It shall be the obligation of the subscriber to notify the Carrier of any interruption in service. Before giving such notice, the subscriber shall ascertain that the trouble is not being caused by any action or omission of the subscriber or is not in subscriber provided wiring or equipment connected to the terminal of the Carrier.

When services are interrupted, credit is allowed on demand to the Carrier, computed as set forth below, provided such interruption is not shown by the Carrier to have been caused by the negligence or willful action of the subscriber, or any other persons at a subscriber terminal location, or is not caused by the failure of the subscriber's equipment or power supply.

Credit is computed by multiplying the monthly rate for the service by the ratio that the number of hours in the period of interruption bears to 720 hours. For the purpose of this computation, each month shall be considered to have 720 hours. The credit will be based on the non-usage charges for the month during which the interruption occurred. For all services (except PRIVATE LINE), an interruption is measured from the time the Carrier detects trouble, or the subscriber notifies the Carrier of the interruption by an expeditious means, until the trouble is cleared. For PRIVATE LINE Service, an interruption is measured from the time the subscriber releases the circuit to Sprint for fault isolation and testing until the circuit is returned to the subscriber. Each interruption is considered separately for purposes of establishing credit allowance. Interruptions shall be accumulated to the nearest half-hour period (or for MONTHLY LINE Service, to the nearest tenth of an hour).
