the energy efficiency programs and program budgets proposed in the TEP Modified Energy Efficiency Plan.

I am willing to invest in energy efficiency on my bill because I understand that energy conservation programs will keep energy costs lower for everyone, reduce pollution and water use, and create jobs in my community. If we don't invest in energy efficiency, we guarantee ourselves higher energy bills in the future as TEP will build unnecessary infrastructure and buy more fuel from and send jobs out of state.

Programs such as home energy audits, weatherization, and Energy Star lighting can make a huge difference on the electric bills for me and other TEP customers.

I do not support allowing TEP to opt out of the Energy Efficiency Standard requirements. It should be promoting the strongest energy efficiency programs possible and seeking a full decoupling program in its next rate case.

I encourage you to protect the interests of today and tomorrow's ratepayers by supporting these important energy efficiency programs.

Thank you for considering my comments.

RE: Consumer comments supporting Energy Efficiency Programs in Tucson Electric Power's Energy Efficiency Implementation Plan, E-01933A-11-0055

Dear Chairman Pierce and Commissioners,

I support the energy efficiency programs and program budgets proposed in the TEP Modified Energy Efficiency Plan.

I am willing to invest in energy efficiency on my bill because I understand that energy conservation programs will keep energy costs lower for everyone, reduce pollution and water use, and create jobs in my community. If we don't invest in energy efficiency, we guarantee ourselves higher energy bills in the future as TEP will build unnecessary infrastructure and buy more fuel from and send jobs out of state.

Programs such as home energy audits, weatherization, and Energy Star lighting can make a huge difference on the electric bills for me and other TEP customers.

I do not support allowing TEP to opt out of the Energy Efficiency Standard requirements. It should be promoting the strongest energy efficiency programs possible and seeking a full decoupling program in its next rate case.

I encourage you to protect the interests of today and tomorrow's ratepayers by supporting these important energy efficiency programs.

Thank you for considering my comments.

Sincerely,
Mr. Jeffrey Allen

If we don't invest in energy efficiency, we guarantee ourselves higher energy bills in the future as TEP will build unnecessary infrastructure and buy more fuel from and send jobs out of state.

Programs such as home energy audits, weatherization, and Energy Star lighting can make a huge difference on the electric bills for me and other TEP customers.

I do not support allowing TEP to opt out of the Energy Efficiency Standard requirements. It should be promoting the strongest energy efficiency programs possible and seeking a full decoupling program in its next rate case.

I encourage you to protect the interests of today and tomorrow's ratepayers by supporting these important energy efficiency programs.

Thank you for considering my comments.

Sincerely,
Mrs. Ilene Celniker

RE: Consumer comments supporting Energy Efficiency Programs in Tucson Electric Power's Energy Efficiency Implementation Plan, E-01933A-11-0055

Dear Chairman Pierce and Commissioners,

I support the energy efficiency programs and program budgets proposed in the TEP Modified Energy Efficiency Plan.

I am willing to invest in energy efficiency on my bill because I understand that energy conservation programs will keep energy costs lower for everyone, reduce pollution and water use, and create jobs in my community. If we don't invest in energy efficiency, we guarantee ourselves higher energy bills in the future as TEP will build unnecessary infrastructure and buy more fuel from and send jobs out of state.

Programs such as home energy audits, weatherization, and Energy Star lighting can make a huge difference on the electric bills for me and other TEP customers.

I do not support allowing TEP to opt out of the Energy Efficiency Standard requirements. It should be promoting the strongest energy efficiency programs possible and seeking a full decoupling program in its next rate case.

I encourage you to protect the interests of today and tomorrow's ratepayers by supporting these important energy efficiency programs.

Thank you for considering my comments.

RE: Consumer comments supporting Energy Efficiency Programs in Tucson Electric Power's Energy Efficiency Implementation Plan, E-01933A-11-0055

Dear Chairman Pierce and Commissioners,

I am asking you to support the energy efficiency programs and an increased program budget for TEP in the energy efficiency implementation plan. In 2011 TEP invested \$11 million in energy efficiency programs. For 2012, it will likely only be \$5 million. That means loss of programs and jobs associated with those programs.

I am willing to invest my ratepayer dollars in these programs through my electric bill in an effort to keep costs lower and reduce pollution as well as create jobs in my community now and in the future. This will help avoid excess infrastructure and costs for me and for future TEP customers as well.

Programs such as offering energy audits, weatherization assistance, Energy Star lighting and appliances and others can make a large difference for us and other TEP customers. We are disappointed that current funding does not allow implementation of several new programs that would provide small businesses and schools with additional ways to address building inefficiencies and upgrade facilities.

Conservation programs for multi-family housing provide opportunities for those who rent to reduce their electric bills and the appliance recycling program would help to move more efficient appliances into homes, while making sure the old ones are recycled appropriately.

We encourage you (the Commission) to act to protect the interests of today's as well as tomorrow's ratepayers by supporting these very important energy efficiency programs.

Thank you for considering my comments.

Sincerely,
Mr. Jim Lawrence

Conservation programs for multi-family housing provide opportunities for those who rent to reduce their electric bills and the appliance recycling program would help to move more efficient appliances into homes, while making sure the old ones are recycled appropriately.

We encourage you (the Commission) to act to protect the interests of today's as well as tomorrow's ratepayers by supporting these very important energy efficiency programs.

Thank you for considering my comments.

Sincerely,
Mr. Tom Wenzel

RE: Consumer comments supporting Energy Efficiency Programs in Tucson Electric Power's Energy Efficiency Implementation Plan, E-01933A-11-0055

Dear Chairman Pierce and Commissioners,

I am asking you to support the energy efficiency programs and an increased program budget for TEP in the energy efficiency implementation plan. In 2011 TEP invested \$11 million in energy efficiency programs. For 2012, it will likely only be \$5 million. That means loss of programs and jobs associated with those programs.

I am willing to invest my ratepayer dollars in these programs through my electric bill in an effort to keep costs lower and reduce pollution as well as create jobs in my community now and in the future. This will help avoid excess infrastructure and costs for me and for future TEP customers as well.

Programs such as offering energy audits, weatherization assistance, Energy Star lighting and appliances and others can make a large difference for us and other TEP customers. We are disappointed that current funding does not allow implementation of several new programs that would provide small businesses and schools with additional ways to address building inefficiencies and upgrade facilities. Conservation programs for multi-family housing provide opportunities for those who rent to reduce their electric bills and the appliance recycling program would help to move more efficient appliances into homes, while making sure the old ones are recycled appropriately.

We encourage you (the Commission) to act to protect the interests of today's as well as tomorrow's ratepayers by supporting these very important energy efficiency programs.

Thank you for considering my comments.

Sincerely,
Mr. J Costion
